FEATURE ARTICLE: This letter was written to a Mr. Ralph Conner on May 13, 1949 from Horton Heath, director of information of NBC...

NBC CHIMES: This idea was conceived in 1926. The chimes were purchased from the Lesch Silver Company. Early in 1927, chimes were used as station breaks for the first time. Previous to this time the announcer at conclusion of programs would read the call letters of all the stations carrying the program; This is station WEAF, WRC, WNAC and so forth. When the network became larger, this process was abandoned and the chimes substituted for cue for local stations to give their own letters.

In the beginning there were seven notes in the chimes, then in the middle of 1927, three notes were dropped and only four chimes

used G C G E. This program continued until approximately 1930 when another note was dropped and the famous G E notes became identified with NBC. On September 17th, 1932 at 10:00 AM, the famous NBC chimes (G E C) were electrified and have been used in this fashion ever since.
