

HELLO  
AGAIN!

A PERSONAL MESSAGE: Hope everyone is enjoying their summer. Mail is scarcer. That, plus less time for me this month may lead to a shorter issue than normal...Except for one letter with mixed feelings, all letters received remarked favorably about the 2 editorials on SA3E and trading risks. Just one more comment: Before mentioning anyone, I write to them hoping to resolve difficulties. Only when I get no response and difficulties persist do I mention names...THE SECOND EAST COAST OLD RADIO CONVENTION is a reality. Details will follow.

TITLES: When a dramatic program such as GUNSMOKE, LONE RANGER, soap operas, etc. and some comedies like Jack Benny, FIBBER MCGEE have no titles given in the program--please give a meaningful one. Dates, of course, will help. I have seen home-given titles of some INNER SANCTUM, GUNSMOKE, etc. that are very vague and meaningless...In your description please list names of people in the story. Names plus opening 5 minutes of action should be sufficient. A complete description is ideal but again names of characters and places must be mentioned...Example:  
GUNSMOKE: Groat kills son, Buzz, after locking Matt and Chester in shed...This is brief, but to the point. If you are describing the opening segment put (op) in front of description. DON'T make up your own titles..Describe the show with names and places.

PUBLICATIONS AND ACTIVITIES: The second East Coast Convention of Oldtime Radio will be held on October 28-29 at the Howard Johnson Motor Lodge in New Britain, Conn. Tentative cost will be \$10.00 if you attend the dinner and \$2.00 for dayvisitors. Tentative guests include Raymond Edward Johnson, William Spier, Richard Dana AND Charles Michelson. Registration forms will be sent shortly. All questions and suggestions should be sent to Bob or Carol Witte, 194 Wyndcliff Rd, Scarsdale, NY 10583 (914) 725-5978 or Sal Trapani, 5 Jupiter Dr, Seymour, Conn 06483 (203) 888-2747. Contact Sal if you have any information about William Spier or Raymond Edward Johnson that might be included in a booklet. Also let Sal know if you know of other personalities that might like to come. Try to hold October 28th or 29th or both open. The dinner will be the evening of the 28th...Don Maris said that the convention at Oklahoma City was a great success with 900 attending from 33 states. There were 153 dealer tables, a record for any convention of this sort. Chester Lauck and Norris Goff were well received. Some collectors present were George Fowler, George Jennings, Jim Plythe, Roy Brink...Chris Sterling, who edited the history of radio-TV series for Arno Press is making a detailed listing of all boy's dime novels having any major content dealing with radio, wireless, telegraph, or television. Anyone with data on above please write Chris, Assist. Prof of Communications, Temple Univ, Philadelphia, Penn 19122...Dave Howe, Box 559 NSGA, Winter Harbor, Maine 04693 has a stack of old Sportsman mags. from the first part of the 1900's. Write if interested in them...Ken Neal mentions the new book: Days of Thrill and Adventure, by Alan Barbour; Collier Books; 167 pages with 200 photos; paperback; \$3.95. It gives a broad coverage of movie serials from the Perils of Pauline through 1956...Bob Joseph writes that refunds for Stay Tuned are through the P&S as of end of July...Barbara Schwarz, 7232 N Keystone Ave, Lincolnwood, Ill 60646 is secretary of a small informal group called "Friends of Viv and Sade." The purpose is to keep in touch with each other and inform each other of new shows available. Write Barbara if interested.

LOGS AND LISTINGS: Fred Dickey (new address), Box 1466, Sequim, Wash 98382 has several logs for sale. Having read them I definitely recommend them. Details follow:

\$3.50 is due for another YEAR IF THE BOX IS CHECKED

FRED ALLEN: 10/4/39 - 6/26/49; This log lists guests for all shows during this period where known. Cort Parent gave needed advice for this log. COST: \$1.00

SCREEN GUILD THEATER (Gulf-then Lady Esther); complete; 9/24/39-5/31/51. The show started 1/8/39 but the log starts in September. All shows with cast/guests listed. COST \$1.00

THEATER GUILD ON THE AIR: 9/9/45 (first show)-9/9/51; Fred's log stops at this point. The show continued to 1953. This and the next log are \$1.00 together.

HALLMARK PLAYHOUSE: 6/10/48 (first)-9/6/51; Again Fred's log stops. The show continued to 1953.

IF ALL FOUR LOGS ARE PURCHASED THE TOTAL COST IS \$2.50. Again, these logs are available from Fred Dickey.

Besides obvious reasons, logs are very useful for finding dates for other shows. I was able to date a new Jack Benny show 3/6/49 because of reference to a Ford Theater show he was on that week. Using that log I was able to date the show.

YOU AND THE LAW: From "Popular Mechanics" June, 1972. Excerpt from "Legal Booby Traps in Tape Recording" by Marshall Lincoln...

Recording from a Receiver: You can record anything you wish from a radio or TV receiver tuned to any frequency in the spectrum without first having to obtain permission from anyone. However, the nature of the transmission taped determines how you may use your recordings. Any radio or TV public information or entertainment broadcast is public domain and can be recorded and played back for anyone who wishes to hear it. But if you record from a commercial channel such as police fire, mobile telephone, etc. you are forbidden under FCC's "Secrecy of Communications" regulation.

PERSONALITIES: Hal Peary sends following about Cecil and Sally: Johnny Patrick who played Cecil and wrote the show in the early 30's in San Francisco is the same John Patrick, playwright and author, "Hasty Heart," "Tea House of the August Moon."...Helen Troy, who later did a character on some big radio shows called "Susie at the Switchboard" was Sally. She has passed away.

MORE ON Gene and Glenn from Ken Morris: I remember hearing several programs as a child in Detroit in the mid 30's. They were called "The Quaker Early Birds" then and were sponsored by Quaker Oats. I grew up with a spoon gotten as a premium with their double profile on the handle

MAILING: Rev. Frank Gilmore has lost 14 reels of tape this summer so far, all through the St. Louis or Chicago post offices. Anyone else with losses this bad? While insuring may get you some money back would special handling be more practice if you are going to do one or the other. This will speed up delivery and probably cut down losses. Make sure that your name and address is on the tape box before you wrap it and also on the program card. If the outer wrapping gets separated at least the tape might be salvaged and returned to you.

LET THE BUYER BEWARE: Tom Cole, Nostalgia in Miami, Jim Harmon (very slow), Richard Casciello, Wil Dufour, Jack Warden (several people have remarked that he has dropped out of sight within the last few months), Dwight Lindley (mixed reports, latest address is Box 716, Lancaster, SC 29728. moves a lot), Owens Pomeroy, Atwell Berry (2 complaints), Several collectors have not received tapes from Luther Seis again. Is he trading again.

COLLECTORS LIST: The first supplement is off the press with 30 more traders and many corrections. Original list is still \$1.00. Just send SASE for the supplement if you have the first list. If you still aren't on it send name, address, age, job, number of shows, and shows particularly interested in.

REFLECTIONS ON SUSPENSE by William N Robson from Detroit News; 12/14/58; contributed by Pat Murray

Remembering recently about Radio's SUSPENSE, William N. Robson, who produced 109 and directed 110 presentations, said his choice for the most frightening broadcast was "Three Skeleton Key" which he described as an unforgettable experience and a story about rats. It was presented 5 times with Vincent Price in 3 of them. (I only know of 2 broadcasts). In the most suspenseful category he chose "Sorry Wrong Number" presented 7 times starring Agnes Moorehead (I know of 8) and "Zero Hour" in which the children of the world eliminate all the adults and take over...The program which brought in the largest listener mail was "Voice of Company H" a comparatively gentle account of an effort to carry out the Biblical injunction to bring peace and goodwill to all people (I know of no available copies). "Headshrinker," a story about psychiatry, also brought in much listener mail.

REMARKS ABOUT "THE CINNAMON BEAR" by John Getto, 134 W 88th St, New York City, NY 10024...At least 3 catalogs I know of list this as a children's classic. It is my business to know children's classics and near approximations and I would like to warn the unwary--this is neither. It is a quite inferior piece of garbage, aired obviously at adults who have forgotten what really pleases children. The show totally lacks suspense, wit or invention. Dialog is banal and anyone who hopes to delight his kids with this show is in for a disappointment. Just wanted to redress the balance. Incidentally, the show is clearly an attempt to rip off "Wizard of Oz" but its creators lack the imagination to be good thieves...(Opposing viewpoints welcome with the best one printed-ed)

POINT: It has come to my attention that this newsletter gets in the hands of individuals who aren't friends to collectors of radio programs. I certainly hope my subscribers use some common sense in this. If anyone reads my newsletter each month I hope it is by subscription or is a good friend and fellow enthusiast...

For this month's column I have picked noise reduction.

There are many traders who have asked questions about the new DOLBY units. I will try to be as brief as possible, and let me say that any so called noise reduction unit will not actually take noise out of any tape. The DOLBY, CONCORD, TEAC, and other units that are available simply make it possible to tape something and have the resulting tape sound as pure and clean as the program material that was fed into the tape recorder.

To help understand this, please bear in mind that normally when you make a tape, you always add some noise (referred to as tape hiss) to the program content. This is true no matter what speed you record at, although the higher the speed the less noise you add.

Something to be particularly aware of is that any tape that is recorded through the use of a noise reduction unit MUST be played back through such a unit. If it is not, the resulting sound will be quite unpleasant to the ear.

There are several units available which can actually take noise out of a tape when making copies (dubbing). These units are called Frequency Equalizers. One of the most popular of these is made by a company called METROTEC. This unit, if properly used, can result in the partial and sometimes complete removal of such objectionable sounds as hum and tape hiss.

The unit is inserted in the line between the play-back and recording decks and has five (5) slide controls which are used to increase or decrease the level of various audio frequencies. Not only does this unit really work, but it is only needed during the dubbing process and not during play-back. It is for this reason that a frequency equalizer is so great. You really do remove noises from the tape, and the removal is of the undesired noises from the tape itself is permanent and any machine can be used for play-back without special equipment. I must clarify this point somewhat, however. In order to use a frequency equalizer properly, you must make a new copy of the tape. It is this copy which will have the undesired noises removed. The undesired noises will still be on the original copy.

The unit sells for \$99.95 and it is fair-traded. If you have trouble getting one or cannot get one at a discount, I can get one for you for \$85 including postage and insurance.

If you are short of money, you can charge it on your Master Charge. Write for Details!

Incidentally, there are other frequency equalizers besides the METROTEC but as far as I know, they all cost considerably more.

That is it for this month. Next month I will talk about taping direct from your radio or tuner and how to get the best results.

Contact me, Don Pellow, or Roy Bright if you have a copy...

THE GREEN HORNET: excerpts from The Hartford Courant; 8/10/72; contributed by Ed Drumm Jr... Evil in radioland never had a chance with the Green Hornet. Saboteurs, thieves and killers were child's play to him and his manservant, Kato. So says A. Donovan Faust who played the star for a while when Al Hodge went into the navy in 1943. Faust is now vice president and general manager for operations of stations operated by the General Electric broadcasting Co. Says Faust: The audience then had no visual reference as it does today. Sound was everything. If the script called for the Hornet to be running then I had to jog while I read my lines. If the Hornet was in a fight, I held the script in one hand, punching and slugging with the other.

It's now Aug 12th and that's it for this month-a little shorter but I hope just as informative. Keep sending your catalogs and supplements, let me know of new programs, send articles, let me know about yourself, spread the word, feel free to reprint what you read-but give the newsletter credit, mention Hello Again when writing to someone mentioned in it. Have a safe Labor Day. Sooooo

HANG BY YOUR THUMBS, WRITE IF YOU GET WORK, SEND A TAPE TO A FRIEND.
