2. I had mixed comments on some sellers listed. A few are well respected by all. I would suggest when buying from someone new to order a minimum amount. You can then use your own judgement on speed, quality, reliability, and exchange policy: Mar Bren (Howard Brenner); Great Radio Shows (George Fowler); McCoy's Recordings (Pat McCoy); Golden Age of Radio (Rex Bills); Barry Brooks; AM Treasures (Gary Dudash); John Furman; John Olsen Jr; Airwaves (Jerry Chapman); Radio Reruns (Larry Kiner); Virgo House; Len Lawson (rentals); Echoes of the Past (Ron Barnett); Phil Cole; Old Radio Warehouse (Joe Webb); Radio Vault; Bill Hagewood; BRC (Bob Burnham); Dick Ayres; Good Tyme Radio Co; Majestic Reruns (Evan MacBride); Sound Tapes of the Past (Bob Joseph); Audio Antiques (Larry Rao); Stu Weiss; Carl Froelich

4. Most people who responded use more than one brand of tape. When trading know the brand each is using. When buying know the brand the seller uses. People have had good and bad luck with many brands of tape. Use what you find works best for you: Scotch (12); Ampex (9); Capital (8); DA<sup>A</sup> (7); Shamrock (7); Realistic (4); Saxitone (3); Wolfman Jack (2); BASF (2); The rest were just mentioned once: Irish; Concert; Tracs; Omega; TDK; Audiotape; Supertape.

Many thanks to you who responded.

**MAILING WANTS:** Keeping track of wants you send out is another tedious job, but record keeping is essential if you don't want to duplicate orders. I jot down programs ordered in another notebook alphabetically by first letter with initials of person I'm ordering it from. I check it in the person's catalog. For programs with many titles (SUSPENSE, JACK BENNY, etc.) that I will order a lot of I note them on large sheets of paper with much space allotted for each program. Even so I still duplicate programs once in a while, especially if title or description is different in the catalog. When sending wants it's good to put number, title, and reel number if it is listed. The time of the show is also helpful.

**RECEIVING THE TAPE:** Cross off programs on your list and in catalog of person from whom you are receiving the tape. I add information to the card if necessary at that point so I don't have to refer to the list again when I make my supplements.

**MAILING TAPE:** My first mailings were pretty insecure as I found out. Tape boxes can be used over and over again and I'm sure you all accumulate a supply. I attach each tape end to the reel so when you receive it the tape isn't all over the box. Scotch tape the box so it doesn't open and put your name on the outside of the box so if the container breaks there is still some record as to where to send it. Make sure stamps, mailing address, return address, 4th-class marking is on the mailing package. Buying a stamp with your name and address can save a lot of time. I keep another notebook with the names of all my trading friends in alphabetical order by first letter only, address, and a record of all wants and tapes received and sent and the dates. This helps in case a tape gets lost and you have to tell the postman in tracing it when you sent it. Make sure you use strong packaging tape to secure package.

**MAKING A CATALOG:** Partly because of the variety of catalogs being circulated and partly because of the requests of some of my readers, what follows is my idea of what should be included in a catalog and how. This should be of special interest to new collectors but many experienced collectors might gain some new information.

1. Use 8½ by 11 paper. If printed on smaller paper try to have it open to 8½ by 11 so it can fit into a looseleaf notebook.
2. Listing the programs in alphabetical order is easier for the reader to find what he wants. Some traders prefer trading by the reel and list that way. When receiving programs write them down in a notebook alphabetically by first letter with essential information. When making a list or supplement you can use this alphabetical reference list and therefore keep you catalog in alphabetical order. If you list by reel and indicate tracks use the following: 1-1, 2-4, 1-3, 2-2. This is read side 1-track 1, side 2-track 4, side 1-track 3, side 2-track 2. Some suggest, if listing by reel, putting down the sender of the reel so quality can be further judged if source is known.
3. If you know some programs are from disc or very few generations, list them separately or indicate them in some way (by an asterick is a good way). Have an introductory sheet explaining how to order, mechanics of trading, how to read unusual aspects of your catalog, ratings, tape you use, etc.

More on making a catalog next month. Please comment on these articles.

# remember radio?

Remember when the entire family would gather around the Atwater-Kent to share the side-splitting antics of Jack Benny, Amos & Andy and Fred Allen? Or the heart-stopping suspense of "Escape" or "Lights Out"? Or the breath-taking tales of "The Shadow" or "Inner Sanctum"?

Yes, radio was the true source of entertainment during the 1930s and 1940s, providing a full realm of mystery, comedy, drama and news--and thus became the center of a looked-to-evening ritual shared by families gathered round that magical sound chamber.

Now, from the vast and historic library of sound at Mar-Bren Sound Ltd., these wonderful radio memories live again! Even if you recall the names but not hearing an actual broadcast, we know you'll be delighted with these cassettes of radio favorites! Most include the original commercials, and the sound quality on many is as good as that of modern radio broadcasts!
