OUR SYSTEM FOR EVALUATING QUALITY IS AS FOLLOWS

E=EXCELLENT - Equal to or better than the original Broadcast quality. NO AUDIBLE DEFECTS

VG=VERY GOOD - May contain slight audio defect which does not affect the listenability.

G=GOOD - Quite listenable, though noticeable defects are present.

F=FAIR - Sound is definitely impaired, but understandable.

P=POOR - May be difficult or even impossible to understand. Recommended only to enthusiastic collectors.

PLEASE NOTE: Our standards are unusually critical. Others who employ a similar scale to the above have a tendency to exaggerate the quality of their programs. Shows in our catalog rated G or better should satisfy most discriminating listeners. Composite ratings (e.g. VG/G) indicate an audio compromise between the two ratings.

He was well-known for several catch-phrases such as "Everybody wants ta get inta da act!" and "It's da condishuns dat prevail!"
