Your **FORMULA** for '42

FM EQUIPMENT, and

General Electric offers transmitters from 250 to 50,000 watts. Frequency stability, low noise level, audio fidelity, complete accessibility without disassembly—all contribute to long, dependable operation at low cost.

Class _____
Book _____

COPYRIGHT DEPOSIT

FM station monitoring with this multi-purpose unit. It provides: direct reading of center-frequency deviation (with or without modulation); direct reading of modulation percentage; instant calibration against a precision crystal standard; adjustable modulation-limit flasher; high fidelity output for audio monitor.

General Electric's 25-watt FM transmitter for S-T service in the 330-344 mc band (Type GF-8-A)—the best known method of transmitting your programs from studio to main transmitter without the loss of their original brilliance. Frequency swing ± 75 kc for 100% modulation, meets F.C.C. requirements.

New multi-bay antenna specially designed for FM broadcasting, are being developed by General Electric. Let us discuss your individual requirements for either broadcast or S-T service.

PROVED AT OUR STATION FOR USE AT YOU

TRANSMITTING TUBES

YOUR broadcasting needs for '42 have been anticipated by General Electric.

You'll find that our recent contributions to FM's progress have removed many of the hurdles from your path to FM. There is no finer, nor more complete, line of FM equipment available today. Our complete service extends from equipping your station to helping you build an FM audience.

From our complete line of transmitting tubes—pace-setters for more than 29 years—you'll find the right tubes to meet your requirements in standard broadcasting, international service, frequency-modulation, or television.

Free!

How to Plan an FM Station
Hints on Operating FM Transmitters
How to Make Measurements in FM Transmitters
50,000 Watts of FM
How W47A Did It / An FM Success Story
Five valuable guides to help you in the FM field. Get them from your G-E representative, or write General Electric, Section 160-19, Schenectady, N. Y.

When you sign your next tube order specify General Electric tubes—proved in the laboratory, checked at our own broadcast stations, and verified by a long list of satisfied users throughout the radio industry. Ask our nearby representative for your copy of Bulletin GEA-3315C.

SESAC IS ON TOP

because -

SESAC GIVES Over 830 licensed radio stations -

Diversified American Music for every type of program every hour of the day - 200 different types of music - 128 publishers.

SESAC GIVES Advertising Agencies -

Freedom from "clearance" headaches. (Practically all stations and networks are licensed to use SESAC music on live talent - recorded - and transcribed shows.)

(Your client will also like the 2¢ recording fee)

SESAC GIVES Transcription Companies -

An unlimited storehouse of music - complete cooperation and the 2¢ recording fee on commercial and library transcriptions.

SESAC GIVES The Broadcasting Industry -

A firm pledge to continue - its 10 year policy of close cooperation with broadcasters - to maintain and insure an unlimited supply of good music - reasonable rates - effective competition - the only station relations staff in the field with actual broadcasting experience,

CLAUDE C. J. CULMER

EMILE J. GOUGH

Is Your News Diet Balanced?

IN THIS MOST CRUCIAL of all years, you can't escape the public demand for news . . . *more news* . . . and *fresher news*.

But what a programming problem it is! What a job to keep most of your news periods from sounding repetitious, stale, deadly dull . . . the same dish merely "warmed over."

In each 24 hours, there's only so much news—but many news periods. Successful programming therefore demands a supply of ready-prepared copy that has variety, spontaneity, sparkle!

That's next to impossible when all the copy comes from a *single source* . . . when the *same* writers rehash it all day long for both you and your competitor.

Just as leading newspapers rely on more than one news service to get better balance, variety and readability, so are many leading stations with heavy news schedules supplementing their present wire service with Transradio.

There's no re-processing to take the "vitamins" out of Transradio copy. Alone among the wire services Transradio prepares its copy *directly* for the mike . . . concentrates on material that has *listenability* rather than mere readability.

For a better-balanced news diet on your station, ask about Transradio's *new rates* today.

Here's a
 "million dollar" reason
 for using KPO
 throughout 1942

And the "million dollar reason" is KPO's new million dollar home. Hundreds of advertisers—both local and national—are going to profit more than ever because of the INCREASED SELLING POWER KPO will deliver in 1942, and years to come. For KPO's new home is much more than a new building to house new studios and technical facilities . . . it will be the center of San Francisco's ever-increasing interest and responsiveness to the type of "big-time" radio which NBC brings the public regularly.

1. Thousands toured the unfinished building. Hundreds of thousands more have listened to and watched "building broadcasts" . . . seen building pictures in newsreels, magazines, and newspapers. Smart advertisers are getting on KPO now . . . to "ride in" on this great barrage of publicity . . . to become a part of the great show which will open the new building in March.

3. NBC leads in the development of San Francisco radio talent. Weekly auditions are held. Promising new talent is put on the air to develop seasoned, salable personalities, and salable shows. Local advertisers are aware of the sales pulling power of this local talent. Nineteen local advertisers are currently using live talent shows on KPO.

2. The best evidence of a station's popularity, and its sales-producing power is the manifest interest of local business firms in broadcast advertising. Without question, KPO is most highly regarded, its personnel best known to San Francisco business and civic leaders. AND . . . NBC's local sales in San Francisco are currently 80% ahead of last year.

4. Dollar-for-dollar, KPO offers you the best advertising buy in San Francisco for 1942 . . . as well as in the years to come. Every day KPO is making firmer its already established lead in listener-popularity. Greater popularity means greater audiences. Greater audiences mean greater sales. And that, after all, is the proof of the pudding!

RADIO IN DEFENSE

By

JAMES LAWRENCE FLY

Chairman, Federal Communications Commission

THE year 1941 will go down in the history of radio broadcasting as the year in which the industry faced the challenge of our national defense program and, with few if any exceptions, met that challenge.

Broadcasters have cooperated with the Army, Navy, and civilian defense agencies to a marked degree. They have also served by providing the listening public with well-rounded discussions of many public issues. In return, broadcasters have already been amply rewarded, for they have won for themselves an unparalleled hold on the public's interest and attention.

The year 1942 will be chiefly featured by a continuing necessity to gear broadcasting into defense needs; but, as 1941 has amply illustrated, emergency requirements are wholly compatible with the normal aims and processes of broadcasting.

In addition to defense, the broadcast year has been marked by the coming-of-age of frequency modulation (FM) in broadcasting. At least 150,000 FM receivers should have been in operation at the close of 1941, and there are prospects for continued growth during 1942.

During 1941 the Commission completed its three year investigation of network broadcasting and issued regulations based thereon; instituted an inquiry into the effects of joint ownership of newspapers and broadcasting stations, with special reference to FM; and heard arguments on a proposed rule to eliminate joint control of two or more standard broadcast stations in a single service area.

Television growth has been impeded by the defense demands for strategic materials and skilled labor. But the Commission is fully aware of the importance of keeping television in readiness during the emergency period, so that when the end of the war effort comes, television can be expanded immediately to take up any slack of unemployment and productive capacity which may follow demobilization. I see no reason why, with proper planning at this time, we cannot look forward to a 50,000,000-set television industry mirroring the present 50,000,000-set broadcast industry, within a comparatively few years after the emergency is at an end.

RADIO AND THE WAR

By

NEVILLE MILLER

President National Association of Broadcasters

AS the nation's most important single means of mass communication, unique in its ability to secure and hold the attention of a vast majority of the people of the nation simultaneously, radio will undoubtedly play a major role in the prosecution of the war. Probably the most favorable development thus far affecting broadcasting is the evidence that our government has decided not to take over and operate radio, but to leave it in the hands of experienced private operators who, through the years, have demonstrated an appreciation of their responsibilities to serve the national interest. With the advent of radio, Congress wisely determined that in America this medium of mass communication should remain free of government operation and control. As a consequence the American System of broadcasting has developed along lines that have made of it a most effective instrument for the preservation of liberty and freedom of thought and expression.

RADIO ROUND-UP AND THE WAR

By M. H. Shapiro, Editor, Radio Daily

RADIO'S TREMENDOUS WAR EFFORT, is obviously the highlight of its current existence. Due in no small measure to the fact that the industry during 1941 and even before, had already been well prepared through many months of aiding the cause of National Defense, the staggering load placed upon its shoulders now, is being carried off magnificently.

Any attempt to enumerate, evaluate or even show the extent of one particular item of 100 per cent cooperation with the U. S. government and its myriad agencies, is well nigh futile. Scope of the job the broadcaster has done, is now doing, or may be called upon to do is something that could only be accomplished through the American System of broadcasting. Suffice it to say that radio's part in the successful prosecution of the war, is as vital a role as any branch of the machinery of war. From the status of morale alone, all critics of the industry are silenced.

This is one assignment that is being carried out without regard to convenience or cost. For the average newspaper to make way for governmental aid is easy in comparison. The newspaper can shift news or advertising, can add extra pages if necessary; the broadcaster cannot add hours. Time is his basic element and commercial programs cannot be put on unless this is taken into account.

Thus the broadcaster carries on his wholehearted support of the entire governmental program ungrudgingly and at a sacrifice he is glad to make. In every instance he has accepted self-censorship and later sought to anticipate any further move or suggestion of defense agencies by promulgating his own code on handling news so that there would be no aid or comfort to the enemy. All this was accomplished in the Democratic way—receiving from and giving full cooperation to U. S. bureaus and officials.

And yet, the past year has not exactly been a sinecure insofar as commercial

radio is concerned. To choose an adjective that would adequately describe the general situation as it applied to 1941 would be rather difficult. Perhaps to approximate the trend of events the word "turbulent" might do. The average listener complacently going about the business of "being the best informed man in the world," hardly knows of such things as the FCC Monopoly Report; the subsequent splitting of the Red and Blue networks; Order No. 79 which is still in the throes of probing newspaper ownership of stations; the suits filed by CBS and NBC backed by some independently owned affiliates to stave off the Monopoly Order; the counter actions filed by the U. S. against these two networks, and so on.

Perhaps one bright light in the course of events during the past year was the question of music performing rights being adjusted. The industry's own reservoir of music hastily set up managed to fill the breach and what's more was found practicable. Ascap, poorly advised apparently, stands to collect from radio \$36,000,000 less over a period of 18 years, than it would, had not the showdown been strongly defended by the industry. This must be construed as radio's gain.

There never having been a year during which radio did not progress, the past year was no exception. Whether television, FM, international activity, program facilities or public service, improvement has been notable. Restrictions placed upon the industry via priorities have been accepted in stride yet the coming year will see further progress to the best of radio's ability. What the war may hold for the industry few can foresee, but come what may, it will always be the American System of broadcasting—first. The broadcasting industry's great contribution to Victory is an enviable monument in the making.

TEN OUTSTANDING RADIO NEWS EVENTS OF 1941

Radio industry offers full facilities to all branches of the Government as war is declared against the Axis.

FCC held monopoly and newspaper ownership of radio station hearings, the former resulting in litigation against new rules and regulations issued by the Commission.

Network gross billing climbs, with NBC, CBS and MBS cumulative total hitting \$110,000,000, a new all-time high.

Industry war against Ascapi raged through the first 10 months of the year, ending when the networks signed with the society. Industry votes to maintain BMI.

Broadcasters, augmented by the entire advertising field, successfully defeated radio-billboard tax proposals.

FM started commercial operations January 1, followed by the commercialization of television six months later, July 1.

AFM called several short-lived strikes against NBC, CBS and affiliates on sustaining and remote programs; AFRA called its first strike and issued an ultimatum against MBS, the case finally being settled by mediation.

NBC and CBS both established Pan American networks which will begin functioning actively early in 1942.

Establishment of the Defense Communications Board; Bureau of Censorship, and Department of Information in connection with the war was completed in Washington.

Divorce of the Red and Blue networks speeded as NBC and CBS completed sale of respective Artist Bureaus.

DEFENSE COMMUNICATIONS BOARD

By E. K. Jett, Chairman, Coordinating Committee

THE DEFENSE COMMUNICATIONS BOARD was created by Executive Order of the President on September 24, 1940. The Order provides that:

"The functions of the Board shall be, with the requirements of national defense as a primary consideration, to determine, coordinate, and prepare plans for the national defense, which plans will enunciate for and during any national emergency—

a. The needs of the armed forces of the United States, of other governmental agencies, of industry, and of other civilian activities for radio, wire and cable communication facilities of all kinds.

b. The allocation of such portions of governmental and non-governmental radio, wire, and cable facilities as may be required to meet the needs of the armed forces, due consideration being given to the needs of other governmental agencies, of industry, and of other civilian activities.

c. The measure of control, the agencies to exercise this control, and the principles under which such control will be exercised over non-military communications to meet defense requirements."

DCB, A Planning Agency

The Board is basically a planning agency and receives valuable assistance from seventeen committees embracing all the fields of communications including amateur, aviation, cable, domestic and international broadcasting, wire, telephone and telegraph, radio point-to-point and maritime services, and Federal, State, and Municipal communications. Included in the setup are liaison committees for civilian defense and priorities for materials and equipment. The Coordinating Committee which has liaison with the Law Committee, Labor Advisory Committee and Industry Advisory Committee reviews the reports of the numbered committees representing the various branches of communications and

prepares the material for final action by the Board. Reports of the Board pertaining to the findings and recommendations are submitted to the President through the Office for Emergency Management.

Throughout 1941, the Board and its various committees have been active in planning for the national defense. Meetings of the Board have been held at least one day each week to consider the large volume of material which has been prepared and assembled by the various committees. Press releases were issued during the year giving some of the accomplishments of the Board. These included statements of policy with respect to the uses to be made of broadcast and other classes of stations during wartime. Also announced were plans designed to insure continuous operation of stations under emergency conditions. The Chairman emphasized that broadcasting would remain in private hands and that all utilization of broadcast facilities would be on a cooperative basis except for possible areas of actual combat.

Wartime Communications

The Board has been fully informed with respect to the operation of the broadcasting stations in England under wartime conditions. A survey is now being made of the facilities of all broadcast stations in the United States to insure full use of all main equipment and auxiliary apparatus.

Since the outbreak of hostilities the Board has been given additional powers to prescribe regulations governing the use, control, and closing of radio stations and the preference or priority of communications. In his press release of December 10, 1941, Chairman Jett stated that the delegation of authority to the DCB by the President does not mean governmental operation of private radio, that the Board will act for the President in facilitating the use of radio by the Army and Navy where necessary and that the DCB is not undertaking censorship of broadcasting.

RADIO GREAT AID TO MANY ACTIVITIES OF WAR DEPARTMENT

By Edward M. Kirby,

*Civilian Advisor on Radio to Secretary of War, Radio Branch of the
Bureau of Public Relations of the War Department*

AT this moment of writing (early January, 1942) history plays the role of a runaway horse whose mad pace will not be checked until the combination of American blood and toil reaches its greatest strength. On Sunday, December 7th, a pagan race chose to commit the crime that "will live long in infamy." But in the few terrible hours at Pearl Harbor, they also created the force which will destroy them. American Unity, the force feared, too, by the desperate man of Berchtesgaden and his boastful puppet in Rome. No person in radio will forget the closing weeks of 1941, not merely because they marked the beginning of what inevitably must be the last stage in a colossal struggle between freedom and aggression, but because American Radio gave full, clear promise of rendering a service of which every person in the industry can be justly proud, and for which every citizen can be justly grateful.

On that dark Sunday, Radio, too, was surprised and stunned, but its recoil to an "alert" state took scarcely longer than a station break. Already, Radio is rapidly gearing to the greatest task it has faced in its young history, a task which is also a grave responsibility: (1) To inform our millions simultaneously, to inform them accurately and honestly; (2) To interpret major events calmly and wisely to the end that the Nation will maintain a mental unity, a high degree

of common understanding of and reaction to these events; (3) To exert all its ingenuity and devote all its resources to keeping American inspiration and spirit at a high pitch "for the duration."

Radio Branch

In the Radio Branch, Bureau of Public Relations, War Department, the foregoing principles have been treated with a great deal of respect since January, 1941. We date this report as of January simply because that month marks the birth of the Radio Branch. The birth was unceremonious. It was not broadcast. The War Department asked the National Association of Broadcasters for the services of the writer, at the usual rate of one dollar per year. The NAB board of directors promptly agreed and the writer promptly and gladly reported to a desk in one room, aided and abetted for a time by a telephone and secretary. Today, the Radio Branch occupies six rooms, operates straight around the clock—straight across the board. The day may shortly be reduced to a mere 18 hours!

Operations are departmentalized under section heads, all of whom have been brought to the War Department from the ranks of radio itself. Robert Coleson, assistant chief and administrative executive, directed radio at the Texas Centennial, San Diego Exposition and San Francisco's '39 and '40 World Fairs, is the principal liaison between the Radio Branch and the many units of the War

Department structure. Jack Harris, director of news and special events, held a similar title at WSM, Nashville; Bill Bailey, former news editor of WLW, Cincinnati, serves us in similar capacity and Brooks Watson of WMBD, Peoria, has rejoined the staff as associate director of news and special events. Captain Ed Curtin, formerly of NBC and BBD&O and Lieutenant Rankin Roberts, formerly with the Texas State Network, rounds out this division of news and special events. Major Harold W. Kent, director for educational stations and broadcasts, is also director of the Radio Council for the Chicago Board of Education. Jack E. Joy, program director, formerly held like positions with the Don Lee network and the two San Francisco expositions. Serving in a duo-writing-production capacity is Glenn Wheaton from the public relations firm of Lee & Losh, San Francisco. Joseph E. Brechner, chief of script section, did freelance radio writing in the East, came in from the radio section of the Army recruiting department. With Brechner are William Coleman, Sol Panitz, Carl Mann and Stanley Field. Brought in for agency liaison are John Cullon and Lou Cowan, the latter in consultative capacity as he continues as major-domo with his show "The Quiz Kids."

Prior to the Selective Service law the War Department's Bureau of Public Relations itself was small, geared to the public relations problems of a relatively small Army—only a few hundred thousand soldiers. When public opinion and Selective Service gave the Nation its first great peace-time Army of some 1,500,000 men (and now moving toward 2,000,000) the need of explaining and interpreting this Army to the people quickly became an all-important need.

Broadcasting's Job

The War Department recognized, first, Radio's unique ability to tell the Army's story, yes—to sell this new Army to the people for whom it exists; second, that the pre-National Emergency Army did not have sufficient men equipped to do this radio job quickly and effectively as was now the demand. The Radio Branch thus grew like a school boy on summer vacation, out of one room into six, and set about to tell the biggest story of peace-time 1941, a story with thousands of chapters interpreting all phases of this new citizens' Army both to itself

and to its great Nation. When the telling of this story shifted into high gear, an average week saw from 150 to 200 radio programs emanating from Army camps and posts, covering Army life, linking it to the life of citizens everywhere and to the National Defense industrial and economic effort.

Through cooperation with the Morale Branch, the volume of this interpretative work was further swelled by supplying each Corps Area Headquarters and each Division Headquarters with transcription and playback equipment, thus permitting the production and release of shows which, under certain local or temporary conditions, might otherwise have been difficult to accomplish. That this story was told with such coverage and variety is a tribute to the Radio Industry and evidence of the logic of the War Department's decision to maintain a liaison between Army and Radio and thus with the public.

In the liaison capacity the Radio Branch has maintained a clearance policy with respect to all network shows emanating from Army posts and camps. All commercial broadcasts originating in camps are cleared first with the Branch. It may be noted that up to the spring of 1941, the Army did not permit commercial programs to originate from military establishments. The Radio Branch was able to sell the advantages of relaxing this policy, with the result that top-flight radio shows have not only helped further to strengthen the common bond between the Army and the Public, but have furnished a major source of entertainment for the men in the Service.

Experienced Personnel

In addition to building our own staff within the Radio Branch to serve the Radio Industry in its job of interpreting the people's Army, we combed the camps for men with radio experience, professional and technical. As a result, many of these men were transferred to public relations departments in the camps and became foundations upon which radio production units have been built, many of sufficient caliber that they are frequently entrusted with entire program details by the stations carrying this non-commercial type of show.

And in the capable hands of recently inducted radio men, together with an

increasing number of reserve officers drawn from radio ranks, these radio productions from the Army camps have been highly popular program material. For in the American Army today are not only good-fighting-men-in-the-making, but at the same time highly talented men, who despite the seriousness of the times retain their high spirits, their talents and their senses of humor. One of the most reassuring phases of the present is the realization through camp radio programs that the American fighting man does have that high morale which enables him to wisecrack in the face of danger.

Perhaps the best-timed activity of the Radio Branch was its meetings with radio news and program directors at the NAB district meetings. Jack Harris, Bill Bailey and I met in informal discussions with these radio representatives and touched on many—in fact, most—of the problems of news and defense handling brought on by the war. These meetings were held in October, November and December, there being only two missed when the war called all hands to the home base in Washington. But largely on the basis of these discussions with news and program people throughout the nation, we were able to get out with the NAB a war-guide for news rooms and program desks when the war was less than one week old.

Consistently, the Radio Branch has tried to facilitate the efforts of stations and networks in telling the story of one of the great battle-fronts—production. While part of this story quite naturally has been handled by the Office of Emergency Management, still much had to be done at those plants with Army contracts where an Army office was in charge of what could and could not be said and done. Until the outbreak of the war, there were numerous programs each week relating the important story of production. Immediately with the war's beginning, such plants were closed to broadcasters and newsmen and practically all such data became secret. Even now, the restrictions are being lifted somewhat and we anticipate a further relaxation to permit the maximum telling of the production story within limits that will not give information to the enemy which need be withheld. But in respect to the production story, radio took Americans right into the factories, enabling millions to comprehend the change taking place in the national economy and the tempo of the national defense effort.

Coverage of Maneuvers

One of the notable jobs in radio in 1941 was its coverage of the maneuvers. The networks and individual stations developed a technique of coverage which gave the listeners a real break and gave the radio operatives and the army valuable lessons in radio problems and potentialities on an actual war-front. These maneuvers, unlike any others in previous American military history, were uncontrolled, meaning nothing could be staged for radio broadcasts. The radio correspondents went right into the field and out of their microphones came one of the significant stories of the year—the progress of the American armed forces in their stiffest test. The individual stations used mobile recording units to go right into the thick of battle. The networks used correspondents roaming the front lines and returning to broadcast points. Each type broadcast was magnificently handled, largely because of extensive advance preparations on the part of special events people in our own branch and the radio networks and radio stations. The Secretary of War complimented radio coverage.

This is modern American Radio's first experience with war. It is meeting the experience like a veteran. The confusion which was a natural result of the fantastic hours immediately following Pearl Harbor, quickly gave way to the Industry's self-made set of standards governing wartime news operations. By these standards, broadcasters pledged themselves to avoid sensationalism; to be accurate and factual; to shun rumors and to qualify the source of their news. Radio is meeting the crisis in stride, proving that today it has a guiding principle overshadowing all others—do nothing that would harm the national interest and to do everything to protect the national interest.

These are not times which permit prophecies, but one forecast can be made: Radio, in winning its chevrons but a few hours after America plunged into this war, will be equal to its tremendous responsibilities; will remain active and potent on the front line "for the duration," and when the peace-conference begins to build a better world, it will be the microphone of free radio under our treasured American System of Broadcasting which will tell that inspiring story of a better day.

AIR WAVES AND THE U. S. NAVY

By J. Harrison Hartley, Chief of Radio Section, U. S. Navy Department

IN OCTOBER of 1938 in a salute to Navy Day, the United States Navy participated in a broadcast which many in the service and the radio industry said was the greatest radio demonstration of our sea power ever presented in the short but colorful history of broadcasting.

As war overtook the old world and this nation came closer and closer to involvement, the activities which the Navy could make available to the broadcasters were limited more and more to insure our National safety and security. In 1939, America's sons were drafted and almost every American immediately had a personal interest in the Army.

As our National Defense effort grew, radio looked to the Navy for its usual cooperation. Times had changed. Programs from ships at sea were impossible, and activities at shore establishments worthy of radio coverage became very limited, and difficult to clear, with officers who rightly put security before all media of publicity. It is to the credit of networks and stations that they were not only understanding, but with all the restrictions, were able to present many interesting and entertaining Navy programs.

Navy Radio Section

In May of 1941, the Honorable Frank Knox established the Office of Public Relations in the Office of the Secretary of the Navy. Rear Admiral A. J. Hepburn, USN, former Commander-in-Chief, United States Fleet, was ordered to Washington as Director. Prior to this, Public Relations in its many categories was the responsibility of a few officers in the Office of Naval Intelligence. One of the first duties performed by Admiral Hepburn was the establishment of sections within the Office of Public Relations to service the many forms of publicity media calling on the Navy Department for cooperation. This included a Press Section, Photographic Section, Motion Picture Section, Script Section, Special Events Section to handle Naval participation in civilian activities, and a Radio Section.

The Radio Section is administered by men formerly connected with broadcast-

ing, Lieut. (j.) John P. Moore and Lieut. (jg) D. H. Saunders, both Naval Reservists, have had many years of experience in radio as employees of the Columbia Broadcasting System. The writer joined the National Broadcasting Co. in 1929 and is at present on leave of absence. In each Naval District, at least one man with radio experience is on the staff of the Public Relations Officer. The Radio Section in Washington works principally with national networks and cooperates with the Public Relations Officers of the Naval Districts in their efforts to service regional network and local station requirements.

It is the job of the Navy's Radio Section to clear program ideas, and to substitute ideas when any program or part of a program is unacceptable for military reasons. It is a further duty to clear with cognizant bureaus all scripts of factual and dramatic content in Navy participation programs, which are submitted for official review.

Industry Cooperation

The United States had hardly been attacked when the Navy Department received many offers of the facilities of broadcasting stations and sponsors. The Navy appreciates the national spirit of patriotism shown by the great American system of broadcasting.

Those officers charged with the defense of our country have in the past and will in the future, lean over backwards to cooperate with radio insofar as the cooperation does not endanger life and property. The Radio Section, Office of Public Relations, Navy Department, and those men in the District Public Relations Offices assigned to radio, will continue their efforts with renewed vigor to unearth for networks and stations alike, material about the Navy which lends itself to interesting and informative programming.

Most ideas for Navy participation are going to come from the broadcasting industry. Don't just decide without checking that something is impossible, for it might be one of the easiest ideas to clear.

WAR FOUND RADIO PREPARED

By David Sarnoff, President, Radio Corporation of America

RADIO entered 1942 with but one aim—"to win the war and to win the peace that follows." National defense was radio's No. 1 program in 1941. Spurred by a determination for victory, the science of radio and electronics is driving ahead across new frontiers, as well as over battlefronts. Workers in every service of American radio are operating with redoubled energy to equip the United States on land, sea and in the air with the most efficient radio communications system in the world. War found radio At the Ready!

Indicative of the trend at the year-end in the RCA Manufacturing Company's plants, the volume of unfilled orders was 80 per cent for defense; 20 per cent commercial. Production for defense was rapidly increasing. Deliveries were being rushed. Employment in RCA at the opening of 1942 was at a new peak of more than 30,000 employees.

Any report on radio's 1941 activities, whether research, manufacturing, broadcasting or communications, must, of a necessity born of the times, be described in more general terms than in the past. The specific achievements of this period of national emergency will come to light in later years in much the same way that the wartime developments of the radio-phonograph, short waves and the vacuum tube were revealed after the Armistice in 1918.

Developments

Each year reveals—and 1941 is no exception—that research and engineering are constantly strengthening the foundation of the radio industry in the United States. Fully aware of the vital significance of scientific research as the primary guarantee of progress and the

creation of new resources, services and products, the Radio Corporation of America in November, 1941, laid the cornerstone of the new RCA Laboratories in New Jersey. These Laboratories, designed as the foremost center of radio and electronic research in the world, will open in 1942.

Spurred by necessity, chemists and physicists associated with radio have developed alternates to release materials for the urgent requirements of defense. New accomplishments in the utilization of metals and plastics are the result.

Modern radio, allied with the science of electronics, finds itself spreading into new fields. Outstanding in this category of development is the RCA electron microscope, which extended its service during 1941 and revealed tremendous possibilities in science and industry.

Morale

Radio manufacturing has geared every production machine with one goal in mind—Victory. Thousands of workers in the RCA Manufacturing Company's plants have pledged themselves to "Beat the Promise," with such eagerness and intensity of purpose that their efforts are acclaimed as one of the outstanding industrial movements of national defense as well as offense.

In RCA Institutes, the oldest radio training school in the United States, more than 1,200 students are enrolled in New York and Chicago classrooms for training in all branches of radio, including ship operators, service men, broadcast engineers, television operators and aviation-radio technicians.

The facility and speed with which radio has rallied the nation from "an unlimited emergency" to a wartime basis,

FOR you folks who wanted to see YIFNUFF, concert violinist . . . here she is! Actually a New Jersey housewife and a complete stranger to a violin, her penalty on TRUTH OR CONSEQUENCES was to play before a thousand unsuspecting music lovers at TOWN HALL. America's number one practical joke of the year and just one of 671 consequences that keeps 'em laughing every Saturday night. Coast-to-Coast on the NBC-Red.

Ralph Edwards
Creator-Conductor

Truth or Consequences

emphasizes the value of network broadcasting as conducted in the United States. Interrupted by news bulletins, radio continues its musical programs, comedy and drama, for these are recognized as revitalizing tonics, needed more than ever in the busy days and nights of war.

Coverage

Radio's instantaneous reports from the Pacific and the eye-witness coverage of the war in Europe and Asia as the NBC-RCA circuits switched from continent to continent, from island to island, revealed as never before the flexibility with which broadcasting performs its service to the people.

The National Broadcasting Company, celebrating 15 years of network broadcasting, also intensified its short-wave activities and made the fan-shaped beams far more effective in reaching across the hemispheres to knit the Americas in a common cause.

The NBC Stations Planning and Advisory Committees on National Defense have been organized to meet the requirements of war as well as peace. Greater integrated broadcasting service, allied with the growing demands of the nation's defense, is the immediate aim.

All-out Effort

Enlisted in the all-out effort, key broadcasting stations are operating on a 24-hour basis. They are participating on an unprecedented scale in the Defense Bond and Stamp campaign. The "Treasury Hour" has become a headline program from coast to coast. Ears of listeners everywhere are hearing the messages of the Red Cross, the USO, Civilian Defense, and of numerous other organizations. Soldiers and sailors in training camps get the same entertainment as the folks at home; they also get the news.

Internationally, the United States holds supremacy in radio communications. When the United States Army went into Dutch Guiana, it found an RCA radio circuit linking Paramaribo with the U. S. A. Since 1928, without interrup-

tion, RCA has operated that direct circuit. Radio was more than usually important in this case since no cables reach Dutch Guiana.

To keep pace with the changing map, American radio has hurled new circuits across the seas. One of the triumphs of radio in 1941 was the flashing of radio-photos out of Moscow across 4,615 miles to the United States. Pictures of the war on the Russian front were received by RCA in New York, in 13 minutes.

Marine radio is one of the services protecting American life and property at sea. It is the voice of the eagle-eyed seaplane, just as it long has been the voice of ships. Along the American coasts powerful land stations watch over the oceans, while radio beacon stations flash like invisible lighthouses. No ship today need be out of communication with land because it is out of sight. The Radiomarine Corporation of America, which has equipped more than 1,500 American vessels with radio installations, now is engaged in the all-out wartime program.

1941-1942

Preliminary estimates for 1941 indicate that the American radio industry as a whole produced 13,000,000 receiving sets, and more than 100,000,000 radio tubes. Phonograph record output reached an all-time high, estimated at 110,000,000 disks revealing how radio in combination with the phonograph has lifted the popularity of recorded music to new heights. This figure is far ahead of the record-breaking year of 1921, before broadcasting began to compete with the phonograph.

Television in 1941 advanced in RCA Laboratories and in the field. It will continue to do so in 1942. As a post-war industry, television holds great promise of becoming a new radio service to the public. Television today is testing its wings over the New York area through NBC's pioneer television station WNBT. Its immediate assignment like that of all radio—research, manufacturing, communications and broadcasting—is National Defense.

RADIO SELLS DEFENSE BONDS

By Vincent F. Callahan

*Chief of the Press and Radio Sections of the
Defense Savings Staff, Treasury Department*

IN the Spring of 1941, the Treasury Department in Washington was faced with the task of promoting the sale of new Federal Securities—United States Defense Bonds and Stamps. Realizing that radio was one of the most forceful mediums of public influence, Secretary Morgenthau established a radio section in the newly formed Defense Savings Staff to supervise the radio end of the campaign. Since the bonds and stamps went on sale May 1, 1941, every radio network, every radio station, every network sponsor and their advertising agencies have cooperated wholeheartedly in making the campaign a success. The Treasury Department is deeply gratified by their tremendous assistance.

The plan of promotion embodied five different phases of radio: one-minute announcements on all stations directed to various groups—general, women, foreign language, and farmers; commercially sponsored network programs; special event broadcasts; special transcribed programs for all stations; and network programs sponsored by or for the Treasury Department. In order that we might do a thorough and professional job, we called upon experts in the radio industry to assist us in our various problems.

Agency Co-op

Since May 1st, the Treasury Department has released five one-minute announcements a day to all radio stations in the United States—either live or transcribed. In preparing this tremendous amount of copy, Harry Marschalk, president of Marschalk and Pratt, Inc., offered us the services of his staff. W. G.

Freeman has written all of our announcements, which according to hundreds of letters from radio stations is the most expertly written copy they receive from any Government Agency. Curt Peterson, head of radio production for Marschalk and Pratt, has supervised and directed the transcribed one-minute announcements which the Treasury released in the months of June, July, September and October.

In addition to the general radio announcements, copy especially prepared from the woman's angle has been released to some 500 women's program directors throughout the country. Anne Hummert has been responsible for writing this specialized copy. In preparing and translating special announcements for foreign language stations, we have had the help of Joseph Lang, General Manager of WHOM, Jersey City. For copy directed to the vast farm audiences, we turned to Jud Woods, authority on farm matters, and manager of KFAB, Lincoln, Nebraska.

Sponsor Tie-ups

Our second important means of selling Defense Bonds and Stamps by radio has been through the wholehearted cooperation of the major sponsors of network programs—cooperation which has trebled since the United States entered the war. Sponsors have worked with the Radio Section wholeheartedly, many of them taking the initiative in devising the most effective possible means of getting our material to their audiences. For instance, representatives of the five leading daytime radio advertisers—Colgate-Palmolive-Peet, General Foods, Gen-

☆ ☆ ☆ *Radio In Defense* ☆ ☆ ☆

Thinking of you

KAY KYSER

Exclusive Management
MUSIC CORPORATION of AMERICA

eral Mills, Lever Brothers, and Procter and Gamble—met voluntarily in Washington during October to devise a plan through which they might most effectively cooperate with the Treasury Department. This meeting has resulted in a coordinated schedule of announcements on every daytime program on the three major networks, beginning at 9:45 a.m. and running through 5:45 p.m. each day of the week. In each case copy is specially prepared by the advertiser or his agency involving various approaches. Some programs are turned over in their entirety to the Treasury Department, others include special dramatized appeals to the listeners, others include Defense Bond and Stamp copy in the dialogue of the script, while still others have a dramatic appeal delivered at the beginning or end of the broadcast by the leading character of the script.

The same fine spirit of cooperation has existed in the case of all major sponsors of night-time programs. Since the beginning of our campaign, an average of three programs each night have assisted in the promotion of Defense Bonds and Stamps. The cooperation by all sponsors has been increased five-fold in the interests of raising money through Defense Bond and Stamp investments. Leading companies of our country have given their entire programs over to our cause—Defense Bond and Stamp copy has been incorporated into programs in every possible way to aid our sales. We are grateful for this opportunity to thank the executives of sponsoring companies, who with their agencies are working so closely with us.

Network Activities

In addition to the individual stations and radio advertisers, the networks have been most generous in their giving of time for special event broadcasts. On the first day of our campaign, NBC, CBS, and MBS contributed 8 hours to the opening of the Bond and Stamp sale. Since then more than sixty special event programs have been broadcast on coast to coast networks. These broadcasts have included half-hour roundtable discussions, special speeches on all networks by Secretary Morgenthau, and other Treasury Department officials, and speeches by prominent persons.

Shortly after our campaign got under way last May, the Treasury Department was approached by the Texas Company with an offer to contribute to the Defense Savings Program one full hour each week for thirteen weeks on the Columbia

Broadcasting System. From this offer was born still another phase of our promotion—the Treasury Department's own radio programs.

Treasury Hour

With acceptance of the Texas Company's generous contribution, Secretary Morgenthau appointed a committee of radio experts, headed by Howard Deitz of MGM, with William Murray of the William Morris Office, and Paul Munroe of Buchanan & Company, to guide the destinies of The Treasury Hour. During the first thirteen weeks, when the Treasury Hour was sponsored for the Treasury Department on CBS by the Texas Company, over 85 of the leading stars of stage, screen and radio contributed their services to make the programs the leading variety show on the air during the summer months. In August, the Hooper Survey placed the Treasury Hour in first place of all programs on the air in popularity.

At the conclusion of the first thirteen weeks, the Treasury Hour was moved to the Blue Network, sponsored by another leading American industry—the Bendix Aviation Corporation. Under the sponsorship in behalf of the Treasury, an equal number of stars and artists contributed their services to the broadcasts during a second 13-week period.

Those who deserve special mention for the success of the Treasury Hours include Tom Buchanan, whose agency has worked so closely with us in putting the broadcasts on the air, Earle McGill of CBS who directed the first 13 programs and Lester O'Keefe who acted in a similar capacity on the NBC Treasury Hour series, and the artists who gave so generously of their time and talent.

MBS Series

Shortly after the initial broadcast of The Treasury Hour in July, another complete program was donated to the Treasury Department—this time by a network. The Mutual Broadcasting System arranged for a half-hour program each week to be given over to the promotion of Defense Bonds and Stamps, with time and production charges contributed by the network. Here again, noted artists gave their services. Under the title of "America Preferred," the program has been on the air weekly, and features each week the music of Alfred Wallenstein's orchestra, with Deems Taylor as narrator, and a guest artist. Designed to appeal particularly to those of foreign birth in the United States, the guest artists have been se-

lected from among the great musicians who have come to our country from other lands.

NBC Series

On July 22, "For America We Sing," a third network program in behalf of the Treasury Department made its debut on the Blue Network. Conceived by Niles Trammell, president of the National Broadcasting Company, Frank Hummert and Dr. Frank Black, "For America We Sing" is designed to present to American radio audiences the music everyone loves—music of north, south, east and west. Frank Hummert has contributed his services in producing the programs, while the National Broadcasting Company has contributed the time for the programs and a forty-eight piece NBC orchestra under the direction of Dr. Frank Black. Each week two guest soloists have appeared without compensation.

To all of the artists and radio executives who have contributed to the success of "America Preferred" and "For America We Sing" the Treasury Department is sincerely grateful. These generous contributions have been of the utmost importance in the success and continuance of our campaign.

Still another contribution by the National Broadcasting Company in our behalf deserves special mention. On December 6th and 13th, Arturo Toscanini conducted the NBC Symphony on two special one hour Treasury Department Concerts. This represented the first time the NBC Symphony had ever been broadcast in the interests of any enterprise.

Special Music

It is virtually impossible to mention everyone who has helped us so splendidly in our job. However, I do want to take this opportunity to say a special word of thanks to Irving Berlin for his great song, "Any Bonds Today?", which has become the theme song of our work. Also, we are greatly indebted to Jack Lear of the Music Corporation of America for his generous help in promoting the Irving Berlin song throughout the country. Thanks, too, to Earle Ferris of Radio Feature Service Incorporated for publicizing our Treasury Department radio programs so successfully, to David Green of David Green Associates, and to Elaine Stern Carrington, who has given freely of her time and talent in supervising

the writing of a series of five-minute dramatizations, and to the noted radio writers who worked with her. During 1942 there will be many more names which should appear here, I know, so to everyone involved in the success of this great Treasury Department Defense Savings Program, my deepest and sincerest appreciation.

Radio Staff

Since the outbreak of war, my desk has been flooded with telegrams and letters with offers to help and suggestions for making our campaign more successful. Those who work directly with me in the Radio Section have been largely responsible for the fine coordination of our undertaking—Charles J. Gilchrest, my assistant, Emerson Waldman, in charge of Foreign Language and Farm Programs, Marjorie L. Spriggs, Chief of Women's and Children's Programs, Frank L. King, E. Frederica Millet and William Rainey, in charge of our New York radio office.

We are at work on many new plans, some of which may already be in operation when you read this. We are arranging the organization of Radio Minute Men on a nationwide basis, who will make one-minute talks in our behalf on Treasury Department programs, on commercially sponsored network programs, and on local radio stations. We are also releasing two series of specially prepared transcriptions for use on all radio stations. The first series is entitled "Any Bonds Today?" and stars such as Henry Fonda, Walter Pidgeon, Fanny Brice, Hanley Stafford, Fay Wray, John Beale, and Dr. Frank Black's NBC Orchestra.

The second series of transcriptions will be a group of five-minute dramatizations featuring noted actors of stage and screen. These have been written by the best known radio script writers in America.

At this time it is impossible to know what turns our campaign may take. One thing is certain however, we must have money to finance this war—and the sale of Defense Bonds and Stamps is all-important in raising this money. None of us now what the future may be. But we all know this—we are in a war to the death. We've got to fight it and finance it. The radio industry has been a vital factor in this campaign—I know it will continue to be as long as our country needs it!

— BACK STAGE WITH — RADIO-TELEVISION-FM

CONTINUING the steady march that has seen the broadcast industry advance to the fore as a major advertising and entertainment medium in less than a decade, radio in '41 was called upon to perform the most important task in its history—keeping a nation informed of defense activities in a national emergency, climaxed by coverage of actual warfare as of December 7 last. Despite the vast volume of broadcast hours devoted to the government agencies involved in the war and defense activities, the four major networks chalked up cumulative billings totaling \$107,000,000 in the 12-month period, an 18 per cent increase over the all-time record established in 1940. Indications for the current year were highly optimistic as first-quarter billings continued that advance, despite priorities which so seriously affected other industries.

Television

Laurels for the outstanding development in the industry in 1941 went to television, established as a commercial medium on July 1, and advanced to a point where the new audio-visual art was hailed as the coming industry—the new art that would absorb the vast manpower that would be available at the conclusion of the world-wide strife. NBC, operating on a commercial license, had an even dozen accounts as the year waned, while plans for competitive outlets were completed in New York with the start of the New Year.

FM, getting off to a fast start, proved worthy of its advance notices, and also operating on a commercial basis, spread from coast to coast with unprecedented speed. There were new stations and sponsors flocking to the stateless stations steadily, and in every major city in the country the populace became acquainted with this flawless type of transmission.

International

As solidarity of the Americas became one of the foremost projects of the

United States Government, radio's activities in that field increased by leaps and bounds. Both NBC and CBS completed plans for the establishment of Pan American links, with all the major outlets in more than 20 South American republics now linked to one of the two networks. Commercial accounts servicing the ever-increasing audiences in Latin America found results highly satisfactory, and billings were vastly increased as the year progressed.

Programs

With national defense as its keynote, radio programming in the hectic 1941 revealed few new trends in commercial or sustaining presentations. Variety shows, especially those presented in behalf of national defense institutions, came into their own after several years of inertia, while comedy, as a result of war, was also highlighted on both network and local program schedules. Quiz programs showed the strain of overproduction, while news broadcasts were responsible for steadily increasing Crossley's. The "March of Time" returned to the air as a result of the demand for news programs, while special events broadcasts were headed by President Roosevelt's declaration of war early in December.

Conclusion

Radio entered 1942 fully matured, and prepared to handle the national defense and war assignment. Coordination of government activities under William Lewis vastly aided the assignment, which included campaigns in behalf of the Treasury Department, the WPB, the Office of Facts and Figures, etc.

That censorship would continue on its abbreviated scale was seen as no serious handicap to the broadcasters, whose plans for the duration were unified—to fight this war as the government and the peoples wanted it fought, with all-out honesty and unabridged presentation of its news as well as its entertainment.

RADIO CENSORSHIP "CODE"

By J. H. Ryan, Assistant Director of Censorship (Radio Division)

PERHAPS the most significant statement in the Code of Wartime Practices for American Broadcasters, issued in January of 1942 by the Office of Censorship is found in the second paragraph:

"... and the following (Code) is intended to be helpful in systematizing cooperation on a voluntary basis during the period of emergency."

In this sentence lies the whole concept of censorship as set forth by Mr. Byron Price, Director. Broadcasters must act as their own censors, merely guided by the broad policies established in the Code. The Office of Censorship, as the war effort progresses, must gradually become an advisory division, as distinguished from the purely creative function which first faced it when a set of general rules for the guidance of broadcasters had to be drawn up.

In this advisory capacity, the Office will be at the service of all broadcasters and all those whose businesses are related to broadcasting. Specific problems of programming, where a given production's content might be questionable during time of war, will be reviewed by the Office of Censorship when so requested by the broadcaster. Instantaneous interpretations on the handling of specific news stories will be offered by the Office when requested.

The Office shall merely act as a correlating branch of the broadcasters in the industry-wide effort to keep information of value to the enemy out of his hands.

Of course, the success of censorship in radio during the war must be measured by the broadcasters' willingness and

ability to learn by experience. No precedent has been established for the censorship of free radio, as we know it in America. The broadcasting stations of Germany and Italy are but tools of the government. In England, the British Broadcasting Corporation is controlled by the government. Even in Canada, which comes nearest to paralleling our own method, the government owns several of the eighty-odd stations on the air.

But here, in the United States, all stations (with the exception of a few municipal and university outlets) are privately owned and operated, according to democratic rules of free enterprise. In developing a set of concepts which could be codified and employed by broadcasters as a guide, the Office of Censorship had to bear this in mind—that it was suggested certain restrictions in freedom of speech in order to prosecute a war which was being fought to protect the kind of government which guarantees freedom of speech. The very anomaly here demanded that the actual working of censorship must be voluntary, a problem for each broadcaster to solve for himself. If free speech—call it free radio, if you will—was important enough to fight and die for, then more than likely it was important enough to warrant the exercise of certain controls.

We have no fear that censorship, as we intend to practice it in the radio industry, will do anything but teach Americans again that the best kind of radio is free radio. Each broadcaster is on his honor and on his mettle to keep his listeners honestly informed, but to tell his enemies nothing. He will find a way to do it. No one will ever be able to censor his ingenuity.

The Code—Effective Jan. 16, 1942

HEREWITH is the text of a war-time code of practice for radio broadcasters, as issued January 16, 1942, by the Office of Censorship, Byron Price, Director. Statement embodied with the code, is included:

In wartime it is the responsibility of every citizen to help prevent the enemy, insofar as possible, from obtaining war, navy, air or economic intelligence which might be of value to him and inimical to our national effort.

The broadcasting industry has enlisted with enthusiasm in the endeavor, and the following is intended to be helpful in systematizing cooperation on a voluntary basis during the period of the emergency.

Two possibilities exist:

(1) Enemy exploitation of stations heard only within our borders, to expedite the work of saboteurs, and

(2) Enemy exploitation of stations heard internationally (both short and long wave) to transmit vital information.

All American stations desire to prevent such exploitation. The statement here-with set forth is presented under three headings:

(1) News Programs.

(2) Ad lib programs.

(3) Foreign language programs.

Radio management can do much in other ways to win the war. It can act, in the light of experience, as its own censor above and beyond the suggestions contained in this statement of conduct.

News Program

It must be remembered that all newspapers, magazines and periodicals are censored at our national borders. No such post-publication censorship is possible in radio. Scores of stations operating on all classifications of frequencies are heard clearly in areas outside the United States. These stations especially should exercise skill and caution in preparing news broadcasts.

Ninety-nine per cent of the commercial station operating in the United States are serviced by one or more news agencies. News teletyped to stations and networks by these agencies will be edited at the source, with a view to observing certain requests set down by the press section of the Office of Censorship. These precautions notwithstanding, the Office of Censorship stresses the need for radio to process all news in the light of its own specialized knowledge. Broadcasters should ask themselves the question, "Would this material be of value to me if I were the enemy". Certain material which may appear on the news service wires as approved for newspapers may not be appropriate for radio.

It is requested that news falling into any of the following classifications be kept off the air, except in cases when the release has been authorized by appropriate authority.

Weather Reports

(1) Weather reports. This category includes temperature readings, barometric pressures, wind directions, forecasts and all other data relating to weather conditions. Frequently weather reports for use on radio will be authorized by the United States Weather Bureau. This material is permissible. Confirmation should be obtained that the report actually came from the Weather Bureau. Special care should be taken against inadvertent references to weather conditions during sports broadcasts, special events and similar projects.

Information concerning road conditions, where such information is essential to safeguarding human life, may be broadcast when requested by a Federal, State or municipal source.

(2) Troop movements. The general character and movements of units of the United States Army, Navy and Marine Corps, or their personnel, within or without the continental limits of the United States; their location, identity or exact composition, equipment or strength; their destination, routes and schedules; their assembly for embarkation or actual embarkation. Any such information regarding the troops of friendly nations on American soil. (The request as regards location and general character does not apply to training camps in the United States, nor to units assigned to domestic police duty.)

(3) Ships. The location, movements and identity of naval and merchant vessels of the United States and of other nations opposing the Axis powers and of personnel of such craft; the port and time of arrival of any such vessels; the assembly, departure or arrival of transports or convoys, the existence of mine fields or other harbor defenses; secret orders or other secret instructions regarding lights, buoys and other guides to navigators; the number, size, character and location of ships in construction, or advance information as to the date of launchings or commissionings; the physical setup of existing shipyards, and information regarding construction of new ones.

(4) Planes. The disposition, movements and strength of army and navy units. The time and location of corps graduations or the equipment strength of any training school.

New Inventions

(5) Experiments. Any experiments with war equipment or materials, particularly those relating to new inventions. Any news of the whereabouts of camouflaged objects.

(6) Fortifications. Any information regarding existing or projected fortifications of this country, any information regarding coastal defense emplacements or bomb shelters; location, nature or numbers of anti-aircraft guns.

(7) Production. Specific information about war contracts, such as the exact type of production, production schedules, dates of delivery, or progress of production; estimated supplies of strategic and critical materials available; or nationwide "round-ups" of locally-published procurement data except when such composite information is officially approved for publication.

Specific information about the location of, or other information about, sites and

factories already in existence, which would aid saboteurs in gaining access to them; information other than that readily gained through observation by the general public, disclosing the location of sites and factories yet to be established, or the nature of their production. Any information about new or secret military designs, or new factory designs for war production.

(8) Casualty lists. Total or round figures issued by the Government may be handled. If there is special newsworthiness in the use of an individual name, such as that attending the release concerning Capt. Colin Kelly, it is permissible material. Stations should use own judgment in using names of important personages from their own areas killed in action. The Government notifies nearest kin BEFORE casualty's name is released to the press.

(9) Release of figures on selective service enrollments.

Unconfirmed Reports

(10) Unconfirmed reports. Reports based on information from unidentified sources as to ship sinkings or land troops reverses or successes should not be used. In the event enemy claims have been neither confirmed nor denied by established authority, the story ordinarily should be handled without inclusion of specific information; there should be no mention of ship's name—only its classification; there should be no mention of army unit designation—just its general description (tank, artillery, infantry, etc.). Commentators, through sensible analyses of reports from enemy origins, stressing the obvious fallacies, can do much to correct any false impressions which might be created.

(11) Communications. Information concerning the establishment of new international points of communication should be withheld until officially released by appropriate federal authority.

(12) General. Information disclosing the new location of national archives, art treasures, and so on, which have been moved for safekeeping; damage to military and naval objectives, including docks, railroads, or commercial airports, resulting from enemy action; transportation of munitions or other war materials, including oil tank cars and trains; movements of the President of the United States, or of official military or diplomatic missions of the United States or of any other nation opposing the Axis powers—routes, schedules, or destination, within or without the continental limits of the United States; movements of ranking army or naval officers and staffs on official business; movements of other individuals or units under special orders of the army, navy or State Department.

Summation: It should be emphasized that there is no objection to any of these topics *if officially released*. These restraints are suggested:

(1) Full and prompt obedience to all lawful requests emanating from constituted authorities. If a broadcaster questions the wisdom of any request, he should take it up with the Office of Censorship.

(2) Exercise of common sense in editing news, meeting new problems with sensible solutions. Stations should feel free at all times to call on the Office of Censorship for clarification of individual problems.

II

Ad Lib Programs

Certain program structures do not permit the exercise of complete discretion in pre-determining the form they will take on the air. These are the ad lib or informal types of programs. Generally they fall into four classifications:

(a) Request programs.

(b) Quiz programs (*effective Feb. 1*).

(c) Forums and interviews (*ad lib*).

(d) Commentaries and descriptions (*ad lib*).

As experience dictates the need of changes, they will be made, and all stations notified. Stations should make certain that their program departments are fully acquainted with these provisions.

(a) Request programs. Certain safeguards should be adopted by the broadcaster in planning request programs. It is requested that no telephoned or telegraphed requests for musical selections be accepted for the duration of the emergency. It is also requested that all mail bearing requests be held for an unspecified length of time before it is honored on the air. It is suggested that the broadcaster stagger replies to requests. Care should be exercised in guarding against honoring a given request at a specified time.

Special note is made here of "lost and found" announcements and broadcast material of a similar nature. Broadcasters are asked to refuse acceptance of such material when it is submitted via telephone or telegraph by a private individual. If the case involves a lost person, lost dog, lost property or similar matter, the broadcaster is advised to demand written notice. It is suggested that care be used by station continuity departments in re-writing all such personal advertising. On the other hand, emergency announcements asked by police or other authorized sources may be accepted. Announcements bearing official authorization seeking blood donors, lost persons, stolen cars, and similar material may be accepted by telephone, but confirmation of the source is suggested.

B E N N Y

G O O D M A N

OKEH Records

★

Exclusive Management
MUSIC CORPORATION OF AMERICA

★

Personal Management: WILL ROWLAND, 1619 Broadway, N. Y. C.

It is requested that announcements of mass meetings not be honored unless they come from an authorized representative of an accredited Governmental or civilian agency. Such requests should be accepted only when submitted in writing.

(b) Quiz program. It is requested that all audience-participation type quiz programs originating from remote points, either by wire, transcription or short-wave, be discontinued, except as qualified hereinafter.

Any program which permits the public accessibility to an open microphone is dangerous and should be carefully supervised. Because of the nature of quiz programs, in which the public is not only permitted access to the microphone but encouraged to speak into it, the danger of usurpation by the enemy is enhanced. The greatest danger here lies in the informal interview conducted in a small group—10 to 25 people. In larger groups where participants are selected from a theatre audience for example, the danger is not so great.

Care in Small Crowds

Generally speaking, any quiz program originating remotely, wherein the group is small, and wherein no arrangement exists for investigating the background of participants, should be discontinued. Included in this classification are all such productions as man-on-the-street interviews, airport interviews, train terminal interviews, and so forth.

In all studio-audience type quiz shows, where the audience from which interviewees are to be selected numbers less than 50 people, program conductors are asked to exercise special care. They should devise a method whereby no individual seeking participation can be **GUARANTEED PARTICIPATION.**

(c) Forums and interviews. This refers specifically to forums in which the general public is permitted extemporaneous comment; to panel discussions in which more than two persons participate; and to interviews conducted by authorized employees of the broadcasting company. Although the likelihood of exploitation here is slight, there are certain forums during which comments are sought "from the floor," or audience, that demand cautious production.

(d) Commentaries and descriptions. (Ad lib). Special events reporters are advised to avoid specific reference to locations and structures in on-the-spot broadcasts following air raids or other enemy offensive action. Both such reporters and commentators should beware of using any descriptive material which might be employed by the enemy in plotting an area for attack.

THE BROADCASTER IN SUMMARY, IS ASKED TO REMEMBER THAT THERE IS NEED FOR EXTRAORDINARY CARE ESPECIALLY. IN CASES WHERE HE OR HIS AUTHORIZED REPRESENTATIVE IS NOT IN FULL CONTROL OF THE PROGRAM.

III

Foreign Language Programs

It is requested that full transcripts, either written or recorded, be kept of all foreign language programs; it is suggested that broadcasters take all necessary precautions to prevent deviation from script by foreign language announcers and performers.

Miscellaneous

From time to time, the Office of Censorship may find it necessary to issue further communications, which will either interpret certain existing requests, amend or delete them, establish new ones or cover special emergency conditions.

These communications will be addressed to managers of radio stations and networks. They should have preferential handling and it is therefore advisable that certain alternate executives be appointed to execute them in the absence of the regularly constituted authority. All such communications will be coded in numerical order, i.e.: R-1; R-2; R-3; etc. Stations are advised to keep them in careful filing order.

The American broadcasting industry's greatest contribution to victory will be the use of good common sense. Too frequently radio in general instead of the individual offender is blamed for even the most minor dereliction. If material is doubtful, it should not be used; submit it to the Office of Censorship for review. Free speech will not suffer during this emergency period beyond the absolute precautions which are necessary to the protection of a culture which makes our radio the freest in the world.

Broadcasters are asked merely to exercise restraint in the handling of news that might be damaging, for the Army behind the Army represents a great force in the war effort. Radio is advised to steer clear of dramatic programs which attempt to portray the horrors of combat; to avoid sound effects which might be mistaken for air raid alarms. Radio is one of the greatest liaison officers between the fighting front and the people. Its voice will speak the news first. It should speak wisely and calmly. In short, radio is endowed with a rich opportunity to keep America entertained and interested, and that opportunity should be pursued with vigor.

AGRICULTURE AND THE RADIO

By Wallace Kadderly,

Chief of Radio Service, U. S. Department of Agriculture

THE part that agriculture is taking in the war has been recognized in a vast production program, "Food For Freedom," under the leadership of President Roosevelt and Secretary of Agriculture Wickard. Agricultural radio, as an important cog in this campaign, stems out from the Department of Agriculture's radio division, which is acting as a focal point from which this work originates. In peace-time the farmer has learned the value of the farm radio, which in these times of emergency has become immeasurable. The character, quality and amount of farm service rendered by radio in the past—when the aim was simply to promote individual gain and national progress—bodes well for the service this year and in the future—while our existence as a free nation is at stake.

Farm Radio Service

Throughout the nation, more than 600 of the some 900 stations present regularly scheduled agricultural information in cooperation with the U. S. Department of Agriculture and the cooperating Federal-State Agricultural Extension Services. Extent of Farm Radio is indicated by the following air activity during 1941-1942:

90 to 100 stations—National Farm and Home Hour, Blue Network. Fifteen minutes of farm and home information presented Monday through Friday by Department of Agriculture.

11 to 13 stations—Western Agriculture, western regional leg of The Blue Network. Fifteen minutes of information presented Monday through Friday by Department of Agriculture and the Land Grant Colleges in the Far Western States.

50 to 60 stations—agricultural broadcasts directed by station's own full-time farm program directors, using manuscript information, transcriptions, and live talent programs prepared by Department of Agriculture and Extension Services.

433 stations — farm market reports

supplied by Department's Agricultural Marketing Service.

420 stations — Farm Flashes, syndicated manuscript service of agricultural information prepared by the Department; released to stations in 42 States through State Extension Services (many of which add material of their own) and in 6 States direct to stations.

242 stations—Homemakers' Chats, five-days-a-week, syndicated manuscript service containing information on foods, nutrition, and home management, prepared by the Department, released in 14 States through State Extension Services and in 34 States direct to stations.

12 stations — 15-minute daily except Sunday programs by the New England Radio News Service, which is sponsored by Department agencies, State Departments of Agriculture, and certain Extension Services in New England.

19 stations—daily except Sunday 15 minute script program by the New England Radio News Service.

CBS Country Journal, presented nationally, provides time frequently for Department speakers and uses considerable information supplied by Department agencies.

Conclusion

This is not a complete list of station and network cooperation. State and county representatives of the Department agencies, and the Federal-State Agricultural Extension Services, prepare and present programs on many individual stations and on some regional and State networks. For example, 256 stations provide time for programs by county extension agents. And in 33 States the State extension services are presenting programs regularly over a station or network covering all or a major part of the State.

The Department welcomes the opportunity to cooperate with any station that desires to provide its listeners with farm and home information.

JEAN HERSHOLT

Fifth Year

as

"DR. CHRISTIAN"

CBS FOR VASELINE PRODUCTS

FOR A UNITED HEMISPHERE

By Sylvester L. Weaver, Jr.,

Director, Radio Section, Office of Coordinator of Inter-American Affairs

OUR national defense and the successful prosecution of the war requires a united people in our own land, but without a united hemisphere, we still stand imperiled. The southern republics of the western world have been under a propaganda barrage from the Axis for almost ten years. The insidious Nazi line has been blasted from radio speakers in every country, and until recently, we have made no attempt to combat it. Today, the vitality of radio is being added to the general effort to show the southern democracies that their cause and ours are inseparable, that our destinies are interlocked. The success of the "Good Neighbor" policy has already been felt in the swing of the southern republics to our side in the war. Today, over a hundred stations in Latin America carry impartial AP and UP news daily, replacing the admittedly biased Trans-Ocean news delivered free from Berlin. American advertisers sponsor these broadcasts.

U. S. International Networks

Today, three international radio chains are operating in Latin America, and in their development lies the possibility of a revolution in broadcasting in the southern republics such as followed the creation of chain broadcasting in this country. For the first time, the people of the other Americas will hear regularly international events, great attractions, world famous personalities. Network radio should be the beginning of real internationalism in this hemisphere.

Our operations in the Radio Section of the Office of the Coordinator of Inter-American Affairs, are two-fold. We must increase the flow of pro-American shows to reach more and more people over more and more stations in Latin America; and we must use radio in this country to gain an aroused and enthusiastic public opinion for the Good Neighbor policy. Our job in the U. S. is mainly one of coordination, stimulation and service.

OCIA Activities

Bulletins of information, special event scripts, some transcriptions, are sent to the local stations weekly. We work with networks in the production of features with a Latin American direction, and with agencies, advertisers, and artists for the use of topical material about our southern neighbors. All operations in the U. S. are based on a realistic approach. The material we send out must be timely, must be good radio. Material for artists must be exclusive. Since radio reflects the American scene, and since today the American scene reflects a real interest in the southern republics, then we must supply the material that radio wants and needs.

In the southern republics, our problems are more difficult. Betting on every horse in the race, we are placing shows point-to-point over commercial facilities, sending transcriptions to local stations, urging program service companies to expand their efforts, getting advertisers to use larger appropriations in Latin America, working to improve short wave program output and station facilities, cooperating with the U. S. networks in Latin America for better shows, offering script service to local stations.

The U. S. campaign is under way, still far short of our objectives. Most readers will have felt our presence by now, and can expect more from us in the future. We want more and better shows about Latin America over U. S. facilities, want more interesting and arresting material delivered by more artists. Only thus can we get more information about, more understanding of, more respect for the people of the other Americas. Radio can play a major part in creating a hemispheric understanding and a linking of the destinies of the Americas, no matter what the obstacles may be.

The Nation's Outstanding Transcribed Shows

★ "THE MEAL OF YOUR LIFE"

A half-hour transcribed (by World Broadcasting) show featuring such outstanding name personalities as ELSA MAXWELL, GERTRUDE LAWRENCE, ILKA CHASE, BURGESS MEREDITH, GEORGE JESSEL, PAUL LUKAS, BORIS KARLOFF, and many others. A different famous guest star appears on every show, supported by an outstanding cast of Broadway and Hollywood talent. A merchandising deal goes with the show that costs the sponsor **ABSOLUTELY NOTHING** . . . in fact, the merchandise give-away is, itself, included **at no cost**.

★ "RADIO THEATRE OF FAMOUS CLASSICS"

A half-hour transcribed (by World Broadcasting) dramatization of the world's greatest classics. De Maupassant, Stevenson, Zola, Ibsen, and Wilde: these are your writers. Each show is complete in itself, brilliantly produced and directed with an outstanding cast, and adapted for radio by today's foremost radio writers. The merchandising campaign included in the cost of this show consists of a give-away of a 500-page cloth-bound book of the collected works of each author. The campaign and books are **GRATIS TO THE SPONSOR**.

★ "CURTAINS UP FOR VICTORY"

presented by

THE AMERICAN THEATRE WING WAR SERVICE
(Radio Division)

A half-hour transcribed (by World Broadcasting) show which, without question, is the dream of every radio sponsor. The biggest names of stage, screen, and radio are starred in these half-hour productions which will be radio adaptations of famous American plays, written by the most outstanding playwrights in the country, and directed by radio's most competent directors. The net proceeds of the sale of this program are to be turned over to The American Theatre Wing War Service, Radio Division, for their allied war charities.

★ "FAMOUS FATHERS"

A fifteen-minute transcribed (by World Broadcasting) show that has been tested and proven on more than one hundred stations throughout the country. This program features Howard Lindsay (as master of ceremonies), the star and co-author of "Life With Father." Each week Howard Lindsay has as his guest a famous American father who tells of some of the outstanding events in his life, and there is a dramatization of these events with the guest star playing his own role. The guests are stars of stage, screen, radio, and many other fields. Success stories on this program are available upon request.

Audition transcriptions are available on all these shows.
(A \$5.00 deposit is requested on all auditions; this amount is refundable upon return of the transcription).
Brochures and sample copies of merchandising items are also available upon request. WRITE . . . WIRE . . . TELEPHONE. . .

RADIO editors, writers and critics on newspapers and periodicals throughout the United States, its possessions and in Canada took part in the fifth annual poll conducted by RADIO DAILY.

Tabulations were made on the basis of 10 points for each first choice, 9 points for each second choice and proportionately down the line. All figures represent points out of a possible 1,000.

Original signed questionnaires as returned by the radio editors and the work-sheets used in the tabulation of the votes are carefully preserved by RADIO DAILY. It is regarded as the one authoritative pool of its kind conducted by a radio industry business paper and is presented as a service to the trade, which finds it helpful to have a true cross-section of opinion from the nation's radio editors.

Streamlined for **VICTORY!**

☆ ☆ ☆ With the whistles, the wheels
and the hammers of America's mightiest industries forging the greatest
armament the world has ever known . . . it becomes increasingly im-
portant to maintain morale at the highest possible level to defeat our
enemies on land, on sea and in the air.

. . . — V

With the purchase of NBC's
talent and artists business by NCAC on January 1, 1942, NCAC was
streamlined for Victory!

. . . — V

Booking over 500 major at-
tractions from coast to coast, including top-flight artists and instru-
mentalists of Concert, Radio, Motion Picture, Theatre, Lecture, Ballet
and all other forms of entertainment, the officers and personnel of
NCAC have pledged an all-out effort to provide the best possible music
and entertainment available in the United States today.

THE BUSINESS SIDE OF RADIO

By Tod Swalm, Radio Daily Staff

FOR the radio industry, the coming of war brought both a challenge and an opportunity. A challenge to fulfill in the broadest manner that principle to which the industry is dedicated, "the public interest, convenience and necessity"; and an opportunity to serve in greater measure the cause of humanity throughout the world in transmitting to all peoples that "truth which will set men free." Only an informed people, in possession of all the facts, can govern intelligently and direct their own destiny along the paths of peace and democracy. And to American radio—the only free system of broadcasting in the world—fell the task on Dec. 7 of helping to meet the obligations of a nation at war.

Problems

The coming of war brought new and disturbing problems to the industry, chief of which was the threat to revenue through possible curtailment of advertising plans by industries converted to full war production or hindered in the manufacture of consumer goods through unavailability of vital supplies pre-empted for war needs. Offsetting this, however, was the promise of continued advertising to maintain brand names, the expected entry into the national field of new products and stepped up advertising efforts for products unaffected by priorities both seeking to obtain greater shares of the expanding purchasing power of the nation resulting from the stimulus of full scale war production.

A further threat was the restriction placed on erection of new physical equipment, but it was indicated by the Government that replacement goods would continue to be made available. In this respect, the industry was placed by the Government in the first line of civilian defense, both from the instructive and morale viewpoints and its continued if static existence was guaranteed. Early in January, 1942, certain restrictions on programming were laid down by the Office of Censorship as war time precautions, but these for the most part were taken in their stride by the broadcasters.

The year 1941 was a record year in

many respects. Network billings advanced approximately 10 per cent over 1940 reaching a total of roughly \$107,000,000. National spot showed even greater gains, advancing some 29 per cent over the preceding year for an estimated total of \$67,000,000. The total of both categories, \$174,000,000, represented a 17 per cent gain over the 1940 combined total of \$148,656,000. Radio advertising of a purely local nature made equally consistent gains during 1941.

New Developments

New developments were many and varied. Two new facets of the industry, Frequency Modulation and television, entered the competition for the advertising dollar on a full commercial scale, but due to defense requirements and the natural limitations of a new industry made little appreciable inroad on the other media. However, both, and particularly television, were viewed as key industries for after-the-war development to aid in taking up the slack of unemployment resulting from abrupt return to peace time operations.

A third development was the formation of Latin American networks by NBC, CBS and WLWO. These were set up on a large scale with commercial operation getting under way early in 1942. With furthering of cultural relations among the American nations a primary objective of the defense effort, this phase of broadcasting was expected to make rapid gains during the year.

The Job Ahead

Summing up, 1941 was a banner year for the industry, but with the entry of the country into war past achievements and post mortems became purely academic as the industry joined with the nation and our allies in the bitter struggle to preserve and extend freedom. For U. S. radio there could be no compromise in the fight for at stake was the very existence of the American System of Broadcasting.

TEAM-WORK IN RADIO SELLING

By Frank E. Pellegrin, NAB Director of Broadcast Advertising

"LET'S make it easier to buy radio!" That was the rallying cry of sales managers at the 1941 convention of the National Association of Broadcasters. There was plenty of eloquence—and cold, hard facts—to support the plea. Attending the convention were about 200 radio sales managers, and station managers in charge of sales. Most of these had some incident or example to cite. Also attending were national station sales representatives, who were faced with the problem unceasingly in their daily contacts with buyers of radio advertising. And also in attendance were some of the leading agency time buyers of the country—men and women whose sympathies were with radio, but who, through hard experience, had learned that radio of all media is most difficult to buy.

Out of the breakfast meetings, the round-table discussions and the general sessions of that convention came the conviction that the major aim of the NAB Department of Broadcast Advertising for the year would be "to make it easier for more advertisers to buy more time on more stations."

Committee Set-up

The department lost no time in going to work. The new Sales Managers' Executive Committee was quickly appointed, along the lines authorized last spring by the NAB Board of Directors. This new committee is headed by a chairman, chosen at large—Eugene Carr, Assistant Manager of WGAR, Cleveland, a veteran in NAB sales work. On the committee are representatives of small, medium and large stations; Dietrich Dirks of KTRI, Sioux City, Ia.; E. Y. Flanigan of WSPD, Toledo, and John Outler of WSB, Atlanta. Also on the committee are representatives of the three networks: George Frey of the National Broadcasting Co., New York; Arthur Hull Hayes of the Columbia Broadcasting System and WABC, New York; and Linus Travers of the Mutual-affiliated Yankee and Colonial networks and WAAB, Boston.

In each of the 17 NAB Districts a Sales Managers' chairman is appointed by the NAB District director. These 17 serve as a General Committee for the department and assist in the conduct of sales managers' meetings in their respective districts. Calls were sent out for a series of fall (1941) meetings, one in each district. Meantime, the Executive Commit-

tee called a meeting in New York, and invited the Radio Executives Club of New York to send its own committee to work on joint problems. National station sales representatives, who are also associate members of the NAB, were likewise invited. They came, and found that radio sales problems, hitherto confined largely to meetings of NAB sales managers, were likewise their own problems. Out of this and subsequent joint meetings, plus a constant exchange of ideas in personal calls and by correspondence, came a new spirit of team-work—a spirit of give-and-take and mutual understanding on the part of sales managers and agency time buyers.

Accomplishments

Throughout, the emphasis was placed on definite, concrete action. Consequently when we attended the fall series of NAB District Meetings to report on industry sales problems, it was possible to take along a series of definite proposals, specific recommendations, evidence of work already accomplished, and an outline of new problems to be solved. For example, buyers of radio time had long complained that radio rates were difficult to apply to any given campaign. All stations publish a rate card, and *Radio Advertising Rates and Data* carries the published rates of all stations. Yet, the time buyers pointed out that because of lack of standardization and lack of uniformity as to frequencies allowed, discounts, etc., it was extremely annoying and actually difficult to make up a station list for presentation to a client. Therefore they made two specific requests: that stations extend all rates to show the net under each frequency, and that frequency discounts be established on the basis of frequent use, such as 13, 26, 52, 104 and 260. When this one problem, fairly simple in itself and yet a part of the whole job of "making it easier to buy radio," was discussed at the district meetings, broadcasters throughout the country were quick to express their willingness to cooperate. Similarly helpful proposals were made and adopted on such items as weekly program schedules; station coverage maps and surveys; standard contract forms; local and national rates, and many others.

Extensive work was done by the NAB in building a list of manufacturers with dealer-co-operative advertising policies,

believed to be the only such list in existence. Definite steps were taken with agencies to curtail the free-time and pre-inquiry abuses, and to establish the industry-wide policies in this respect that had long ago been adopted by the broadcasters. "The Broadcast Advertising Record," produced jointly by the NAB Department of Research and Department of Broadcast Advertising, was fully explained to the industry as radio's media record, and also as a definite selling tool.

Industry Cooperation

Because of information gained through the new program of cooperation with time buyers and others interested in radio, it was possible to focus the industry's serious attention on the implied and direct threats aimed at the medium by recently formed radio "checking services," and to make these expensive services unnecessary to clients by putting into effect, wherever needed, self-checking systems that would be complete, accurate and thoroughly reliable. A nationwide survey on merchandising policies and practices was conducted and released to the industry. These and many other special activities high-lighted the accelerated program of the Department of Broadcast Advertising during the last nine months

of 1941. Trade studies were published and distributed; a national clearing-house for radio case histories of all types was instituted; numerous special manuals and bulletins were released; helpful speeches and articles on radio advertising were gathered and printed, and "summary tables" on a variety of account classifications, giving factual data never before available, were released to members as an aid to increased sales.

New and pressing problems in radio selling, brought about by the first war period to be faced by American broadcasters, were given searching consideration. Numerous phases of these problems were explored and courses of action were recommended. Of particular significance and value was a special study on "The Effect of Priorities on Radio Advertising," combining the known experiences of England and Canada with the best American thought on the subject.

Sales managers were urged to realize as never before that, despite the many grave problems facing American broadcasters—problems related to the war as well as others totally unrelated to it—the most basic and fundamental problem of all is that of maintaining station revenue, in order that the free American system of broadcasting may be preserved.

RADIO COVERAGE REPORTS SALUTE THE TIME BUYER

TO MOST people, broadcasting is music, entertainers, familiar voices. It is laughter and song, the great American political arena, the world of sports, drama, orchestra and quizz.

But these are only the outer facets of a complex structure of skills and instruments. There is an essential though hidden world of engineers who distribute radio features and the advertising accompanying them.

Of late years, the allocation engineer has been able to produce a dozen radio stations where but one appeared before. He has produced fantastic coverage patterns, suppressing here and expanding there. He has discovered many queer nooks and crannies for new additions to station lists. And, in this process, familiar stations have been rivalled or displaced by new sources of good service or have been eliminated entirely from the listener's visiting list by interference, bringing a new alignment of service to the listener in every population concentration of the land.

The time buyer has dealt patiently and understandingly with this world of increasing confusion and has done his part to keep broadcasting useful and profitable to the advertiser. Although an essential link to successful broadcasting, his work is largely taken for granted by agency clients and often by agency executives themselves. The time buyer's task has hundredfolded in complexity in ten years. In some agencies, time buying staffs are decidedly underpaid and undermanned.

Radio Coverage Reports are the only comprehensive, comparable and uniform source of information on broadcasting distribution for all important communities and for all stations, regardless of affiliation. No agency, conscientious in its service to its clients, up-to-date in its thinking and methods and prepared to meet the even greater confusion and complexity of the coverage situation of the immediate future, operates its radio department without Radio Coverage Reports and a staff experienced and competent to use them. Some of the largest users of radio advertising would not entrust the servicing of their account to any agency which does not have Radio Coverage Reports. They are as essential to the time buyer as the microphone is to the program director.

EDGAR FELIX, *Director*, RADIO COVERAGE REPORTS
18 East 48th Street New York, N. Y.

CHECK-LIST FOR SPOT BUYING AND SELLING

By N. Charles Rorabaugh, President, National Radio Records

A. Coverage

1. Power and Frequency.
2. Directional—if so, what it proves (B).
3. Significance of FCC classification relative to competition.
4. Soil conductivity.
5. Unusual interference situations due to foreign cross channel or other interference.
6. Day vs. night distinctions and differences.
7. Cost per 1000 homes (F).
8. Organization of coverage maps.
9. Comparative importance of markets served vs. other neighboring stations.
10. Coverage statistics relative to population, retail sales, radio homes, farm facts, etc.

B. Facilities

1. Date and make of transmitter.
2. Directional equipment and what it proves (A).
3. Studios—make and condition and location as to public attendance, also seating capacity.
4. Remote equipment permanently maintained (D).
5. Transcription equipment.

C. Affiliations

1. Newspaper or Farm paper.
2. Local organizations of prestige.
3. Is competitor affiliated with any organization tending to limit or bias his operation?
4. With other stations tending to improve management.
5. Importance of individual owner in community.
6. With colleges, universities, boards of trade, government agencies, etc.—indicating excellence of operation (D).
7. History of station and events leading up to and securing its audience acceptance.

D. Programs

1. Network affiliation.
2. Number of network hours.
3. Exclusivity of network in area or duplication of competitors' network area.
4. Surveys and what they say: CAB, Hooper, and others.
5. Various station awards.
6. Outstanding local shows—the names of them and the results from them.
7. Audience mail.

8. Remote hookups permanently maintained: where and what (B).
9. Size of orchestra and production staff.
10. Program and production personnel—who are they and what do they mean locally?
11. Community cooperation and tangible recognition thereof by local authorities.
12. Dominance in any particular type of program; news, sports, etc.
13. Relation of station to accepted outlets in Chicago and New York.
14. Kind of news service and organization of news programs.
15. Special program events or packages to be sold.
16. Special programs appealing to a particular group.
17. Programs produced for networks.

E. Results and Accounts

1. Local prestige accounts.
2. National prestige accounts.
3. Result stories of especial import.
4. Commercial mail—geographic distribution and also by programs (D).

F. Rates

1. Rate card analysis.
2. Competitive advantages in rate card.
3. Are service features packaged separately with package rates?
4. Cost per M homes.
5. Spot vs. network costs.
6. Special combination rates available.
7. Retail and/or National differentials.

G. Promotion and Merchandising

Nature of merchandising service maintained by station:

1. Newspaper promotion.
2. Taxicab covers or signs.
3. Street car and bus posters.
4. Movie trailers.
5. Point of sale promotion.
6. Package stuffers.
7. Pre-Announcements.
8. Letters to trade.
9. Window displays.
10. Theatre displays.
11. Calls on trade.
12. Survey work.

H. Criticism

1. Of Representative: Standing, etc. Nearby conflicts. Character of list out of keeping with a given station.
2. Of Station's sales effort: Promotion.

Through Studio 9 flows the news of the world

Center of a newsgathering organization whose outposts span the meridians, Studio 9 never sleeps. Day and night, over the CBS network, it reports the news to all America—the news that heartens when it is good, that renews determination when it is bad.

From Ankara to Sydney, from Buenos Aires to Moscow, from San Francisco to Singapore, CBS reporters are *there* when it happens. From 56 foreign cities in 1941, CBS broadcast a thousand first hand accounts of world developments. And today, at strategic news points all over the world, CBS men are telling their stories into distant microphones, or reporting their news to general headquarters back in New York.

In twenty-one languages...

the CBS "listening post" plucks from the air the news of the world—news in Japanese, German, Italian, Spanish, Portuguese and Russian and fifteen others. Wherever and whenever news is being made, it is heard and recorded at the CBS listening post.

Out of radio has been born this kind of journalism unknown to past wars. And under the direction of one of the world's great editors, CBS has played an important role—perhaps the major one—in bringing radio journalism to maturity. CBS news men have been called the greatest reporters of our time. Davis, Murrow, Shirer, Brown, Trout, Daly—are names well in the forefront among radio's newsmen. And through them—CBS upholds its now traditional standing as the prime radio news source for the American people.

The Columbia Broadcasting System

RADIO IS BUILDING MORALE

*By Major Jean V. Grombach, 165th Infantry (69th N. Y.)
Morale Officer, 27th Division*

PSYCHIATRY approaches its problem by extremes. Therefore psychiatric consideration of morale begins with the study of demoralized people on the road to panic, terror, and the "nuthouse." Morale outside of psychiatry has a simple and non-lunatic meaning. Morale is "guts." However, in an age of the sound-track and the carrier-wave there can be no courage without conviction.

Morale is mental and vital because modern wars are no longer won—they are lost. Infantry assault is prepared by dive-bombers at six hundred miles per hour. But dive-bombers are preceded by words at 186,000 miles per second.

Today psychiatrist, soldier, and showman agree that morale means conviction, inspiration, confidence, and relaxation.

Powerful Medium

Radio is the most powerful medium, if properly used, to convince every individual through the many millions of radio sets in the continental limits of the United States of his place, responsibility, and rewards, and the like conviction of his fellow-citizens.

Radio is an artistic medium for the inspiration of the individual and all groups in the principles and purposes of Democracy and Democracy's ability to cope with the economic problems of the world more fairly and more effectively than either Communism or Fascism.

Radio is an intimate medium which can teach millions of individuals and hundreds of groups confidence in themselves, in their neighbors, in their leaders, and in their country.

Radio is the entertainment medium that can reach the "mostest" people to relax the individuals and groups from the crises imposed on them by the war and war's responsibilities and sacrifices.

Commercial radio has aided the morale of the Nation through entertainment, the sugar-coating for the messages of everything from soup to nuts and from laxatives to locomotives. Now it can continue to do that as well as convincing and inspiring.

The statement that we are fighting to

make the world safe for Democracy may no longer suffice. The fact that we are not fighting to preserve capital or private monopoly against Socialism or government dictatorship must be actually dealt with on the radio and handled as cleverly and carefully as Germany sold National Socialism in Europe and advertisers sold their products in America.

Army Morale

Radio has been of tremendous importance in Army morale, and in civilian morale which is the greatest single factor influencing military morale. It will not be long, in the writer's opinion, before the government begins programs through the Coordinator of Information aimed to convince and inspire the mass radio audience while other programs of pure entertainment already relax and give confidence. Also, within another year the Army, through the Special Services Branch, should have a program employing the commercial broadcasting principles of cumulative interest, identity through sameness of pattern and effectiveness through entertainment and craftsmanship. These programs will be professional in their presentation and national and international in their scope.

Conclusion

So far Army radio programs have done much locally, but because they are sporadic and radio is cumulative, and because they have bordered on education while radio concentrates on entertainment, none have ever gotten an audience rating of 1.5 per cent nor even a listening audience in the camp from which they initiated of more than 5 per cent.

Now with an entertainment vehicle and with attention to cumulative power and regular days and times of broadcast, an Army program will command real audiences and increase its specific value to Army morale.

Radio in general will probably prove itself before this war is over the greatest single factor in morale throughout the world. From the Arctic to the Antipodes and from Cathay to the Caribbean, it will inspire all to greater effort.

★ RADIO STATION REPRESENTATIVES ★

Radio station representatives have been responsible in no small measure for the phenomenal growth of broadcasting in the past two decades. Their cumulative efforts in selling both spot and network time to national and regional advertisers, in servicing agencies and in supplying pertinent information, availabilities and other data, have contributed much to the industry which, because of its national characteristics, depends on the station representative to perform a most valuable and indispensable service.

1st

**in total advertising lineage
number of radio advertisers
number of exclusive radio advertisers
number of radio insertions**

That's how **ADVERTISING AGE** stacks up for 1941, in maintaining its unchallenged position as the primary promotional medium of the broadcasting field. It is used by more broadcasting companies than any other general advertising publication. It's the preferred medium for contacting the national advertising field.

Here's one reason: Nine readership surveys made by radio stations and other users of the advertising press in 1940 and 1941 have in each instance put **ADVERTISING AGE** in first place. Preferred readership by advertisers and agency executives justifies preference by broadcasters! Would you like to see the evidence supporting these statements?

the **THINKING MEN**

OF ADVERTISING *will see and* *read your message in* **ADVERTISING & SELLING**

These are serious times and demand serious thinking. THINKING MEN read Advertising & Selling because THINKING MEN write Advertising & Selling—the only specialized journal of advertising EXCLUSIVELY DEVOTED to PROBLEM INFORMATION.

Radio Networks and Stations (a total of 21 used space in 1941) know the advantage of reaching the pace setters of advertising—especially at a time when radical readjustments must be made in advertising and merchandising policies for both immediate and long-term results.

EXAMPLES OF HOW ADVERTISING & SELLING HAS FURTHERED THE CAUSE OF RADIO:

1. A & S was the first advertising publication to recognize the legitimate use of radio as an advertising medium. (*Radio's Relationship to Advertising and the Newspaper*, January 28, 1925 issue . . . *How Radio Broadcasting Is Being Used as an Advertising Tool*, April 22, 1925 . . . *Broadcasting's Place in the Advertising Spectrum*, December 16, 1926).

2. Arch Crossley gives A & S credit for proposing a circulation audit for radio—which later developed into the CAB. In *It's Time We Took the "Blue Sky" Out of Air* (October 16, 1929 issue) S. H. Giellerup suggested a plan for a continuing, cooperative checkup on the habits of listeners. This article, according to Archibald M. Crossley in *Taking the Blue Sky Out of the Air* (July, 1939 issue), became the basis for CAB reports.

They also know how this magazine has pioneered in recognizing and sponsoring the legitimate use of radio as an advertising medium . . . and how it continues to focus the attention of advertising and agency executives on radio's major problems and significant trends.

Your present and future sales problems will be easier if the THINKING MEN of advertising are THINKING WITH YOU. Ask us for the complete story of why Advertising & Selling can get the right message across to the right men.

ADVERTISING & SELLING

9 EAST 38th STREET **NEW YORK**

AND ITS MAKERS

*56 YEARS-THE VOICE OF AUTHORITY
IN THE FIELD OF POPULAR MUSIC*

Merril V. Reed. BRANCH OFFICES: 333 N. Michigan Ave., Chicago, Ill., Phone State 1266, C. E. Lovejoy, Manager; 29 East de la Guerra, Santa Barbara, Calif., Phone, 6405, Warwick S. Carpenter, Manager. Sales Management's editorial front is a broad one, embracing all the phases of general management, market analysis, operation of the sales force, use of advertising media and other sales tools, advertising agency relations, consumer research, product design, etc., which fall within the limits of the responsibility of the Director of Sales of a business concern. Specifically this publication publishes from time to time articles on the use of radio as an advertising medium; stories (in the Media Department) on the latest news in radio and network development; histories of stations' and networks' growth. The publication issues an annual survey of buying power in April for the purpose of presenting statistical information for evaluating markets. Survey provides data on current family and per capita income by counties, cities and states, together with estimates on retail sales and other market factors for all population units.

FREC Service Bulletin

MONTHLY. Federal Radio Education Commission, c/o U. S. Office of Education, Washington, D. C. Editor, (Mrs.) Gertrude B. Broderick. This publication is distributed free to broadcasters and educators. Its purpose is to serve as a medium of the exchange of information concerning education through radio on a national scale. Activities of all educational groups using radio are reported.

General Radio Experimenter

MONTHLY. 30 State St., Cambridge, Mass. Phone, TRObridge 4400. This publication is a house organ for the General Radio Co. and contains descriptions of the latest radio and electrical measuring instruments and their applications. The appeal is to scientists, engineers and technicians engaged in development, research and maintenance of radio and industrial electrical equipment.

The International Musician

MONTHLY. 39 Division St., Newark, N. J. Phone, HUmboldt 2-3400. Publisher-Editor, Fred W. Birnbach; Radio

Broadcasters . . .

- To **SELL TIME ON YOUR STATIONS** YOU must reach those executives who can *buy time*—and are interested in buying—today—and tomorrow . . . Tell them **YOUR Station's Market Sales** story — in the pages of **The ADVERTISER**—you'll register **SALES INTEREST!**
- The field of prospects for the great broadcasting industry is a comparatively limited one. **The ADVERTISER** goes **DIRECTLY** to these very executives—the nation's advertisers and their advertising agency executives who **BUY time!**
- To reach this rich prospect list a regular schedule in **The Advertiser** at 12 time rate is only \$160. per page. One time rate per page is \$185.

What **BUYERS** of **TIME** say about **The ADVERTISER** . . .

*"At least six in our office read **The ADVERTISER**, and I find it one of the best magazines that comes to my desk. Congratulations also on your annual edition, **MARKETS of AMERICA**, which we use repeatedly throughout the year!"* writes Robert B. Brown, Asst. V. P. and Adv. Mgr., Bristol-Myers Co., New York.

*"I read **The ADVERTISER** every month, and it is read by many other members of our staff. Also, congratulations on **MARKETS of AMERICA**, which we find very valuable in studying market conditions,"* writes Miss Helen Kennedy, Radio Adv. Dir., The Kroger Grocery and Baking Co., Cincinnati.

111 West Washington, Chicago, Ill.
Phone, Franklin 5180
Manager.....M. F. Hayes
Services offered: Nationwide service developing factual information for advertisers, both spot and network; performance reports on individual radio stations throughout the nation. Field organization is composed of 458

National Radio Checking Service, Inc.

- **WHAT WE DO**—Our reports take the "guess-work" out of individual radio station performance.
- **HOW OUR SERVICE WORKS**—Our staff of 450 trained checkers are stationed throughout the country to check programs (spot or show) at point of origin. Our reports can be made from any town or city in the U. S. with a broadcasting station.
- **WHY OUR SERVICE WORKS**—Even in the "best of" radio stations, discrepancies occur. Here are some of the most common:
 - Show or spot omitted
 - Portion of commercial omitted
 - Competitive products advertised next to yours
 - "Garbled" talk or interruption
 - Transcriptions ineffectively handled
 - Your Spot "sandwiched" between others
 - Local station "rushing" network cue

National Radio Reports are *accurate* and *inexpensive* . . . and sent to you *weekly*.

POLICY OF F. T. C. IN RADIO ADVERTISING

By P. B. Morehouse,

Director of Radio and Periodical Division of Federal Trade Commission

FOR the purpose of effecting a more direct and expeditious method of handling certain cases involving false and misleading advertising, violative of the provisions of the Federal Trade Commission Act, as amended, the Commission established its Radio and Periodical Division. Through this Division, advertisers, publishers, broadcasting stations, and advertising agencies can deal directly with the Director, with a view to reaching an agreement in such cases as are appropriate for negotiating a stipulation, thereby disposing of the issues involved and obviating the necessity of formal trial.

By this procedure the advertisers are afforded an opportunity informally to present for consideration such evidence relating to the advertising claims questioned by the Commission as they may care to submit, with a view to determining whether or not a revision of their advertising is required, and to stipulate the discontinuance of any representations which, after a consideration of all the evidence, are determined to be false or misleading. In most cases the results obtained by this procedure are as effective as those that could be accomplished by the issuance of cease and desist orders; expensive litigation both to the advertisers and the Government is thereby avoided. In this phase of the Commission activity, its only objective is to prevent false and misleading advertisements. It does not undertake to dictate

what an advertiser shall say, but merely indicates what he may not say under the law.

Radio Advertising

The Commission, in its systematic review of radio advertising, issues calls to individual radio stations, generally at the rate of four times yearly for each station. However, the frequency of calls to such individual broadcasters is varied from time to time, depending principally upon transmittal power, the service radius or area of specific stations, and the advertising record of certain types of stations, as disclosed in analyses of previous advertising reviews.

National and regional networks respond on a continuous weekly basis, submitting copies of commercial continuities for all programs wherein linked hook-ups are used involving two or more stations.

Producers of electrical transcription recordings submit monthly typed copies of the commercial portions of all recordings produced by them for radio broadcast. This material is supplemented by periodic reports from individual stations listing the programs of recorded commercial transcriptions and other data.

During the fiscal year ended June 30, 1941, the Commission received 857,890 copies of commercial radio broadcast continuities, amounting to 1,737,181 pages of typewritten script. These comprised 1,197,199 pages of individual station script, 528,820 pages of network script,

☆ ☆ ☆ *Radio In Defense* ☆ ☆ ☆

and 10,162 pages of commercial recorded script. The staff examined 871,909 commercial radio broadcast continuities, amounting to 1,749,640 pages of type-written script. These comprised 519,640 pages of network script, 1,219,950 pages of individual station script and 9,967 pages of script representing the built-in commercial portions of transcription recording productions destined for radio broadcast, through distribution of multiple pressings of such recordings to individual stations. An average of 5,755 pages of radio script were read each working day. From this material 24,535 commercial broadcasts were marked for further study as containing representations that might be false or misleading.

Industry Cooperation

In general, the Commission has received the helpful cooperation of the 3 nation-wide network chains, 13 active regional networks, and transcription producers engaged in preparing commercial radio recordings, in addition to that of some 781 active commercial radio stations, 491 newspaper publishers, and 533 publishers of magazines, farm journals and trade publications, and has observed an interested desire on the part of such broadcasters and publishers to aid in the elimination of false and misleading advertising.

Procedure in Advertising Cases

If it appears that a published or broadcast advertisement coming to the Commission's attention may be misleading, a questionnaire is sent to the advertiser, and request is made for a sample of the product advertised, if this is practicable, and the quantitative formula, if the product is a compound. Copies of all advertisements published or commercial continuities broadcast during a specific period are also requested, together with copies of all booklets, folders, circulars, form letters, and other advertising literature used. Upon receipt of this data, the sample and formula are referred to

the Commission's Medical Advisory Division or to an appropriate technical agency of the Government for a scientific opinion. Upon receipt of the opinion, a list of such claims as then appear to be false or misleading is sent to the advertiser, along with pertinent portions of the opinion. The advertiser is extended the privilege of submitting evidence in support of his claims; he may answer by letter or, upon his request, may confer with the Commission's Radio and Periodical Division in person or through counsel.

If, after a consideration of all available evidence at hand including that furnished by the advertiser, the questioned claims appear to be true, the division reports the matter to the Commission with the recommendation that the case be closed. If it appears from the weight of the evidence before it that the advertising is false or misleading, the division refers the matter to the Commission with recommendation either that the complaint be issued or the case be returned to the Division for negotiation of a stipulation, provided it is one appropriate for stipulation procedure and the advertiser desires to dispose of it by such voluntary agreement to cease and desist from the use of the acts and practices involved.

If the Commission so authorizes, the division prepares a stipulation and forwards it to the advertiser for execution. Should he object to any of its provisions, he may discuss them by mail or in person. If and when he agrees upon the terms of the stipulation and signs and returns it, the matter is again reported to the Commission with recommendation that the stipulation be accepted and the case closed without prejudice to the right of the Commission to reopen the matter at any time the facts so warrant. If the Commission accepts and approves the stipulation, the advertiser is required to submit within 60 days from the date of acceptance a report in writing showing the manner and form in which he has complied and is complying with the provisions of his agreement.

TECHNICAL PROGRESS IN 1941

By George P. Adair, Assistant Chief Engineer of FCC

DURING the year 1941 there were several developments in broadcasting of considerable interest which are discussed briefly below.

North American Regional Broadcasting Agreement

The first and most important development, in so far as standard broadcasting is concerned, was the placing of the North American Regional Broadcasting Agreement into effect on March 29, 1941. On that date some 780 United States stations, as well as the majority of Canadian, Cuban and Mexican stations, changed frequencies in accordance with the assignments previously agreed upon with no difficulty worthy of note. This is considered as a high tribute to the co-operation and ability of the licensees, their personnel, equipment manufacturers, frequency monitoring services, and consulting engineers. This is particularly true in view of the large number of directional antennas involved. Following this shift, there were a few cases where the interference was greater than previously. However, the majority of these cases were corrected immediately and, in general, interference free reception was greatly extended.

Technical Developments

The number of stations employing directional antennas has continued to increase and, in general, the complexity of these has also increased. The extended use of directivity in the vertical plane, as well as in the horizontal plane, has necessitated the adoption of new methods of making proof of performance measurements as well as monitoring procedure for the maintenance of such patterns. Many of the patterns now employed have such a high degree of directivity that the location of other structures in the vicinity, particularly radio towers, make it

extremely difficult to establish and maintain these patterns. It has been found in many cases that where radio stations are located less than approximately five wavelengths apart (for the lowest frequency concerned) interaction develops so that a change in any of the antennas affects the others. It is also necessary in such cases to bury the power lines, telephone lines and transmission lines as well as take other precautions.

High Frequency Broadcast Service

At the close of 1941, the Commission had authorized 60 high frequency (frequency modulation) broadcast stations (43,000 to 50,000 kilocycles). A substantial number of stations commenced regular program operations, in most cases using temporary installations due to inavailability of equipment. Six stations are operating in the New York area. Available information indicates that the public has a total of approximately 200,000 receivers equipped for FM reception.

While no fundamental technical developments have been released during the year, substantial strides have been made by the manufacturers and broadcasters in the realization of FM as a public service.

The Commission has authorized nine noncommercial educational broadcast stations, employing frequency modulation, to operate in the band 42,000 to 43,000 kilocycles, adjacent to the commercial FM band, which can be received on the same receivers. Increased use of radio for class room and adult education is made possible by this class of station.

Television Broadcast Service

The year 1941 will be a red-letter year in television. In a hearing on March 20, 1941, the Commission found that the industry was in agreement that television was ready for standardization and sub-

sequent commercialization and adopted the transmission standards proposed by the National Television Systems Committee and established the commercial television broadcast service. The standards provide some alternatives of transmission but are such as to permit reception on all modern receivers. Further investigations have been and are being made with the view of further restricting the standards for most efficient system operation. Color television has been the subject of considerable investigation. As of December 31, 1941, the Commission has authorized nine commercial television broadcast stations. Three of these were operating on 15 hour per week schedules.

Much of the television research work conducted throughout the years has resulted in developments which have found application in apparatus being used by the military naval forces. Considerable demand upon personnel trained in television technique and manufacturing facilities for the war effort has resulted in curtailment of activity in television.

Television is now out of the laboratory and should assume an important social and economic role in our post-war national life.

International Broadcast Service

International broadcast stations, in the increased tension of world affairs, have assumed a vital function in the dissemination of accurate information and combating enemy propaganda. There are 12 international broadcast stations in regular operation at the present time, two additional stations have been authorized. All but three stations have completed construction for operating powers of at least 50 kw, as required by the Commission's Rules. In addition, stations are required to "beam" the transmitted power to the foreign country or countries for which the program is designed with a power gain of at least 10. In addition to increases in power, improvements in ex-

isting antenna systems have been made and additional system installed all of which has improved the world-wide coverage of these stations.

ST Stations

In order to provide high quality and auxiliary program channels between the studio and transmitter of high frequency (FM) broadcast and international broadcast stations, the Commission allocated frequencies in the band 330,000-346,000 kilocycles for use by ST stations which employ frequency modulation and highly directive directional antennas. These are assigned on an experimental basis in so far as the licensees are required to conduct experimentation relative to antenna design.

Conclusion

In view of the present emergency, it is impossible to predict the course of technical trends in broadcasting. However, there will undoubtedly continue to be developments as in the past and there will necessarily be certain adjustments in order to meet the needs of defense. It is anticipated that many new developments will result from the war requirements of communication which can later be advantageously applied to broadcasting and conversely many of the techniques of present-day broadcasting will prove valuable to the armed forces.

The fact that the materials required for radio equipment include many of those required for vital defense purposes and that all or practically all of the production of radio manufacturers is required for defense purposes will necessarily retard the expansion of civil radio. However, when the emergency is over the vast capacity of these manufacturers will be available for the production of radio products for civilian needs which will undoubtedly play a vital part in readjustment and rehabilitation. The proper gearing of war industries to civilian needs will be one of the most important factors in preventing the aftermath being more disastrous than the war itself and should not be lost sight of in the more immediate problems.

—ADMINISTRATIVE— PROCEDURE OF F. C. C.

A summary of the administrative procedure of the Federal Communication Commission reviewing its duties and activities, the administrative setup, departments and their functions.

Commission

The Federal Communications Commission is composed of seven Commissioners appointed by the President, subject to Senate advice and confirmation. The President also designates the Chairman. The normal term of a Commissioner is seven years. A Commissioner is not permitted to engage in any other business during such tenure. Under terms of the creative act, "not more than four Commissioners shall be members of the same political party."

The Commission functions as a unit in administrative matters. It retains direct supervision of all activities but delegates certain routine responsibilities. Committees, consisting usually of three members, have made special studies and supervised particular undertakings.

The Commission normally holds at least two en banc meetings each week. On Tuesdays it acts on various matters relating to radio, and telegraph and telephone. At such time the Commission considers—

Applications for construction permits for new stations or modifications of existing construction permits or licenses involving changes in frequency, power, transmitter and studio sites, or change in name of licensee.

Applications for voluntary or involuntary control of company or corporation holding license.

Petitions for rehearing.

Dismissal of applications.

Retiring of applications to closed files.

Adoption of new rules or amendments to existing rules.

Suspension of amateur or operator licenses.

Authority to supplement existing facilities or telephone or telegraph companies.

Extension of temporary authority to common carriers to communicate with foreign countries.

Other common carrier matters, such as investigation and suspension of tariffs.

Admissions to practice.

On Wednesdays the Commission acts on docket cases, that is to say, cases which have been accorded public hearings. Where the Commission, upon examination of a particular broadcast application, is unable to determine that a grant will serve the public interest, the case is designated for formal hearing upon specific issues, and all persons interested are given opportunity to be heard. After a hearing has been held, "Proposed Findings of Fact and Conclusions" are issued by the Commission. The parties are allowed additional time in which to file exceptions and to request oral argument before final decision is made. If no exceptions or requests for oral argument are received, the Commission generally issues an order adopting and making effective its proposed decision. If exceptions are filed, the Commission may, after oral argument, affirm, modify, or reverse the proposed findings. This is the final determination unless there is a petition for rehearing or unless there is litigation.

Commissioners

In addition to en banc meetings, the Commissioners individually preside at particular hearings when designated to do so by the Commission. Each month the Commissioners, in rotation, are allocated other specific duties. These assignments are changed, thus permitting each Commissioner to be directly informed on various phases of Commission activity, at the same time conserving the principal portion of each Commissioner's time for consideration of matters involved in action by the Commission as a whole. In any month one Commissioner will act upon applications for requests for special temporary broadcast authorizations. Another will consider motions or petitions in cases designated for formal hearing, final disposition of which is, of course, reserved for the Commission as such.

Such authorization is covered by the following part of Administrative Order No. 2:

"A Commissioner, to be named by subsequent supplements to this Order, is hereby designated to hear and determine, order, certify, report or otherwise act upon:

(a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission, and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 to 1.256, inclusive, of the Commission's Rules of Practice and Procedure; provided further that when one or more members of the Commission have been designated to preside at a hearing such Commissioner or Commissioners shall be authorized and empowered to fix the time and place such hearing shall be held; and such motions, petitions, or matters arising in connection with such hearing shall be handled by the Commissioner or Commissioners designated to preside, subject to the provisions of Sections 1.232, 1.252, 1.254, 1.255, and 1.256 of the Rules of Practice and Procedure; provided further that in the absence of the individual Commissioner designated to preside at a hearing, or his inability to act or pass upon such preliminary matters, they shall be referred to the presiding officer of the Motions Docket.

(b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

"Any party affected by any order, decision, or report of any individual, board, or individual Commissioner, to whom authority is delegated under the provisions hereof, may file a petition for rehearing, as provided by Section 1.271 of the Commission's Rules of Practice and Procedure, before the Commission, and every such petition shall be passed upon by the Commission."

Departments

In considering all types of cases the Commission is aided by recommendations of its technical and administrative units. The staff consists of four departments:

The Law Department handles litigation

and the legal aspects of licensing, regulation, and general administration, including legislation, rule-making and international matters, and conduct of investigations.

The Engineering Department attends to the engineering phases of the various services, and their regulation, supervises the field staff, participates in international and governmental conferences, and conducts technical research.

The Accounting, Statistical, and Tariff Department looks after accounting regulation, tariff analysis and rate regulation, and compiles statistics pertaining to these and other Commission functions.

The Secretary's Office has charge of matters of internal administration, handles the issuance of licenses, maintains records, and is responsible for supplying official copies of the Commission's order and decisions.

Rules Committee

The heads of these departments meet regularly, on Thursdays, as a Committee on Rules to consider proposals for new or revised rules and regulations, or changes in administrative procedure. This Committee can initiate such study or make comment or recommendation upon matters referred to it by the Commission. The Committee on Rules has functioned actively since 1937, and has done much to coordinate administrative procedure.

Administrative Board

In 1940 Commission work was further expedited by creation of an Administrative Board, consisting of the General Counsel, Chief Engineer, Chief Accountant, and Secretary. This board is authorized to pass upon routine detail in accordance with rules and policies previously established by the Commission. Administrative Order No. 2, as revised, gives the Administrative Board authority to "determine, order, certify, report or otherwise act upon" the following matters:

"(a) All applications for the Coastal, Marine Relay, Aviation, Emergency and Miscellaneous services, except those falling under paragraphs (1), (2), and (3) of this Order;

"(b) Upon all radio matters of every character (except broadcast, and cases falling under paragraphs (1), (2) and (3) of this Order) within the Territory of Alaska;

- “(c) Upon all applications for experimental authorizations except: Class II experimental stations to authorize experimentation directed toward the establishment of new services;
- “(d) Upon all broadcast service applications as follows: for licenses following construction which comply with the construction permit; applications for construction permit and modification of construction permit involving only a change in equipment; applications for extensions of time within which to commence and complete construction; applications to install frequency control equipment; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site not involving any substantial change in service area; applications for relay broadcast stations; and requests for authorization to rebroadcast under the provisions of Section 3.94 of the Rules and Regulations;
- “(e) Upon all applications or requests for special temporary authorization other than those falling under paragraphs (1), (2), (3) or (5) of this Order;
- “(f) All applications or requests for emergency and renewal exemptions from the provisions of Section 352 (b) of the Act;
- “(g) Upon all uncontested proceedings involved in:
- (1) the issuance of certificates of convenience and necessity and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act;
 - (2) Applications for existing licensees for instruments of authorization for the Fixed Public or Fixed Public Press radio services, except applications involving (1) new points of communication, (2) changes in transmitter location other than local in character, (3) assignment of additional frequencies, or (4) involving change of policy by the Commission, or the

establishment of a new type of service;

- “(h) Upon requests for inspection of records under provisions of Section 1.5(c) of the Commission's Rules of Practice and Procedure.”

Actions taken by the board are reported in writing each week to the Commission at its regular meeting. Applications or requests for special temporary standard broadcast authorizations are referred to the board for recommendation and reference to a Commissioner designated to act in such matters.

The same order which created this board (Administrative Order No. 2) further speeded procedure by allowing the Secretary, Chief Engineer, and Chief Accountant to handle specific matters. Its particular provisions with respect to these officials follow:

Secretary

“The Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act, upon:

- (a) all applications for operator licenses or renewals thereof; and
- (b) all applications for amateur and ship stations or renewals thereof; and
- (c) all applications for aircraft station licenses or renewals thereof where the applicant is or has been the holder of a station license within the preceding year;

“The Secretary of the Commission is hereby designated to enter the appropriate final order of the Commission in all cases involving applications for radio station authorizations in which proposed findings and conclusions of the Commission have been issued pursuant to the provisions of Section 1.231 of the Commission's Rules of Practice and Procedure and in which no exceptions have been filed within the time prescribed in said section.”

Chief Engineer

“The Chief Engineer of the Commission is hereby designated to determine and act upon all applications and requests and to make appropriate order in letter form for the signature of the Secretary of the Commission in the following matters:

- (a) temporary operation without specified items of equipment, or with temporary, substitute or auxiliary equipment;
 - (1) operation without an approved frequency monitor;
 - (2) operation without an approved modulation monitor;

- (3) operation without thermometer in automatic temperature control chamber;
 - (4) operation without antenna ammeter, plate voltmeter or plate ammeter;
 - (5) operation with substitute ammeter, plate voltmeter or plate ammeter;
 - (6) operation without temporary antenna system;
 - (7) operation with auxiliary transmitter as main transmitter;
- (b) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application;
 - (c) where formal application is not required, application for new or modified equipment or antenna system;
 - (d) change of specifications for painting and lighting antenna towers where formal application is not required;
 - (e) operation to determine power by direct method during program test period;
 - (f) relocation of transmitter in same building;
 - (g) operation with reduced power or time under Sections 3.57 and 3.71;
 - (h) approval of types of equipment as to compliance with outstanding rules and standards;
 - (i) all authorizations for equipment and program tests, or extensions thereof, where it appears that compliance has been had with the terms of the construction permit;
 - (j) denial of requests for equipment and program tests where specifications of construction permit have not been met;
 - (k) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorizations it appears that the terms of the construction permit have not been met;
 - (l) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission;
 - (m) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications);
- (n) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location;
 - (o) all authorizations for special operation necessary to facilitate equipment, program and service tests or to comply with technical requirements specified in authorizations, orders, rules or releases."

Chief Accountant

"The Chief Accountant of the Commission is hereby designated to determine, order, certify, report or otherwise act upon:

- (a) administration, interpretation and application of regulations promulgated by the Commission pursuant to Section 220 of the Act, relating to accounts, records, and memoranda to be kept by carriers subject to the jurisdiction of the Commission;
- (b) applications for extensions of time in which to file annual, monthly, and special reports required by the Commission pursuant to Section 219 of the Act;
- (c) administration, interpretation and application of orders or rules of practice and procedure promulgated by the Commission relating to financial and statistical data of standard broadcast stations and broadcast networks or chains, including applications for extensions of time in which to file financial and statistical statements and reports.
- (d) all matters arising in connection with the administration of tariff regulations promulgated by the Commission pursuant to Section 203 of the Act, and in connection with the administration of this section in so far as it relates to the modification of requirements thereof or made pursuant thereto, as authorized in particular instances by subsection (b) thereof, and to the rejection of tariffs as authorized by subsection (d) thereof;

and, where appropriate in carrying out the foregoing, to make orders in letter form for the signature of the Secretary of the Commission."

Procedure

The procedure under which hearings are conducted and the administrative and adjudicative processes leading up to final decisions have been revised in the interests of public convenience as well as smoother Commission functioning. From the standpoint of internal administration, these changes have vastly simplified and expedited the decision process. This speeding up has not been at the sacrifice of complete and deliberate consideration of every element of the various type of proceedings the Commission is called upon to decide. On the contrary, the standards of "fair play" in reaching administrative determinations, as laid down by the courts, have been fully met.

Some of the outstanding practice and procedure changes may be mentioned briefly. The Communications Act requires that the Commission grant radio authorizations without hearing if it is able to determine from the information before it that the authorization would serve public interest, convenience and necessity. Formerly such grants were made, in broadcast cases, subject to the right of interested parties to file protests within a 30-day period. The previous policy had been to require the holding of hearings in virtually all such cases, which frequently involved needless expense to the parties without disclosing information of a substantial character not already known to the Commission. Under present practice, when the Commission is satisfied from the information before it that a grant is warranted, it proceeds to authorize the issuance of the license, which grant is final rather than conditional in its terms. The rules fully protect the interests of persons other than the applicant by providing for the filing of petitions for reconsideration within a 20 day period.

Formerly it was the practice of the Commission to include in the issues upon which hearings were to be held, not only those matters on which the Commission entertained doubt, but issues which required affirmative proof of all items contained in the applications. As a result the task of preparation for hearings was rendered extremely burdensome, hearings were unnecessarily prolonged by the applicant's tedious proof of many facts not really in controversy. The Commission now undertakes the burden of determining and specifying limited issues in hearing cases, which are actually controversial in character and on which the results of the hearing must turn.

In yet another direction, the Commission has improved its practice in con-

nection with the issues involved in hearings. It frequently happens that there are any one of several grounds on which it appears from initial examination of the application that a denial must result. Some of these grounds would necessarily result in the introduction of a great deal of testimony and documentary evidence if included among the issues to be heard. In order to save time and money, both for the applicant and the Commission, effort is now made to eliminate issues which would unnecessarily complicate the hearing.

Under its former rules the Commission permitted any party to intervene if his petition disclosed a "substantial interest in the subject matter." Furthermore, the Commission designated as parties to its hearings those persons shown by its records to have some potential interest, whether or not such persons were known to have an intention to appear. The effects of the complete freedom of intervention and of the automatic inclusion of various persons as parties to the proceeding were the unnecessarily prolonged discussion of non-controversial issues and the unnecessary multiplication and accumulation of evidence on relevant issues, due to the cross examination to which witnesses were subjected by the various parties. The Commission's rules now require all parties who desire to appear in opposition to an application to file petitions to intervene, by means of which their interests may be tested, and parties are required to make a showing that the requested intervention will be in the public interest. The Commission also makes provision for the filing and consideration by any of the parties of motions for enlargement of the issues, a further safeguard for the protection of interests of applicants and other parties.

Motions Docket

The Commission makes provision for the holding of oral arguments on all interlocutory motions, pleadings and matters of procedure which arise in cases pending before it. Previously, these motions were disposed of by the Commission without opportunity for argument, and thus without a full opportunity for parties in interest who might wish to oppose the relief sought to make a contest and have an adjudication based on a full showing of the nature of their interests. These interlocutory matters are now placed on a Motions Docket presided over by an individual Commissioner, which is called Friday of each week. Provision has also been made for the disposition in chambers of emergency motions, after proper notice to all parties.

STATION APPLICATION PROCEDURE

A summary of the procedure in applying for a station in the broadcast services as followed by the Federal Communications Commission

Any person, firm, corporation, educational, or other group legally qualified may apply to the Federal Communications Commission for radio-broadcast facilities in any locality. Formal application for a standard broadcast station construction permit is submitted in duplicate direct to the Commission on Form 301, which is obtainable on request. Applicants for FM (frequency modulation) stations use Form 319, which applies to high-frequency broadcast stations. Prospective television broadcasters use Form 330 which applies to that type of transmission.

Time Requirements

Each construction permit must specify a maximum of 60 days from date of grant thereof as the time within which construction of the station shall begin, and a maximum of 6 months thereafter as the time within which construction shall be completed and the station ready for operation, unless otherwise determined by the Commission upon proper showing in any particular case.

The time required for an application for a new broadcast station to go through the necessary routine varies with individual cases. In the case of a purely local station, where no interference is involved, the time can be as short as 4 to 6 weeks, providing that the application is accurately and completely filled out and all the required exhibits are appended. However, where interference and formal objection by other stations enter, a longer time is necessary.

Where the Commission, upon examination of a particular application, is unable to reach determination that a grant will serve the public interest, the case is designated for formal hearing upon specific issues, and all persons having an interest in the matter are given opportunity to be heard. Under present procedure, after a hearing has been held the parties are permitted 20 days in which to file supporting statements. The Commission then issues its Proposed Findings of Fact and Conclusions, and the parties are allowed 20 days thereafter to file exceptions and to request oral arguments before final decision is rendered. In the event that no exceptions or requests for oral argument are

received, the Commission issues an order adopting and making effective its proposed decision. This is the final determination unless there is litigation.

Equipment Tests

Upon completion of construction of a radio station the permittee is authorized to test the equipment for a period not to exceed 10 days. The inspector in charge of the district in which the station is located, as well as the Commission, are notified 2 days in advance of the beginning of equipment tests. When construction and equipment tests are completed, and after application for regular station operating license has been filed with the Commission (Form 302 for standard broadcast and Form 320 for high frequency broadcast) the permittee is authorized to conduct service or program tests for a period not to exceed 30 days, again advising the Commission and inspector in charge 2 days in advance of the beginning of such tests.

Broadcast stations are licensed for a period of 1 year. Requests for renewal of license are made on special forms.

The approximate cost of constructing a 100-watt standard broadcast station (the minimum power capable of rendering appreciable public service) is, roughly, between \$5,000 and \$8,500. High frequency (FM) stations cost somewhat more.

Public Interest Requirements

In the public interest, the Commission does not license stations to broadcast recordings exclusively.

Broadcast station licenses are denied corporations "of which any officer or director is an alien or of which more than one-fifth of the capital stock is owned of record or voted by aliens or their representatives."

The Commission exacts no fee or other charge in connection with radio licensing. Unlike telephone and telegraph, a radio-broadcast station is not deemed a common carrier under the Communications Act. No standard tariffs apply. While certain specific prohibitions are imposed by the Act, the Commission is given no general censorship powers over broadcast programs.

F. C. C. REGULATIONS REGARDING BROADCASTING APPLICATIONS

As of January 1, 1942

PLACE of filing; number of copies. Each application for construction permit or station license, and all papers incorporated therein and made a part thereof, with respect to the number of copies and place of filing, shall be submitted as follows:

Three copies direct to Washington, D. C.

Contents. Each application shall be specific with regard to frequency or frequencies, power, hours of operation, equipment, location of the station, and other information required by the application forms. An application for broadcast facilities in the band 550 kilocycles to 1600 kilocycles shall be limited to one specific frequency. An application for radio station construction permit or license requesting alternate facilities will not be accepted.

Full disclosures. Each application shall contain full and complete disclosures with regard to the real party or parties in interest, and their legal, technical, financial and other qualifications, and as to all matters and things required to be disclosed by the application forms.

Additional statements. In addition the Commission may require an applicant to submit such documents and written statements of fact, under oath, as in its judgment may be necessary.

Installation or removal of apparatus. Applications for construction permit or modification thereof, involving removal of existing transmitting apparatus and/or installation of new transmitting apparatus, shall be filed at least sixty days prior to the contemplated removal and/or installation.

Forfeiture of construction permits; extensions of time.—(a) A construction permit shall be automatically forfeited if the station is not ready for operation within the time specified therein or within such further time as the Commission may have allowed for completion, and a notation of the forfeiture of any construction permit under this provision will be placed in the records of the Commission as of the expiration date.

(b) Any application (FCC Form No. 701) for extension of time within which to construct a station shall be filed at least thirty days prior to the expiration date of such permit if the facts supporting such application for extension are known to the applicant in time to permit such filing. In other cases such applications will be accepted upon a showing satisfactory to the Commission of sufficient reasons for filing within less than thirty days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the failure to complete was due to causes not under the control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension.

License following construction permit. In all cases where a construction permit is required by Section 319 of the Act for the construction of a station, the application for station license (or for station license or modification thereof, if for station other than broadcast) shall be filed by permittee prior to service or program tests.

Where construction permit not required. Each application for new license, except amateur, where a construction permit is not a prerequisite thereto, shall be filed at least sixty days prior to the contemplated operation of the station: *Provided, however,* That in emergency and for good cause shown, the Commission may waive the requirements of this rule.

Modification of license. An application for modification of license, except amateur, and except as otherwise provided by these rules, may be filed for change in frequency, change in operating power where no construction is necessary, change in hours of operation, and for change in name of licensee where no change in ownership or control is involved. In case of a broadcast station, an application for modification of license may be filed for change in location of main studio. In case of all stations other than broadcast, an application for modification of license may be filed for change in points of communication, change in nature of authorized service,

and to cover an outstanding construction permit where the station is already licensed. Except when filed to cover construction permit, each application for modification of license shall be filed at least sixty days prior to the contemplated modification of license; *Provided, however*, that in emergencies and for good cause shown, the requirements hereof may be waived in so far as time for filing is concerned.

Renewal of license. Unless otherwise directed by the Commission, each application for renewal of license shall be filed at least sixty days prior to the expiration date of the license sought to be renewed. No application for renewal of license of a standard broadcast station will be considered unless there is on file with the Commission, the balance sheet and income statement currently required by the rules of practice and procedure of the Commission, reference to which by date and file number shall be included in the application.

Financial statements. Each licensee of a standard broadcast station shall file with the Commission on or before March 1 of each year on Forms 705 and 706, or such other forms as may be prescribed by the Commission, a balance sheet showing the financial condition of a licensee as of December 31 of the preceding year and an income statement for the preceding calendar year. Each such form shall be subscribed and verified by: (1) the parties or party filing the statement; (2) in the case of a corporation, an officer of the corporation. (An attorney for either is allowed with sufficient reason.)

Filing directed by Commission. Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

Temporary extension of station licenses. Where there is pending before the Commission any application, investigation, or proceeding which, after hearing might lead to or make necessary the modification of, revocation of, or the refusal to renew an existing license, the Commis-

sion may, in its discretion, grant a temporary extension of such license; *Provided, however*, That no such temporary extension shall be construed as a finding by the Commission that the operation of any radio station thereunder will serve public interest, convenience, and necessity beyond the express terms of such temporary extension of license; *And provided further*, That such temporary extension of license will in no wise affect or limit the action of the Commission with respect to any pending application or proceeding.

Assignment or transfer of control. (a) *General.* An application for consent to assignment of a construction permit or license, or for consent to transfer of control of a corporation holding a construction permit or license, shall be filed with the Commission at least sixty days prior to the contemplated effective date of assignment or transfer of control. If the assignment or transfer is voluntary, the appropriate application shall be fully executed by all parties and, if involuntary, by assignee or transferee only.

(b) *Broadcast.* With each such application, involving any standard broadcast station construction permit or license, there shall be submitted under oath or affirmation all information required to be disclosed by the application forms prescribed by the Commission, together with such other information under oath or affirmation as the Commission may require.

(c) *Other than broadcast.* In all classes of applications for consent to assignment of construction permit or license or for consent to transfer of control of a corporation holding a construction permit or license, other than those prescribed in paragraph (b), the Commission may require the furnishing of such information as in its discretion is deemed necessary.

Special temporary authorizations. (a) Special temporary authority may be granted for the operation of a station for a limited time, or in a manner and to an extent or for service other or beyond that authorized in an existing license upon proper application therefor; *Provided, however*, That no such request will be considered unless:

1. It is received by the Commission at least ten days previous to the date of proposed operation; *Provided, however*, That

any such request received within less than ten days may be accepted upon due showing of sufficient reasons for the delay in submitting such request.

2. Full particulars as to the purpose for which the request is made are stated.

(b) If the request is for operation of a standard broadcast station, the following additional requirements shall apply:

1. No such authority may be granted to a person other than the licensee of an existing standard broadcast station.

2. The request shall be limited to a definite or temporary period or periods for the transmission of programs or events which are not recurrent, and approval thereof will not be granted for a period in excess of thirty days.

3. The request shall show that it has been seasonably submitted to other stations whose operations may be affected (to be determined as indicated below), and the date on which such request was so submitted, which such stations shall submit direct to the Commission waiver of objection to the granting thereof or a statement of the nature of any objections that such stations may desire to interpose:

4. If the request is for operation upon a clear channel, showing required above shall be made with respect to the Class I station or stations on the channel.

5. If the request is made by time sharing station, the showing required above shall be made with respect to the station or stations with which time is shared.

6. In any case, the showing required above must be made with respect to any station on the same or adjacent channels when any such station is located within the interference range of the station making the request to be determined by the "Standards of Good Engineering Practice Concerning Standard Broadcast Stations."

7. Waiver of objections, or statement of objections, when furnished under this rule, shall be forwarded direct to the Commission by the responding station, and in the case of waiver shall show whether the waiver covers simultaneous operation or whether the station is giving up the time sought by the applicant. Where it appears that the proposed operation has been seasonably submitted to the station or stations referred to in sub-paragraphs (4), (5), and (6), above, and no reply has been received, it will be considered that such stations have waived any objections to the granting of the request.

Special Service Authorizations. Special Service Authority may be issued to the licensee of a standard broadcast station for a service other or beyond that authorized in its existing license for a period not exceeding that of its existing license upon proper application therefor; and satisfactory showing in regard to the following, among others:

(a) That the requested operation may not be granted on a regular basis under the existing rules governing the operation of standard broadcast stations;

(b) That experimental operation is not involved as provided for by Part 3, Section 3.22, of the Rules and Regulations:

(c) That public interest, convenience, and necessity will be served by granting the authorization requested.

Inconsistent or conflicting applications. When an applicant has an application pending and undecided, no other inconsistent or conflicting application filed by the same applicant, his successor or assignee, or on behalf or for the benefit of said applicant, will be accepted for consideration.

Multiple applications; broadcast service. In the broadcast service, while there is one application for new or additional facilities pending for a standard, international, television, facsimile, high frequency or experimental broadcast station, the Commission will not consider another application for new or additional facilities for a station of the same class (as given above) to serve in whole or in part the same area, by the same applicant or by his successor or assignee, or on behalf or for the benefit of the original parties in interest. Two such applications may not be filed simultaneously.

Repetitious applications. (a) *Broadcast services.* In the broadcast service, where an applicant has been afforded an opportunity to be heard with respect to a particular application for a new standard, international, television, facsimile, high frequency, or developmental broadcast station, or for an extension or enlargement of existing service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider another application for a station of the same class (as given above) to serve in whole or in part the same area, by the same applicant or his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of twelve months from the effective date of the Commission's order.

(b) *Other radio services.* In any other radio service, where an applicant has been afforded an opportunity to be heard with respect to a particular application for a new station, or for an extension or enlargement of service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider a like application involving service of the same kind to the same area by the same applicant, or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of twelve months from the effective date of the Commission's order: Provided, however, That the Commission may waive the requirements of this rule in situations effecting safety of life or property.

Pending appeals. Where an appeal has been taken from the action of the Commission in denying a particular applicant another application for the same class of broadcast station and for the same area, in whole or in part, filed by the same applicant or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, will not be considered until the final disposition of such appeal.

Action on Applications

Partial grants. Where any application is granted in part, or with any privileges, terms, or conditions other than those requested, without a hearing thereon, the action of the Commission shall be considered as granting such application unless the applicant shall, within twenty days from the date on which public announcement of such grant is made, or from its effective date if a later date is specified, file with the Commission a written request for a hearing with respect to the part, or with respect to the privileges, terms, or conditions, not granted. Upon receipt of such request, the Commission will vacate its original action upon the application and set the application for hearing in the same manner as other applications are set for hearing, and the applicant and other parties in interest will be notified thereof.

Designation for hearing. In cases where an application for radio facilities is proper upon its face but the Commission is unable to determine upon examination of the same that the granting of such application either in whole or in part, would serve public interest, con-

venience or necessity, the Commission will designate the same for hearing and the following procedure will govern it:

(a) The Secretary shall forthwith mail a written notice to the applicant setting forth the action of the Commission designating the application for hearing, together with such statement of the Commission's reasons therefor as shall be appropriate to the nature of the application.

(b) In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission a written appearance stating that he will appear and present evidence on the issues specified in the statement of reasons furnished by the Commission on such date as may be fixed for the hearing. In cases other than standard broadcast, high frequency broadcast, international broadcast and television, the applicant will accompany his appearance with an additional copy of his application and supporting documents.

Answers to Notices of Violation

Under Title III of the Act. Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, any legislative act, Executive Order, treaty to which the United States is a party, or the Rules and Regulations of the Federal Communications Commission, shall, within three days from such receipt, send a written answer direct to the Federal Communications Commission at Washington, D. C., and a copy thereof to the office of the Commission originating the official notice when the originating office is other than the office of the Commission in Washington, D. C.; *Provided, however,* That if an answer cannot be sent nor an acknowledgment made within such three-day period by reason of illness or other unavoidable circumstances, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, are taken to prevent future violations,

and if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification as will permit of ready reference. If the notice of violation relates to some lack of attention or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

Revocation and Modification of Station Licenses

Revocation. Whenever the Commission shall institute a revocation proceeding against the holder of any radio station construction permit or license under Section 312 (a), it shall initiate said proceeding by serving upon said licensee an order of revocation effective not less than fifteen days after written notice thereof is given the licensee. The order of revocation shall contain a statement of the grounds and reasons for such proposed revocation and a notice of the licensee's right to be heard by filing with the Commission a written request for hearing within fifteen days after receipt of said order. Upon the filing of such written request for hearing by said licensee the order of revocation shall stand suspended and the Commission will set a time and place for hearing and shall give the licensee and other interested parties notice thereof. If no request for hearing on any order of revocation is made by the licensee against whom such an order is directed within the time hereinabove set forth, the order of revocation shall become final and effective, without further action of the Commission. When any order of revocation has become final, the person whose license has been revoked shall forthwith deliver the station license in question to the inspector in charge of the district in which the licensee resides.

Modification. (a) *Order to show cause.* Whenever the Commission shall determine that public interest, convenience, and necessity would be served, or any treaty ratified by the United States will be more fully complied with, by the modification of any radio station construction permit or license either for a limited time, or for the duration of the term thereof, it shall issue an order for such licensee to show cause why such construction permit or license should not be modified.

(b) *Contents of order to show cause.* Such order to show cause shall contain a

statement of the grounds and reasons for such proposed modification, and shall specify wherein the said construction permit or license is required to be modified. It shall require the licensee against whom it is directed, to be and appear at a place and time therein named, in no event to be less than thirty days from the date of receipt of the order to show cause why the proposed modification should not be made and the order of modification issued.

(c) *Failure to appear.* If the licensee against whom the order to show cause is directed does not appear at the time and place provided in said order, a final order of modification shall issue forthwith.

Suspension of Operator Licenses

Order of suspension. No order of suspension of any operator's license shall take effect until fifteen days' notice in writing thereof, stating the cause for the proposed suspension, has been given to the operator licensee who may make written application to the Commission at any time within said fifteen days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have fifteen days in which to mail the said application. In the event that physical conditions prevent mailing of the application at the expiration of the fifteen-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be held in abeyance until the conclusion of the hearing which shall be conducted under such rules as the Commission, shall deem appropriate. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of suspension.

Proceedings. Proceedings for the suspension of an operator's license shall in all cases be initiated by the entry of an order of suspension. Respondent will be given notice thereof together with notice of his right to be heard and to contest the proceeding. The effective date of the suspension will not be specified in the original order but will be fixed by subsequent motion of the Commission in accordance with the conditions specified above. Notice of the effective date of suspension will be given respondent, who shall send his operator license to the office of the Commission in Washington, D. C., on or before the said effective date, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

RULES APPLICABLE TO STATIONS ENGAGED IN CHAIN BROADCASTING

Licensing Requirements

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization¹ under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary service area upon the programs of the network organization.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years: *Provided*, That a contract, arrangement, or understanding for a period up to two years, may be entered into within 120 days prior to the commencement of such period.

No license shall be granted to a standard broadcast station which options² for network programs any time subject to call on less than 56 days' notice, or more time than a total of three hours³ within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m.; 11:00 p.m. to 8:00 a.m.⁴ Such options

may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a), with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b), with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control⁵ with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area

¹ The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J, of Report on Chain Broadcasting.

² As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

³ All time options permitted under this section must be for specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

⁴ These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.

⁵ The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.

of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (Effective date of this section may be extended from time to time with respect to any station in order to permit the orderly disposition of properties.)

No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network: *Provided*, That this regulation shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in

the territory served by the group of stations comprising each such network. (Effective date of this section shall be suspended indefinitely and any further order of the Commission placing said section in effect shall provide for not less than six months' notice and for further extension of the effective date from time to time in order to permit the orderly disposition of properties.)

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

FCC REGULATIONS REGARDING NATIONAL DEFENSE

Any common carrier or the licensee of any radio station subject to the Communications Act may utilize its facilities to render free service to the government for military or naval communications in preparation for national defense. The government agency concerned will keep the Commission generally informed of the services of this kind accepted. Nothing herein or in any other regulation of the Commission shall be construed to require any such carrier or station to participate in any such communication.

The Federal Communications Commission may authorize the licensee of any radio station during a period of national emergency to

operate its facilities upon such frequencies with such power and points of communication, and in such a manner beyond that specified in the station license as may be requested by the Army or Navy.

No provision of the Commission's Rules and Regulations shall, in time of war, prevent the master of any vessel of the United States from taking any action whatsoever in regard to the radio installation, the operators, the transmission and receipt of messages, and the radio service of the ship whenever in his discretion such action is necessary to carry out the instructions of the United States Navy control officers and other instructions issued by the Navy Department.

UNITED STATES
CENSUS FIGURES

RADIO MARKETS OF THE NATION

By Robert A. Litzberg, Statistician, Radio Daily

With the mighty war effort occupying many minds of the broadcasting industry, the study of markets has become increasingly important to the time-buyer. For this reason and because of the commendation and universal acceptance of last year's presentation of market and population statistics, the 1942 RADIO ANNUAL, in addition to bringing the material up-to-date, has elaborated upon this information. The data which follows constitutes one of the many services of RADIO DAILY and RADIO ANNUAL to the broadcast industry and was prepared in association with Walter P. Burn & Associates, Inc. It is based on the 16th Census of the United States (1940).

In order to assist the broadcaster and time-buyer in evaluating potential markets more accurately four new features have been added to this year's presentation of Census data: (1) the population figures have been broken down into their urban and rural classifications; (2) two new retail trade groups, Retail-Service and Apparel, have been added to the three already included; (3) recent Census Bureau releases on 140 Metropolitan Districts in the United States have been included and are treated in the same manner as the data for individual states; (4) inclusion of a list of cities showing percentage changes in population as a result of increased activity in defense industries has been made. This material, which precedes the data on Metropolitan Districts, was prepared for RADIO ANNUAL by Ross Federal Service, Inc., from their studies of "national defense and your shifting markets.")

Definitions

For purposes of using the market and population statistics contained in this volume the following definitions apply:

Total Population: This figure is a revised and final U. S. Census Bureau total of the number of persons living in the individual counties of the country and the District of Columbia, obtained by a house-to-house canvass during the 16th Census of the United States (1940).

Urban Population: As defined by the Census Bureau this figure consists mainly

of these people living in *incorporated* places of 2,500 or more. Exceptions to this rule apply when the Bureau found a situation in which the general rule did not hold. (An example of such a situation is found in New York State where there was one unincorporated town of more than 10,000, having a population density of more than 1,000 per square mile; in this case the population of this town is included in the urban classification even though the town itself was not incorporated.) Exceptions are so rare that no effect will be felt in the using the data for radio coverage areas. (In Massachusetts and Connecticut many minor civil divisions are classified as urban.)

Rural Population: The remainder of population, after the urban figures had been determined, was classified as rural.

Families: The family figure is obtained from Housing Studies of the 16th Census. It is the total occupied dwelling unit count and has been recognized by the Bureau and research authorities as indicative of the total number of families in the country. In RADIO ANNUAL'S presentation the totals for 23 states are final; for the balance a preliminary figure is used as final releases were not available at press-time. (When preliminary totals are used a statement to that effect is printed after the state total.) The Census Bureau defines a dwelling unit as "the living quarters occupied

by one family or household; the number of occupied dwelling units in a given area is about the same as the number of families and may be compared with the number of private families returned in the 1930 Census."

Radio Homes: Of all the data in this presentation "radio homes" is the only classification that is not a Government release (except indicated estimates). The 1940 radio homes figure of the Census Bureau was expected to be released for publication in this volume but was delayed as a result of the declaration of war by the United States and other pressing duties of the Bureau. The figures which are presented are estimates made by RADIO ANNUAL in association with Walter P. Burn & Associates for the 1941 edition. They are based on the 1940 census population and use as a base the latest available Joint Committee percentages projected against the 1940 Census "occupied dwelling unit" figure for each county. These take into consideration trends of population and other characteristic changes as shown in the 1940 Census; these estimates have been accepted by the broadcast industry and other interested groups outside of the industry as the best available data on the subject.

Retail Trade

In the retail Trade Census 99 kinds of business were studied. Of these RADIO ANNUAL presents five major groups which are used most by research authorities to determine the potentialities of a definite geographical section for market development. The five major groups and what they include are as follows:

Store: For census purposes "store" is defined as the "place where a business is conducted and a place that is readily recognizable as a place of business." Only establishments which were doing more than one-half of their business at retail are included in any one of the five classifications presented.

Sales: This term is defined as total operating receipts of the included establishments after deductions of refunds and allowances for returned merchandise have been made.

Food: Grocery stores, meat markets, dairy product stores, milk dealers, fish

markets, candy and nut stores, confectionery stores, delicatessen stores, fruit and vegetable markets, bakeries and caterers, egg and poultry dealers, etc.

Drug: Stores selling prescriptions, drugs and patent medicines, complimentary products such as cosmetics, toiletries, tobacco, novelty merchandise, etc.

Automotive: New and used motor vehicle dealers; new parts and accessory dealers; aircraft, motorboat and motorcycle dealers.

Apparel: Stores selling primarily clothing, shoes, hats, underwear and related articles for personal wear and adornment.

Retail-Service: This figure is a total of all retail trade data taken from the Retail Trade Census and including 99 kinds of retail business plus over 250 types of service establishments. Service establishments are classified into seven major groups: (1) personal such as barber shops, cleaning and dyeing plants, photo studios, etc.; (2) business such as credit bureaus, advertising agencies, sign-painters, etc.; (3) services allied to transportation such as warehousing; (4) automotive repairs and services such as repair shops, paint shops, battery, ignition and tire repair shops, etc; (5) other repair shops such as blacksmiths, piano-tuners, radio service men, etc.; (6) custom industries such as printing, publishing, cabinet making, etc.; (7) miscellaneous such as circulating libraries, livery stables, tree surgeons.

Metropolitan Districts

Metropolitan Districts: The Bureau of Census in establishing Metropolitan Districts for cities of 50,000 population and more says, "The general plan for metropolitan districts that have been set up for use in the 1940 Census includes, in addition to the central city or cities, all adjacent and contiguous minor civil divisions having a population density of 150 or more per square mile. The metropolitan district is thus not a political unit but rather an area including all the thickly settled territory in and around a city or group of cities. It tends to be a more or less integrated area with common economic, social and, often, administrative interests."

ROSS FEDERAL STUDY REVEALS POPULATION CHANGE IN U. S. MARKETS

Compiled by

T. B. Ellsworth and E. M. Jones, Ross Federal Service, Inc.

During the last half of 1941 and early 1942, the shift from peace-time to war economy—with attendant throwing into high gear of America's industrial and military resources—has led to population changes of considerable magnitude in many American markets. Census figures of 1940 in many cases have been temporarily thrown out of kilter.

As a necessary supplement to RADIO ANNUAL's presentation of U. S. Census data, Ross Federal Service, Inc., have collaborated in compiling the following list, showing population changes in various markets as a result of the nation's defense effort. The material was prepared from the Ross Federal company's continuing study of nationwide economic changes.

Figures given refer generally to city limits. In some cases, which are noted, the increase or decrease in population has taken place outside actual city limits but still within a close metropolitan area.

CITY	1940 Census	Increase or Decrease	Per Cent Change
Akron, Ohio	244,791	+ 5,000	+ 2.0
Albany, N. Y.	130,577	+ 3,106	+ 2.5
*Albuquerque (N. M. (Metropolitan District))	61,968	+ 5,000	+ 8.1
Allentown, Pa.	96,904	+ 4,500	+ 4.6
*Atlanta, Ga. (Metropolitan District)	442,294	+29,000	+ 6.6
Augusta Ga. (Metropolitan District)	87,809	+22,000	+25.1
Austin, Tex.	87,930	+ 5,300	+ 6.0
Baltimore, Md.	859,100	+141,000	+16.4
*Baton Rouge, La. (Metropolitan Area)	64,700	+11,000	+17.0
Battle Creek, Mich.	43,453	+ 7,500	+17.3
*Birmingham, Ala. (Metropolitan Area)	400,931	+25,000	+ 6.2
Boston, Mass.	770,816	+29,000	+ 3.8
Bridgeport, Conn.	147,121	+ 4,000	+ 2.7
Buffalo, N. Y.	575,901	+ 2,000	+ .3
Burlington, Ia.	25,832	+14,000	+54.2
Camden, N. J.	117,536	+ 3,000	+ 2.5
Canton, O.	108,401	+ 7,000	+ 6.5
Charleston, S. C.	71,275	+35,000	+49.0
Charleston, W. Va.	67,914	+ 3,400	+ 5.0
Charlotte, N. C.	100,899	+ 2,000	+ 2.0

CITY	1940 Census	Increase or Decrease	Per Cent Change
Chattanooga, Tenn.	128,163	+ 5,500	+ 4.3
Chicago-Hammond-Gary	3,578,711	+35,000	+ 1.0

Wilmington, Del.	112,504	+ 1,000	+ .9
<small>(Another 2,000 increase in nearby suburbs.)</small>			
Worcester, Mass.	193,694	Little change	
Youngstown, O.	167,720	+ 8,500	+ 5.1

* Metropolitan district more indicative of population change.

METROPOLITAN DISTRICTS

Information on Metropolitan Districts is a new addition to RADIO ANNUAL's presentation of market data. The material that follows is distinguished from the data by county on preceding pages in that the areas studied are economic rather than political. A Metropolitan District is an area including all the thickly settled territory in and around a city or group of cities. It includes the central cities of the United States and all adjacent and contiguous minor civilian divisions having a population density of 150 or more per square mile. The U. S. Bureau of Census has prepared data on 140 Metropolitan Districts, all of which are included in the following presentation.

Population	Families	TOTAL Stores	TOTAL Sales	AKRON METROPOLITAN DISTRICT Contains parts of Medina, Portage and Summit Counties (Ohio)			ALBANY-SCHENECTADY-TROY METROPOLITAN DISTRICT Contains parts of Albany, Rensselaer, Saratoga and Schenectady Counties (N. Y.)			ALLEN TOWN-BETHLEHEM-EASTON METROPOLITAN DISTRICT Contains parts of Bucks, Lehigh, Northampton Counties (Penn.), Warren (N. J.)			ALTOONA METROPOLITAN DISTRICT Contains parts of Blair and Cambria Counties (Penn.)			AMARILLO METROPOLITAN DISTRICT Contains parts of Potter and Randall Counties (Tex.)			ASHEVILLE METROPOLITAN DISTRICT Contains parts of Buncombe County (N. C.)			ATLANTA METROPOLITAN DISTRICT Contains parts of Clayton, Cobb, DeKalb and Fulton Counties (Ga.) WESTINGHOUSE TRANSMITTERS SET THE PACE

More stations are stepping into line for new operating economy, convenience, and attractive arrangement as the swing toward Westinghouse Transmitters gains speed.

The Westinghouse 50-HG has set a new pace for 50-kw transmitters—and in the 5-kw field it's the 5-HV. In these sets, knowledge accumulated over many years of radio and diversified electrical experience has brought a fresh viewpoint to bear on transmitter design.

As pace-setters in today's radio parade, the stations to keep an eye on, are those now having on order or now using Westinghouse Transmitters.

CBS, Coast-to-Coast

THESE ARE THE PEOPLE

KMBC, with nearly 100 trained radio experts, has by far the largest single station staff in the entire Kansas City area!

WHO PRODUCE THE PROGRAMS

KMBC presents 30 hours of service features weekly—farm and markets, news, sports, home economics, education...in addition to music, variety, comedy and quiz shows galore! All live talent!

THAT ATTRACT THE LISTENERS

Independent surveys of Greater Kansas City show KMBC leading in audience during more quarter hours, day and night, than any other station!

WHO BUY YOUR PRODUCT

National spot advertisers know how KMBC delivers results. Hence, they place more business on KMBC than on any other Kansas City station (sworn statement, Robt. S. Conlan & Associates, independent market analysts.) And 3 out of 4 KMBC accounts are renewals!

BLUE NETWORK COMPANY, INC.

MARK WOODS

THE Blue Network made radio headlines this year when it stepped out on its own as an independent organization. With a history dating back to January 1, 1927, the Blue is a new-old network. Its emergence as a new

and distinct corporation is another highlight in the record of America's second oldest chain. The Blue starts out on its independent career with a staff of nearly 500 men and women, the majority of whom are young in years but "old in radio." Their wealth of experience is a tangible asset.

Important at any time, the fact that the Blue now stands on its own feet takes on even greater significance at the present when radio is playing a vital role in upholding the public morale of a nation at war. Alive to its full responsibilities, the Blue Network will continue to maintain the high reputation of the broadcasting industry for service to the public.

While the Blue Network is conscious of its great opportunity for public service, we believe that this service can be most efficiently rendered by the Blue in its primary role as a nationwide advertising medium. The Blue Network is a great advertising medium which renders an essential public service, not a great public service which happens to take advertising.

Policy

Our conception of performance for the common good covers not only educational or "service" programs, speeches by statesmen and politicians, news bulle-

tins and special events, but the entertainment supplied to listeners by manufacturers who give their audiences helpful, straightforward and truthful advertising messages.

Since we see no conflict between the interests of the public and the advertiser, programs on the Blue Network — both sustaining and commercial—will be considered and planned as genuine public service programs. The Blue will frankly set out to give advertisers the kind of service they need, confident that in doing so we shall really give the public what it wants.

Progress

The 15-year-old network moves forward with a bigger and more representative list of advertising sponsors than ever before in its history. In its programs, the Blue caters to a wide variety of interests. The Metropolitan Opera and our great Symphony Orchestra are outstanding in the realm of serious music programs, while the Blue also carries the top favorites among dance bands. The Blue plans to develop new programs in the field of public discussion in which America's Town Meeting of the Air, already a Blue feature, is a recognized leader. For news coverage, the Blue has a corps of radio reporters located at action centers throughout the world, and its worldwide coverage will continue to be as thorough as at present.

1942

While the Blue will continue to present the many fine programs for which it is already noted, its primary efforts will be dedicated to increasing their number and enriching their quality. In programs, in selling, in promotion, publicity, engineering and in all phases of network operations, the men and women of the Blue Network, fired with new enthusiasm, are out to make broadcasting history in 1942 and the years to come.

COLUMBIA BROADCASTING SYSTEM

WILLIAM S. PALEY

IN NO year since its inception has the broadcasting industry rendered such a full measure of public service as it did during the year 1941.

During most of the year we, as a nation, were preparing for the defense of our country and its ideals. During the last days of the year, the enemy struck and we were catapulted into war. It was fortunate that radio broadcasting had been forged and tempered into a potent instrument of democracy before America became involved in the supreme test of the war. From the moment of the first bulletin of the treacherous attack on Hawaii, broadcasters were able to bring to bear responsible judgment, trained personnel, and world-wide facilities. A swift and yet a sober service to listeners has resulted, which has kept the whole nation objectively informed of the flood-tide of events which has followed.

1941 Activities

I have been asked to review our activities during 1941. I will do so in a very general way because I, as well as most broadcasters, have little desire now to look backwards. During the past year, the Columbia Broadcasting System responded to the country's needs as they developed. This meant that our major efforts dealt with the defense program.

One of our outstanding achievements during 1941 was the completion of the new CBS Latin American network. This is composed of 74 affiliated stations in every nation in Latin America. It began operations on December 31st, when the first of our two new 50,000-watt short-wave transmitters was completed. The inauguration of full service to and from our Latin American network will take place some time in February, when the second high-powered transmitter will go

on the air, permitting us to double the effective power of both transmitters by narrowing the beams.

During the past year, we also completed and inaugurated WABC's new 50,000-watt transmitter located on Columbia Island in Long Island Sound. Many other technical improvements and advances were made throughout our network operations—too numerous to mention in this short statement.

Television

Columbia's television program started on July 1, 1941, and we have maintained a 15-hour-a-week schedule ever since. Also, during the year, CBS announced a full color television system, invented by Dr. Peter C. Goldmark, CBS chief television engineer, and developed by him and his staff during the year. We have completed more than 100 hours of color television transmission on an experimental basis.

F.M.

The Columbia Broadcasting System entered the new field of Frequency Modulation with the inauguration of its stations in New York and Chicago. We have received construction permits for stations in Los Angeles and St. Louis and have on file an application for a Boston station.

1942

As we face the crucial year ahead, we feel confident that we are well organized and equipped to respond swiftly and flexibly to the ever-changing needs of a democracy at war. We shall do so by keeping ourselves fully and understandably acquainted with the nation's general and special objectives. We shall use our skill and the machinery at our command to help bring about those objectives. We shall prove to the world that radio as a democratic instrument of the people can serve its country more effectively than radio under a dictator.

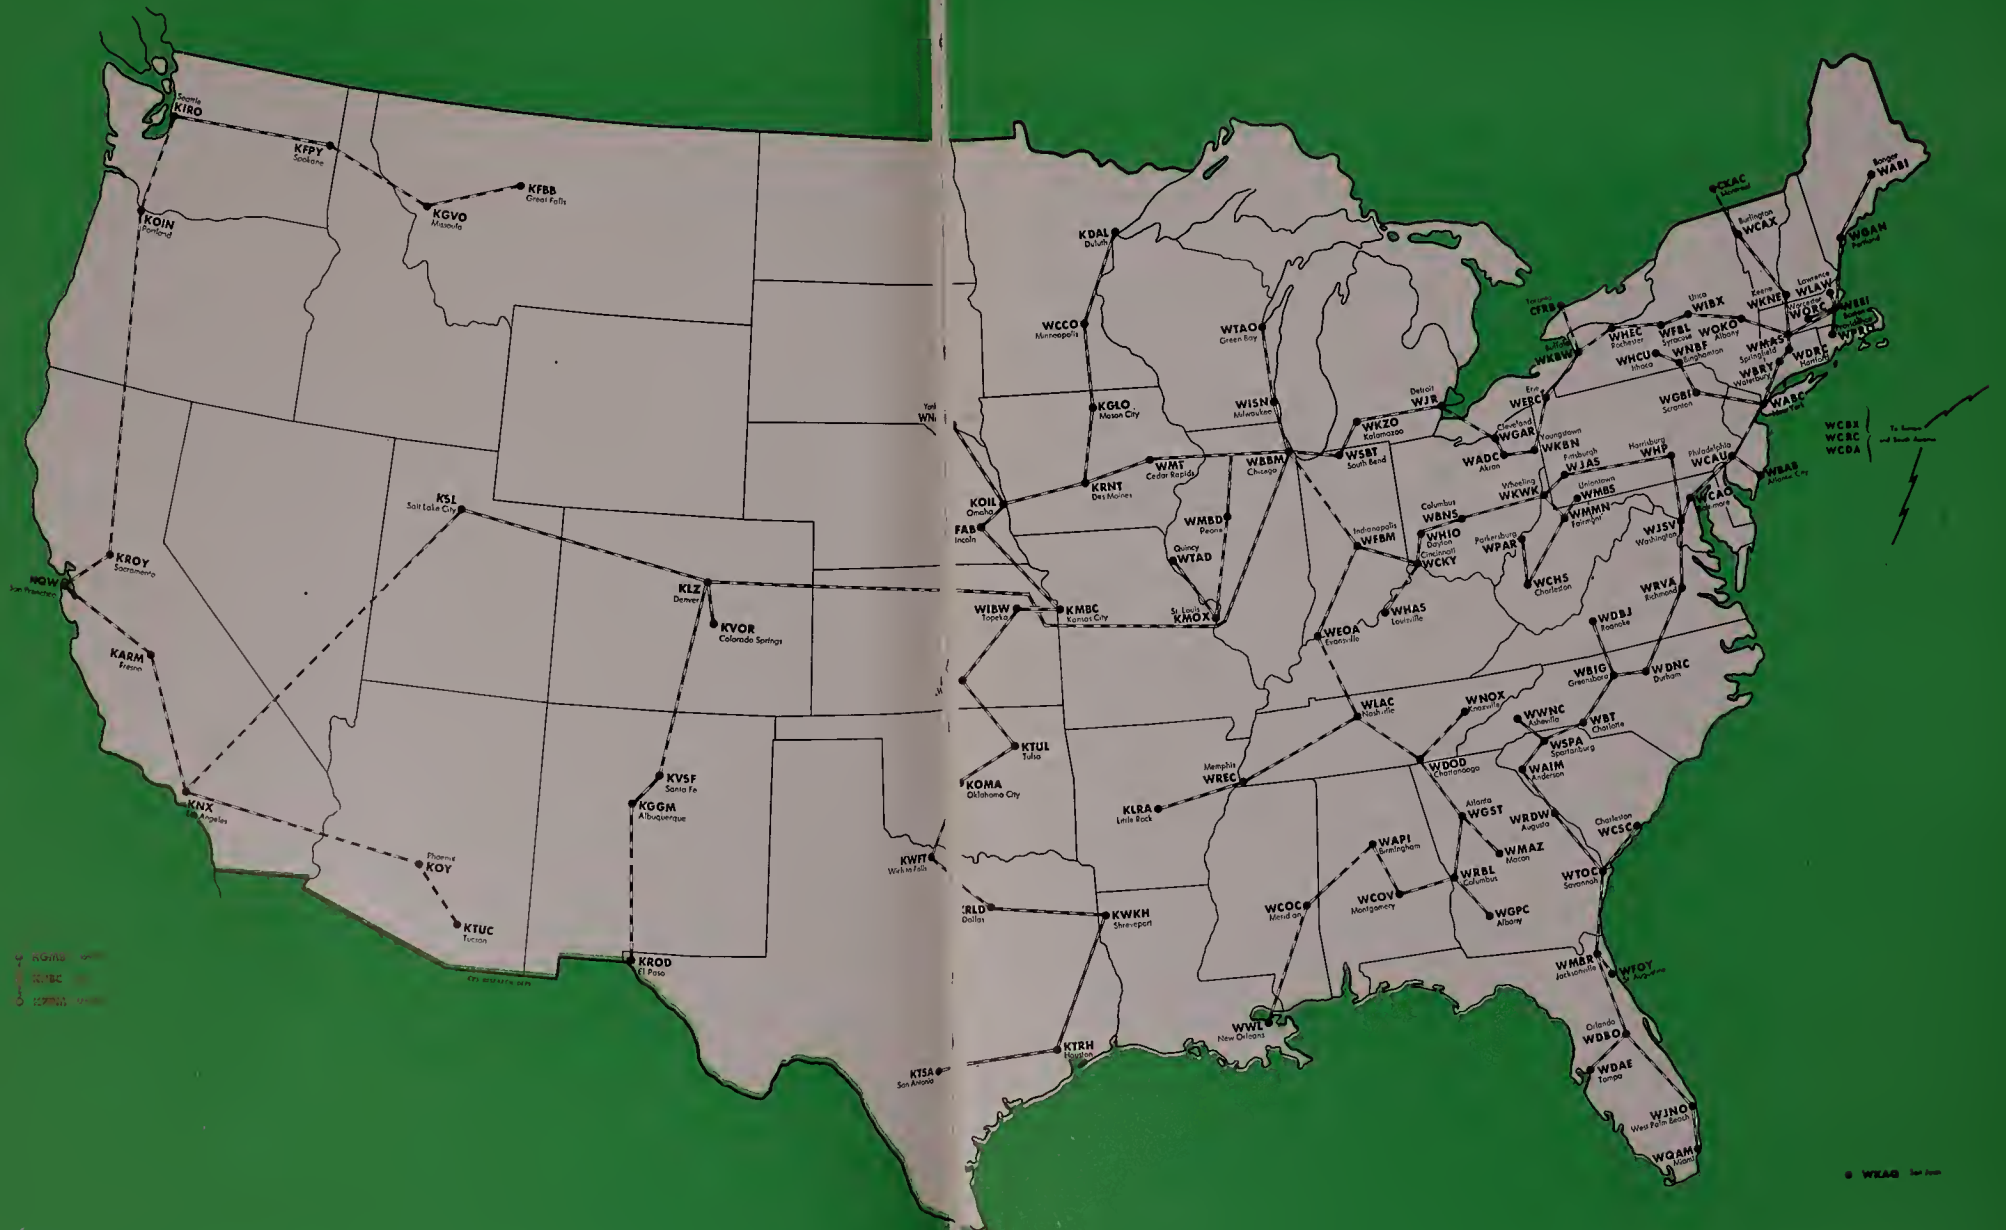

I am confident that radio will make its full and proper contribution to the winning of the war and of the winning of peace. I know this is the aim of all broadcasters today.

MUTUAL BROADCASTING SYSTEM

ALFRED J. MCCOSKER

RADIO in 1942, for the first time since the inception of network broadcasting, must fulfill its obligations to a nation at war. Radio is a new and powerful weapon of defense, and the Mutual network will concentrate its efforts in 1942 toward helping the United States win the war.

Competition in the broadcasting industry must be sacrificed to cooperation whenever necessary, for the best interests of the country.

The Mutual Broadcasting System, which consisted of four stations at the time of its formation in October, 1934, now has close to 200 affiliates in the United States, Canada and Hawaii. The nation's cooperative network, which has consistently operated for the benefit of the individual station, and in the public interest, looks to 1942 as another year of increased service.

News Coverage

News coverage, always important to radio programming, will be of paramount importance in 1942. We shall attempt to present facts as complete as government regulations permit. In addition to such competent domestic analysts as Raymond Gram Swing, Gabriel Heatter, Fulton Lewis, Jr., Boake Carter and John B. Hughes, we shall continue to present eye-witness accounts by trained observers from the important battle-fronts of the world.

At the same time, the question of national morale will receive attention, and to this end, programming during the coming year must be intelligently planned.

Music

We shall continue to present the fine musical programs of the Philadelphia Orchestra, and those of Henry Weber

from Chicago, Alfred Wallenstein from New York. Government agencies will be free to use our facilities for the presentation of such programs as the Office for Emergency Management's "Keep 'Em Rolling" and the Treasury Department's "America Preferred" series.

Sports

Sports will again occupy an important place in the Mutual schedule, just as in past years. In 1941, for example, 931 special features and sports programs were broadcast, accounting for 492 hours of air time. On June 1, 1941, Mutual gained exclusive rights to all championship boxing bouts of the Twentieth Century Sporting Club. We look forward to the continuance of our broadcasts of these leading ring contests. Mutual presented the World Series exclusively in 1941 for the third consecutive year, and will do it again in 1942.

Good Will

International good-will shall be fostered by an interchange of programs with our Latin-American neighbors. Already in progress are two outstanding series: "The Americas Speak," presented in cooperation with Rotary International, and a monthly exchange program with Brazil, which started on August 28, 1941.

The return of Ascaph music to Mutual on May 13, 1941 was the first settlement of a disagreement which had deprived the American radio public of much of the world's finest music.

Gross billings for the network in 1941 represented the highest figure in Mutual's history—\$7,300,955—an increase of 53.2 per cent over the preceding year.

1942

At the present time, the condition of the radio industry is healthy, both financially and functionally. And now, more than ever, radio, working cooperatively with other media, has an opportunity to assume leadership in public opinion, both in the molding of opinion and interpreting it. To this end, we shall dedicate our efforts in 1942.

NATIONAL BROADCASTING COMPANY

NILES TRAMMELL

WITH America's entry into World War II, the year 1941 provided the American system of broadcasting with unprecedented opportunity to demonstrate the usefulness of its services to the government and the people of the United States in a grave emergency. Radio did not have this opportunity in World War I, so 1941 must be recorded as one of the most significant periods in the entire 15 years of network broadcasting.

Radio's presentation of dramatic, eye-witness accounts of the bombing of Pearl Harbor and Manila, the stirring war message President Roosevelt delivered to the Congress of the United States, and the actual declaration of a state of war by Congress, are all "firsts" in radio's Hall of Fame. These unparalleled achievements by the industry gave the listening public the full impact of radio's worth to America at war.

Foreseeing war as a distinct possibility, NBC engineers made 1941 a year of expanding radio facilities to meet the nation's growing demands on American broadcasters. Chief among new projects were the rebuilding of NBC's powerful overseas shortwave plant and the building of new studios in Radio City, Chicago and San Francisco. With two powerful stations and the most complete program division in the country, NBC raised the power of its shortwave stations WRCA and WNBI to 50,000 watts each and built the most modern antenna arrays for each.

Furthermore, the language pattern was increased to 9 foreign languages, providing world-wide translation of major events. American views of news and world events are being short-waved to practically every nation on the globe to help promote truth and understanding of American ideals and purposes.

Marked improvements in NBC coverage of the nation took place in 1941, by addi-

tion of stations, increases in power, and changes to better frequencies.

Notable advancement also was made in NBC's public service activities, highlighted by establishment of a transcription service for America's schools and colleges. This move marked the first effort by a national organization to provide an extension of radio education through recordings for the nation's classrooms.

Rising above the harsh discord of war in 1941, music, through the medium of radio, found its greatest opportunity to help national morale and to create understanding and friendship between the Americas. Conscious of music's vital role during a period of crisis, NBC presented musical broadcasts, not only of the old masters and the moderns, but also music by, of, and for Americans.

In the field of television, NBC's New York sight-and-sound station became the first in 1941 to advance from experimental status to full obligations of public service under commercial license. Station WNBT, which had cradled American television broadcasting as W2XBS, went on the air as the world's first commercial television station on July 1, 1941, and at the year's end was still the only television unit broadcasting commercially in New York City.

And the job goes on. In addition to radio's gigantic war effort, NBC is going right ahead with its normal pattern of broadcasting, gearing it to the emergency and providing the general public with an ever-higher quality of programs, embracing all forms of entertainment, including the arts, sciences, drama, education and religion.

Already under a self-imposed censorship, NBC was glad to accept the U. S. government official radio censor regulations, and will continue to guard to the last detail, all information which would be useful to the enemy.

All this is possible because radio in America today is an instrument of free expression, because it has the ability to command the instantaneous attention of almost the entire population of the nation, on 56,000,000 radio sets, and because the American people believe in it and trust it.

This Place is EAR-Conditioned...

FIFTEEN YEARS of leadership in radio coverage, in facilities-improvements, in preferred programs, have made the Red the All-America network. Whether you measure it clockwise, lengthwise, or marketwise, you will always come out with the same answer. America is ear-conditioned to the NBC Red Network, the network they listened to first, the network they still listen to most.

"WHAT! CINCINNATI COSTS US ONLY \$138.72?"

At first glance, it may seem inconsistent that the cost of reaching Greater Cincinnati over WLW is so small a fraction of the station's rate. But it is a fact, because so great a part of our daily listening audience lies outside our home city.

The existence of this condition emphasizes a problem that long has confronted management men—the proper allocation of radio costs to specific markets. And it has been particularly true in the case of WLW advertisers, because of the wide coverage of the station, and the number and diversity of the markets we serve.*

Realizing the need for an accurate cost control

technique for our advertisers, WLW engaged Dr. Richard R. Mead of the Wharton School of Finance and Commerce, University of Pennsylvania. Dr. Mead studied 208,411 coincidental telephone survey calls made in 28 markets, and 396,545 pieces of mail received from four offers broadcast at four different periods of the day over WLW. The result is "The Allocation of the WLW Radio Dollar in 345 Midwestern Counties," which gives an accurate charge-off system for allocating WLW time and talent costs to 38 Merchandise-Able Areas in eight states.

Since its publication, a number of WLW advertisers have found this study so helpful in controlling sales and distribution costs that we are convinced it is a worthwhile contribution to many of the problems faced by management in modern merchandising.

Consult your advertising agency, or write to WLW, Cincinnati, Ohio. We will be glad to send a representative to explain the Cost Allocation plan, and how it applies to your problem.

*Combined retail drug and grocery sales in WLW's Nighttime Merchandise-Able Area are one-third greater than those of New York City's five boroughs, more than three times greater than corporate Chicago!

How Green Is My Valley?

PLENTY!

The Don Lee Broadcasting System has now completed the last important link in the Pacific Coast's only network covering every one of the 32 important Pacific Coast Markets, with the addition of station KFRE in Fresno, the biggest market in the rich agricultural San Joaquin Valley. *Now* every important market on the Pacific Coast is covered by a local Don Lee station. More than 9 out of every 10 radio homes on the Pacific Coast are within 25 miles of a Don Lee station. If you have a sales message for the radio listeners in Fresno . . . if you have a message for any of the 10,000,000 people on the Pacific Coast, buy the network Pacific Coast advertisers prefer* . . . Don Lee.

**Don Lee carries more Pacific Coast network business than the other three networks combined.*

KEYSTONE BROADCASTING SYSTEM, INC.

DECEMBER 15, 1940, marked the inauguration of the Keystone Broadcasting System, a new, nation-wide network. On that date, KBS released its first sustaining programs to 66 radio stations throughout the country, — marking the beginning of a new, unique venture in the field of commercial radio.

Michael M. Sillerman
President

For the first time in broadcasting history, a "network" consisting of low-wattage stations serving secondary markets was put into active operation via electrical transcriptions.

Setting up KBS was the culmination of two years' activity. The entire plan was based on observations of the Keystone management: Small-town, low-powered radio stations were not receiving serious consideration from national advertisers sponsoring important popular programs. These big-time programs were doing a fine job of moving the sponsors' products in those markets where consumer-listeners were able to hear them, but the neglect of the secondary markets was costing both the advertisers and the stations a tremendous, unrealized and justified potential.

Station owners, sponsors and agencies all agreed that the plan itself was a good one,—but added "You'll be very lucky if you get your first commercial by the end of your first two years!" However, by the seventh month of actual operation, KBS was releasing to its affiliates the famous "Lum 'n' Abner" series, sponsored by Miles Laboratories for Alka-Seltzer!

Progress

Keystone's progress, by the end of 1941, its first year of operation, more than justified the aims and policies of its management. The following is from the KBS year-end report:

"Beginning 1941 with 66 stations, the Keystone Broadcasting System completed

its first year with 152 affiliates—an increase of 86 stations.

"During this period, aggregate power of the network was increased by 35,000 watts. New stations added to the KBS list raised the potential listening audience by 23,000,000 to a total coverage of approximately 53,000,000 persons.

"An increase of 8,000,000 radio homes in the listening areas of new KBS affiliates made a total of 11,000,000 families served by the 'network,' as of the end of 1941.

"The first large-scale 'invasion' into the KBS secondary markets by a major advertiser occurred in June, 1941, with the introduction of the 'Lum 'n' Abner' series by Miles Laboratories, over 129 KBS stations from coast to coast.

"Late in November another 'first' occurred in the form of a widespread night-time extension, into the secondary markets, of Lever Brothers' 'Burns and Allen' program, for Swan Soap.

"Keystone comes to the end of its first year with an increase, in sponsored time, exceeding 15,000 hours for the year.

"When war was declared in December, the network and its affiliates with the rest of the radio field, pledged their facilities to full cooperation with the authorities and the nation 'for the successful prosecution of the war.'"

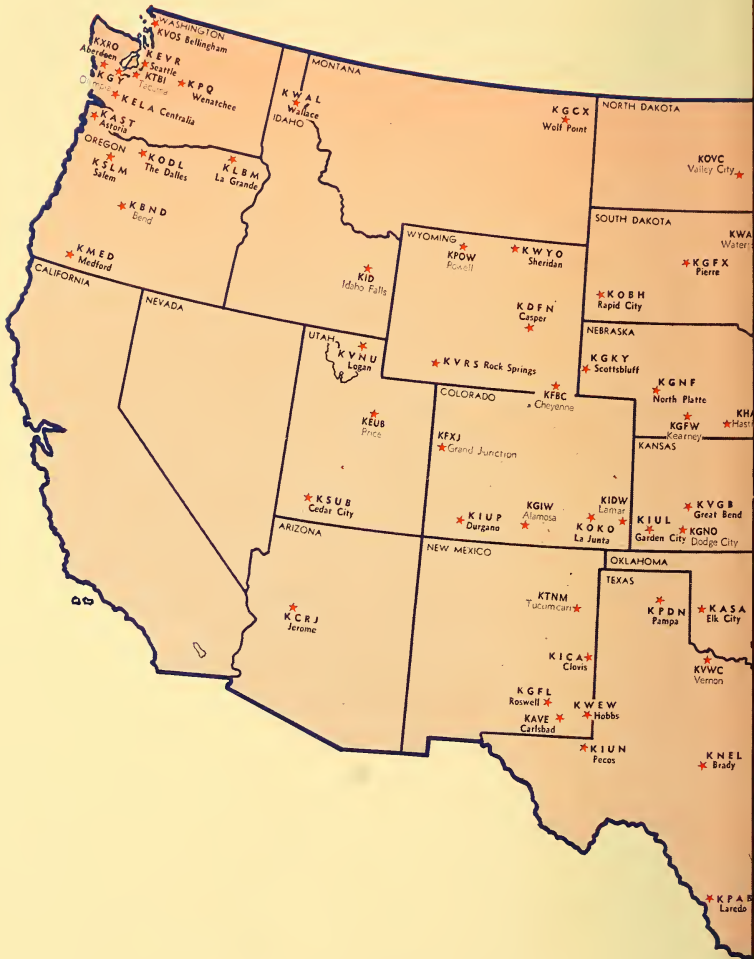

Future

Now, with the beginning of 1942, the road ahead is well-defined by the almost phenomenal achievement of this network during its first year of service.

The policy introduced by KBS has revolutionized a large portion of the general concepts of the radio field regarding the smaller, secondary markets of the nation. For the first time, national advertisers can cover secondary markets intensively at less than mass coverage costs. For the first time, smaller stations can now broadcast national prestige programs. Thus, the ever-greater progress of Keystone is assured by the very forces which are responsible for its success: the advantages gained by lower-wattage stations and the increased coverage for sponsors of major programs. These all-important elements promise for KBS a vital and permanent place in the American broadcasting picture.

IMPORTANT NOTICE REGARDING THE LISTING OF THE 924 STATIONS THAT FOLLOW

Compilation

List of stations in the succeeding pages has been compiled to reveal as intelligently as possible the respective status of each as to power, frequency, personnel and other pertinent data deemed necessary to give the reader a quick and accurate picture. Both the format and information of the listing has been changed from that of preceding issues of Radio Annual in the interest of progress and improvement. Explanation of some of the changes follow below.

Power-Frequencies

With the mandatory changes in frequency and subsequent power grants that came as a result of the Havana Treaty and hundreds of stations making the switch as of March 29, 1941, Radio Annual for 1941 issued just prior to the change which affected North American, Mexican and Cuban radio, decided to anticipate the new frequencies and power. Thus the station listings carried the data regarding frequencies as of March 29, and the potential greater power to which certain outlets were entitled. In this edition the data listed is actually as operated under as of January 1, 1942.

Coverage-U. S. Census

Coverage data as submitted by the respective stations has been omitted this year, thus removing a highly controversial bone of contention among the broadcasters themselves. However, as additional services for both time-buyer and broadcaster, two classifications have been added to the comprehensive statistics based on the U. S. Census for 1940; these two, concern retail appare! and Retail Service. Total population figures have been broken down into rural and urban divisions, and still another special compilation reveals population changes in U. S. Markets due to shift from peacetime to war economy basis. Further completing the market data is a new listing of 140 Metropolitan Districts with the counties therein and full retail sales figures. As a ready reference apart from the general Index, the first page of each station listing by states, contains the actual page upon which will be found the U. S. Census, Population and Retail Trade Data pertaining to the state in question.

something **NEW** has been
CULTIVATED
 in the **3rd**
 major market

It's the biggest county in the United States as far as agricultural wealth goes, yet no station in Southern California ever put forth any particular effort to serve these 15,000 Los Angeles County farmers.

But that's all been changed since **KFI** rolled up its Clear Channel sleeves and went to work really putting out the kind of farm programs the growers wanted. From what we hear, we've done real well, and not only do our nearby neighbors dial daily for these informative broadcasts, but more than a few of the 100,000 other growers in the eleven western states make **KFI** a daily dialing habit.

Yes, we've cultivated an important field in the Nation's 3rd Major Market and we're **K**eeping **F**armers **I**nformed every day with *Western Agriculture*, *National Farm and Home Hour*, *Noon Farm Reporter*, *Nightly Frost Warnings*, plus all the other weekly farm features.

So now, in addition to being the station "most people listen to most" in Los Angeles city, **KFI**, all 50,000 watts of it, is also the voice of the farm in these parts as well.

*the west coast's only
 clear channel station*

K F I

owned and operated by

EARLE C. ANTHONY, INC.

LOS ANGELES

Memo to Radio Daily:

"Facts can stand repetition so please duplicate our ad of last year in this year's Annual." H. M.

K F W B, Hollywood's own station, carries *more local business than any other station* in the greater Los Angeles area—this is as it should be:—

★ **BECAUSE** Warner Bros.' experienced staff of directors, writers and merchandising men have created high rating local shows available for your sponsorship;

★ **BECAUSE** KFWB's staff is available to produce, direct and merchandise your advertising campaign to help create greater audiences—more sales;

★ **BECAUSE** KFWB has the largest studio facilities on the west coast—studios with capacities ranging from 450 to 3,000 seats. This affords the local advertiser a *real opportunity to merchandise his show*;

★ **BECAUSE** KFWB's 5,000 Watts day and night gives it signal strength that adequately covers the greater Los Angeles area—the area that boasts one-third of the buying power of the eleven western states;

★ **BECAUSE** KFWB's position on the dial places it right in the center of the greatest activity.

THE RICHEST PEOPLE
IN THE WORLD
Live in the Valley
of Paradise.

K P R O

1000 watts

Unlimited time

RIVERSIDE, CAL.

The richest people in the world is right—over one-half million of them. The per capita wealth is \$1928.00, which is a record in itself. Here in the Valley of Paradise are real people living in an "EDEN PARADISE" with real money and the zestful desire to get the most out of living in a climate that is beyond comparison. In addition, manufacturing, military population, and an average tourist population of 177,000 daily within the primary service area of KPRO, the only regional station serving the "Valley of Paradise", in Southern California. Transmitter and offices, Riverside, California.

THIS unpretentious stone with its simple but significant inscription has no counterpart in all the world. Plymouth Rock is a symbol of opportunity today just as it was in 1620 when our forefathers leaped ashore on the rocky New England Coast to build a new life for themselves.

New England is still the land of opportunity. Its buying income, especially in Southern New England, is now (as always) far above the national average*. These people have money to spend, and wise national advertisers are finding that out.

Acquaint them with your product through WTIC. Back up your sales message with the prestige and dependable service which has made WTIC this section's "listening habit." For richness of opportunity combined with power of coverage

THERE'S NOT ANOTHER LIKE IT!

A WAR MESSAGE
to
ALL EMPLOYERS

★ From the United States Treasury Department ★

WINNING THIS WAR is going to take the mightiest effort America has ever made—in men, materials, and money!

An important part of the billions of dollars required to produce the planes, tanks, ships, and guns our Army and Navy need must come from the sale of Defense Bonds. Only by regular pay-day by pay-day investment of the American people can this be done.

Facing these facts, your Government needs, urgently, your cooperation with your employees in *immediately* enrolling them in

A PAY-ROLL SAVINGS PLAN

The voluntary Pay-Roll Savings Plan (approved by organized labor) provides for regular purchases by your employees of Defense Bonds through voluntary pay-roll allotments. All you do is hold the total funds authorized from pay-roll allotments in a separate account and deliver a Defense Bond to the employee

each time his allotments accumulate to an amount sufficient to purchase a Bond.

You are under no obligation, other than your own interest in the future of your country, to install the Plan after you and your employees have given it consideration.

WHAT THE PAY-ROLL SAVINGS PLAN DOES

1. It provides immediate cash now to produce the finest, deadliest fighting equipment an Army and Navy ever needed to win.
2. It gives every American wage earner the opportunity for financial participation in National Defense.
3. By storing up wages, it will reduce the current demand for consumer goods while they are scarce, thus retarding inflation.
4. It reduces the percentage of Defense financing that must be placed with banks, thus putting our emergency financing on a sounder basis.
5. It builds a reserve buying power for the post-war purchase of civilian goods to keep our factories running after the war.
6. It helps your employees provide for their future.

Make Every Pay Day • BOND DAY

W J N O

"The Voice of the Palm Beaches"
West Palm Beach, Florida

AFFILIATED WITH THE
COLUMBIA BROADCASTING SYSTEM

Today, these already rich markets are experiencing increases in every classification of business, payrolls, retail sales, building . . . increases from 30% and more over last year. Atlanta, Columbus and Albany all are invaded by defense dollars. You cover these markets thoroughly with WATL, WRBL and WGPC.

ATLANTA

Served by WATL (MBS)

Metropolitan area population up from 442,294 to 471,000. Cobb County airport a \$400,000 project. \$700,000 enlargement of Candler Field, Atlanta's main airport. 55,000 manufacturing workers (20.2% above year ago). Payrolls up 30%. 10,000 new telephones in service. Large military payroll. 98,710 radio homes, 134,972 families, 516,564 people. WATL is the news station of Atlanta.

COLUMBUS

Served by WRBL (CBS)

With a total coverage area of 522,175, WRBL covers 121,000 radio families and 63,000 homes. Fort Benning, adjacent to Columbus, has . . . monthly payroll of \$4,000,000 . . . its officers and men trade almost exclusively in Columbus. Over \$16,000,000 has been spent in construction work for Fort Benning, a bonus factor in addition to the WRBL area \$80,000,000 retail sales.

ALBANY

Served by WGPC (CBS)

Population up about 5000 since 1940, giving WGPC a potential 236,682 audience. \$4,500,000 project—200 defense housing units just completed or planned . . . 6000 new jobs! Retail sales in Albany area now approximate \$20,000,000 yearly. Department store sales up 25%. Motor traffic up 33-1/3%. WGPC primary area has 25,540 radio homes, 56,334 families, southwest Georgia's oldest radio station.

Need New Bounce Back of Your Advertising

—to turn today's purchasing power into profits?

Use WBBM.

Sixteen years straight advertisers have picked WBBM to carry more of their advertising than any other big Chicago station. Regularly 8 out of 10 renew, too.

And only *results* result in renewals.

If you feel your advertising is "under wraps" in the nation's second market, we have some recent results you'd like to see.

Tell
your story
to a
Full House!

During 1940 and 1941, surveys repeatedly showed that when messages of national importance were broadcast over all major Chicago stations—W-G-N had the largest audience!

When you can have this large, alert, W-G-N audience, why take less?

How To Get Results In Mid-West America

LIT is an accepted fact among hundreds of advertisers that advertising on WLS gets results.

A mail order advertiser, for example, offered a permanent wave kit for 50¢ on a WLS morning program three days weekly. He got results—but quick! From 23 programs he received 18,136 orders, each with 50¢ enclosed!

For information on how *you* can use WLS to get results in Chicago and the Middle West, write Glenn Snyder at WLS... or ask any John Blair man.

Use!

ALONE in the Kansas Field

DAY in and day out, our Wizard of Oz friend, the scarecrow is on the job in the interests of greater productivity. Standing alone and unique in the field of productive advertising throughout Kansas and adjoining states is WIBW.

Since 1924, farm and small town listeners have known our announcers and personalities by their first names. Selling, therefore, becomes a sincere, personalized recommendation of one friend and neighbor to another. Results from such long-established confidence are inevitable.

WIBW led the entire country in volume of low-cost inquiries for Kerr Mason Jars. Client X (name on request) made direct \$1.00 sales at a unit cost of only 15c. Our daily commercial mail averages over 1,100 pieces!

Our Family of 4,811,511 listeners tunes in one of America's easiest-heard signals . . . a dominating signal made possible by America's peak soil conductivity and our enviable 580 kc frequency that makes our 5,000 watts equal to a million watts at the other end of the dial.

Take advantage of this station that stands alone in power, personality and prestige in a territory where buying power is at a 20-year peak.

A HURRICANE OF POWER ALONG THE GULF COAST!

WWL New Orleans Gives Solid Coverage from Pensacola to Port Arthur

There are no "light spots" in WWL's dominance of the rich, thriving mid-Gulf region. For over 150 miles east, west, north of New Orleans its clear-channel 50,000-watt signal commands unquestioned leadership. For Deep South results, you need the powerful consumer and dealer influence of WWL, New Orleans.

LATEST CBS LISTENING AREA STUDY SHOWS WWL REACHES:

DAYTIME — 608,090
Radio Homes*—\$853,779,-
000 Retail Sales

(*182 counties in which 33% or more of the radio homes regularly listen to WWL. Plus coverage in 510 counties in which 10% to 33% of the 1,513,600 radio homes are regular WWL listeners)

NIGHT TIME—1,027,610
Radio Homes* — \$1,354,-
406,000 Retail Sales

(*340 counties with 33% or more regular WWL listening homes. Plus coverage in 901 counties where 10% to 33% of the 3,209,090 radio homes regularly listen to WWL)

870 KC • CBS • 50,000 Watts • Clear Channel

Penny For Penny—

BALTIMORE COVERAGE

Better Than Any!

Penny for penny, your advertising dollar realizes more Baltimore listeners—more permanent purchasers—over WCBM! This is no idle boast . . . no "freak" . . . no one-time proposition. It is WCBM's reason for existence . . . and YOUR reason for making it your key selling station in Baltimore!

*P. S. Baltimore business is booming today
as never before! Population up 20%!*

TIME...

. 591 YEARS OF IT ON KSTP

117 national and local spot advertisers have used an average of nearly 5 consecutive years each—an aggregate total of 591! We've prepared a booklet full of proof. Write for it. You'll see how products and services *just like yours* have used KSTP and why! The 8th retail market listens—and buys—when it's on KSTP, the Northwest's leading radio station.

PUT YOUR MONEY ON THE BLUE!

The Winning Radio Bet in the Golden Kansas City Market

KANSAS CITY DEALS IN MILLIONS!

\$285,000,000 worth of merchandise is sold through Kansas City retail stores annually.

\$112,000,000 worth of meat products are produced in Kansas City packing plants each year.

\$69,000,000 are paid out annually to employees of Kansas City's wholesale and retail stores.

\$47,000,000 are paid each year to employees of industrial manufacturing concerns.

\$4,000,000,000 represent the approximate amount of wealth created in this area annually from livestock marketed, farm crops raised, and oil and minerals produced.

In Kansas City, there's a spot on the dial now being tuned in by more and more people every day—the favorite station of thousands who play a big part in making Kansas City one of the nation's greatest markets.

And this station is KCMO—the basic blue network station in this great buying area.

KCMO reaches the people you want to hear your message. And it does this with a degree of economy that will surprise you. For KCMO's popularity and KCMO's rates make this station the most profitable of all radio "buys" in this market.

Write us about the time that's available and the merchandising service that goes with it.

To put it across
**...SPEAK your
 LISTENER'S
 LANGUAGE**

"Pailin' a cow" sounds as foreign to the city-ite, as "Having brunch" does to the farmer. To *sell* your product, talk your listeners' language. Use **KOIL** and **KFAB**.

KOIL sells your product to metropolitan listeners in the greater Omaha area, because it speaks the language of the city. KFAB sells in the agricultural areas throughout Nebraska and her neighboring states, because it knows how to talk to farm men and farm women. Including famous 7-Point Plus Merchandising, there are dozens of other reasons, too, why **KOIL** and **KFAB** will give *your* product a substantial sales boost.

Call or write for details. You *need* these stations, to do a *complete* selling job in these city and farm markets.

\$ YOUR BEST
ADVERTISING
MEDIUM

WMUR

The Radio Voice of New Hampshire

WMUR gives you complete coverage of New Hampshire . . . a market of 500,000 people with \$250,000,000 a year to spend. With one of the most, if not THE most, desirable frequencies in New England, WMUR on 610 kcs. with 5000 watts day and 1000 night throws out such a strong signal that 67% of its regular mail comes from the 17 major markets of New Hampshire which account for 76% of the retail business of the state. A member of the Blue network, WMUR also features local programming which attracts mail from the entire state and neighboring major markets in Maine and Vermont. To get your sales message across to the farmers, business men, laborers, housewives and every other sales potentiality in New Hampshire, your best medium is WMUR . . . "The Radio Voice of New Hampshire"

KILOCYCLES
in the center
of the dial

Represented by
**EDWARD
PETRY & CO.**

WBEN now operates on 5 KW day and night, with complete new transmitter and antenna installations geared to the compact Buffalo area of 400,000 families. But long before this increase in power and facilities, WBEN was outstanding in audience acceptance. All this means further supremacy in one of the nation's major centers of inland industrial and agricultural production.

The Preference of the Audience Is the Choice of the Advertiser

Good for you

before and after

As this ad goes to press, WINS is happy to announce that construction on its new 50 kilowatt transmitter at Lyndhurst, N. J. is rapidly nearing completion.

Actual operation on this increased power is expected early in 1942. Until this time, having now built up its other facilities as a 50,000 watt station, WINS offers the advertiser highly effective radio coverage at unusually attractive rates.

How to make 5,000 watts do the work of 480,000

The lower the frequency of a station the longer its wave-length; the longer the wave-length the stronger the signal. WMCA has New York's lowest frequency (570 kc.) and longest wave-length (526 meters). The tremendous value of "first on the dial" is illustrated below:

FOR EXAMPLE, TO DELIVER A 2 MILLIVOLT SIGNAL 43 MILES WITH A NON-DIRECTIONAL ANTENNA*:

(*Actually WMCA triples its power through a three-element directional antenna which amplifies the signal toward areas of greatest population.)

WMCA at 570 kc. needs only 5,000 watts

IF WMCA were at 1000 kc. . . . it would need 76,500 watts

IF WMCA were at 1200 kc. . . . it would need 158,000 watts

IF WMCA were at 1600 kc. . . . it would need 480,000 watts

Virgil Reiter & Co.,
400 N. Michigan Ave.,
Chicago.

WOV ... — FOR VICTORY

5000 WATTS

1280 KC

THE KEY
TO TWO
MARKETS

DAY TIME

IT'S A MONOPOLY

For 12 hours a day...from 6 A.M. to 6 P.M. ... WOV monopolizes 14% of the entire metropolitan listening audience ... the audience that can best be sold in the Italian language.

WOV sells this fruitful market of industrious wage earners and prosperous tradespeople ... 521,606 families, 1,780,024 persons...at a lower cost (at our present low rates) than any other advertising medium.

NIGHT TIME

ALAN COURTNEY

M. C. "1280 CLUB"

With platters and patter he battles the networks ... and "blitzs" all the rest. He bites a larger chunk out of the area's listening audience than any other program on the air.

PAN AMERICANA

Latin American Rhythms

AMERICA IN MUSIC

Classics by American Composers

MAXINE KEITH

"FOLLOW THE LEADER"

A lovely lady with discs and discourse.

THE Pulse of New York Survey for January 2-14, 1942 ... the only 100% yardstick for the measurement of radio audiences... establishes beyond question the leadership WOV enjoys among the independent radio stations in the Metropolitan area.

A representative from WOV, with authentic facts and figures will be very glad to prove this conclusion.

WOV ... — For Victory

WHAM's clear channel, 50,000 watt signal covers a rich and fertile 43 county primary area, where the occupants of 900,000 radio homes spend a better-than-average annual income in not one, but 18, busy trading centers. That's WHAMland—where the smoking chimneys of 5305 factories stand against the sky as symbols of payroll producing non-seasonal industrial activities—where 140,518 farms yield a rich annual harvest.

WHAM gives you coverage—but more than that, WHAM gives you plus listenership—in Rochester and all the cities of its 43 county primary area—in the small towns and in the country. Survey after survey

gives WHAM the top-flight audience-winning programs. In one of the most recent surveys published, nine out of the first ten audience-chosen programs were WHAM programs.

WHAM gives you more for your money—a broader market—a richer market. At approximately one-third the cost of localized coverage of the same area, WHAM is a better buy.

LOW RATE BLANKETS NORTH CAROLINA

“KEY” CITY — *With “Plus” Values*

Greensboro, N. C.—“Pivot of the Pied-
 mont,” with high per capita earnings and
 regular payrolls from diversified sources,
 is noted for its “trade-at-home” spirit.
 WGBG offers exceptional returns on your
 advertising dollar spent in this city—with
 a “Plus” value of heavy listener audience
 in its rich trade area—backed by merchan-
 dising aid from an up-and-coming staff
 of alert radio men.

CENTER OF WEALTH AND POPULATION OF NORTH CAROLINA

REASONS for THIS "MUST" STATION

6 CITY COVERAGE
 HIGH POINT GREENSBORO
 WINSTON-SALEM LEXINGTON
 THOMASVILLE
 DICKENSBORO

THE "TRIANGLE MARKET"

No. 1 The High Point-Winston-Salem-Greensboro triangle is the richest area in North Carolina—the center of the State's population—with highest income per capita.

COVERAGE

No. 2 WMFR completely blankets High Point—with a heavy listener audience in the trade area, "the triangle market."

PROGRAMS

No. 3 WMFR carries Blue Network shows, supplemented by proven local entertainment from studios in High Point, Thomasville and Lexington.

COST

No. 4 One of the best buys on the dial... Costs low enough to be placed in the modest budget with results comparable to much greater expenditure.

Your advertising on Fort Industry stations hits the mark. The experienced hands of 176 radio people pull the bow string that lets fly your message to its target. Of these staff members, all but ten have been with The Fort Industry Company two years or more; 22 have been with this firm ten years or longer; 44, five years or longer; 52 have been with Fort Industry at least three years. Long association together has sharpened their aim; they have pioneered, many of them, in broadcasting. Their combined experience doesn't show on the rate card, but it can be measured in vast, loyal audiences. If it's a Fort Industry station, your programming problem is safe in the hands of qualified broadcasters. Your message will find its mark!

RETAIL SALES UP 16% IN OKLAHOMA

Put your sales message into this growing, prosperous defense market, and watch it ring your cash register.

Retail sales increased 17% in Tulsa department stores in 1941—15% in Oklahoma City. And 1942 promises even greater gains, because of the millions in defense payrolls in this market.

It is a market full of people who have money to spend for your product or service. Easy, economical coverage by KOMA and KTUL brings that money into your coffer—doublefold!

Here, you get MORE for your MONEY!

BOTH STATIONS

MULTIPLY THE STRIKING EFFECTIVENESS
OF YOUR SALES CAMPAIGN WITH

It pays to buy WFIL . . . the only Philadelphia station offering merchandising cooperation tailor-made to meet individual sales problems. CHARTED MERCHANDISING! Unsolicited letters from leading advertisers and agencies conclusively prove the "Plus Value" of WFIL's specialized promotion.

You can sell more effectively in Philadelphia if you use WFIL's CHARTED MERCHANDISING — the plan that produces the largest listening audience at lowest cost. In 1941, 52.5% more advertisers used WFIL facilities compared to 1940. There must be a reason . . . and there is . . . WFIL Charted Merchandising.

THE Fifth ESTATE

RADIO has become of age. Its miracle, now 21 years old, has advanced through all the stages of every important and beneficial service, and has become commonplace . . . its mystery taken for granted.

That is as it should be. For radio is too important . . . too great to be held in awe. Let the philosopher wonder at its cause, but let the people enjoy its effects. Radio is for the people.

Jew, Gentile, Catholic and Protestant are all served . . . and served well by radio. For American radio is as democratic as the people it serves.

Information, entertainment, education and innumerable services that Midas could not buy with all his gold are to be had with the push of a button . . . the flick of a dial. The financier is served no better . . . no quicker than the farm-

The American public . . . comfortable and relaxed in the living room or speeding over the highway . . . hears history as it is being made and is better informed on both sides than ever before. Radio has not only reported the events, but for the first time has brought about mass participation in the determination of a foreign policy.

Radio service is as limitless as the ether waves. In peace it provides culture, information and amusement. In catastrophe it has alleviated suffering and raised funds for the needy. Today it is bolstering morale and building bridges of understanding between the Americas. But regardless of its task . . . always it serves.

That's why Radio is the Fifth Estate

WSM is proud to be a part of the American system of Broadcasting . . . the Great Fifth Estate.

HARRY L. STONE, Gen'l. Mgr.

KGKO

Edward Petry & Company, Inc.

Yes, everything to assure *outstanding* results...modern facilities, best of talent, effective coverage, clear signal, and a responsive audience. For national and regional advertisers, WFAA-WBAP, with the largest 50,000 watt primary coverage in the United States, and KGKO, second only to its sister station, present the best choice in radio in the Southwest. When you're thinking of Texas and Oklahoma—a rich, high income market—investigate this powerful combination.

WISN

MILWAUKEE, WISCONSIN

REPORT TO THE NATION

(Radio Time Buyers!)

★
On September 5, WISN dedicated its new 5000 watt transmitter increasing by twenty times its night time and five times its day time power.

★
A directional system concentrated to reach Wisconsin's greatest buying power was installed. Milwaukee County (1/4 of the State population) has been provided with a signal two to four times stronger than any other Milwaukee Station.

★
Thousands and thousands of new listeners throughout the State have been added to the regular audience of this important CBS key station.

★
Sales of WISN are increasing daily. Sales (excluding CBS) during the past ninety days over a year ago show:

STATION TIME SALES INCREASE

ANNOUNCEMENT TIME SALES INCREASE - 47%

★
The CBS commercial schedule for WISN is now the greatest in its history. New Columbia commercials are being added as they are inaugurated over this network.

★
The year 1942 finds WISN with licenses of ASCAP, BMI and SESAC and with the libraries of World and Standard.

★
With expanded Program and Merchandising Departments WISN stands ready to go "ALL OUT" to be of assistance to its advertisers.

★
Let us help solve your advertising problems in Milwaukee and in the area of the lucrative WISN coverage.

G. W. Ferguson

General Manager.

WE FOUND IT ON DECEMBER 7, 1941

With so many billions being spent for Defense, it is odd to note that the most important factor in our fight for freedom is itself free.

It was there with the American flyer who dove blindly to explode his ship on the deck of the invader.

It is there now with the air-raid wardens who pace vigilantly on cold, wet nights.

It is there as the greedy Hitlers and wretched Mussolinis realize that "Pearl Harbor" was an irrevocable blunder.

It is there as Mr. and Mrs. America grimly tighten their belts . . .

And with their son, who halts plans for his future to learn to shoot a gun.

It marks the end of the Fuehrer's Drang Nach Osten; his Wehrmacht; his Blitzkrieg; his fat puppet to the south; his slant-eyed dummy in the East.

It is America unified where it was once divided . . . 130 million people welded together in the flash of the first Jap bomb.

It is victory by unity, for now we are one.

HISTORY OF RADIO REGULATION

*With a Chronology of the Federal Radio Commission
and the Federal Communications Commission*

Compiled by Mary O'Leson, FCC Information Office

(Editor's Note: Treatise which follows was all-inclusive of the subject of communications, wired and all phases of broadcast, and has been edited so that only developments pertaining directly to commercial broadcasting are presented.)

Preliminary Regulation

Marconi's practical experiments with "wireless" at the turn of the century invited a quick succession of radio development that made some orderly supervision of this new means of communication necessary. The need for a common distress call for ships was recognized at the preliminary International Radio Telegraph Conference held in Berlin in 1903. The 1906 International Radio Telegraph Conference in Berlin proposed adoption of "SOS" to supplant "CQD" as a marine distress signal. On January 23, 1909, "CQD" calls sent out by Jack Binns speeded rescue to the steamship "Florida" in collision off New York.

Radio Act of 1910

On June 24, 1910, the United States enacted a law ordering wireless installation on passenger-carrying steamships. The Department of Commerce, on July 1, 1911, organized a Radio Division to enforce this 1910 requirement. The value of wireless was again demonstrated in the saving of more than 700 lives in the "Titanic" disaster on April 14, 1912, when Jack Phillips and Harold Bride were the heroes. Regulations to secure uniformity of practice in wireless communication were adopted by the International Radio Telegraph Conference at London in July, 1912.

Radio Act of 1912

On August 13, 1912, the United States adopted the Radio Act of 1912 which placed licensing of wireless stations, wireless operators, and amateurs, in the hands of the then Secretary of Commerce and Labor. "Radio Communication Laws of the United States," issued August 15, 1919, classified early broadcasters as

"limited commercial stations" and "special amateur stations."

Station KDKA, first listed in the "Radio Service Bulletin" for November 1, 1920, was licensed as a commercial land station. Initial regulations governing operation of broadcasting stations as such appear in the "Radio Service Bulletin" of April 1, 1922. At that time the "wavelength" of 360 meters (approximately 830 kilocycles) was assigned for the transmission of "important news items, entertainment, lectures, sermons, and similar matter." Stations engaged in this service held limited commercial licenses and their operators were licensed by the Department of Commerce. Recommendations of the First National Radio Conference, held at Washington on February 27, 1922, were promulgated into regulations by the Secretary of Commerce. A new type of broadcast station came into being, with minimum power of 500 watts and maximum not to exceed 1000 watts, whose programs "must be carefully supervised and maintained to insure satisfactory service to the public." Mechanically operated musical instruments were to be used only in an emergency and during intermission periods in regular programs.

The Interdepartment Radio Advisory Committee was formed by the Secretary of Commerce at the suggestion of the First National Radio Conference. It met as a temporary body from March 8 to April 16, 1922, after which it organized on a permanent basis. The Second National Radio Conference, March 20, 1923, made certain recommendations which were embodied in supplemental Department of Commerce regulations. Under their provisions, broadcast of telegrams or letters was permitted so long as the signer was not addressed in person and the text was of general interest. Reallocation of wavelengths, on May 15, 1923, further established the "broadcasting

development class" of station. Power was not permitted to exceed 1000 watts without special authority from the Secretary of Commerce.

The Third National Radio Conference, October 6 to 10, 1924, deemed increased power desirable, so the Department of Commerce authorized up to 5000 watts for experimentation. The Radio Service Bulletin for January 2, 1925, showed but one station—KOA—operating with power of 1000 watts. The next month's listing revealed KGO and WEAJ operating with 2000 watts, and KFI, KYW, WBZ, WGY, WLW, WOC and WTAM with 1500 watts, and about a dozen stations using 1000 watts. Following the Fourth National Radio Conference, November 9 to 11, 1925, several stations began to use 5000 watts, and KDKA and WJZ were indicated as operating with "variable" power.

Air Chaos of 1926

During the early part of 1926 the Zenith Radio Corporation was charged with operating its broadcast station "on a wavelength and at times which were not authorized." Resultant court opinion characterized provisions of the Radio Act of 1912 as "general, indefinite and ambiguous." The Attorney General was asked by the Secretary of Commerce for a ruling. According to the Circuit Court of Cooke County, Illinois, in the Tribune Company versus Oak Leaves Broadcasting Station, Inc., case, Acting Attorney General Donovan, on July 8, 1926, rendered an opinion which, in effect, advised that "broadcasting stations coming within the prescribed band could not be regulated, except for the purpose of designating normal wavelengths. . . . and that the Act conferred no general authority to fix hours of operation or to limit power." Consequently, the list of broadcast stations published in the Radio Service Bulletin for January 31, 1927, carried this explanation: "The power and wavelengths given in this table were compiled from applications for licenses furnished the Department by owners of the stations. Since the Department does not make assignments in either respect, this list is not necessarily in conformity with wavelengths or power actually used." The listing showed KGA operating with 20 kilowatts, others employing 5 kilowatts, and still others using "variable" power. There was bedlam on the air. More than 200 radio stations sprang up within two months. Many broadcasters jumped their frequencies and increased their power and operating time at will.

On December 8, 1926, Congress legislated that broadcast license renewals should not be granted for more than 90

days, and those of other classes of stations not longer than two years.

Federal Radio Commission

The Radio Act of 1927, approved February 23 of that year, created the Federal Radio Commission. For some time after its organization, the Federal Radio Commission was obliged to devote a major portion of its time to straightening out the tangle in the broadcast band that was precipitated in 1926. With only 90 channels available, it was impossible to care for the 732 broadcast stations as then operating. Promulgation of new rules and regulations caused about 150 of these broadcasters to surrender their licenses. Under the Radio Act of 1927 the Federal Radio Commission was to be the licensing authority for all radio services. At the end of that year the Federal Radio Commission was to become an appellate body to review decisions of the Radio Division of the Department of Commerce in making allocations. Its authority as a licensing body was extended annually by Congress until December 18, 1929, when an act was approved continuing its powers "until otherwise provided by law."

1927

On April 5, the Commission established the broadcast band ranging from 550 to 1500 kilocycles. Six frequencies were cleared for Canadian use and provision made for sharing 11 channels with that country. The Radio Service Bulletin of April 30, showed several stations operating with power of 20 kilowatts or more, and authorization for station WGY to use 56 kilowatts.

On May 5 the Commission ordered announcement of broadcast call letters every 15 minutes. Action to prevent speculation transfer of control was initiated by the in radio stations in connection with Commission on May 13. Hearings on interference started June 7. Announcing of mechanical recordings was required by order of August 16. The International Radiotelegraph Conference, meeting at Washington October 5 to November 25, resulted in many technical adjustments, including allocation of the entire range of frequencies from 10 to 60,000 kilocycles, effective January 1, 1929. On November 14 the Commission moved to clear channels of heretodyning.

1928

On March 28, the so-called "Davis Amendment" was adopted. It amended the Radio Act of 1927 to provide "a fair and equitable allocation of licenses, wave-

lengths, time for operation and station power" by states within the five zones established to bring about "equality of radio broadcasting service, both of transmission and reception." A Commission order of April 20 prohibited removal of studios outside borders of states in which they were then located. On May 11 the Commission called public attention to Section 18 of the Radio Act of 1927 with reference to use of broadcasting facilities by candidates for public office. A Commission order of August 30 set up 96 broadcast channels of which number 40 were designated as "clear channels," 34 as "regional channels" and 6 as local channels." An order of September 7 fixed the power of clear channel stations at 25 kilowatts but allowed 50 kilowatts operation on an experimental basis. Regulations to prevent program duplication at night were promulgated September 8. (Execution of this order was frequently postponed). Further requirement as to announcing mechanical reproductions was made October 26. Initial steps to provide for television were taken on October 31. On October 31 the Commission banned future use of transmitters employing damped wave emissions. Further reference to announcing mechanical reproductions was made November 26. Allocation of frequencies between 1500 and 6000 kilocycles was announced December 22.

1929

Additional provisions for television broadcast were made January 14. On March 4 the Radio Act of 1927 was amended in minor particulars. Time of operation with respect to local standard time, daylight saving time, etc., was defined March 23. Width of channels in the high frequency band were stipulated April 5. On June 10 priority was ordered for "SOS" calls. On June 10 the Commission authorized issuance of subpoenas for witnesses. Rules governing relay broadcasting were announced June 10. Restrictions on the use of damped waves by broadcasters was amended September 13. On September 18 the Commission extended to December 31 proposed restrictions on chain programs. Allocation of frequencies between 1500 and 6000 kilocycles to include geophysical service was announced October 11. An order of November 8 regulated the kind of apparatus to be used to reduce interference between stations. As of November 9, the following stations were operating with 50 kilowatts—KDKA, KFI, WBCN,

WEAF, WENR, WFAA, WGY, WLW, WTAM and WTIC. New requirements for announcing mechanical transcriptions were announced December 5. On December 18 the Radio Act of 1927 was amended in minor details. An order rescinding previous orders regarding duplication of chain programs, was adopted December 20.

1930

A further order on damped wave transmission was issued January 3.

New York v. Federal Radio Commission, March 12, 1930, (36 F (2nd) 115, cert. denied). The Court of Appeals of the District of Columbia affirmed an order of the Commission denying an existing station the right to operate full time and requiring it to share time with another station. The court held that a radio licensee has no property right in a license and that such a licensee, even if it be a city, is subject to Federal regulation under the interstate commerce clause and may be deprived of its license without compensation.

Broadcast allocation regulations were amended April 7. High frequency channel width regulations were announced April 14. An order of April 21 required applications for license renewals to be filed 30 days prior to their expiration.

Federal Radio Commission v. General Electric Co., May 19, 1930, (281 U. S. 464). Writ of certiorari dismissed. The Supreme Court held that the Commission had no jurisdiction to review a decision of the Court of Appeals for the District of Columbia which reversed an order of the Radio Commission refusing an application to renew an existing license for full time operation of a broadcasting station. Its reasoning was that it could not review the proceeding in the lower court because it was not a case or controversy, but only an administrative proceeding in which the Court of Appeals acted as a "superior and revising agency." The jurisdiction of the Court of Appeals over Commission decisions was then defined by Section 16 of the Radio Act of 1927 which was subsequently amended. (See discussion of *Federal Radio Commission v. Nelson Bros. Bond & Mortgage Co.*, p. 9 infra).

Posting of licenses in transmitter locations was required under date of May 19. An order of May 23 established maximum rated carrier power for broadcast transmitters.

Great Lakes Broadcasting Co. v. Federal Radio Commission, and companion

cases, June 2, 1930, (37 F. (2nd) 993, cert. denied 281 U.S. 706). The Court of Appeals for the District of Columbia upheld a Commission decision denying the application of a part-time station to be given more operating time on another frequency. The Court held that the fact that one station had been using the channel for a long time gives it no preference since no station has any fixed right in a frequency as against the Federal regulatory power.

An order of June 17 provided a quota system to comply with the "Davis Amendment." Rules of practice and procedure were announced June 25. On September 29 the Commission repealed its order of May 13, 1927, intended to prevent speculation in broadcast stations in connection with transfer of control. Maximum rated power of transmitters was specified October 6. On October 15 and 16 the so-called "high power hearings" were held. An order of October 27 related to auxiliary studios and remote control apparatus.

1931

White v. Johnson, January 5, 1931, (282 U.S. 367), *American Bond & Mortgage Co. v. United States*, January 5, 1931 (282 U.S.374). The Court refused to entertain certificates of questions certified by Circuit Court of Appeals as to whether a person continuously broadcasting and having a going business acquired a property right holding that the questions were too general.

Plan of equalization of quota service under zones was announced January 8. An order of February 12 defined the broadcast day, experimental period, unlimited time stations, etc. Instructions for keeping logs were announced February 16. On March 24 amendments of April 7, 1930, to allocation set-up were repealed. Transmitter power rating requirements were amended March 26. (Same were repealed April 20). Requirements for broadcast station licensed persons were announced May 11. An order of May 15 required broadcast applications to be filed 60 days prior to expiration of license. An order of May 25 established tube rating and specified transmitter power, etc.

Duncan v. United States, June 1, 1931, (48 F. (2nd) 128, cert. denied, 283 U.S. 863). The Court of Appeals, Ninth Circuit, affirmed the conviction of Duncan who had been convicted of violating Section 29 of the Radio Act of 1927, prohibiting the broadcast of obscene, indecent, and profane language. The Court held that the enactment of such a provision was within the power of Congress under the interstate commerce clause.

On June 22 the frequency tolerance in the broadcast band was changed to 50 cycles, effective a year from date. Certain provisions re channel width were amended June 24. Band width and type of emission were designated September 3. "Rules and Regulations of the Federal Radio Commission" were adopted November 7. They embodied principles established by previous orders with slight modifications. On November 17 construction permits were granted WHAM, WBZ, WHAS, WAPI, KVOO, KFAB, WOR, WCAU, WSM, WSB, WHO - WOC, WCCO, KOA, KPO and KSL. The Commission's annual report for the fiscal year 1931 published extensive "Empirical Standards used as Basis for Engineering Testimony in Hearings Concerning Broadcast Stations."

1932

American Bond & Mortgage Co. v. United States, February 23, 1932, (52 F. (2nd) 318, cert. denied, 285 U.S. 538). The Court of Appeals, Seventh Circuit, affirmed a decree of a district court which enjoined the operation of a station which was being operated after the Commission had refused an application to renew its license. The Court held the Federal Radio Act of 1927 to be constitutional under the Commerce clause and that the order denying renewal was not contrary to law. It held that licensees had no property interests in their licenses, despite expenditures made on the faith thereof.

The International Radio Conference at Madrid, Spain, September 3 to December 10, 1932, completely revised the agreement signed at Washington in 1927, and culminated in the International Telecommunications Convention, ratified by the United States. The Federal Radio Commission's annual report for the fiscal year 1932 set forth certain developments in Empirical Standards of Allocation of Frequencies, dealing largely with "Transmitter Locations."

1933

Trinity Methodist Church South v. Federal Radio Commission, January 16, 1933, (62 F. (2d) 850, cert. denied, 288 U.S. 599). The Court of Appeals of the District of Columbia held that Congress had the power to regulate radio broadcasting under the interstate commerce clause, that an existing licensee had no property interest in the license, that the Commission may deny his application for renewal of a license without violating the Constitutional guarantees against the taking of property without due process, and that the Commission had not erred in concluding that certain objectionable

programs broadcast by the licensee were contrary to the public interest. The Commission's order was affirmed.

Radio Investment Co. v. Federal Radio Commission, March 4, 1933 (62 F. (2d) 381, cert. denied, 288 U.S. 612). The Court of Appeals of the District of Columbia held that the Commission had not erred in granting the application of one of two existing time-sharing stations and terminating the other's temporary license. Both stations had asked for modification of their licenses and for unlimited hours of operation. The station which had been deleted had been found by the Commission to have violated its license and the Commission's regulations and to have rendered a program service inferior to that of the other station.

Federal Radio Commission v. Nelson Bros. Bond & Mortgage Co., and related cases, May 8, 1933 (289 U.S. 266). Judgment of Court of Appeals reversed, and cause remanded, with directions to affirm the decision of the Commission. The Supreme Court held that the standard of public interest, convenience or necessity was not so vague as to render the Radio Act of 1927 unconstitutional. It held that the Commission had not acted arbitrarily in deleting a station in an over-quota state and assigning the frequency vacated to a station in an under-quota state.

Boston Broadcasting Co. v. Federal Radio Commission, October 23, 1933 (67 F. (2d) 505, cert. denied, 290 U.S. 679). The Court of Appeals of the District of Columbia, held that the Commission's decision in denying an application for renewal of a station license was not contrary to law and that the findings of the Commission were supported by substantial evidence and were not arbitrary or capricious. It appeared that the licensee was insolvent, that it had made certain misstatements as to ownership in the application and that the station had not operated in the past within the terms of its license.

Pote v. Federal Radio Commission, October 23, 1933. The Court of Appeals of the District of Columbia held (67 F. (2d) 509 cert. denied 290 U.S. 680), that it was without jurisdiction over an appeal by a proposed transferee to whom the Commission had denied consent to a transfer of a license.

Federal Communications Commission

At the request of President Roosevelt, Secretary of Commerce Daniel C. Roper in the summer of 1933 appointed an in-

terdepartmental committee to study the communications situation. The Committee consisted of Secretary Roper, Chairman; Dr. Irwin Stewart, State Department; Lt. Commander Edward M. Webster, Coast Guard, Treasury Department; Maj. General Irving J. Carr, Chief Signal Officer, War Department; Capt. S. C. Hooper, Chief of Naval Communications; Maj. General Charles McK. Saltzman, former chairman of the Federal Radio Commission, then serving as a member of the United States Shipping Board; Dr. J. H. Dellinger, Chief of the Radio Section, Bureau of Standards, and Herbert L. Pettey, secretary of the Federal Radio Commission. In an advisory capacity were Senator C. C. Dill, Chairman of the Senate Interstate Commerce Committee; Representative Sam Rayburn, Chairman of the House Interstate and Foreign Commerce Committee, and Dr. W. M. W. Splawn, adviser to the House Interstate and Foreign Commerce Committee.

In October, 1933, this Committee reported to the President that "the communications service, so far as Congressional action is involved, should be regulated by a single body." Accordingly, it recommended establishment of a new body to which would be transferred the jurisdiction of the Interstate Commerce Commission over common carriers by wire or wireless, the authority of the Federal Radio Commission over radio broadcasting, and jurisdiction of the Post Office Department over telegraph companies and telegraph lines.

On February 26, 1934, the President sent a special message to Congress urging passage of a Communications Act and creation of the Federal Communications Commission. His message read:

...I have long felt that for the sake of clarity and effectiveness the relationship of the Federal Government to certain services known as utilities should be divided into three fields; Transportation, power and communications. The problems of transportation are vested in the Interstate Commerce Commission, and the problems of power, its development, transmission, and distribution, in the Federal Power Commission. In the field of communications, however, there is today no single Government agency charged with broad authority. The Congress has vested certain authority over certain forms of communications in the Interstate Commerce Commission, and there is in addition the agency known as the Federal Radio Commission. I recommend that

the Congress create a new agency to be known as the Federal Communications Commission, such agency to be vested with the authority now lying in the Federal Radio Commission and with such authority over communications as now lies with the Interstate Commerce Commission—the services affected to be all of those which rely on wires, cables, or radio as a medium of transmission. It is my thought that a new commission such as I suggest might well be organized this year by transferring the present authority for the control of communications of the Radio Commission and the Interstate Commerce Commission.. The new body should, in addition, be given full power to investigate and study the business of existing companies and make recommendations to the Congress for additional legislation at the next session.”

On February 27, 1934, Senator Dill and Representative Rayburn introduced bills to carry out the President's recommendations. Senate Bill 2910 provided “for the regulation of interstate and foreign communications by wire or radio and for other purposes.” House Resolution 8301 was identical in many respects, the chief difference being in the sections relating to broadcast. Extensive hearings were held on the Senate Bill which, amended, was reintroduced on April 4, 1934, as S. 3285. It passed the Senate on May 15 and was referred to the Committee on Interstate Commerce. That committee held hearings for several days on H.R. 8301, the companion bill, and in executive session worked out a substitute measure, S. 3285. The Senate Interstate Commerce committee reported it with amendments in Senate Report No. 781, on April 19, 1934. On June 1, 1934, Representative Rayburn from the House Committee on Interstate and Foreign Commerce reported out S. 3285 in House Report No. 1850. After two hours of debate but without a record vote, the House passed the bill that same day. The measure which came through the House differed materially from the original Senate bill. Title 3 of the Senate bill, containing numerous amendments to the Radio Act of 1927, was eliminated from the House bill, which repealed the Radio Act of 1927 but re-enacted its provisions without change. The bill went to conference and on June 8, 1934, Representative Rayburn filed a conference report which appeared in full in the Congressional Record of that date. The following day this conference report was adopted by both the Senate and the House, and the measure was sent the President for his signature. On June 19, 1934, the Communications Act was signed by President Roosevelt. The Act took effect, as to Sections 1 and

4, on July 1, 1934, and as to its remaining provisions on July 11, 1934.

1934

Unity School of Christianity v. Federal Communications Commission, May 21, 1934, (69 F. (2d) 570 cert. denied 292 U.S. 646). The Court of Appeals for the District of Columbia affirmed an order of the Commission which granted full time operation on a certain frequency to a station which had been operating on a share-time basis with another station, even though the effect of such order was to delete operation by such other station. The Court found that the Commission's decision was supported by substantial evidence.

The Federal Communications Commission started to function July 11, when the Commissioners took their oaths of office. Three Divisions—Broadcast, Telegraph, and Telephone—were established by Commission Order No. 1, July 17. Order No. 3, September 28, directed the Broadcast Division to conduct public hearings on non-profit radio programs as required by Section 307 (c) of the Act. Administrative Order No. 1, December 14, enjoined Commission personnel from giving verbal interpretations of provisions of the Act.

1935

Appointment of the original seven members of the Commission was not confirmed until February 7, 1935, when the Senate did so without objection rules of practice and procedure. Organization of the FCC Employees Credit Union was announced September 16.

October 21, 1935, *Sykes v. Jenny Wren Co.* The Court of Appeals (78 F. (2d) 729, cert. denied 296 U.S. 624), held that the District Court was without jurisdiction to enjoin the Commission from acting upon an application for a license. It was held that the plaintiff, an existing station complaining of the proposed competition of the applicant for a license, must pursue his statutory remedy of appeal to the Court of Appeals for the District of Columbia should he be aggrieved by any final decision the Commission might make.

Creation of the Federal Radio Education Committee was announced by the Commission December 18.

1936

Order No. 14, May 13, made Rule 229, as amended, (allocation of frequencies) effective July 1, 1936. (Order No. 15,

May 13, related to hearings on objections to Order No. 14.) On June 5, Congress amended the Communications Act repealing provisions of the "Davis Amendment" carried over from the Radio Act of 1927, which had provided for "fair and equitable allocation of (broadcast) facilities to each state," and repealing that portion of the Act which had divided the country into five broadcast zones. On August 8, 1936, the United States ratified and deposited at London, the "Safety of Life at Sea" Convention which was signed in London May 31, 1929.

The annual report for 1936 refers to the appointment of a "Standing Committee on Rules," representative of the different departments with the General Counsel as chairman, having the duty of drafting regulations from time to time for the consideration of the Commission.

1937

Order No. 18, October 13, allocated frequencies to services in the band from 10 to 30,000 kilocycles. Order No. 19, October 13, allocated frequencies to services in the band from 30,000 to 300,000 kilocycles. Order No. 20, October 13, abolished the Broadcast, Telegraph, and Telephone divisions created in Order No. 1.

Eastland Co. v. Federal Communications Commission, and companion case, *Congress Square Hotel Co. v. Federal Communications Commission* October 25, 1937 (92 F. (2d) 467, cert. denied 302 U.S. 735). The Court of Appeals of the District of Columbia affirmed a decision of the Commission granting a construction permit to one of two applicants for the use of a certain frequency, denying the application of the other, and overruling the objections of an existing station in the same city. The Court held that since the Division of the Commission rendering the decision had acted on the evidence, there was no error despite a change in personnel in the Commission after the hearing of oral testimony. The order of the Commission was not a violation of its rules against repetitious applications where a prior applicant held some stock in but did not control the present applicant. The finding of the Commission on the question of the economic effect of a new station on existing stations is conclusive.

The First Inter-American Radio Conference, held at Habana, Cuba, November 1 to December 13, initiated the subsequent North American Regional

Broadcasting Agreement. Convention and Agreement ratified on July 21, 1938, Arrangement ratified on July 18, 1938. Order No. 23, November 10, extended orders and regulations promulgated by abolished divisions. Order No. 24, November 10, amended Part 1 of rules and regulations relating to practice and procedure. Order No. 25, November 11, required the Secretary to make a record of all communications received by the Commission relating to applications. Order No. 26, November 11, required the Secretary to prepare a weekly list of all applications received. Order No. 28, November 29, authorized the Secretary and Chief Engineer to act on certain routine applications.

1938

Limitations on the use of spark sets and technical agreements to improve radio service generally were agreed to at the International Radio Conference at Cairo, Egypt, February 1 to April 8. General Regulations ratified August 25, 1939. Order No. 35, February 23, authorized the Secretary to issue travel orders.

United States v. Baker, February 28, 1938 (93 F. (2d) 332 cert. denied 303 U.S. 642). The Circuit Court of Appeals, Fifth Circuit, reversed a judgment of the District Court convicting Baker for operating radio apparatus without a license. The appellate court held that the scheme of Baker, by which he made phonograph records in Texas, transported the records to Mexico, and played them there over Mexican radio stations so as to be heard in the United States was not within the scope of Sec. 325(b) of the Act, since the sound waves were not reproduced in the United States.

Order No. 36, March 1, assigned Commissioners duties for March. On March 18, the Commission on its own motion, by Order 37, authorized an investigation of network broadcast practices. Order No. 38, March 23, required broadcasting companies to file earnings, reports and other data with the Commission.

Missouri Broadcasting Corp. v. Federal

Communications Commission, March 28, 1938 (94 F. (2d) 623, cert. denied 303 U.S. 655). The Court of Appeals of the District of Columbia affirmed an order of the Commission which granted a permit to one of two applicants for the same frequency in the same city and denied it to the other. The Court held that though it was error for the Commission to fail to file a statement of grounds for its decision simultaneously with its order denying the application, yet in this case it was harmless because applicant had filed a motion for rehearing with knowledge of such reasons. The court also found that the evidence was sufficient to support the Commission's action.

On April 6 the Commission appointed a committee comprising Chairman McNinch, and Commissioners Walker, Sykes and Brown to conduct the network inquiry. (Sykes was later replaced by Thompson). From June 6 to June 30 hearings were held on proposed new and modified Rules and Regulations Governing Standard Broadcast Stations.

Saginaw Broadcasting Co. v. Federal Communications Commission, October 10, 1938 (96 F. (2d) 554 cert. denied 305 U.S. 613). The Court of Appeals of the District of Columbia held that the filing of a petition for rehearing suspends the running of the appeal period, and that an applicant has 20 days from the date of final action on the petition for rehearing within which to file his notice and reasons for appeal. The Court found that the failure of the Commission to make specific findings of fact from the evidence was prejudicial to an applicant for a permit and remanded the case to the Commission.

Red River Broadcasting Co. v. Federal Communications Commission, October 10, 1938 (98 F. (2d) 282 cert. denied 305 U.S. 625). The Court of Appeals of the District of Columbia held that the owner of an existing station could not appeal from an order of the Commission granting a construction permit to an applicant in the same territory, unless he had exhausted the administrative remedies afforded by the statute.

Order No. 49, November 9, abolished the Press Division. Order No. 50, November 9, abolished the Examining Division and changed post-hearing procedure. On November 14 hearings began on network inquiry. (Continued intermittently to May 19, 1939.)

1939

On January 1 provision was made for holding oral argument on all interlocutory pleadings and motions. On January 3 a proposal for television transmission

was referred to a committee comprising Commissioners Craven, Brown, and Case for study.

Black River Valley Broadcasts, Inc. v. McNinch, April 29, 1939, (101 F. (2d) 235, cert. denied 307 U.S. 623). The Court of Appeals of the District of Columbia held that the District Court was without jurisdiction to enjoin the enforcement of a Commission order setting aside a grant of license to plaintiff and ordering a *de novo* hearing on plaintiff's and a conflicting application, since the statutory appeal provided in Section 402 (b) of the Act was a complete and adequate remedy for review of such action. (See *Sykes v. Jenny Wren Co., supra*).

May 22 first Committee report on television study. An engineering conference on Standards of Good Engineering Practice was held June 5 and 6. New Rules and Regulations and Standards of Good Engineering Practice were adopted June 23, to become generally effective August 1, 1939. On July 1 revised rules governing commercial radio operators became effective, incorporating a new examining procedure. Administrative Order No. 2, July 12, authorized an Administrative Board and department heads to act on routine non-policy matters. (Various Amendments.)

Woodman of the World Life Ins. Society v. Federal Communications Commission, October 9, 1939 (105 F. (2d) 75, cert. denied 308 U.S. 588). The Court of Appeals of the District of Columbia held that the Commission's findings that interference would not result to a Nebraska station by the granting of an application of a Michigan station to change its equipment and power, was supported by substantial evidence and that therefore the Nebraska station was not aggrieved so as to have an appealable interest.

Crosley Corp. v. Federal Communications Commission, November 6, 1939 (106 F. (2d) 833, cert. denied 308 U.S. 605). The Court of Appeals of the District of Columbia held that it had no jurisdiction to entertain an appeal by the holder of a special temporary authorization to carry on experimental programs when the Commission refused to extend the duration of such license.

A second Committee report on television was made November 15. On December 21 the Commission adopted committee report and rules looking toward limited commercialization of television on September 1, 1940.

1940

On January 15 hearings opened on proposed limited commercialization of television. (Continued for eight days).

Federal Communications Commission v. Pottsville Broadcasting Co. January 29, 1940 (309 U.S. 134). *Fly v. Heitmeyer*, January 29, 1940 (309 U.S. 146). Judgments of Court of Appeals for the District of Columbia reversed with directions to dissolve writs of mandamus and to dismiss respondents' petitions. The Supreme Court held that when the Court of Appeals for the District of Columbia reverses a Commission decision denying an application and sends it back for further proceedings, the Commission may reconsider the application along with rival applications, subsequently filed, to determine on a comparative basis which would best serve the public interest. The Court of Appeals for the District of Columbia has no power to prevent the Commission from doing this by requiring a reconsideration of the application on the record.

On March 18 hearings began on possibilities of high frequency (FM) broadcast service. (Continued for 10 days). Order No. 65, March 22, suspended the proposed September 1 date for limited commercial television and ordered further hearing.

Federal Communications Commission v. Sanders Bros. Radio Station, March 25, 1940 (309 U. S. 470; rehearing denied, April 22, 1940, 309 U. S. 642). Judgment of Court of Appeals of the District of Columbia reversed a Commission order granting application affirmed. It was held that an existing licensee likely to be financially injured because of competition resulting from the issuance of a license to another has the standing to appeal from an order of the Commission granting the license, for the purpose of pointing out errors of law in the Commission's action. However, economic injury to an existing licensee resulting from proposed competition is not a separate and independent element to be considered

by the Commission in acting upon an application for broadcast facilities inasmuch as such licensee is not protected under the Act from competition. The Commission's order was affirmed.

On March 29, Mexico deposited its ratification of the North American Regional Broadcasting Agreement, to become effective one year from that date (previously ratified by Canada, Cuba, the Dominican Republic, Haiti, and the United States). Reopened television hearings began on April 18. (Continued for 5 days.) Full commercialization of high frequency (FM) broadcasting was authorized May 20 and certain frequency shifts were ordered. Order No. 67, May 22, assigned particular frequencies to FM. Order No. 68, May 22, dismissed without prejudice pending FM applications to permit application on commercial basis. Order No. 69, May 22, called upon experimental FM stations to return licenses for cancellation. A new plan for experimental television development pending industry agreement on uniform system was announced May 28. Allocations to various services of frequencies in the bands 116,000 to 119,000 kilocycles and 156,000 to 162,000 kilocycles, were approved June 4.

Order No. 7, June 7, extended time of broadcast operation from local sunrise to 4 a.m. On June 12 the network inquiry committee submitted its report. New rules and regulations governing television experimental stations were announced June 18. Order No. 75, June 18, required all commercial and amateur operators to furnish proof of citizenship. On June 22 the Commission adopted rules putting FM broadcasting on a commercial basis. Standards of Good Engineering Practice Concerning High Frequency (FM) Broadcast Stations were announced June 28. On July 17 the Commission announced creation of a National Television Systems Committee through cooperation of the Radio Manufacturers Association.

Administrative Order No. 3, July 24, provided for action by the Commission in

the absence of a quorum. On July 24 special emergency radio service rules were changed for clarification. The Defense Communications Board was created by Executive order September 24. High frequency (FM) broadcast rules were amended October 2. On October 6 the Commission authorized a questionnaire on foreign language broadcasts. On October 15 the Commission adopted a new rule requiring international broadcast stations to make verbatim mechanical records of international programs transmitted, and to keep transcripts and other records for a period of two years. An informal engineering conference to consider frequencies for electro-medical apparatus was held November 29.

Federal Communications Commission v. Columbia Broadcasting Co. and companion case, November 25, 1940, (——— U. S. ———, 85 L Ed. 109). Order of Court of Appeals of the District of Columbia denying the Commission's motion to dismiss the appeals, reversed. The Supreme Court held that the Court of Appeals did not have jurisdiction to entertain appeals by the proposed transferor and transferee of an existing license from a Commission order refusing consent to the transfer of license.

Oral argument on briefs submitted pursuant to the report of the network inquiry committee was heard December 2 and 3. On December 6 the Commission reported on responses to its foreign language broadcast questionnaire by October 6. A system of distinctive calls for FM broadcast stations was adopted December 6. On December 9 there was an engineering conference on equipment for high frequency (FM) broadcast stations.

1941

The National Television Systems Committee made report to the Commission on January 27. On January 28, the Commission announced a hearing for March 20 to consider television engineering proposals. Conclusions and agreements reached at the high frequency (FM) engineering conference of December 9 were announced on January 31. On January 31 the Commission approved Recommendations of the Engineering Conference

under the North American Regional Broadcasting Agreement and released a revised list of United States frequency assignments, effective March 29.

Federal Radio Commission Commissioners

The following were the original five members of the Federal Radio Commission; Rear Admiral W. H. G. Bullard; Judge Eugene O. Sykes; Orestes H. Caldwell; Henry A. Bellows; Colonel John F. Dillon. All were appointed March 15, 1927; Admiral Bullard representing the Second Zone, was named Chairman. He served until his death November 24, 1927. A vacancy then ensued for several months, until his successor Judge Ira E. Robinson was appointed on March 29, 1928. Judge Robinson was made Chairman April 5, 1928; reappointed to the Commission February 23, 1930, for a term of 2 years, and resigned January 15, 1932. He was succeeded by Colonel Thad H. Brown on January 21, 1932, who was appointed for a term of 6 years, and was reappointed to the Federal Communications Commission. Judge Sykes was appointed to represent the Third Zone; reappointed February 23, 1930 for a term of 3 years; reappointed March 20, 1933, for a term of 6 years; elected Chairman March 21, 1933; reappointed to the Federal Communications Commission in July, 1934, for a term of 7 years. Resigned April 5, 1939. O. H. Caldwell resigned February 23, 1929, and was succeeded by W. D. L. Starbuck, representing the First Zone, who was appointed May 2, 1929; reappointed February 23, 1930 for a term of 4 years, which expired February 23, 1934. Henry A. Bellows resigned October 31, 1927 as Commissioner for the Fourth Zone. He was succeeded on November 1, 1927 by Sam Pickard, who served until his resignation on January 31, 1929. He was succeeded by Maj. Gen. Chas. McK. Saltzman, appointed May 2, 1929; reappointed for a term of 6 years on February 23, 1930; made Chairman February 28, 1930, resigned July 19, 1932. He was succeeded by James H. Hanley, appointed to fill the unexpired term ending February 23, 1936. Mr. Hanley was not appointed to the Federal Communications

Commission in 1934. Colonel John F. Dillon, who represented the Fifth Zone, died October 8, 1927, and was succeeded by Harold A. Lafount, appointed November 14, 1927; reappointed February 23, 1930 for a term of 5 years, but was not named to the Federal Communications Commission in 1934.

Secretaries

Sam Pickard was engaged as Acting Secretary of the Federal Radio Commission on March 15, 1927; made permanent Secretary April 20, 1927, and served until his appointment as Commissioner on November 1, 1927. Carl H. Butman succeeded Mr. Pickard as Secretary from November 1, 1927, serving until he resigned May 1, 1930. James W. Baldwin was appointed Secretary May 5, 1930. He resigned February 28, 1933. Herbert L. Pettey succeeded Mr. Baldwin as Secretary on March 31, 1933, and was made Secretary of the Federal Communications Commission in July, 1934.

General Counsels

The Federal Radio Commission had no legal division until June 25, 1928. The Department of Justice from time to time detailed Bethuel M. Webster, Jr., Special Assistant to the Attorney General, to assist the Commission in the handling of particular hearings and court cases. On June 25, 1928, the position of General Counsel was filled by appointment of Louis G. Caldwell. Mr. Caldwell served until February 23, 1929, when he resigned. Bethuel M. Webster, Jr., was on March 5, 1929 appointed General Counsel. He resigned December 15, 1929. Colonel Thad H. Brown was then appointed General Counsel, and served from December 15, 1929 until January 21, 1932, when he was named Commissioner. On March 28, 1932, Duke M. Patrick who had been Assistant General Counsel since January 27, 1930, was made General Counsel. He served until his resignation March 1, 1933. From March 1, 1933 to July 11, 1934, George B. Porter, Assis-

tant General Counsel, acted as General Counsel until appointment of Paul D. P. Spearman as General Counsel of the Federal Communications Commission on July 11, 1934.

Chief Engineers

On August 1, 1928, Dr. J. H. Dellinger was appointed Chief Engineer of the Commission and served until December 1, 1928. He was succeeded by Dr. C. B. Jolliffe who served from March 1, 1930 to November 12, 1935.

Federal Communications Commissioners

The following were the original seven members of the Federal Communications Commission:

Judge Eugene O. Sykes (D)—Chairman, appointed for a term of 7 years; Col. Thad H. Brown (R)—appointed for a term of 6 years; Paul A. Walker (D)—appointed for a term of 5 years; Norman S. Case (R)—appointed for a term of 4 years; Dr. Irvin Stewart (D)—appointed for a term of 3 years; George Henry Payne (R)—appointed for a term of 2 years; Hampson Gary (D)—appointed for a term of 1 year.

Judge Sykes served as Chairman until March 9, 1935, when he was appointed Chairman of the Broadcast Division. On April 5, 1939 he resigned to enter the private practice of law, and was succeeded by Frederick I. Thompson to fill his unexpired vacancy ending June 30, 1941. Thad H. Brown was named Vice-Chairman of the Broadcast Division on July 17, 1934, and on March 9, 1935, he was named Vice-Chairman of the Telephone Division instead of the Broadcast Division. His term expired June 30, 1940. The President submitted his name to the Senate for reappointment but his nomination failed to be reported out of Committee and, on October 5, 1940, he withdrew his name from nomination. He died February 25, 1941. Ray C. Wake-

field, member of the California Railroad Commission since January, 1937, was, on March 17, 1941, confirmed by the Senate for a seven year term from July 1, 1940, to succeed Thad H. Brown as Commissioner. Paul A. Walker was named Chairman of the Telephone Division on July 17, 1934. He was reappointed for a term of 7 years from July 1, 1939.

Norman S. Case was named Vice-Chairman of the Telephone Division on July 17, 1934. He served until March 9, 1935, when he was named Vice-Chairman of the Broadcast Division. He was reappointed as a member of the Commission for a term of 7 years from July 1, 1938. Dr. Irvin Stewart was named Chairman of the Telegraph Division on July 17, 1934. He served as Commissioner until the expiration of his original term, June 30, 1937, and informed the President that he was not a candidate for reappointment. There was a vacancy on the Commission from June 30 to August 21, 1937, when Commander T. A. M. Craven was appointed for a term of 7 years, succeeding Dr. Stewart. George Henry Payne was named Vice-Chairman of the Telegraph Division July 17, 1934. He was reappointed Commissioner for a term of 7 years from July 1, 1936. Hampson Gary on July 17, 1934, was named Chairman of the Broadcast Division. He resigned as Commissioner December 24, 1934, before his original term expired on June 30, 1935. He was succeeded by Anning S. Prall January 17, 1935. On March 9, 1935, the President designated Mr. Prall Chairman of the Commission, and on July 1, 1935, he was named to succeed himself as Commissioner for a term of 7 years. He died July 23, 1937. To fill Mr. Prall's unexpired term, Frank R. McNinch was nominated by the President August 17, 1937, and took office on October 1, being named Chairman on the same date. He resigned September 1, 1939. Mr. McNinch was succeeded by James Lawrence Fly who was nominated by the President July 27, 1939, for the term expiring June 30, 1942. Mr. Fly took office September 1, 1939, at which time he was designated by the President to serve as Chairman.

Secretaries

Upon organization of the Federal Communications Commission July 11, 1934, Herbert L. Pettey, who had been secretary of the Federal Radio Commission, was appointed as Secretary of the new Commission. He resigned August 30, 1936. From the time of Mr. Pettey's resignation until May 1, 1937, John B. Reynolds, appointed as Assistant Secretary, acted as Secretary. On that date Thomas J. Slowie was appointed Secretary.

General Counsels

Paul D. Spearman, who had been Assistant General Counsel with the Federal Radio Commission, was on July 11, 1934, named General Counsel of the Federal Communications Commission. He served until June 30, 1935, when he resigned. He was succeeded on July 3, 1935, by Hampson Gary as General Counsel, who served until December 15, 1938, when his services were terminated. On December 26, 1938, William J. Dempsey who had been Acting General Counsel since December 6, was made General Counsel. He resigned April 25, 1940. He was succeeded on May 6, 1940, by Telford Taylor.

Commission

Dr. C. B. Jolliffe was carried over from the Federal Radio Commission as Chief Engineer of the Federal Communications Commission. On December 2, 1935, after Dr. Jolliffe's resignation, T. A. M. Craven was named Chief Engineer. He served in this capacity until his appointment on August 21, 1937, as Commissioner. On January 1, 1938, E. K. Jett, Assistant Chief Engineer who had been Acting Chief Engineer, was appointed Commander Craven's successor as Chief Engineer.

Chief Accountant

The Accounting, Statistical, and Tariff Department was established in October, 1934. On June 7, 1935, William J. Norfleet was appointed Chief Accountant.

NED WAYBURN

STAGE, RADIO and TELEVISION PRODUCER

TEACHER OF DRAMATIC ART AND STAGE-CRAFT

FOUNDER AND DIRECTOR OF

S NED WAYBURN S SCHOOL OF STARS

A FEW OF THE STARS WHO HAVE BEEN COACHED, DIRECTED
AND HELPED UP THE "LADDER OF FAME" BY NED WAYBURN:

George M. Cohan, Mae West, Fred Astaire, Jeanette MacDonald, Eddie Cantor, Grace Moore, Al Jolson, Charlotte Greenwood, Ed Wynn, Fannie Brice, W. C. Fields, Ina Claire, Clifton Webb, Paulette Goddard, Hal Leroy, Vivienne Segal, George Tapps, George Murphy, Gertrude Niessen, Keenan Wynn, Olsen and Johnson.

CANADA CARRIES ON

WITH Canada engaged in an "all out" war effort, Canadians are carrying on as always, despite war-time conditions. Industry is operating at capacity, new factories are coming into production, employment is at a peak, retail sales show steady gains. The average Canadian is sharing in these improved conditions.

In a country geared to increased production, the Canadian Broadcasting Corporation also "carries on". The CBC national network is playing an increasingly important role in the Dominion. Its modern facilities offer a *complete* broadcast service to advertisers who seek to reach the Canadian market.

STATIONS OF CANADA

The following list of stations is arranged in call letter alphabetical order giving page number for complete station data.

Every effort has been made to present accurate and complete information in a self-explanatory method. Data was obtained from questionnaires sent to the stations early in December and corrections were made up to the time of going to press to insure the inclusion of late developments.

Canadian network facilities covered in full on page 642.

PULLING TOGETHER

WE'RE closer to-
 gether than ever before
 — Canada and the
 United States. We're
 marching the same road
 —fighting and working
 for the same ideals—set
 toward the same goal.
 We'll stay together till
 Victory—and long after.

Strengthen and extend
 the friendship of Cana-
 dians toward your com-

pany and its products by
 spotting your radio pro-
 grammes North of the
 border over the 'All-
 Canada' stations. A fam-
 ily of over thirty key
 stations each the "high
 spot" on the dial in the
 market it serves.

Whether you want to
 cover one Province or all
 Canada—you want 'All-
 Canada'. Get the facts.

The cream is
always at the top!

If you want to reach the cream of the CANADIAN market, you start with Ontario, the richest of Canada's nine provinces. Ontario has 29% of Canada's population and over 36% of the buying power! If you want to reach the cream of the ONTARIO market, you start with CFRB, Toronto, the station that has proven itself to be first choice among a potential audience of 3,000,000 listeners.

Get this fact!

IN THE MOST RECENT OF THE SURVEYS PERIODICALLY CONDUCTED ON BEHALF OF CFRB AND INVOLVING PERSONAL INTERVIEWS, 53.4% OF THE INTERVIEWEES NAMED CFRB AS THEIR FAVORITE STATION! IN FACT CFRB LED THE RUNNER-UP BY ALMOST 2 to 1!

CFRB, Toronto, is now in its 14th year of continuous operation... before you place your advertising in Ontario, Canada's 2½ billion dollar market, get all the facts concerning CFRB—the key to Ontario sales!

FUNCTIONS

Western Association of Broadcasters is a regional trade association of broadcasting stations in Manitoba Saskatchewan, Alberta and British Columbia, closely affiliated with the Canadian Association of Broadcasters. It is virtually a western division of the latter organization, as all members are in both associations.

Thanks to the radio industry for making 1941 our biggest year.

Thanks to the many advertising agencies—Ruthrauff & Ryan—BBD&O—Lou Maxon—L. W. Ramsey—Bill Polje—R. A. Moritz—Irv Olian—Mike Ellis—and all the rest for tabbing Ziv “headquarters for open-end transcriptions.”

Thanks to a great array of talent—Alan Courtney, The Korn Kobblers, Charlie Wayne, Tom Slater, Kay Lorraine, The Ranch Boys, Stan Waxman, Sam Balter, et al for making our shows such clickeroos.

Thanks to a swell staff whose sparkling ideas and sound musical and dramatic production have helped us to build such a swell reputation and such gratifying relations with our customers.

GROMBACH PRODUCTIONS, INC., EST. 1930

RADIO PROGRAM PRODUCTION

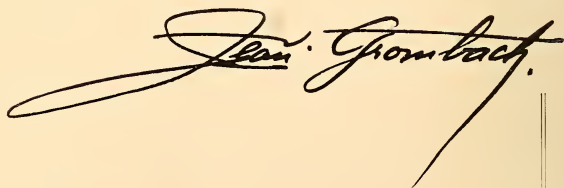

•

JEAN V. GROMBACH INC., EST. 1929

ELECTRICAL TRANSCRIPTIONS

•

Both temporarily suspended Nov. 1st, 1941 for the
duration of our national emergency.

A handwritten signature in black ink, reading "Jean V. Grombach". The signature is written in a cursive style with a large, sweeping initial "J" and a long, trailing flourish at the end.

1941—RADIO PRODUCTION—1941

LARGEST SINGLE OVER ALL FACTOR influencing production in all phases of broadcasting, AM, FM, television and short wave, during 1941 was, of course, National Defense. That was the dominant influence up until Dec. 7—after that Victory became the keynote.

These themes produced something of a revolutionary reorientation in radio programs. From the strictly non-partisan, unbiased attitude of the pre-war days, with the accent entirely on such non-social or political objectives as "pure" entertainment and good music, radio programs throughout the year underwent a gradual evolution as the threat of U. S. involvement became increasingly menacing. More and more radio shows, both commercial and sustaining, veered away from their "ivory tower" detachment and became more closely identified with current events and with the people. Especially was this so when war was declared and the wraps came off entirely, permitting writers and producers to go to town.

From both the producer and listener points of view this had a tremendously vitalizing effect. Programs took on a timeliness and emotional appeal which had been lacking previously, except on a very few experimental or workshop-type shows. And concurrently, new and more realistic production techniques developed.

No Dearth of Ideas

The general calibre of programs continued to rise during the year in all categories, whether quiz, soap opera, comedy or musical. Illustrative of the wealth of new ideas abroad in the industry was RADIO DAILY's annual "Shows of Tomorrow" issue, wherein producers of all types, independents, networks, transcription firms and agencies, showcased a tremendous variety of potential sock radio material.

Activity at the networks continued

strong throughout the year, the separation of the Red and Blue acting as a powerful stimulant to competitive programming. A subsidiary development was increased reliance on shows originated and produced by affiliates to augment network programs.

In television, during the latter part of the year National Defense took over almost entirely. Programs contributing to civilian defense activities, promoting Defense Bond sales and as actual training media for auxiliary defense services assumed an important place on tele program schedules, with further expansion in this field indicated for 1942.

FM Gets Under Way

FM remained something of an unknown factor as far as its production aspects were concerned. While FM was a healthy, even lusty infant, it still was an infant and, lacking the requisite advertising revenue, its possibilities from a production aspect were barely tapped. The full advantages of its differences from AM broadcasting, from a dramatic point of view, still remained to be discovered and developed.

International broadcasting, encouraged by the Government's Good Neighbor policy, made rapid strides. Whole program schedules in Spanish and Portuguese were developed in cooperation with Federal agencies for Latin American consumption, while news—honest news in the American tradition—was beamed to every quarter of the globe in all languages.

Just as defense was the keynote of radio production in 1941, the war effort will lend increasing impetus to this aspect of radio during the current year. Recognizing the job to be done and welcoming the opportunity to serve their country, producers have enlisted for the duration. They will continue to be in the vanguard of the fight on the home front.

Why not do it the EASY way?

THE ROLL-YOUR-OWN method is one way to produce a top-notch show. It takes time, skill, worry*, expensive talent—and usually requires a substantial budget.

THE NBC RADIO-RECORDING WAY of getting top-notch programs is easier—and costs a lot less when you use NBC Syndicated Recorded shows. They're complete—ready to broadcast!

In Radio Programs, as in Cigarettes, the "Ready-Made" Product is Easier to Handle!

SHOWS that would be far beyond your budget, if you had to produce them yourself, are yours at extremely reasonable prices through the facilities of NBC Radio-Recording Division.

These programs are already in use in many varied markets for a greatly diversified list of products. Experience proves that they will obtain fine results for you.

Pick your program to suit your need. On the NBC Syndicated Program list you will find a wealth of material from which to choose, programs of various lengths, various frequencies, varied subjects, and varied costs. Shown here are a few of the outstanding buys!

Betty and Bob. Outstanding dramatic programs with name stars who are favorites of millions. Five quarter-hours per week. 390 programs available.

The Face of the War—as seen by Sam Cuff. Keen, timely, penetrating analysis of the stories behind war headlines. Three 5-minute programs per week.

Who's News. Revealing, informal 5-minute chats with America's headline personalities in the arts, sciences, sports, business, music, theatre, etc. Three programs per week. 39 programs.

Getting the Most Out of Life Today with Dr. William L. Stidger. Forceful, down-to-earth philosophy every man and woman can understand and enjoy. Three 5-minutes per week. 117 programs.

Time Out—with Ted Steele and Grace Albert. Bright, gay boy-and-girl songs and

banter with interludes featuring "Nellie the Novachord." Twenty-six quarter-hour programs.

Five-Minute Mysteries. Unique series of thrilling, dramatized mysteries—complete in each 5-minute episode, three to five per week. 63 programs.

Hollywood Headliners. Intimate inside stories about Hollywood Stars told by Stella Unger. Three to six 5-minutes per week. 156 programs.

Produced at "Broadcasting Headquarters," these programs have all the flavor and character of live shows, and the finest recording—NBC ORTHACOUSTIC.

*P. S. Don't worry! NBC can help you roll your own too, if you do not have your own facilities for production. We're ready for all jobs from script writing, casting, producing, right down to shipping the finished pressings.

Write for complete presentations and audition samples

SERVICES OFFERED: Keystone Broadcasting System is a transcription network principally covering secondary markets from coast to coast. All stations are linked together by means of transcriptions, eliminating wire charges. At time of going to press, the network includes 160 affiliated stations, with the network supplying its stations with 26 fully scripted sustaining shows per week filling 4 hours per day, seven days each week. All music included in these KBS sustaining programs is delivered tax-free to member stations.

Keystone is continuing to increase its facilities and the number of its affiliates, all over the country, with activities directed from its main offices in New York City.

This is the only national, full-sized network in the United States offering national radio advertisers the opportunity to invade the secondary markets through group deals in single transactions.

EXCLUSIVE IN NBC THESAURUS...

"names" like these . . .

plus complete program service

ROSARIO BOURDON and his Symphony Orchestra...

ALLEN ROTH and the "Symphony of Melody"...

SAMMY KAYE and his "Swing and Swoy" music.

DR. EDWIN FRANKO GOLDMAN and world-famous Goldman Bond...

These famous artists will record *exclusively* for THESAURUS and your station in 1942, along with Norman Cloutier and his 25-piece String Orchestra, Xavier Cugat, Dick Jurgens, Vincent Lopez, Lawrence Welk and his "Champagne Music," Richard Leibert at the Radio City Music Hall organ and many others.

THESAURUS SCOPE

Swing to symphony—for every taste—in balanced, complete musical *programs* . . . not just "selections."

THESAURUS RANGE

Over 2600 selections in present basic library—and approximately 1000 new selections scheduled for 1942, with weekly continuity for more than 20 program series.

THESAURUS PRODUCTION

By men with both local station and network experience—with the facilities of "Broadcasting Headquarters."

THESAURUS SALES-HELPS

Colorful, dramatic presentations for *each* of your salesmen; sales manual, photos, mats, news stories!

THESAURUS RECORDING

NBC Orthacoustic, to air your shows with all the flavor of *live* broadcasts.

THESAURUS ECONOMY

Available to sponsors at a cost so low that even the shyest prospect won't fear the dotted line! *Write for the whole story—information on rates, availability, presentation, audition samples.*

By **E. C. MILLS**

Chairman, Administrative Committee

UNDER the Copyright Law of the United States enacted in 1909, the public performance for profit of a copyrighted musical composition is lawful only if done under license of the copyright owner. Any performance without such license is illegal and an infringement of the copyright, subject under the law to minimum statutory damages of \$250 per performance.

A proprietor of a public amusement enterprise or broadcasting station which utilizes copyrighted music in its programs is thus confronted with the necessity of securing a license from owners of the copyrights of the musical compositions to be included in his programs. There are many thousands of different copyright owners and almost every musical program includes the works of many different such owners. A proprietor confronted with the necessity of negotiating licenses with separate, individual, musical copyright owners would find himself in a difficult position indeed.

Throughout the world, therefore, equally to properly police and protect the rights of the copyright owners, and to afford a convenient central source of supply of music licenses for proprietors, there has been organized in each country a so-called "performing rights society." In the United States the principal such society is the American Society of Composers, Authors and Publishers (Ascap), organized by Victor Herbert and a group of associates in 1914, and presently representing a membership of some 153 publishers and 1,269 composers and authors. The membership includes the leading composers and authors and publishers in the fields of standard, production, motion picture and popular music. Ascap is an unincorporated, non-profit, voluntary association. Its earnings are distributed among its members at quarterly intervals. Through reciprocal agreements and treaties it represents in the United States the copyright rights of the members of similar societies in European and other performing rights societies.

License agreements are in effect between Ascap and some 30,000 public amusement enterprises throughout the United States.

Its agreements with broadcasters expired at the end of 1940 and negotiations for a renewal were not successfully concluded until October of 1941. During the ten-month interval most of the broadcasting stations operated without an Ascap license. Under conditions established by a Consent Decree between the Federal Government and Ascap, entered in March 1941, the principle of "payment at the source" in respect of network broadcasts was established. Previously the practice had been for each station in the network broadcast to pay its individual fees, but under the new rule as to such broadcasts of copyrighted music, fees are paid by the station originating the network broadcast. The inter-connected stations thus need no license in respect of music received on network programs "cleared at the source." Individual stations, however, need to have licenses covering copyrighted music used in programs which they originate and broadcast.

☆ ☆ ☆ *Radio In Defense* ☆ ☆ ☆

Prior to 1941 a number of individual states had enacted legislation declaring as unlawful and forbidding operations within the state, of any "combination" of musical copyright owners, the purpose of which was to fix prices for public performance licenses.

Federal Courts held several of such laws to be unconstitutional, but in 1941 as to certain aspects thereof, a law enacted by Florida was upheld by the Supreme Court of the United States. The decision, however, did not cover the entire subject matter of the law involved and the status of this situation is currently a matter of negotiation and discussion with the state authorities.

During 1941 more than one hundred new members were elected to Ascap. The organization continued its sponsorship of creative musical activities, such as fellowships for collegians writing musical plays, a national competition for amateur musical playwrights, and the Nathan Burkan Memorial Competition in which all well-established law schools of the United States have been entered for the past several years.

Principal officers of Ascap are: Gene Buck, president; Louis Bernstein and Otto Harbach, vice-presidents; George W. Meyer, secretary; Gustave Schirmer, treasurer; E. C. Mills, chairman of administrative committee; John G. Paine, general manager.

BROADCAST MUSIC INC.

By **MERRITT E. TOMPKINS**

Vice-President-General Manager

IN ONE YEAR of intensive application to the music problem, Broadcast Music, Inc., achieved freedom from music monopoly for every broadcaster. Through BMI, every broadcaster is securing the benefits of an open market for music.

Organized in September, 1939, by the broadcasting industry to provide an independent source of music supply for radio stations and other users of music, BMI has built up over 500,000 titles of music of all types. In working toward its objectives, BMI has (1) bought and published original music; (2) coordinated and licensed performance rights to music published by over 350 affiliated publishers and five performing right societies; (3) provided equal opportunity of recognition for the authors, composers and publishers of meritorious work.

BMI stock and licenses are held by stations of every classification in 48 states, Alaska, Puerto Rico and Hawaii. Station members are divided into three groups, (1) independents; (2) network affiliates; (3) stations managed or operated by the national networks. Stock holdings of the networks in BMI is 18.5 per cent of the total. The three groups of station stockholders elect their own representatives to the Board of Directors.

By PAUL HEINECKE

President

SESAC has grown during the past ten years from a small group of publishers to one of the largest music performing rights organizations in the United States. SESAC now controls the catalogs of 130 publishers of the best music in America. This virtually unlimited storehouse of program material including everything from Swing to Symphony and Hillbilly to Opera gives broadcasters a complete answer to the music needs of the radio station.

SESAC Music is used by more radio stations than any other music because—

—SESAC has licenses with 830 commercial radio stations.

—SESAC music is American music, our 130 publishers being located from coast to coast.

—SESAC publishers dominate their respective fields and include the largest publisher of American standard music—the largest publisher of American cowboy, western and hillbilly music—the largest publisher of American band and patriotic music—the largest publisher of accordion music—the largest publishers of gospel and religious music for every denomination, etc.

—SESAC music includes many of the best known compositions of such American composers as Edward MacDowell, Mrs. H.H.A. Beach, Bruno Huhn, Victor Herbert, Rudolf Friml, etc., etc.

A SESAC tune always becomes the outstanding number of the year. "Intermezzo" was the leading song on the Hit Parade in 1941 and "The Shrine of St. Cecilia" is leading the field in 1942.

SESAC music is used extensively by advertising agencies on hundreds of commercial transcriptions. It is contained in the library services of all of the transcription companies, it is used extensively in motion pictures and on phonograph records.

SESAC exclusively pioneered every major advance in the music copyright field including clearance at the source on network programs, a competitive supply of diversified music, on restriction list, reasonable rates, negotiation of licenses by a station relations staff with actual broadcasting experience, a program service department and friendly cooperation. SESAC licenses performance rights as well as the mechanical and film rights.

SESAC, its publishers, Program Service Department and station relations staff are at your service. You know the SESAC station relations representative in your area. He is there to help you—call on him:

CLAUDE C. J. CULMER

Eastern States

GUS HAGENAH

Central States

BURT SQUIRE

Middle West

EMILE J. GOUGH

Western States

With 830 commercial radio stations carrying blanket SESAC licenses, SESAC leads the field and we are determined to merit this fine support by maintaining our established policy of cooperation and continuing to supply broadcasters with the best music in America.

MERLE PITT

MUSICAL DIRECTOR WNEW

- ★ **WALTER WINCHELL—MIRROR:**
"New Orchids to Merle Pitt's 'Five Shades of Blue'"
- ★ **BEN GROSS—NEWS:**
"Pitt rates a salute—a listening gem. If we had crown jewels, we'd bestow them on Pitt's Orchestra."
- ★ **BILLBOARD:**
"Merle Pitt's 'Five Shades of Blue' dish out a subtle, extremely listenable brand of rhythm, able to handle pops, standards, swing or sweet with equal finesse . . ."

RULES AND REGULATIONS OF F. C. C. REGARDING PRODUCTION BY RADIO BROADCAST STATIONS

As of January 1, 1942

GENERAL

Except Sundays, the licensee of each standard broadcast station shall maintain a minimum operating schedule of two-thirds of the total hours that it is authorized to operate between 6 a.m. and 6 p.m., local standard time, and two-thirds of the total hours it is authorized to operate between 6 p.m. and midnight, local standard time, except that in an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating the station may cease operation for a period of not to exceed 10 days, provided that the Commission and the inspector in charge shall be notified in writing immediately after the emergency develops.

The licensee of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference. (Stations involved in the after-midnight frequency monitoring programs are notified of their operating and silent schedule.)

If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as otherwise prescribed in the rules herein stated.

Share-Time Stations

If the licenses of stations authorized to share time do not specify hours of operation, the licensees shall endeavor to reach an agreement for a definite schedule of periods of time to be used by each. Such agreement shall be in writing and each licensee shall file the same in triplicate original with each application to the Commission for renewal of license. If and when such written agreements are properly filed in conformity with this rule the file mark of the Commission will be affixed thereto, 1 copy will be retained by the Commission, 1 copy forwarded to the inspector in charge, and 1 copy returned to the licensee to be posted with the station license and considered as a part thereof.

If the license specifies a proportionate time division, the agreement shall maintain this proportion. If no proportionate time division is specified in the license, the licensees shall agree upon a division of time. Such division of time shall not include simultaneous operation of the stations unless specifically authorized by the terms of the license.

For the purpose of determining the proportionate division of time of the broadcast day for sharing time stations one night hour shall be considered the equivalent of two day hours.

If the license of a station authorized to share time does not specify the hours of operation, the station may be operated for the transmission of regular programs during the experimental period provided an agreement thereto is reached with the other stations with which the broadcast day is shared and further provided such operation is not in conflict with the rule of operation during experimental periods herein stated. Time sharing agreements for operation during the experimental period need not be submitted to the Commission.

Departure from the regular operating schedule set forth in a time-sharing agreement will be permitted only in cases where an agreement to that effect is reduced to writing, is signed by the licensees of the stations affected thereby and filed in triplicate by each licensee with the Commission prior to the time of the proposed change. If time is of the essence, the actual departure in operating schedule may precede the actual filing of written agreement, provided appropriate notice is sent to the Commission and the inspector in charge.

If the licensees of stations authorized to share time are unable to agree on a division of time, the Commission shall be so notified by statement to that effect filed with application for renewal of licenses. Upon receipt of such statement the Commission will designate the applications for a hearing, and pending such hearing, the operating schedule previously adhered to shall remain in full force and effect.

Limited Time Stations

If the licensee of a broadcast station is required to commence or cease operation of the station at the time of sunrise or sunset, the license will specify the hour of the day during each month of the license period when operation of such station will commence or cease.

The licensee of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station or stations on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule, bearing a signed notation by the licensee of the dominant station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return 1 copy to the licensee authorized to operate limited time which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only in accordance with the procedure set forth in these rules.

If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.

Material Term of License Violations

In all cases where a station licensee is required to prepare and file an operating schedule, any deviation or departure from such schedule, except as herein authorized, shall be considered as a violation of a material term of the license.

All references herein to standard time or local standard time refer to local standard time as determined and fixed by the Interstate Commerce Commission.

Time Changes

If local time is changed from standard time to daylight-saving time at the location of all stations sharing time on the same channel, the hours of operation of all such stations on that channel shall be understood to refer to daylight-saving time, and not standard time, as long as daylight-saving time is observed at such locations. This provision shall

govern when the time is changed by provision of law or general observance of daylight-saving time by the various communities, and when the time of operation of such stations is specified in the license or is mutually agreed upon by the licensees: *Provided, however, That* when the license specifies average time of sunrise and sunset, local standard time shall be observed. In no event shall a station licensed for daytime only operate on regular schedule prior to local sunrise, or shall a station licensed for greater daytime power than nighttime power or for a different radiation pattern for daytime operation than for nighttime operation operate with the daytime power or radiation pattern prior to local sunrise.

Where the local time is not changed from standard time to daylight-saving time at the location of all stations sharing time on the same channel, the hours of operation of such stations shall be understood to have reference to standard time, and not daylight-saving time, unless said licensees mutually agree upon a new schedule which shall be effective only while daylight-saving time is observed at the locations of some of these stations.

The time of operation of any broadcast station which does not share time with other stations on the same channel shall be understood to have reference to local standard time unless modification of such license with respect to hours of operation is authorized by the Commission.

The provisions of the rules defining various types of stations and time periods shall not prevent the transmission of programs between four o'clock a.m., local standard time, and local sunrise, of standard broadcast stations with their authorized daytime facilities, *Provided*: That the provisions of this rule shall not extend to:

(1) Stations regularly sharing time during daytime hours either under licenses pursuant to which time-sharing agreements have been entered into or licenses specifying hours of operation, unless time-sharing agreements have been reached covering such operation prior to local sunrise. Sections regarding sharing time of these rules shall be applicable to such agreements.

(2) Any class II stations causing interference by use of its daytime facilities within the 0.5 mv/m 50% sky wave contour of any class I station either of the United States or of any country party to the North American Regional Broadcasting Agreement.

(3) Operation by use of its daytime facilities of any class II station on any

class I-A channel not assigned to the United States under the North American Regional Broadcasting Agreement.

Any station operating during such hours receiving notice from the Commission that undue interference is caused shall refrain from such operation during such hours pending further notice from the Commission.

Nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation except as herein provided.

The period 4:00 a.m. to 6:00 a.m., local standard time, shall not be included in determining compliance with section on minimum operating schedule of these rules.

General Rules Applicable to Standard and High Frequency Broadcast Stations

The station license and any other instrument of authorization or individual order concerning construction of the equipment or the manner of operation of the station shall be posted in a conspicuous place in the room in which the transmitter is located in such manner that all terms thereof are visible and the license of the station operator shall be posted in the same manner.

The licensee of each station shall have a licensed operator or operators of the grade specified by the Commission on duty during all periods of actual operation of the transmitter at the place where the transmitting equipment is located.

The licensed operator on duty and in charge of a standard or high frequency broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such other stations: Provided, However, That such duties shall in no wise interfere with the proper operation of the standard broadcast transmitter.

Logs

The licensee of each broadcast station shall maintain program and operating logs and shall require entries to be made as follows:

A. In the Program Log

a. An entry of the time each station identification announcement (call letters and location) is made.

b. An entry briefly describing each program broadcast, such as "music,"

"drama," "speech," etc., together with the name or title thereof, and the sponsor's name, with the time of the beginning and ending of the complete program. If a mechanical record is used, the entry shall show the exact nature thereof such as "record," "transcription," etc., and the time it is announced as a mechanical record. If a speech is made by a political candidate, the name and political affiliations of such speaker shall be entered.

c. An entry showing that each sponsored program broadcast has been announced as sponsored, paid for, or furnished by the sponsor.

B. In the Operating Log

a. An entry of the time the station begins to supply power to the antenna, and the time it stops.

b. An entry of the time the program begins and ends.

c. An entry of each interruption to the carrier wave, its cause and duration.

d. An entry of the following each 30 minutes:

- (1) Operating constants of last radio stage (total plate current and plate voltage).
- (2) Antenna current.
- (3) Frequency monitor reading.
- (4) Temperature of crystal control chamber if thermometer is used.

e. Log of experimental operation during experimental period (If regular operation is maintained during this period, the above logs shall be kept).

- (1) A log must be kept of all operation during the experimental period. If the entries required above are not applicable thereto, then the entries shall be made so as to fully describe the operation.

Logs of standard or high frequency broadcast stations shall be retained by the licensee for a period of two years except when required to be retained for a longer period in accordance with the provisions of the rules pertaining to logs involving communications incident to a disaster or incidents to or involved in an investigation by the Commission or concerning which the licensee has been notified, in which case they shall be retained by the licensee until specifically authorized in writing by the Commission to destroy them; Provided, further, That logs incident to or involved in any claim or complaint of which the licensee has notice, shall be retained by the licensee until such claim or complaint has been fully satisfied or until the same has been barred by statute limiting the time for the filing of suits upon such claims.

Station Identification

A licensee of a standard or high frequency broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation on the hour and either on the half hour or quarter hour following the hour and at the quarter hour preceding the next hour: Provided

Such identification announcement during operation need not be made on the hour when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert or operatic production of longer duration than thirty minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the entertainment continuity and at the conclusion of such program.

Such identification announcement need not be made on the half hour or quarter hours when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production. In such cases an identification announcement shall be made at the first interruption of the entertainment continuity, and at the conclusion of the program, *Provided*, That an announcement within 5 minutes of the half hour or at the quarter hour following the hour or at the quarter hour preceding the next hour, will satisfy the requirements of identification announcements.

In case of variety show programs, baseball game broadcasts, or similar programs, of longer duration than thirty minutes, the identification announcement shall be made within five minutes of the hour and of the half hour or at the quarter hour following the hour or at the quarter hour preceding the next hour.

In case of all other programs the identification announcement shall be made within two minutes of the hour and on the half hour and at the quarter hour following the hour and at the quarter hour preceding the next hour.

In making the identification announcement, the call letters shall be given only on the channel of the station identified thereby.

Mechanical Reproduction

Each broadcast program consisting of a mechanical record, or a series of mechanical records, shall be announced in the manner and to the extent set out below:

1. A mechanical record, or a series thereof, of longer duration than thirty minutes, shall be identified by appropriate announcement at the be-

ginning of the program, at each thirty minute interval, and at the conclusion of the program; provided, however, that the identifying announcement at each thirty minute interval is not required in case of a mechanical record consisting of a single, continuous, uninterrupted speech, play, religious service, symphony, concert or operatic production of longer duration than thirty minutes;

2. A mechanical record, or a series thereof, of a longer duration than five minutes and not in excess of thirty minutes, shall be identified by an appropriate announcement at the beginning and end of the program;
3. A single mechanical record of a duration not in excess of five minutes, shall be identified by appropriate announcement immediately preceding the use thereof;
4. In case a mechanical record is used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of the sponsorship of the program proper, no announcement of the mechanical record is required.
5. The identifying announcement shall accurately describe the type of mechanical record used, i.e., where an electrical transcription is used it shall be announced as a "transcription" or an "electrical transcription" and where a phonograph is used it shall be announced as a "record."

Rebroadcast Programs

(a) The term "rebroadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station. (In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.)

(b) The licensee of a standard or high frequency broadcast station may, without further authority from the Commission, rebroadcast the program of a United States standard or high frequency broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program. (The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting

certain programs of a standard or high frequency broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period).

(c) The licensee of a standard or high frequency broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a non-commercial basis a non-commercial program of a United States international broadcast station.

The licensee of a standard or high frequency broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

In the case of any rebroadcast under these provisions, the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program. (The broadcasting of a program relayed by a relay broadcast station is not considered a rebroadcast.)

(e) In case of a program rebroadcast by several standard broadcast stations such as a chain rebroadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcast both from the Commission and from the person or licensee of station originating program.

Attention is directed to Section 325 (b) of the Communications Act of 1934, which reads as follows:

"No person shall be permitted to locate, use or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there having a power output of sufficient intensity and/or being so located geo-

graphically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission upon proper application thereof."

Political Broadcasting

No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates for that office to use such facilities, provided that such licensee shall have no power of censorship over the material broadcast by any such candidate. The following definitions shall apply for the purpose of this rule: a. 'A legally qualified candidate' means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who has qualified for place in the ballot or is eligible under the applicable law to be voted for by sticker, by writing in his name on the ballot, or other method, and has been duly nominated by a political party which is commonly known and regarded as such, or makes a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

The rates, if any, charged all such candidates for the same office, shall be uniform and shall not be rebated by any means, directly or indirectly; no licensee shall make any discriminations in charges, practices, regulations, facilities or services for or in connection with service rendered pursuant to these rules, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the *exclusion of other legally qualified candidates* for the same public office.

Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests and the charges made, if any, if request is granted.

TELEVISION AIDS IN DEFENSE

By Noran E. Kersta, Manager, Television Dept., National Broadcasting Co.

TELEVISION, the "hard luck guy" of the radio industry, faces in 1942 the most critical of a succession of critical years. The misfortunes that have dogged television's steps since the inception of regular broadcasting service in 1939 continue to bedevil its progress.

The inaugural broadcast from the World's Fair was followed, in five months, by the outbreak of history's greatest war. A regrettable controversy over technical standards flared up in 1940. In 1941 television finally received the full recognition of the Federal Communications Commission. A brave new start was made against obstacles of a nation disturbed by the prospect of imminent war, priorities in raw materials and manufacturers' assembly lines groaning under the load of defense orders. Five months later Japanese bombers blasted Pearl Harbor. Restrictions on the 1942 production of radio receivers are only the latest block in television's path toward the future.

But if 1942 brings fresh crisis for television it also brings new opportunity. In the service of national defense, television is proving the contention that it can transmit intelligence, instruction, better and faster than any other known means of communication.

National Defense

As these words are written, television is undertaking its biggest job in national defense work, the job of instructing New York City's air wardens and fire watchers. In cooperation with the city's Police Department, NBC's television division is to broadcast lecture-demonstrations in officially approved methods of combatting the enemy's war from the skies. A tentative schedule calls for eighteen such television lessons a week within one month after the beginning of the series. The radio industry is generously contributing television receivers for installation in precinct house classrooms throughout the nation's largest city.

Television has given, is giving, liberally of its limited hours on the air to organizations associated with the national effort. New York viewers are constantly reminded of drives for Defense Bonds and Stamps, Army and Navy

recruiting, the American Red Cross, Bundles for Britain and like organizations. The Red Cross and the New York City Fire Department have been represented by regular programs on first aid and fire control.

Television brings to its new defense tasks implements and techniques sharpened through more than two years of regular broadcasting. In its daily work on behalf of war activities, television introduces elements of showmanship to infuse public appeals with more urgency and to dramatize instruction relayed to televiewing volunteer workers and citizen owners of receivers.

Tele in Peace

Those charged with the direction of television have still another job. No more than the wars of centuries gone by, will this one last forever. The day will come when men must turn to the task of rebuilding a world of peace. "Pilot" industries, new activities to lead the country out of the morass of post-war depression, will be needed as never before. Television must be ready then, ready for a period of expansion that will carry it across the country. And to be ready means the accumulation of experience, during months or years of war, in television showmanship, improving equipment and in the business of operating a television station.

The year just ended has given television six months of commercial experience. By order of the Federal Communications Commission, television advanced to full commercial status on July 1, 1941. On that day NBC's WNBT went on the air as the world's first commercial television station. The Philco Radio & Television Corporation station at Philadelphia received the second license under the new order. At the year's end these two were the only commercial television broadcasters. Several others, however, were near commercial status. Among them were W9XBK, a Chicago station operated by the Balaban & Katz Corp.; W6XAO, Los Angeles, owned by the Don Lee Broadcasting System, and W2XWB, the Allen B. DuMont Laboratories station at New York City. WCBW, of the Columbia Broadcasting System, complied with

the operating requirements laid down by the F.C.C. under experimental license.

Rates

Commercialization did not, of course, solve television's economic problem. Current rates cover no more than a fraction of the cost of putting a program on the air. The sponsor does, however, pay the entire cost of talent and of special stage sets involved in his production.

Time charges, being intimately bound up with the number of receivers in a station's service area, will probably remain at or near their present levels for some time to come. The outlook for additional sets from manufacturers' assembly lines does not appear bright at the moment. The demands of war production on available time, men and materials make it improbable that the industry will be able to supply the existing, much less the potential, demand for television receivers.

New York City, with more than half of the country's receiving sets, now has about 5,000. Of these 600 are located in public places, so that the average nighttime audience for New York stations must be in the neighborhood of 40,000 persons. Some sponsors have found television attractive as an advertising medium. In the first six months of commercial operation NBC had fourteen individual sponsors, eight of whom rep-

resented apparel industries, which thus far have found little advantage in sound broadcasting.

Relay Progress

With convincing demonstrations of television's utility in the national defense, the broadcasters should make 1942 the year of a regularly established network. WNBT has been linked experimentally for some time with the Philco station at Philadelphia. A single relay, located at Wyndmoor, eight miles from the Philco station, establishes a connecting link through which NBC programs from New York are rebroadcast to Philadelphia viewers.

In another direction, a distance of 129 miles is bridged by a relay receiver near the General Electric Company station on Helderberg Mountain, near Schenectady. It is not too sanguine to hope for an extension of the network to the nation's capital through the construction of additional radio relay units.

Technical development has been going forward these last few months despite the nation's demands on the time of scientists and development engineers in the industry's laboratories. Significant advances have been made in the design of television apparatus, and constant improvement continues in the circuits of studio and transmitter equipment.

TELECAST PRODUCTIONS, INC.

are pleased to announce that they have taken over the exclusive sales and distribution for Advance Television Picture Service, Inc.

Over 500 feature pictures and more than 1,000 short subjects are now available for sustaining or sponsored programs. Full cutting room, projection room, inspection, delivery and programming service. Special production department.

Best independent feature films in blocks of 13, 26 and 52 are now available for telecasting at reduced unit prices.

1941-1942 ACTIVITIES

In January, 1941, CBS demonstrated both live and film pick-up of color television to the Federal Communications Commission and the National Television System Committee in New York. This demonstration employed the color

television system developed by CBS during 1940.

As soon as the CBS transmitter in the Chrysler Building had been converted for operation on the new frequency in June, daily experimental color broadcasts were conducted, and have been continued ever since.

The color development of the Columbia Broadcasting Television has proceeded throughout 1941 and has resulted in basic technical data looking toward the setting of standards. New equipment for both pick-up and receiving, based on commercially practical designs, was constructed.

On July 1, 1941, station WCBW began a regular weekly program schedule of 15 hours per week under the rules of the Federal Communications Commission. The following people in the field of public affairs have appeared before the Columbia Broadcasting System television cameras:

Governor Philip LaFollette, Admiral Yates Sterling, Norman Thomas, Harper Sibley, Mrs. Preston Davie, William L. Shirer, Rex Stout, Morris L. Ernst, Clark Eichelberger, Quincy Howe, Linton Wells, Robert K. Straus, Major George Fielding Eliot, Mrs. Harold V. Milligan, Judge Dorothy Kenyon, Emmet S. Conely, Father Talbot, Helen Parkhurst, Janet Flanner, Michael Strange.

In the field of sports, Arthur Donovan, Johnny Vandermeer, Ruth Aarons, Sandor Glancy, Billy Soose, Lefty Gomez and others.

Third, in the general field of entertainment. The great dancers Paul Draper, Paul Haakon, Patricia Bowman, Eric Hawkins, Estelle and LeRoy, Betty Jane Smith, Harland Dixon and Victor. Singers: Joan Edwards, Tamara, Kuznetzoff, Tana, Burl Ives, Mary Sutherland. Comedians: Al Bernie, Hal Sherman, Gus Van, Jack Gilford, John Hoysradt.

In the arts, Francis Henry Taylor, the Direc-

**Station has special authority to operate experimentally with a commercial license at press-time.

*Station had construction permit at press-time.

tor of the Metropolitan Museum of Art and members of the Metropolitan staff; Thomas Craven the famous art critic; Sidney Janis, authority on modern art; also among architects and designers, Buckminster Fuller and Donald Deskey.

In the great field of country and folk dancing, May Gadd, the head of the Country Dance Society, and the folk dances of a dozen nations.

The lack of mobile equipment because of priorities, hampered the operation of the station because of the pressure it put on the studio. Nevertheless, a new ease of movement, sense of space and sense of real life were developed in the technique of handling the camera and the participants in the programs. These constitute a major contribution in the art of producing television programs.

WCBW, since the start of its operations in July, has presented programs dealing with the National Defense and War Efforts, has shown the workings of many branches of the services of the United States Government, including the Navy, Coast Guard, Marine Corps; also, the Red Cross, Boy Scouts and Civilian Defense organizations. The station developed a technique for the direct sale of Defense Bonds to the television audience by inviting members of the audience to telephone in their Defense Bond orders. In three programs, a total of 100,000 dollars worth of bonds were sold.

FACILITIES

SYSTEM IN USE: 525 line 30-60 frame F.C.C., Standard, all electronic cathode-ray. Horizontal Polarization. Studio Cameras and film equipment. Complete 100 ft. square two story television building housing one 100 ft. x 60 ft x 30 ft. television stage, one 46 ft. x 26 ft. x 16 ft. stage, monitor, film, transmitter, makeup, and lounge rooms, offices, shop, transformer vaults, etc. Three hundred foot tower, antenna elevation 2000 ft.

W6XDU (experimental television relay station operating with KTSL) operates on 324 megacycles and is a beam relay type television transmitter used for outside pickups.

DEVELOPMENTS OF 1941: W6XAO (experimental call letters of KTSL) operated 590 hours. Sixty-seven remote programs scheduled and broadcast.

Studio shows have included vaudeville by Maury Amsterdam, Mabel Todd, Tony Romano, the Montez ballet dancers, news telecasts featuring Maxine Gray, and an enlistment and instructional group of acts by the U. S. Navy.

Film presentations included educational items and instruction on and promotion of interest in National Defense. Comedies also were shown, and exceptionally fine films from the Hancock Expedition's travels on the western coast of North and South America. Newsreels also played an important part in the television program, several being prepared especially for television station W6XAO.

Remote television pickups included the professional boxing and wrestling matches from the Hollywood American Legion Stadium twice weekly until November, 1941; thereafter, the same program from the Olympic Auditorium in downtown Los Angeles. The pickup of the Hollywood Stars Coast Baseball League twice weekly was also another remote of great interest to our television lookers. The Easter Sunrise service at the Hollywood Bowl, the Easter Promenade and auto races from Southern Ascot speedway were also telecast.

RECEIVERS: There are between 400 and 500 television receivers in the service area of W6XAO, some as far as Pomona at 35 miles away, a number in Long Beach at 25 miles away and many in cities at lesser distances. The predominant commercially manufactured television receiver is the TRK12 or 120 of RCA. There are some RCA TRK9, and approximately 50 TT5 RCA television receivers. A number of the latter are operating satisfactorily in Long Beach at 25 miles from W6XAO. Other commercially manufactured television receivers are the local Gilfillan G12 which is an equivalent to the RCA TRK12 and utilizes a 12-inch cathode ray tube, some Dumont 12 and 20-inch tube television receivers, the General Electric 12's and 9-inch

receivers, and the Stromberg-Carlson and Stewart-Warner 12 and 9-inch receivers.

There are over a hundred owner constructed television receivers fabricated from Meissner and other kits, as well as completely according to the owners' design. A number of the latter give excellent operation, some utilizing 12-inch cathode ray tubes giving actually superior images at 15 and 20 miles from W6XAO than would be expected from commercially manufactured models.

PUBLIC DEMONSTRATIONS: Television receivers have been maintained by the Don Lee Broadcasting System at the following public places: Wilshire Brown Derby, Kiefer's Pine Knot Drive-In, Vine Brown Derby, Griffith Planetarium, Miramar Hotel, Hollywood Roosevelt Hotel, The Town House. Various radio stores have also held public demonstrations.

PATENTS & RESEARCH: In addition to regularly scheduled programs, research work on television in all of its branches has continued at W6XAO. Membership on NTSC committees and testimony at F.C.C. hearings assisted in setting the commercial standards for television.

FACILITIES

Technical facilities of Station WNBT include a direct pickup studio for live talent productions, a mobile television unit and transportable equipment. All facilities operate under technical standards established in 1941 by the Federal Communications Commission.

The live talent studio, located in Radio City, is fitted with three camera chains. The cameras are of the Iconoscope type. A film scanning room has two cameras and specially adapted motion picture projectors for both 35 mm. and 16 mm. films.

The mobile unit, mounted in two motor vans, is equipped with two cameras for direct pickup of a wide variety of outdoor and indoor programs at points remote from NBC's Radio City sight-sound studios. It has successfully relayed outdoor programs over a distance of 27 miles. Its video transmitter has an output of 400 watts; an associated sound transmitter is rated at 100 watts. The two operate in the relay channel of 162,000-168,000 Kc. Cable carried with the unit enables the field crew to operate cameras at distances up to 800 feet from the motor vans.

The transportable equipment used by NBC television for remote pickups is a compact unit, weighing less than 1,000 pounds and divided into carrying cases, none of which weighs more than 90 pounds. The equipment

*Station had construction permit at press-time.

COMMERCIAL TELEVISION STATIONS

is used for remote pickups where operation of the larger mobile unit is impracticable. It includes a 15-watt video transmitter, two cameras and associated monitoring and control apparatus. A typical instance of its use was in relay of the 1941 New Year's Eve celebration at the Rainbow Room in New York City. The unit is licensed to operate in the channel 162,000-168,000 Kc.

Signals from the WNBW transmitter, located in the Empire State Building tower, are received over a service area with a radius of approximately 60 miles. Under favorable conditions the NBC television programs are seen and heard over considerably greater distances. The General Electric Company's Station W2XB, located 129 miles from the NBC transmitter, has in the past rebroadcast NBC programs originating in New York City. Station WPTZ, Philadelphia, undertook regular rebroadcast of NBC programs in 1941. A single relay link, located at Wyndmoor, eight miles from the Philco station's transmitter, shunts NBC programs to the WPTZ transmitter in North Philadelphia.

The National Broadcasting Company maintains a television staff of nearly 80 persons at Radio City. These are engaged in technical, programming, sales and research activities. A minimum weekly program service of 15 hours is offered to televiewers in the New York City area.

Experimental facilities associated with the station include studio equipment for color television. This is of the mechanical, three-color scanning disc type. Experimental broadcasts in color have been made; also frequency modulated transmissions in black-and-white images.

Station WNBW, the world's first commercial television station, was formerly operated as experimental station W2XBS. Originally an RCA station, it was first licensed April 4, 1928. W2XBS was successively located in Fifth Avenue and the Times Square Studio of the National Broadcasting Company. It passed under NBC management in 1930. Since 1931 NBC has conducted television transmissions from the present location of WNBW, in the Empire State Building tower.

The all-electronic system of television was introduced by NBC in a series of test transmissions in 1936. Images were first in 343 horizontal scanning lines. Later the standard was raised to 441 lines, then to 525 lines.

Regular public service in television programs was inaugurated April 30, 1939, when opening ceremonies of the New York World's Fair were broadcast to New York televiewers.

The first commercial license issued under the rules of the F.C.C. was granted to NBC in June, 1941. On July 1 the station, as WNBW, went on the air with four commercial pro-

grams. The station's commercial record for the first six months of commercial operation included thirteen sponsors, representing eight different industries. The percentage of sponsored time in December, 1941, was slightly less than ten per cent.

Outstanding programs transmitted by the NBC station have included the complete floor proceedings of the 1940 Republican National Convention at Philadelphia; National League baseball games at Ebbets Field, professional and college football games, numerous Madison Square Garden sports events, supper club floor shows and a wide range of dramatic, variety, educational and personality presentations from the Radio City television studios.

F. C. C. REGULATIONS REGARDING BROADCAST STATIONS FOR TELEVISION AND FACSIMILE

As of January 1, 1942

The term "visual broadcast service" means a service rendered by stations broadcasting images for general public reception. There are two classes of stations recognized in the visual broadcast service, namely: Television broadcast stations and Facsimile broadcast stations.

COMMERCIAL TELEVISION BROADCAST STATIONS

Definitions

"*Television broadcast station*" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public.

"*Television broadcast band*" means the bands of frequencies allocated for television broadcast stations.

"*Television channel*" means a band of frequencies 6,000 kilocycles wide and which may be designated by channel numbers as in section on channel assignments in these rules or by the extreme lower and upper frequencies.

"*Television transmission standards*" means the standards which determine the characteristics of the television signal as radiated by a television broadcast station.

"*Standard television signal*" means a television signal conforming with the television transmission standards set forth in the Standards of Good Engineering Practice for television stations.

"*Television transmitter*" means the radio transmitter or transmitters for the transmission of both visual and aural signals.

"*Visual transmitter*" means the radio equipment for the transmission of the visual signal only.

"*Aural transmitter*" means the radio equipment for the transmission of the aural signal only.

"*Visual transmitter power*" means the peak power output when transmitting a standard television signal.

"*Service area*" means the area in which the signal is not subject to objectionable interference or objectionable

fading. (Television broadcast stations are considered to have only one service area; for determination of such area see *Standards of Good Engineering Practice for Television Broadcast Stations.*)

"*Main studio*" as to any television broadcast station means the studio from which the majority of the local programs originate, or from which a majority of the station identification announcements are made.

Allocation of Facilities

Basis for license.—Television broadcast stations will be licensed on the basis of the effective signal radiated (ESR) from the visual transmitter in accordance with the following:

ESR is equal to the square root of the power times the antenna field gain times the height of the antenna above the surrounding area. The power is measured in kilowatts, the gain in voltage ratio, the antenna height in feet above surrounding area.

Time of operation.—Television broadcast stations will be licensed only for unlimited time operation.

Showing required.—Authorization for a new television broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following matters:

(a) That the service area and population which the applicant proposes to serve are computed in accordance with the Standards of Good Engineering Practice for Television Broadcast Stations. (The service area shall be consistent with and serve adequately the city or community proposed to serve in keeping with technical feasibility of coverage. The application shall be accomplished by an analysis of the computation of the

¹ The transmission of synchronized sound (aural broadcast) is considered to be an essential phase of television broadcast and one license will authorize both visual and aural broadcasts.

service area as set forth in the application. No application for construction permit for a new station or change in service area of an existing station will be accepted unless a definite site, details of proposed antenna and other data required by the application form are supplied.)

(b) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweighs the need for the service which will be lost by reason of such interference.

(c) That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree. (For determining objectionable interference, see *Standards of Good Engineering Practice for Television Broadcast Stations.*)

(d) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations herein and *Standards of Good Engineering Practice for Television Broadcast Stations.*)

(e) That the applicant is financially qualified to construct and operate the proposed station.

(f) That the applicant has available adequate sources of program material for the rendition of satisfactory television broadcast service.

(g) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(h) That the applicant is legally qualified, is of good character, and possesses other qualifications sufficient to provide a satisfactory public service.

(i) That the facilities sought are subject to assignment as requested under existing international agreements and the Rules and Regulations of the Commission.

(j) That the public interest, convenience, and necessity will be served through the operation under the proposed assignment.

Channel assignments.—The channels or frequency bands set forth below are available for assignment to television broadcast stations.

(a) Channel	
No.	
1	50,000- 56,000 kc
2	60,000- 66,000 kc
3	66,000- 72,000 kc
4	78,000- 84,000 kc
5	84,000- 90,000 kc
6	96,000-102,000 kc
7	102,000-108,000 kc

8	162,000-168,000 kc
9	180,000-186,000 kc
10	186,000-192,000 kc
11	204,000-210,000 kc
12	210,000-216,000 kc
13	230,000-236,000 kc
14	236,000-242,000 kc
15	258,000-264,000 ks
16	264,000-270,000 kc
17	282,000-288,000 kc
18	288,000-294,000 kc

(b) Stations serving the same area will not be assigned channels adjacent in frequency.

(c) One channel only will be assigned to a television broadcast station.

Experimental operation.—Television broadcast stations may conduct technical experimentation directed to the improvement of technical phases of operation and for such purposes may utilize a signal other than the standard television signal subject to the following conditions:

(a) That the licensee complies with the provisions of section 4.261 with regard to the minimum number of hours of transmission with a standard television signal.

(b) That no transmissions are radiated outside of the authorized channel and subject to the condition that no interference is caused to the transmissions of a standard television signal by other television broadcast stations.

(c) If objectionable interference would result from the simultaneous operation of a television broadcast station operating experimentally and an experimental broadcast station, the licensees shall make arrangements for operation to avoid interference.

(d) No charges either direct or indirect shall be made by the licensee of a television broadcast station for the production or transmission of programs when conducting technical experimentation.

Multiple ownership.—No person (including all persons under common control)² shall, directly or indirectly, own, operate, or control more than one television broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among television broadcast stations or provide a television broadcast service distinct and separate from existing services, and (2) that such ownership, operation or control would not result in the concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity; *Provided, however,* That no person (including all persons under common control), shall directly or indirectly, own, operate, or control more

² The word "control," as used herein, is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

than one television broadcast station that would serve substantially the same service area; and provided, further, That the Commission will regard the ownership, operation, or control of more than three television broadcast stations as constituting a concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

Normal license period.—All television broadcast station licenses shall be issued so as to expire at the hour of 3 a.m., Eastern Standard Time, and will be issued for a normal license period of one year, expiring February 1.

Equipment

Maximum rated power; how determined.—(a) The maximum rated carrier power of standard television transmitters shall be the same as the manufacturer's rating of the equipment.

(b) The maximum rated carrier power of composite television transmitters shall be the sum of the applicable commercial ratings of the vacuum tubes employed in the last radio stage.

Maximum power rating and operating power.—The Commission will authorize the installation of a television transmitter having maximum power rating equal to the operating output power in accordance with the table set out in section titled "Basis for License."

Monitors.—The licensee of each television broadcast station shall operate at the transmitter:

(a) A frequency monitor independent of the frequency control of the transmitter. The monitor shall meet the requirements set forth in the Standards of Good Engineering Practice for Television Broadcast Stations;

(b) A modulation monitor to determine that the radiated television signal complies with the television transmission standards set forth in the Standards of Good Engineering Practice for Television Broadcast Stations.

Required transmitter performance.—The external performance of television broadcast transmitters shall be capable of radiating a standard television signal meeting the minimum requirements prescribed by the Commission contained in the Standards of Good Engineering Practice. The transmitters shall be wired and shielded in accordance with the good engineering practice and shall be provided with safety features in accordance with the specifications of Article 810 of the current National Electrical Code as approved by the American Standards Association.

Indicating instruments.—The operating output power of television broadcast stations shall be measured by instruments having an acceptable accuracy.

Auxiliary and duplicate transmitters.—The provisions of the rules governing standard and high frequency broadcast stations shall also govern the use of auxiliary and duplicate transmitters for television broadcast stations

Changes in equipment and antenna system.—(a) No changes in equipment shall be made.

(1) That would result in emission of signals outside of the authorized television channel.

(2) That would result in the external performance of the transmitter being in disagreement with that prescribed by the Commission in the Standards of Good Engineering Practice provided that for experimental transmissions equipment changes may be made which would not render the transmitters incapable of radiating a standard television signal for the required minimum number of hours. (See section titled "Minimum Operating Schedule.")

(b) Specific authority³ is required for a change in any of the following:

(1) Increase in the maximum power rating of the transmitter.

(2) Replacement of the transmitter as a whole.

(3) Location of the transmitter antenna.

(4) Antenna system, including transmission line, which would result in a measurable change in service area or which would affect the determination of the operating power by the direct method. If any change is made in the antenna system or any change made which may affect the antenna system, the method of determining operating power shall be changed immediately to the indirect method.

(5) Relocation of main studio if new location is outside of the borders of the city, state, District of Columbia, territory, or possession.

(6) Operating output power delivered to the antenna.

(c) Specific authority,⁴ upon filing informal request therefor, is required for the following change in equipment and antenna:

(1) Indicating instruments installed to measure the antenna current or transmission line, except by an instrument of the same type, maximum scale reading and accuracy.

(2) Minor changes in the antenna system or transmission line which would not result in an increase of service area.

(3) Changes in the location of the main studio except as provided for in subsection (b) (5).

³ Formal application required. See Standards of Good Engineering practice for Television Broadcast Stations for specific application form.

⁴ Informal application by letter may be made.

(d) Other changes, except as above provided for in this section or in Standards of Good Engineering Practice for Television Broadcast Stations prescribed by the Commission may be made at any time without the authority of the Commission, provided that the Commission shall be promptly notified thereof, and such changes shall be shown in the next application for renewal of license.

Operating output power; how determined.—The operating output power, and the requirements for maintenance thereof, of each television broadcast station shall be determined by the Standards of Good Engineering Practice for Television Broadcast Stations.

Operation

Minimum operating schedule.—(a) The licensee of each television broadcast station shall maintain a regular program operating schedule transmitting a standard television signal for a total of 15 hours per week. On each day, except Sunday, there shall be at least 2 hours program transmission between 2 p.m. and 11 p.m., including at least 1 hour program transmission on five week days between 7.30 p.m. and 10.30 p.m.

(b) The aural transmitter of a television broadcast station shall not be operated separately from the visual transmitter except for experimental or test purposes, and for purposes incidental to or connected with the operation of the visual transmitter.

Station identification.—(a) A licensee of a television broadcast station shall make station identification announcement, aurally and visually, (call letters and location), at the beginning and ending of each time of operation and during operation on the hour.

(b) Identification announcements during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, or any type of production. In such cases the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

Motion picture film.—All motion picture film employed in the broadcasts of a television broadcast station must be briefly described as such either at the beginning of the program in which such film is used, or immediately prior to the broadcast of the film. Where the film

broadcast is of more than 15 minutes duration, it shall also be briefly described or immediately following the broadcast of a such either at the end of the program the film.

Logs.—The licensee of each television broadcast station shall maintain program and operating logs and shall require entries to be made as follows:

(a) Program log.

(1) Entry of the time each station identification is made.

(2) Entry briefly describing each program broadcast under the heading 'outside pickup,' 'studio production,' and motion picture film,' or combination thereof.

(3) Entry showing that each sponsored program has been announced as sponsored, paid for or furnished by the sponsor.

(4) Entry showing name of each sponsor and commodity advertised.

(b) Operating log (when transmitting a standard television signal).

(1) Entry of the time the station begins to supply power to the antenna and the time it stops.

(2) Entry of the time the program begins and ends.

(3) Entry of each interruption to the carrier waves, cause and duration.

(4) Entry of the following each thirty minutes:

i) Operating constants of the last radio stages.

ii) Frequency monitor readings.

(c) Log of experimental operation when transmitting other than a standard television signal.

(1) Entry of the time the station begins to supply power to the antenna and the time it stops.

(2) Short description of the broadcast made and its technical purpose.

Logs; retention of.—Logs of a television broadcast station shall be retained by the licensee for a period of 2 years, except when required to be retained for a longer period in accordance with the provisions of section 2.54 (FCC General Rules and Regulations).

Broadcasts by Candidates for Public Office

The provisions of sections on political broadcasts of the Rules and Regulations Governing Standard and High Frequency Broadcast Stations shall also govern television broadcast stations.

EXPERIMENTAL TELEVISION BROADCAST STATIONS

The term "television broadcast station" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public. The transmission

of the synchronized sound (aural broadcast) is considered an essential phase of television broadcasting and one license will be authorized for both visual and aural broadcast as herein set forth.

Under these rules for experimental television broadcast stations, the Commission will authorize experimental television relay broadcast stations for transmitting from points where suitable wire facilities are not available, programs for broadcast by one or more television broadcast stations. Such authorization will be granted only to the licensee of a television broadcast station.

A license for an experimental television broadcast station will be issued for the purpose of carrying on research and experimentation for the advancement of television broadcasting which may include tests of equipment, training of personnel, and experimental programs as are necessary for the experimentation.

Licensing Requirements

A license for a television broadcast station will be issued only after a satisfactory showing has been made in regard to the following:

1. That the applicant has a definite program of research and experimentation in the technical phases of television broadcasting, which indicates reasonable promise of substantial contributions to the developments of the television art.

2. That upon the authorization of the proposed station the applicant can and will proceed immediately with its program of research.

3. That the transmission of signals by radio is essential to the proposed program of research and experimentation.

4. That the program of research and experimentation will be conducted by qualified personnel.

5. That the applicant is legally, financially, technically, and otherwise qualified to carry forward the program.

6. That the public interest, convenience or necessity will be served through the operation of the proposed station.

Charges

No charges either direct or indirect shall be made by the licensee of a television station for the production or transmission of either aural or visual programs transmitted by such station except that this section shall not apply to the transmission of commercial programs by an experimental television relay broadcast station for retransmission by a television broadcast station.

Announcements

A licensee of a television broadcast station shall make station identification announcement aurally and visually (call letters and location) at the beginning and ending of each time of operation and during operation on the hour.

At the time station identification an-

nouncements are made, there shall be added the following:

'This is a special television broadcast made by authority of the Federal Communications Commission for experimental purposes.'

Operating Requirements

Each licensee of a television broadcast station shall diligently prosecute its program of research from the time its station is authorized.

Each licensee of a television station will from time to time make such changes in its operation as may be directed by the Commission for the purpose of promoting experimentation and improvement in the art of television broadcasting.

Frequency Assignment

(a) The following groups of channels are available for assignment to television broadcast stations licensed experimentally:

Group A		Group B	
Channel		Channel	
No. 1	50,000-56,000 kc	No. 8	162,000-168,000 kc
2	60,000-66,000	9	180,000-186,000
3	66,000-72,000	10	186,000-192,000
4	78,000-84,000	11	204,000-210,000
5	84,000-90,000	12	210,000-216,000
6	96,000-102,000	13	230,000-236,000
7	102,000-108,000	14	236,000-242,000
Group C		15	258,000-264,000
Any 6000 kc band		16	264,000-270,000
above 300,000 kc		17	282,000-288,000
excluding band		18	288,000-294,000
400,000-401,000 kc.			

No experimental television broadcast station will be authorized to use more than one channel in Group A except for good cause shown. Both aural and visual carriers with side bands for modulation are authorized but no emission shall result outside the authorized channel.

No persons (including all persons under common control) shall control directly or indirectly, two or more experimental television broadcast stations (other than television relay broadcast stations) unless a showing is made that the character of the programs of research require a licensing of two or more separate stations.

A license for an experimental television broadcast station will be issued only on the condition that no objectionable interference will result from the transmissions of the station to the regular program transmissions of television broadcast stations. It shall at all times be the duty of the licensee of an experimental television broadcast station to ascertain that no interference will result from the transmissions of its station. With regard to interference with the transmissions of an experimental television broadcast station or the experimental or test transmissions of a television broadcast

station, the licensees shall make arrangements for operations to avoid interference.

Channels in Groups B and C may be assigned to experimental television stations to serve auxiliary purposes such as television relay stations. No mobile or portable station will be licensed for the purpose of transmitting television programs to the public directly.

Power

The operating power of a television station shall be adequate for but not in excess of that necessary to carry forward the program of research and in no case in excess of the power specified in its license.

Reports

A report shall be filed with each application for renewal of station license which shall include a statement of each of the following:

1. Number of hours operated.

2. Full data on research and experimentation conducted including the type of transmitting and studio equipment used and their mode of operation.

3. Data on expense of research and operation during the period covered.

4. Power employed, field intensity measurements and visual and aural observations and the types of instruments and receivers utilized to determine the service area of the station and the efficiency of respective types of transmissions.

5. Estimated degree of public participation in reception, and the results of public observation as to the efficiency of types of transmission.

6. Conclusions, tentative and final.

7. Program for further developments in television broadcasting.

8. All developments and major changes in equipment.

9. Any other pertinent developments.

Special or progress reports shall be submitted from time to time as the Commission shall direct.

— FACSIMILE BROADCAST STATIONS —

The term "facsimile broadcast station" means a station licensed to transmit images of still objects for record reception by the general public.

A license for a facsimile broadcast station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development of the facsimile broadcast service.

2. That sufficient facsimile recorders will be distributed to accomplish the experimental program proposed.

3. That the program of research and experimentation will be conducted by qualified engineers.

4. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.

5. That the public interest, convenience and/or necessity will be served through the operation of the proposed station.

Conditions of Licensing

(a) A licensee of a facsimile broadcast station shall not make any charge, directly or indirectly, for the transmission of programs.

(b) No licensee of any standard broadcast station or network shall make any additional charge, directly or indirectly,

for the transmission of some phase of the programs by a facsimile broadcast station, nor shall commercial accounts be solicited by any licensee of a standard broadcast station or network, or others acting in their behalf, upon representation that images concerning that commercial program will be transmitted by a facsimile station.

Frequencies Allotted

a. The following groups of frequencies are allocated for assignment to facsimile broadcast stations which will be licensed experimentally only:

<i>Group A</i>	<i>Group B</i>	<i>Group C</i>
25,025 kc	43,540 kc	Any frequency above 300,000 kc excluding band 400,000 to 401,000 kc.
25,050	43,580	
25,075	43,620	
25,100	43,660	
25,125	43,700	
25,150	43,740	
25,175	43,780	
25,200	43,820	
25,225	43,860	
25,250	43,900	
	43,940	

b. Other broadcast or experimental frequencies may be assigned for the operation of facsimile broadcast stations on an experimental basis provided a sufficient need therefor is shown and no interference will be caused to established radio stations.

c. One frequency only will be assigned

to a facsimile station from the Groups in subsection (a) of this rule. More than one frequency may be assigned under provisions of subsection (b) of this rule if a need therefor is shown.

d. Each applicant shall specify the maximum modulating frequencies proposed to be employed.

e. The operating frequency of a facsimile broadcast station shall be maintained in accordance with the frequency tolerance of 0.05 per cent or less as required, provided, however, where a lesser tolerance is necessary to prevent interference, the Commission will specify the tolerance.

f. A facsimile broadcast station authorized to operate on frequencies regularly allocated to other stations or services shall be required to abide by all rules governing the stations regularly operating thereon, which are applicable to facsimile broadcast stations and are not in conflict with other FCC rules which apply to all stations generally.

Power Limitations

The operating power of a facsimile broadcast station shall not be in excess of that necessary to carry forward the program of research, provided, however, not more than 1000 watts will be authorized on a frequency in Group A. The operating power may be maintained at the maximum rating or less, as the conditions of operation may require.

A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following:

1. Number of hours operated for transmission of facsimile programs.
2. Comprehensive report of research and experimentation conducted.
3. Conclusions and program for further developments of the facsimile broadcast service.
4. All developments and major changes in equipment.
5. Any other pertinent developments.

FM MAKING RAPID PROGRESS

By Dick Dorrance, General Manager, FM Broadcasters, Inc.

IT is doubtful whether any single medium in the history of radio has ever made quite so much progress in the space of one year as frequency modulation (FM) broadcasting did during 1941. And yet, when analyzed, there is nothing unduly surprising about it. FM has had the ingredients of success which appeal to both broadcasters and public. It can provide improved and expanded service beyond the technical limitations of ordinary broadcasting; it has the enthusiastic support of some of the biggest broadcasters and engineering groups in the country.

When 1941 started there were, according to the most optimistic estimates, about 15,000 receivers in the nation equipped for FM reception. By the end of the year, the FM listening audience had grown to approximately a quarter of a million sets, with close to 50,000 being sold each month. These figures, accurately compiled by FM Broadcasters, Inc., with the cooperation of manufacturers, indicate an increase of 1400 per cent during the twelve-month period.

Commercial FM

Officially, FM assumed its commercial status on January 1, 1941, but it was not until March 1 that the first commercial FM station actually began operating. By the end of 1941, the Federal Communications Commission had authorized the construction of 62 such transmitters, 24 of which had already gone on the air. The rest are pushing installation of equipment as fast as war-time exigencies will permit.

The increased coverage of FM stations now on the air contrasts sharply with the limited reception available from the handful of low-power experimental stations operating at the close of 1940. Although these had an average range of about 30 miles, it is not uncommon to find commercial outlets serving a radius of 70 to 100 miles and more. Some 40,000,000 persons live within the assigned service areas of the 24 transmitters on the air at the end of 1941.

Another interesting development of the past year has been the organization of The American Network, Inc., FM's first chain with coast-to-coast ambitions. Ultimate plans call for outlets in the 42 largest U. S. markets, providing maximum coverage with a pre-planned network.

Time Sales

Time sales over FM stations in 1941, while not epochal, have at least been promising. There was great variation from city to city in the amount of business secured, but local accounts far out-totaled national business. Toward the close of the year agency interest appeared to be growing as the FM audience reached appreciable proportions. Many stations began to set up special FM sales staffs.

The public today has a selection of over 125 different set models to pick from, produced by 20 manufacturers. The year brought noticeable reductions in price, with table receivers capable of both FM and AM reception selling for as little as \$67.50. Practically all sets now on the market are of the FM-AM type, and extensive improvements in circuit design have taken place in the 1942 models.

Future

It cannot be denied that the war will place formidable obstacles in the path of FM development in the coming year—a situation now being faced by almost every civilian industry. Curtailment of set production, however, is expected proportionately to wreak no more havoc on FM than on ordinary broadcasting, with the likelihood that manufacturers, confronted by shortages of raw material, will use their limited allotments to make FM-AM sets, thus compensating with quality for revenue normally brought in by the sale of low-priced AM midget receivers.

There can be no question that further FM development during 1941 was held up by the FCC investigation of newspaper-controlled radio stations. Some three dozen of the ungranted FM applications pending have been filed by newspapers, anxious to enter the FM field. These, however, have been kept in abeyance by the Commission until definite policies with respect to such ownership are determined.

Active throughout the year, and an important factor in coordinating the growth of FM, has been FM Broadcasters, Inc., the young industry's trade association to which all leading FM groups belong. Its promotional work, public education, liaison with manufacturers, and trade representation has served FM well, and will continue to do so in 1942.

HIGH FREQUENCY—FREQUENCY MODULATION BROADCAST STATIONS

The term "high frequency broadcast station" means a station licensed primarily for the transmission of radiotelephone emissions, intended to be received by the general public and operated on a channel in the high frequency broadcast band. Commercial high frequency broadcast stations must use frequency modulation.

F. C. C. Regulations

Regarding High Frequency Broadcast Stations

As of January 1, 1942

The term "high frequency broadcast station" means a station licensed primarily for the transmission of radiotelephone emissions intended to be received by the general public and operated on a channel in the High Frequency broadcast band. High frequency broadcast stations must use frequency modulation.

Definitions

High Frequency Broadcast Band. The term "high frequency broadcast band" means the band of frequencies extending from 43,000 to 50,000 kilocycles, both inclusive.

Frequency Modulation. The term "frequency modulation" means a system of modulation of a radio signal in which the frequency of the carrier wave is varied in accordance with the signal to be transmitted while the amplitude of the carrier remains constant.

Center Frequency. The term "center frequency" means the frequency of the carrier wave with no modulation. (With modulation the instantaneous operating frequency swings above and below the center frequency. The operating frequency with no modulation shall be the center frequency within the frequency tolerance).

High Frequency Broadcast Channel. The term "high frequency broadcast channel" means a band of frequencies 200 kilocycles wide and is designated by its center frequency. Channels for high frequency broadcast stations begin at 43,100 kilocycles and continue in successive steps of 200 kilocycles to and including the frequency of 49,900 kilocycles.

Service Area. The term "service area" of a high frequency broadcast station means the area in which the signal is not subject to objectionable interference or objectionable fading. (High frequency broadcast stations are considered to have only one service area; for determination of such area see *Standards of Good Engineering Practice for High Frequency Broadcast Stations.*)

Antenna Field Gain. The term "antenna field gain" of a high frequency broadcast antenna means the ratio of the effective free space field intensity produced at one mile in the horizontal plane expressed in millivolts per meter for 1 kilowatt antenna input power to 137.6.

Free Space Field Intensity. The term "free space field intensity" means the field intensity that would exist at a point in the absence of waves reflected from the earth or from reflecting objects.

Frequency Swing. The term "frequency swing" is used only with respect to frequency modulation and means the instantaneous departure of the carrier frequency from the center frequency resulting from modulation.

Multiplex Transmission. The term "multiplex transmission" means the simultaneous transmission of two or more signals by means of a common carrier wave. (Multiplex transmission as applied to high frequency broadcast stations means the transmission of facsimile or other aural signals in addition to the regular broadcast signals.)

Percentage Modulation. The term "percentage modulation" with respect to frequency modulation means the ratio of the actual frequency swing to the frequency swing required for 100 per cent modulation expressed in percentage. (For high frequency broadcast stations, a frequency swing of 75 kilocycles is standard for 100 per cent modulation.)

Experimental Period. The term "experimental period" means that period of time between 12 midnight and sunrise. This period may be used for experimental purposes in testing and maintaining apparatus by the licensee of any high fre-

quency broadcast station, on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period.

Main Studio. The term "main studio" means, as to any station, the studio from which the majority of its local programs originate and/or from which a majority of its station announcements are made programs originating at remote points.

Allocation of Facilities¹

Basis of Licensing High Frequency Broadcast Stations. High frequency broadcast stations shall be licensed to serve a specified area in square miles. The contour bounding the service area and the radii of the contour shall be determined in accordance with the *Standards of Good Engineering Practice for High Frequency Broadcast Stations.*

Service Areas (Definitions)

For the purpose of determining the areas to be served by high frequency broadcast stations, the following definitions apply:

(a) "Basic trade areas" and "limited trade areas" consist of areas the boundaries of which are determined by the Commission on the basis of showings made in applications as to retail trading areas or consumer trading areas and from government data². Each basic trade area includes one "principal city." The boundaries of the basic trade areas are adjoining and the aggregate of all such areas is the total area of the United States. Each "limited trade area" includes one city. The boundaries of limited trade areas are not necessarily adjoining. Such areas may include portions of other limited trade areas and may extend into more than one basic trade area.

(b) "Principal city" means the largest city or the city or cities designated as "principal city" by the Commission, within a basic trade area. "City" means any city, town, or borough in a basic trade area except the principal city. Each "city" has a limited trade area.

¹The rules relating to allocation of facilities are intended primarily for the information of applicants. Nothing contained in said rules shall be regarded as any recognition of any legal right on behalf of any person to a grant or denial of any application.

²There are several current and recognized authorities on retail trading areas or consumer trading areas from which the applicant may prepare its showing and to which the Commission will give consideration in making its determination.

(c) "Rural area" means all land area outside incorporated towns or cities with population greater than 2500 and where the density of population is less than 150 per square mile. Incorporated towns or cities with population from 2500 to 5000 without a high frequency broadcast station and not adjacent to larger cities may be considered rural area.

Service Areas—Established

The Commission in considering applications for high frequency broadcast stations will establish service areas. Such stations will be licensed to serve areas having the following characteristics:

(a) An area comprising a limited trade area and a city. The station shall render good service to the city and its service area shall conform generally with the limited trade area.

(b) An area comprising a basic trade area and a principal city. The station shall render good service to the principal city and its service area shall conform generally with the basic trade area; *Provided, however,* That the station may be licensed to serve temporarily an area less than the basic trade area, subject to the following conditions: (1) that an applicant for authority to serve temporarily less than the basic trade area show substantial reason for relaxation of the requirement to serve the basic trade area and for specification of the proposed service area; (2) that the area to be served include as much of the basic trade area as reasonably may be required in the public interest to be served and in no event less than the principal city and the metropolitan district in which it is located; (3) that such an applicant show compliance with the section of these rules regarding similarity of service areas for all stations in the same established area except that such sections shall apply only in relation to other stations established under this proviso; (4) that the Commission may condition the granting of any application for renewal of license of such station upon the rendering of service by such station to an area conforming generally with the basic trade area.

(c) An area of at least 15,000 square miles comprising primarily a large rural area, and particularly that part of basic trade areas which cannot be served by stations assigned basic trade areas due to economical and technical limitations.

The service area may include one or more principal city or cities, provided that in rendering service to such cities, the service to rural areas which the station is designated to serve is not impaired. The transmitter of such a station shall be located in such a manner that the service area, (1) shall extend into two or more basic trade areas, (2) shall not conform generally with a basic trade area, and (3) shall not merely extend beyond a basic trade area.

(d) An area having substantially different characteristics (social, cultural, or economic) from those areas specified in subsections (a), (b) and (c) of this section where, by reason of special conditions, it is shown that a need (which cannot be supplied by a station serving areas under subsections (a), (b) or (c) of this section) for the proposed service both program and technical exists which makes the establishment of the service area in the public interest, convenience or necessity. The Commission will give particular consideration in this connection to competitive advantages which such stations would have over other stations established under other provisions.

(e) In case it is not economically and technically feasible for a station assigned a basic or limited trade area to serve substantially all such area, the Commission will establish the service area on the basis of conditions which obtain in the trade area.

(f) In case an applicant proposes a change in an established service area, the applicant shall make a full showing as to need for such change and the effect on other stations serving the area.

Time of Operation. All high frequency broadcast stations shall be licensed for unlimited time operation.

Showing Required. Authorization for a new high frequency broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following matters:

(a) That the area which the applicant proposes to serve has the characteristics of an area described in subparagraphs (a), (b), or (c) of the section on *Service Areas* stated above.

(b) Where a service area has been established in which one or more existing high frequency broadcast stations are in operation, that the contours of any new

station proposed to serve such area will compare with those of the existing station or stations as nearly as possible, or that the service area already established should be modified.

(c) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweigh the need for the service which will be lost by reason of such interference.

(d) That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree.

(e) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice.

(f) That the applicant is financially qualified to construct and operate the proposed station; and, if the proposed station is to serve substantially the same area as an existing station, that applicant will be able to compete effectively with the existing station or stations.

(g) That the program service will include a portion of programs particularly adapted to a service utilizing the full fidelity capability of the system, as set forth in the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

(h) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(i) That the applicant is legally qualified, is of good character, and possesses other qualifications sufficient to provide a satisfactory public service.

(j) That the facilities sought are subject to assignment as requested under existing international agreements and the Rules and Regulations of the Commission.

(k) That the public interest, convenience, and necessity will be served through the operation under the proposed assignment.

Channel Assignments

The channels set forth below with the indicated center frequencies are available

Multiple Transmission

for assignment to high frequency broadcast stations to serve the areas provided in the section on *Service Areas Established* stated above:

(a) An applicant for a station to serve an area specified in paragraphs (a) or (b) of that section to be located in a principal city or city which has a population less than 25,000 (city only) shall apply for one of the following channels:

48900	49300	49500	49700
49100			49900

(b) An applicant for a station to serve an area specified in paragraph (a) or (b) of that section to be located in a principal city or city which has a population greater than 25,000 (city only) shall apply for one of the following channels:

44500	45700	46700	47900
44700	45900	46900	48100
44900	46100	47100	48300
45100	46300	47300	48500
45300	46500	47500	48700
45500		47700	

(c) An applicant for a station to serve primarily a large rural area, specified in paragraph (c) or an area specified in paragraph (d) of that section shall apply for one of the following channels:

43100	43500	43900	44300
43300	43700	44100	

(d) Notwithstanding the provisions of subsection (a) of this section, an applicant for a station to serve an area specified in section of these rules defining the establishment of "an area comprising a limited trade area and city," to be located in a city having a population greater than 25,000, in or adjacent to any metropolitan district having a population greater than 1,000,000, may apply for one of the following channels:

49100	49500	49900
-------	-------	-------

Special Provisions Concerning Assignments

(a) Stations located in the same city shall have substantially the same service area.

(b) High frequency broadcast stations shall use frequency modulation exclusively.

(c) Stations serving a substantial part of the same area shall not be assigned adjacent channels.

(d) One channel only will be assigned to a station.

Facsimile Broadcasting and Multiplex Transmission. The Commission may grant authority to a high frequency broadcast station for the multiplex transmission of facsimile and aural broadcast programs provided the facsimile transmission is incidental to the aural broadcast and does not either reduce the quality of or the frequency swing required for the transmission of the aural program. The frequency swing for the modulation of the aural program should be maintained at 75 kc and the facsimile signal added thereto. No transmission outside the authorized band of 200 kc shall result from such multiplex operation nor shall interference be caused to other stations operating on adjacent channels. The transmission of multiplex signals may also be authorized on an experimental basis in accordance with standard broadcast station rule on special experimental authorizations.

Proof of Performance Required. Within one year of the date of first regular operation of a high frequency broadcast station, continuous field intensity records along several radials shall be submitted to the Commission which will establish the actual field contours, and from which operating constants required to deliver service to the area specified in the license are determined. The Commission may grant extensions of time upon showing of reasonable need therefor.

Multiple Ownership. (a) No person (including all persons under common control¹) shall, directly or indirectly, own, operate, or control more than one high frequency broadcast station that would serve substantially the same service area as another high frequency broadcast station owned, operated, or controlled by such person.

(b) No person (including all persons under common control) shall, directly or indirectly, own, operate, or control more than one high frequency broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among high frequency broadcast stations or provide a high frequency broadcasting service distinct and separate from existing services; and (2) that such ownership, operation, or control would not result in the concentration of control of high frequency broadcasting facilities in a manner inconsistent with public interest,

¹The word "control" as used herein is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

convenience, or necessity; *provided, however*, that the Commission will consider the ownership, operation, or control of more than six high frequency broadcast stations to constitute the concentration of control of high frequency broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

Normal License Period. All high frequency broadcast station licenses will be issued so as to expire at the hour of 3 a.m., Eastern Standard Time, and will be

(a) For stations operating on the frequency issued for a normal license period of one year, expiring as follows:

frequencies 48900, 49100, 49300, 49500, 49700, and 49900, April 1.

(b) For stations operating on the frequencies 44500, 44700, 44900, 45100, 45300, 45500, 45700, 45900, 46100, 46300, and 46500, May 1.

(c) For stations operating on the frequencies 46700, 46900, 47100, 47300, 47500, 47700, 47900, 48100, 48300, 48500, and 48700, June 1.

(d) For stations operating on the frequencies 43100, 43300, 43500, 43700, 43900, 44100, and 44300, July 1.

Equipment

Maximum Power Rating. The Commission will not authorize the installation of a transmitter having a maximum rated power more than twice the operating power of the station.

Maximum Rated Carrier Power; How Determined. (a) The maximum rated carrier power of a standard transmitter shall be determined by the manufacturer's rating of the equipment.

(b) The maximum rated carried power of a composite transmitter shall be determined by the sum of the applicable commercial ratings of the vacuum tubes employed in the last radio stage.

Frequency Monitor. The licensee of each high frequency broadcast station shall have in operation at the transmitter a frequency monitor independent of the frequency control of the transmitter. It shall have a stability of 20 parts per million.

Modulation Monitor. The licensee of each high frequency broadcast station shall have in operation at the transmitter an approved modulation monitor.

Required Transmitter Performance. (a) The external performance of high frequency broadcast transmitters shall be within the minimum requirement prescribed by the Commission contained in the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

(b) The transmitter center frequency shall be controlled directly by automatic means which do not depend on inductances and capacities for inherent stability.

(c) The transmitter shall be wired and shielded in accordance with good engineering practice and shall be provided with safety features in accordance with the specifications of article 810 of the current National Electrical Code as approved by the American Standards Association.

Indicating Instruments. The direct plate circuit current and voltage shall be measured by instruments having an acceptable accuracy.

Changes in Equipment and Antenna System. Licensees of high frequency broadcast stations shall observe the following provisions with regard to change in equipment and antenna system:

(a) No changes in equipment shall be made:

1. That would result in the emission of signals outside of the authorized channel.
2. That would result in the external performance of the transmitter being in disagreement with that prescribed in the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

(b) Specific authority, upon filing formal application¹ therefor, is required for a change in service area or for any of the following changes:

1. Changes involving an increase in the maximum power rating of the transmitter.
2. A replacement of the transmitter as a whole.
3. Change in the location of the transmitter antenna.
4. Change in antenna system, including transmission line, which would result in a measurable change in service

¹See Standards of Good Engineering Practice for High Frequency Broadcast Stations for specific application form required.

or which would affect the determination of the operating power by direct method. If any change is made in the antenna system or any change made which may affect the antenna system, the method of determining operating power shall be changed immediately to the indirect method.

5. Change in location of main studio to outside of the borders of the city, state, district, territory, or possession.

6. Change in the power delivered to the antenna.

(c) Specific authority, upon filing *informal* request therefor, is required for the following change in equipment and antenna:

1. Change in the indicating instruments installed to measure the antenna current or transmission line, direct place circuit voltage and the direct current of the last radio stage, except by instruments of the same type, maximum scale reading and accuracy.

2. Minor changes in the antenna system and/or transmission line which would not result in an increase of service area.

3. Changes in the location of the main studio except as provided for in subsection (b) 5.

(d) Other changes, except as above provided for in this section or in Standards of Good Engineering Practice for High Frequency Broadcast Stations prescribed by the Commission may be made at any time without the authority of the Commission, provided that the Commission shall be promptly notified thereof, and such changes shall be shown in the next application for renewal of license.

Operating Power; How Determined. The operating power, and the requirements for maintenance thereof, of each high frequency broadcast station shall be determined by the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

Modulation. (a) The percentage of modulation of all stations shall be maintained as high as possible consistent with good quality transmission and good broadcast practice and in no case less than 85 per cent on peaks of frequent recurrence during any selection which normally is transmitted at the highest level of the program under consideration.

Frequency Tolerance. The operating

frequency without modulation of each broadcast station shall be maintained within 2000 cycles of the assigned center frequency.

Operation

Minimum Operating Schedule; Service.

(a) Except Sundays, the licensee of each high frequency broadcast station shall maintain a regular daily operating schedule which shall consist of at least three hours of operation during the period 6 a.m. to 6 p.m., local standard time, and three hours of operation during the period 6 p.m. to midnight, local standard time. In an emergency, however, when due to causes beyond the control of the licensee, it becomes impossible to continue operating, the station may cease operation for a period not to exceed ten days, provided that the Commission and the Inspector in Charge of the radio district in which the station is located shall be notified in writing immediately after the emergency develops.

(b) Such stations shall devote a minimum of one hour each day during the period 6 a.m. to 6 p.m., and one hour each day during the period 6 p.m. to midnight, to programs not duplicated simultaneously as primary service in the same area by an standard broadcast station or by any high frequency broadcast station. During said one hour periods, a service utilizing the full fidelity capability of the system, as set forth in the Standards of Good Engineering Practice for High Frequency Broadcast Stations, shall be rendered. However, the Commission may, upon request accompanied by a showing of reasons therefor, grant exemption from the foregoing requirements, in whole or in part, for periods not in excess of three months.

(c) In addition to the foregoing minimum requirements, the Commission will consider, in determining whether public interest, convenience, and necessity has been or will be served by the operation of the station, the extent to which the station has made or will make use of the facility to develop a distinct and separate service from that otherwise available in the service area.

DEVELOPMENTAL BROADCAST STATIONS

The term "developmental broadcast station" means a station licensed to carry on development and research for the advancement of broadcast services along lines other than those prescribed by other broadcast rules or a combination of closely related developments that can be better carried on under one license.

— F. C. C. REGULATIONS REGARDING — DEVELOPMENTAL BROADCAST STATIONS

The term "developmental broadcast station" means a station licensed to carry on development and research for the advancement of broadcast services along lines other than those prescribed by other broadcast rules or a combination of closely related developments that can be better carried on under one license.

Licenses for developmental broadcast stations will be issued only after a satisfactory showing has been made in regard to the following, among others:

(1) That the applicant has a program of research and development which cannot be successfully carried on under any of the classes of broadcast stations already allocated, or is distinctive from those classes, or combination of closely related developments that involve different phases of broadcasting which can be pursued better under one license.

(2) That the program of research has reasonable promise of substantial contribution to the development of broadcasting, or is along lines not already thoroughly investigated.

(3) That the program of research and experimentation will be conducted by qualified persons.

(4) That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.

(5) That the public interest, convenience, and necessity will be served through the operation of the proposed station.

A separate developmental broadcast station license will be issued for each major development proposed to be carried forward. When it is desired to carry on several independent developments, it will be necessary to make satisfactory showing and obtain a license for each.

A licensee of developmental broadcast stations shall broadcast programs when they are necessary to the experiments being conducted. No regular program service shall be broadcast unless specifically authorized by the license.

A licensee of a developmental broadcast station shall not make any charge, directly or indirectly, for the transmission of programs, but may transmit the programs of a standard broadcast station or network including commercial programs, if the call letter designation when identifying the developmental broadcast station is given on its assigned frequency only and the statement is made

over the developmental broadcast station that the program of a broadcast station or network (identify by call letters or name of network) is being broadcast in connection with the developmental work. In case of the rebroadcast of the program of any broadcast station, the FCC Regulation on rebroadcasting holds.

Frequency Allotted

The following frequencies are allocated for assignment to developmental broadcast stations:*

	1,614				
2,396 } 2,398		12,855 } 12,862.5		37,140	
2,400 } 12,870				37,540	
				39,140	
3,490 } 17,300				39,460	
3,495 } 3,492.5		17,320 } 17,310		39,540	
				116,050	
4,795 } 23,100				116,250	
4,800 } 4,797.5		30,660		116,450	
		31,020		116,850	
		31,140		117,050	
6,420 } 31,180				117,250	
6,430 } 6,425		31,540		117,650	
		33,340		118,050	
		33,460		118,250	
9,130 } 33,620				118,450	
9,140 } 9,135		35,060		118,650	
		35,460		118,850	
		37,060		156,525	
				156,975	
				157,425	
				157,725	
				158,175	
				159,075	
				160,425	
				161,325	
				161,775	
				162,000-168,000	
				210,000-216,000	
				264,000-270,000	
				300,000-400,000	
				401,000 and above	

A license will be issued for more than one of these frequencies upon a satisfactory showing that there is need therefor.

The frequencies suited to the purpose and in which there appears to be the least or no interference to established stations shall be selected.

In cases of important experimentation which cannot be conducted successfully on the frequencies allocated herein, the Commission may authorize developmental broadcast stations to operate on any frequency allocated for broadcast stations or any frequencies allocated for other services under the jurisdiction of the Commission upon satisfactory showing that such frequencies can be used without causing interference to established services.

The operating frequency of a developmental broadcast station shall be main-

* Also available for assignment to all other stations in the experimental service.

tained in accordance with the frequency tolerance of 0.05 per cent or less as required, provided, however, where lesser tolerance is necessary to prevent interference, the Commission will specify the tolerance.

The operating power of a developmental broadcast station shall not be in excess of that necessary to carry on the program of research. The operating power may be maintained at the maximum rating or less, as the conditions of operation may require.

Supplemental Report

A supplemental report shall be filed with and a part of each application for renewal of license and shall include statements of the following, among others:

1. The number of hours operated.
2. Comprehensive report on research and experiments conducted.
3. Conclusions and program for further development of the broadcast service.
4. Any other pertinent developments.

A developmental broadcast station authorized to operate on frequencies regularly allocated to other stations or services, shall be required to abide by all rules governing the stations operating regularly thereon which are applicable to developmental broadcast and are not in conflict with rules of the Commission for stations in general or for rules for developmental broadcast stations.

ST BROADCAST STATIONS

The term "ST broadcast station" means a station used to transmit programs from the main studio to the transmitter of a high frequency or an international broadcast station.

RULES GOVERNING ST BROADCAST STATIONS

The term "ST¹ broadcast station" means a station used to transmit programs from the main studio to the transmitter of a high frequency broadcast station, or an international broadcast station.

An ST broadcast station will be licensed only to the licensee of a high frequency broadcast station or of an international broadcast station. Only one ST broadcast station will be authorized in connect with the license for any high frequency broadcast station. Not more than two ST broadcast stations will be authorized in connection with the license for any international broadcast station. Each such ST station shall be at a fixed location.

The license of an ST broadcast station authorizes the transmission of program material, including commercial programs, from the main studio to the transmitter of the high frequency broadcast station or international broadcast station in connection with which it is authorized.

Frequency Assignment

The following frequencies are allocated for assignment to ST broadcast stations upon an experimental basis:

kc	kc	kc	kc	kc
330,400	333,400	335,800	338,200	340,600
331,000	334,000	336,400	338,800	341,200
331,600	334,600	337,000	339,400	341,800
332,200	335,200	337,600	340,000	342,400
332,800				343,000
				343,600

ST broadcast stations will be authorized to employ frequency modulation only.

The maximum frequency swing employed by ST broadcast stations shall not be in excess of 200 kilocycles.

The licensee of each ST broadcast

¹ The abbreviation "ST" is derived from "studio-transmitter."

station shall install and operate a directional antenna designed so that the gain in power toward the receiver shall be 10 (field gain 3.16) times the free space field from a doublet (137.6 mv/m for 1 kw at one mile). In all other directions 30° or more off the line to receiver, the power gain shall not exceed ¼ of the free space field gain from a doublet.

ST broadcast stations will be licensed with a power output not in excess of that necessary to render a satisfactory service.

The licensee of each ST broadcast station is required to conduct experimentation with regard to the following:

(a) Design of equipment and power required to render a satisfactory service.

(b) Design and adjustment of directional transmitting antennas.

(c) Design and location of receiving antennas.

Supplemental Report

A supplemental report shall be filed with and made a part of each application for renewal of application and shall include statements as to the following items:

(a) Total hours of operation.

(b) Continuity of service, causes and duration of any interruptions.

(c) Power required to deliver satisfactory signal at receiver.

(d) Data on design, adjustments and operation of directional receiving and transmitting antennas.

(e) Interference to service resulting from other stations or other sources.

(f) Cost of transmitter and receiver installation and expense of operation.

(g) Overall fidelity of equipment, frequency and amplitude.

BROADCASTING AND THE WAR

By Neville Miller, President, National Association of Broadcasters

RADIO broadcasting in the United States is just entering upon a period of what promises to be its greatest effectiveness. While it is not possible to form definite conclusions as to the effect of this long, hard war upon the industry, it is gratifying to note that the first impact of the war found the broadcasters measurably prepared to fulfill their responsibility.

Radio was ready because there has been many months of careful planning and more than two years of experience in news handling under war conditions abroad and radio had been consistently performing a notable service in the national defense effort which preceded the actual declaration of war. The groundwork to meet just such a contingency as arose out of the Pearl Harbor incident had been laid. Within two days after the attack upon Hawaii a voluntary set of rules and regulations for the handling of news and other types of programs, easily accessible to subversive interests, had been formulated. Within ten days after our entry into the war an almost complete set of rules and regulations had been perfected and the industry was voluntarily following it closely.

As the nation's most important single means of mass communication, unique in its ability to secure and hold the attention of a vast majority of the people of the nation simultaneously, radio will undoubtedly play a major role in the prosecution of the war. Probably the most favorable development thus far affecting broadcasting is the evidence that our government has decided not to take over and operate radio, but to leave it in the hands of experienced private operators who, through the years, have demonstrated an appreciation of their responsibilities to serve the national interest. With the advent of radio, Congress wisely determined that in America this medium of mass communication should remain free of government operation and control. As a consequence the American system of broadcasting has developed along lines that have made of it a most effective instrument for the preservation of liberty and freedom of thought and expression. In this, America is singularly fortunate for it has been the sad experience of all too many people that the establishment of government control over radio has been the stepping stone

to the elimination of free speech and finally of freedom itself. This must not, and I am convinced will not, happen in America.

Radio's War Purposes

On the other hand, radio will undoubtedly be used to a constantly greater extent for war purposes. The Defense Communications Board has been designated by the President to coordinate the physical facilities of the industry to the end that they may most adequately serve the war effort. The President has delegated to the Office of Censorship the responsibility of eliminating from programs any material which might serve to aid the enemy. The broadcasters have cooperated wholeheartedly in devising reasonable rules and regulations that would make these two important functions effective.

For many months prior to the actual advent of war, broadcasters had devoted a substantial portion of their time and facilities on a gratis basis to promote the national defense program. While the responsibilities of radio have been increased by the advent of war, the demands of the armed services have exacted their toll from the industry. The need of the military for trained radio men together with the operation of the Selective Service System, has produced a dangerous shortage of trained technicians. As a service to the armed forces, as well as for its own needs, the industry set out, even prior to the declaration of war, to establish courses for the training of radio technicians. This activity has received enthusiastic cooperation from the educational institutions of the country and is now well under way in all areas.

In addition, lack of critical materials, many of which are essential to the proper technical operation of radio broadcasting, will hamper normal operations and in some cases retard developments. Television and frequency modulation have made great strides in the past year and the industry will assuredly devote as much of its time and effort as possible to continue the development in these new fields consistent with the large demands upon its facilities and the handicaps of the emergency period.

"Business as Usual"

From the commercial standpoint, while broadcasters do not hope for a "business as usual" program, there is every reason

to believe that radio will continue to be used as a major advertising medium. Radio listening is at its peak and there has even been an increase in the sale of radio receiving sets. With a peak audience and a higher degree of sustained listening audience it is felt that advertisers and agencies will not abandon radio to any great extent. There is, of course, the probability that some commodities heretofore widely advertised by radio will be affected by material shortage and compelled to discontinue all advertising. Experienced operators feel, however, that these losses will be more than offset by advertising of substitute commodities coming into the field.

In the early stages of the war when commercial programs were interrupted by war announcements and when occa-

sional black-outs were required, sponsors of commercial programs cooperated heartily and for this the broadcasters are grateful. It is my belief that the officers of government appreciate the importance of keeping broadcasting at its job. I also believe that they appreciate the fact that in performing its normal duties radio can pay its own way and at the same time render a most essential service to the country.

Despite all the uncertainties of what may develop the broadcasting industry faces 1942 with confidence and a determination to render an even greater service to the country in this time of crisis and to carry on our normal job in an orderly and efficient manner. No industry, no individual citizen, can be expected to do more.

1941 RESEARCH ACTIVITIES

By Paul F. Peter, NAB Director of Research

THIS Department materially expanded its activities during the past year, continues to grow in usefulness to the industry. In January, the NAB Broadcast Advertising Record was inaugurated. This is a monthly report on the nature and extent of the use of radio by advertisers throughout the country. This service to all stations has received widespread commendation as one of the most valuable sales-building tools at the disposal of the individual station, and it serves as basic material for the NAB Department of Broadcast Advertising.

The monthly publication of the "Broadcast Advertising Record" contains a tabulation in terms of time units of advertising placed by advertisers on the station and networks cooperating in the service. Advertisers are classified as to type of business in sufficient detail to permit of quite specific examination. Separate consideration is given Local, National, Spot, Regional Network and National Network business. Averages are presented for Local and National Spot business to provide a direct comparison of an individual station's business to serve station management.

Urban Radio Survey

Early in 1941, the NAB published its "Survey of Urban Radio Listening in the United States," a companion study to the "Rural Radio Ownership Study" made public in 1939. Heralded as a major contribution to knowledge of the broadcasting industry, this survey of radio owner-

ship and listening habits in urban areas was made in collaboration with the National Broadcasting Company and the Columbia Broadcasting System. It has been widely distributed among radio broadcast stations, advertisers and advertising agencies.

Pursuing its studies of methods used in program audience measurement, the NAB Research Committee invited the C. E. Hooper organization to present to it an analysis of the method employed in preparing the monthly "telephone coincidental" reports which this organization furnishes to its subscribers. A similar invitation was extended to the Co-operative Analysis of Broadcasting (Crossley) services who employ the "telephone recall" system. Both of these services furnished exceedingly interesting reports on their respective methods. It is the intention of the Research Committee to hear further reports on methods used in audience measurement, and to prepare a Research Manual for the use of NAB membership in placing or conducting audience measurement research.

A considerable amount of the Research Director's time during the year was devoted to work on various committees engaged in drafting standard forms of contracts and invoices for use by broadcast stations and agencies in connection with the purchase and sale of broadcasting time.

LEGAL—LEGISLATIVE ACTIVITIES

By Russell P. Place, NAB Counsel

OF the bills affecting the broadcasting industry which have been introduced during the first session of the 77th Congress, undoubtedly the bills to amend the Communications Act introduced respectively by Senator White of Maine and Representative Sanders of Louisiana most vitally affect broadcasters. Seeking as they do to make changes in the organic act governing the industry and the Federal Communications Commission, these measures deserve the careful study of every broadcaster. In order to assist broadcasters in such study, the Legal Department prepared an analysis of the bills, which was circulated to the membership of the NAB at the District meetings held during the fall of 1941.

Leading up to the introduction of these bills, was Senator White's resolutions calling for an investigation of the Federal Communications Commission's Regulations Governing Chain Broadcasting, introduced almost immediately following the promulgation of those regulations on May 2, 1941. Pursuant to the vote of the NAB membership at the St. Louis Convention in May, the NAB, acting through Neville Miller, President, appeared before the Interstate Commerce Committee of the Senate in support of the resolution. The hearings were recessed, subject to the call of the chair, on June 20, and have not since been resumed. Subsequent to the recess, the Commission amended the regulations in certain respects; in November, by stipulation approved by the Court, the operation of the regulations was suspended pending judicial determination of the bill for a temporary injunction against their operation which was filed by CBS and NBC, and in which stations WHAM and WOW joined.

Of vital importance to the broadcasting industry and advertising generally was the eleventh hour threat to impose a gross receipts tax on time sales by stations and networks. A united industry succeeded in defeating the tax.

Copyrights

Strenuous efforts were made by the State Department to persuade the Committee on Foreign Relations of the Senate that the Senate should give its advice and consent to adherence to the International Copyright Union. The NAB, in company with all other users and authors of copyrighted material, vigorously opposed adherence at the hearings before

that Committee. To date, the Committee has not made a report to the Senate. The effect of adherence of greatest importance to broadcasters would be the enormous number of musical compositions now in the public domain which would be thrown into the field of copyright protection. These works would become unusable because of the impossibility, under existing world conditions, of contacting their authors at the present time. Companion bills for the preservation of authors' rights during the emergency were introduced by Senator Bone and Representative Kramer; NAB appeared at the hearing and suggested perfecting amendments.

The Johnson Bill seeking to bar the advertising of alcoholic beverages by radio was reintroduced at this session. The Committee on Interstate Commerce of the Senate has not scheduled hearings on the bill. Because the measure is grossly discriminatory against radio in favor of competing media, NAB will oppose the bill if hearings are held.

The NAB appeared at the hearings on the daylight-saving time bills and urged the Committee on Interstate and Foreign Commerce of the House to report out a bill providing for daylight-saving time on a nation-wide basis. Such a bill has passed both branches of the Congress and has gone to the President for signature.

The Sacks Bill to legalize copyright in recorded renditions and interpretations has been referred to the Committee on Patents of the House; no hearings have been scheduled. The NAB is opposed to this measure.

State Legislation

Legislatures in forty-four states have been in session this year. District Directors cooperated with counsel by appointing broadcasters in each state, and wherever possible in the state capital, to serve as Legislative Contacts for NAB. By providing an additional safeguard against overlooking the introduction of bills affecting radio, and liaison for communication on legislative matters in each state, this innovation has been most useful in this department.

Chiefly of note at this year's sessions was the introduction of 35 so-called "anti-ASCAP" bills in 18 states. Other than enactment of the Wisconsin law to provide effective enforcement of existing provisions relating to investigators and

music brokers, no such bills have been enacted. The NAB did not encourage or support any legislation of this character. The Montana law of this character was repealed.

The Perry bill to bar off-the-air recording of broadcasts was again introduced, in somewhat different form, in New York. New York state broadcasters persuaded the author to strike the enacting clause, and the measure was killed. A committee is working to perfect an acceptable bill for introduction at the next session.

Oregon passed a radio libel law, relieving broadcasters from liability for radio defamation unless the plaintiff can prove that the broadcaster failed to exercise due care. A similar bill was vetoed by the Governor of Washington.

Litigation

The position of the NAB in *RCA v. Whiteman* was sustained in the Circuit Court of Appeals and again in the Supreme Court, thus establishing the law, except in Pennsylvania, that broadcasters are at liberty to play phonograph records without license from the record manufacturer or the performing artists. This was a notable accomplishment for the industry, particularly for the smaller stations.

The Florida and Nebraska statutes prohibiting as an "unlawful combination" the activities of an aggregation of authors, composers, publishers and copyright owners whose object is to fix prices were held by the U. S. Supreme Court not to violate

the Federal Constitution or copyright laws.

Other Activities

Nearly five months were required in conference with the AAAA Time-Buyers' Committee to determine that complete reconciliation of views on certain provisions was impossible at the time. The Agency Contract, recommended by the NAB March 21, is the result of the protracted discussions. During the summer new committees were appointed and conferences have been resumed.

In cooperation with FCC staff a NAB committee was successful in securing amendment to the standard and FM application forms which greatly facilitates filling out of these forms.

Correspondence with stations and their attorneys on numerous matters as well as assistance to staff and general office work has consumed considerable time. Since Ed Kirby's going to the War Department, the duties of Secretary of the Code Committee have devolved on counsel. Service as alternate to Neville Miller on the International Broadcasting Committee of the Defense Communications Board has not been burdensome to date. There have been no meetings of the Committee on Cooperation Between Press, Radio and Bar since the last report. The New York Tax Committee, appointed to combat assessment by the City of New York of real estate tax on station equipment, was successful in its efforts.

NAB WAR-DEFENSE ACTIVITY

By Arthur Stringer, NAB Director of Promotion

THE march of world events brought changes to the NAB promotion department in 1941. The last normal operation ended on March 29 with the nationwide Radio Movin' Day promotion, when 90 per cent of all broadcast stations shifted to new locations on listeners' dials in accordance with the terms of the Havana Treaty.

At the year's end the department's activities were concerned solely with winning the war. It was engaged in coordinating the radio recruiting efforts of the nation's fighting forces, Army, Navy, Marine Corps and Coast Guard. It continued cooperation with the U. S. Civil Service Commission and, upon request, cooperated with members of other agencies.

Assisting OPM

On September 10, with the cooperation of manufacturers of broadcasting apparatus, NAB completed an involved research job for OPM which ordinarily would have taken months and the employment of large numbers of auditors. The problem was to determine in pounds the needs of the broadcasting industry on a 1940 basis—apparatus, parts, tubes and towers. Ninety-five per cent of the volume of the manufacturing end of the business responded, on a few days notice, to a conference called in Washington. At the end of the day those attending had produced the required information. After another day of calculations, the findings

were presented to Director of Priorities, Donald M. Nelson.

As an outgrowth of this meeting, this and other NAB departments continue to devote considerable time with government officials concerned with priorities. Information, rulings and suggestions are relayed to stations through NAB Reports and by correspondence having to do with specific problems.

Immediately after Pearl Harbor, the Army and Navy requested the NAB National Defense Committee, of which the promotion manager is secretary, to urge the institution of intensive radio technician training courses throughout the United States. During the previous several months some thirty-two such radio

courses with approximately 900 students, had been established. But with official requests from the armed forces, the committee quickly inaugurated a plan which contemplated the training of tens of thousands of technicians during 1942. Colleges and universities throughout the country are cooperating in this all-out educational effort. Funds are provided by Congress with supervision and disbursements under the Engineering, Science and Management Defense Training program of the U. S. Office of Education. The plan provides for the teaching of the fundamentals of radio. The courses are essentially foundation-feeder courses for later "in-service" Army and Navy specialized instruction.

LABOR RELATIONS IN 1941

By Joseph L. Miller, NAB Director of Labor Relations

CORRELATING the broadcasting industry's labor policy with national war-time labor policy will be the principal function of the NAB's Labor Relations Department in 1942. Management and labor generally have agreed that there shall be no strikes for the duration of the war, and that all disputes shall be settled by peaceful means. All the principal labor unions dealing with the broadcasting industry have subscribed to this policy—a policy adopted by the NAB when its Labor Relations Department was established in 1938.

Steering whatever disputes may arise into the proper channels for amicable settlement will be the Department's major function during the coming year. The Department, however, deals with all problems involving broadcasting stations and labor—both personnel problems and problems concerning labor programs on the air. The Department advises all

member stations on the application of labor laws to their employees; furnishes information and advice with regard to collective bargaining; keeps the members informed of all labor developments affecting the industry.

Broadcasting and labor enjoyed a harmonious relationship in 1941. Evidence of this harmony was seen in the whole-hearted support given to the industry by the entire organized labor movement in killing the time sales tax proposed in Congress. There were only a few work stoppages, and most of these were settled within a day or two of their start. The industry was generous with the time on the air accorded to the labor unions. Labor leaders made 74 appearances on the four major networks alone, while numerous local stations carried periodic programs devoted to labor problems.

For "Engineering Developments" by Lynne C. Smeby, NAB Director of Engineering, please turn to page 973 in the Technical Section.

1941-PUBLIC RELATIONS-1942

PUBLIC relations of radio begin in the program department. NAB has repeated this up and down the land for the past four years. Today, the war drives this home as never before. In 1941, the industry went through a gradual transition into defense programming culminating to a full war-time basis on December 7. Elaborate brochures, issuance of mighty pronouncements are meaningless unless the program log can back up every claim, spoken or written.

Fortunately the claim that no media in history ever won the complete confidence of the public as has American radio can be documented and authenticated to the satisfaction of all but the blind. This confidence, this tremendous audience, was begot by what came from the loud-speaker in the front parlor, in the kitchen, on the farm, and in the office. If there is criticism to be made, it is that radio has, in years gone by, been reluctant to take its stand on its own record. In good faith, it adopted a policy of "let the record speak for itself."

But there were those, for reasons, political or otherwise, who sought to bring into court a record of their own making. Upon how vigorously radio mobilizes its legions of listeners in every segment of our social and economic life, depends the future development of American radio under the American system. Public relations, then, is the number one mission of radio in this war.

In the past year, the NAB Code stood stout like a rock of Gibraltar against those who would assault and destroy radio for their own interests. There was the unfounded attack upon the integrity of radio news, and the fairness in apportioning time for controversial public issues, by a sub-Committee of the Senate, operating under questionable investigatory authority. This melted under the sunlight of public opinion. The integrity of radio news and its fairness in the controversial field was vindicated.

There were a few who started an insidious campaign that "commercial" radio could not be relied upon to "indoctrinate" the youth of the next generation with principles of democracy as the Nazis had used radio to indoctrinate their present and next generation with nazi ideology. But the preponderance of women's organizations whose confidence had been

won through sheer sincerity of purpose, beat down this fallacious and clever approach for "social" control of American broadcasting.

Radio's War Service

Radio has managed to serve the defense and now the war effort, without dropping essential public service features in the agricultural, educational and religious fields. This is no little accomplishment. In these three groups will be found the most steadfast supporters of the American system of radio. When the war came, through the workings of self-regulation instituted by the Code three years ago, it was ready to make the necessary program adjustments caused by war secrecy and censorship. In fact, in advance of the censor, the NAB issued its own War Time Guide voluntarily, which, with few modifications, is the industry's censor's guide as officially promulgated.

Along with all others, radio stations have had to make financial sacrifices in the war thus far. More may be expected. Revenues will be lost on coastal stations which will go off the air from time to time for air-warning service. In one or two instances, certain types of media competition have sought to take advantage of this in showing loss of audience. Such underhand efforts should be exposed to full public view. As a matter of fact, a silent station during an air raid warning has probably more potential listeners standing by, ready and eager to listen upon resumption of service, than it has at any time, day or night. In war, people rely on radio for instruction, for news and for inspiration.

In anticipation of the war, the NAB Board of Directors assented to a request by the War Department for the loan of Ed Kirby, its Public Relations Director "for the duration." As a dollar-a-year man, representing the industry in the war-nerve center in Washington, he has surrounded himself with a staff of men chosen directly from the industry, representative of all types of stations and networks, and all sections of the country. This work has been a real contribution to both the Army and to the industry. It is sound public relations work, because it is concerned only with what does and does not go into the microphone.

THE N A B CODE

AMONG the highlights of this past year were evidences of continued public approval of the Code and the placing of the commercial sections in effect. Restrictions on the length of commercial copy in five, ten and twenty-five minute programs were adopted by the membership. In his message to the 1941 annual convention NAB President Neville Miller stated: "Time continues to prove the wisdom shown by the industry in the adoption of the Code." Code provisions are in six sections, as follows:

Children's Programs

Programs designed specifically for children reach impressionable minds and influence social attitudes, aptitudes and approaches and, therefore, they require the closest supervision of broadcasters in the selection and control of material, characterization and plot.

This does not mean that the vigor and vitality common to a child's imagination and love of adventure should be removed. It does mean that programs should be based upon sound social concepts and presented with a superior degree of craftsmanship; that these programs should reflect respect for parents, adult authority, law and order, clean living, high morals, fair play and honorable behavior. Such programs must not contain sequences involving horror or torture or use of the supernatural or superstitious or any other material which might reasonably be regarded as likely to over-stimulate the child listener, or be prejudicial to sound character development. No advertising appeal which would encourage activities of a dangerous social nature will be permitted.

To establish acceptable and improving standards for children's programs, the National Association of Broadcasters will continuously engage in studies and consultations with parent and child study groups. The results of these studies will be made available for application to all children's programs.

Controversial Public Issues

As part of their public service, networks and stations shall provide time for the presentation of public questions including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot

Time for the presentation of controversial issues shall not be sold, such time with fairness to all elements in a given controversy, except for political broadcasts. There are three fundamental reasons for this refusal to sell time for public discussion and, in its stead, providing time for it without charge. First, it is a public duty of broadcasters to bring such discussion to the radio audience regardless of the willingness of others to pay for it. Second, should time be sold for the discussion of controversial issues, it would have to be sold, in fairness, to all with the ability and desire to buy at any given time. Consequently, all possibility of regulating the amount of discussion on the air in proportion to other elements of properly balanced programming or of allotting the available periods with due regard to listener interest in the topics to be discussed would be surrendered. Third,

and by far the most important, should time be sold for the discussion of controversial public issues and for the propagation of the views of individuals or groups, a powerful public forum would inevitably gravitate almost wholly into the hands of those with the greater means to buy it.

The political broadcasts excepted above are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away.

Nothing in the prohibition against selling time for the presentation of controversial public issues shall be interpreted as barring sponsorship of the public forum type of program when such a program is regularly presented as a series of fair-sided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network.

Educational Broadcasting

While all radio programs possess some educative values, broadcasters nevertheless desire to be of assistance in helping toward more specific educational efforts, and will continue to use their time and facilities to that end and, in cooperation with appropriate groups, will continue their search for improving applications of radio as an educational adjunct.

News

News shall be presented with fairness and accuracy and the broadcasting station or network shall satisfy itself that the arrangements made for obtaining news insure this result. Since the number of broadcasting channels is limited, news broadcasts shall not be editorial. This means that news shall not be selected for the purpose of furthering or hindering either side of any controversial public issue nor shall it be colored by the opinions or desires of the station or network management, the editor or others engaged in its preparation or the person actually delivering it over the air, or, in the case of sponsored news broadcasts, the advertiser.

The fundamental purpose of news dissemination in a democracy is to enable people to know what is happening and to understand the meaning of events so that they may form their own conclusions and, therefore, nothing in the foregoing shall be understood as preventing news broadcasters from analyzing and elucidating news so long as such analysis and elucidation are free of bias.

News commentators as well as all other newscasters shall be governed by these provisions.

Religious Broadcasts

Radio, which reaches men of all creeds and races simultaneously, may not be used to convey attacks upon another's race or religion. Rather it should be the purpose of the religious broadcast to promote the spiritual harmony and understanding of mankind and to administer broadly to the varied religious needs of the community.

Commercial Programs and Length of Commercial Copy

Acceptance of programs and announcements shall be limited to products and services offered by individuals and firms engaged in legitimate commerce; whose products, services, radio advertising, testimonials and other statements, comply with pertinent legal requirements, fair trade practices and acceptable standards of good taste.

Brief handling of commercial copy is recommended procedure.

Member stations shall hold the length of commercial copy, including that devoted to contests and offers, to the following number of minutes and seconds:

Daytime

Five-minute programs	2:00
*Five-minute news programs	1:45
Ten-minute programs	2:30
Fifteen-minute programs	3:15
Twenty-five-minute programs	4:15
Thirty-minute programs	4:30
Sixty-minute programs	9:00

Night-time

Five-minute programs	1:45
*Five-minute news programs	1:30
Ten-minute programs	2:00
Fifteen-minute programs	2:30
Twenty-five-minute programs	2:45
Thirty-minute programs	3:00
Sixty-minute programs	6:00

Exceptions:

The above limitations do not apply to participation programs, announcement programs, "musical clocks," shoppers' guides and local programs falling within these general classifications.

Because of the varying economic and social conditions throughout the United States, members of the NAB shall have the right to present to the NAB for special ruling local situations which in the opinion of the member may justify exceptions to the above prescribed limitations.

* Further restriction by individual stations is recommended.

NATIONAL INDEPENDENT BROADCASTERS, INC.

THE National Independent Broadcasters, consistent with the purposes of its creation and existence, has during the year 1941 been extremely active in the interests of the broadcasters of radio stations in this country. Among the many matters receiving the attention of its officers and committees was the negotiations with Ascaph, BMI, AF of M and NAPA; rules, regulations and forms of the FCC. Several committee meetings were held to discuss other important matters, including; national business and how to obtain it; interference on local and regional channels; free time to the Government and the advisability of asking compensation for at least a portion of the services rendered, for and in behalf of the Government.

Also, its officers devoted considerable time in defeating the proposed tax on broadcasting stations. The president of National Independent Broadcasters testified on that subject before the Senate Committee in Washington.

On September 21st and 23rd a very successful convention was held in Chicago, attended by over 200 broadcasters from all parts of the United States, and included many distinguished guests. Among them were the Honorable James Lawrence Fly, Army officials, representatives of the Department of Justice, officials of Ascaph, BMI, etc. It was considered unusual since it was a meeting of the Broadcasters for the Broadcasters with no slate of pre-arranged resolutions. Everyone had an equal opportunity to be heard. Many important subjects were discussed and everyone benefited by attendance.

Since the convention, committees and the officers have been extremely busy on matters of importance to all broadcasters and are now cooperating with the different branches of the Government in connection with the War and War activities.

INDEPENDENT RADIO NETWORK AFFILIATES, INC.

FUTURE STATUS OF IRNA remained in doubt as RADIO ANNUAL went to press. Late in November, 1941, after having served as a key factor in working out details of the industry peace settlement with the American Society of Composers, Authors and Publishers, IRNA was eclipsed and, to a certain extent, relegated to the background by defections from its own ranks resulting in the formation of a new trade organization, Network Affiliates, Inc. As a result of this and certain other factors, including the inability of IRNA officers, all of whom are unpaid, to devote the necessary time to carrying out the arduous duties imposed upon them, it was decided at a board meeting in Chicago on Nov. 25, 1941, to discontinue regular meetings and activities pending final decision at the May, 1942, NAB convention in Cleveland on IRNA's future course. Its officers twice tried to resign, but were persuaded to continue in office pending the May convention. Meanwhile, IRNA remained quiescent, but without dissolution.

Although NAI took the play away from IRNA in final stages of the Ascapi negotiations, the latter's contributions to settlement of that 10-month battle were of no small significance to the industry. INRA secured two important concessions from Ascapi: a reduction of the local blanket commercial fee from 2¾ per cent to 2¼ per cent, and an allowance of 15 per cent (the advertising agency commission) deductible by stations from gross local business before applying the Ascapi tax. These concessions, it was figured, amounted to a total saving over a year's time of approximately 30 per cent from the original network agreement with Ascapi or, in round figures based on 1940 non-network revenue, over \$600,000 per annum.

NETWORK AFFILIATES, INCORPORATED

NETWORK AFFILIATES, INC. (which was temporarily called Independent Broadcasters, Inc.), was organized in Chicago, November 1941, by a group of 76 owners and managers of independently owned network affiliated stations, who felt the need for an organization actively functioning in behalf of their stations. Any regional outlet, whether or not affiliated with a network, is eligible for membership, provided it has no management or ownership connection with a national network.

At its organizational meeting, NAI stated that the original purpose and fundamental objective behind its formation was the preservation of the American System of Broadcasting. With membership in practically every state in the Union, the immediate aims and purposes of the organization were outlined as follows:

1. The clarification of contracts then being offered to the industry by Ascap.
2. The organization of active opposition to the granting of super-power stations, which are regarded as a threat to the fundamental structure of the American System of Broadcasting.
3. The selection of a committee to counsel and cooperate with the FCC in formulating regulations designed to stimulate the growth and development of the American System of Broadcasting. In this connection a committee of NAI met with the FCC to clarify and understand the Chair broadcasting rules.
4. The appointment of a Legislative Committee to give intelligent and constructive study to proposed legislation which would affect the radio industry. This committee was successful in helping to "debunk" the proposed Sanders advertising tax bill.
5. The formation of a Network Committee to work with the national networks in an effort to develop and promote healthy and mutually beneficial relations between the members of NAI and the network.

Board of Directors of NAI met with FCC Chairman James L. Fly on the day war was declared by the United States against Japan and offered the cooperation and services of NAI to whatever purpose was deemed desirable. At the present time the organization has put first and foremost among its purposes cooperation on all radio matters relating to National Defense and the war program.

Officers

FUNCTIONS

To provide a common forum and a central medium for cooperative effort on behalf of all individuals and groups interested in advertising.

To elevate the standards of advertising practice and to combat any unfair competitive methods in its sale.

To help increase the effectiveness of advertising as an instrument of distribution, with its resulting benefits to business and the general public.

To determine and disseminate more accurate knowledge of the functions of advertising in business, and its social and economic values.

To aid in raising the standards of education and training for advertising practitioners.

Managing Director.....Frederic R. Gamble
Vice-President.....B. B. Geyer
Secretary.....Wilbur Van Sant
Treasurer.....E. DeWitt Hill
Director of Service.....L. W. MacKenzie
Counsel.....McKercher & Link

FUNCTIONS

The American Association of Advertising Agencies was formed in 1917 by the amalgamation of the New England, New York, Philadelphia, Southern and Western Advertising Agency Associations—to promote the interests and raise the standards of advertising and of the advertising agency business.

It welcomes to membership any advertising agency qualified to aid in this purpose by reason of its ability to serve the cause of advertising, its financial soundness and its demonstrated desire to adhere to sound and ethical business practices.

The aims of the Association are partly ethical and partly economic. It is a professional body and also a trade association. It aims to raise standards, to improve technique, to ascertain values, to safeguard relations, and to cooperate with other organized effort in related fields.

One of the major aims of the Association is to keep advertising agency practice on a high level, in order that it may be most useful to the advertiser, most helpful to the publisher and respected by business men.

Early in its career the Association adopted for the guidance of its members two official statements. One is entitled "Agency Service Standards," in which agency service is defined, so that advertisers and publishers may know what to expect and agencies may know what should be required of them, thus discouraging the incompetent and encouraging those equipped to render effective service.

The other statement, entitled "Standards of Practice," deals with agency relations with media, clients and the public, with fair and ethical agency competition, and other professional ethics.

American Bar Association (Standing Committee on Communications)

Office of the Chairman: 810 Colorado Bldg.
Washington, D. C.

COMMITTEE

Chairman.....John W. Guider
Committeeman.....Edwin M. Borchard
Committeeman.....John C. Kendall

EDUCATIONAL RADIO PLAYS ITS PART IN NATIONAL DEFENSE

*By Wm. D. Boutwell, Chief, Division of Radio, Publications and Exhibits
U. S. Office of Education*

THE official recognition and support of Congress was awarded educational radio in 1941 with the establishment of a permanent radio division in the U. S. Office of Education. This significant step has culminated six years of effort in this direction, and insures important plans for the future. Most of these plans center in the Educational Radio Script and Transcription Exchange. In its report, the House Appropriations Committee stated: "The increase in salary appropriations this year for the Office of Education is largely for the expansion of activities of the radio service that is engaged in compiling, indexing, and disseminating radio scripts for distribution in educational channels throughout the country. There is a very large interest in these educational scripts in high schools and colleges through the country, and it is essential that there be one clearing-house to which interested parties may apply in order to obtain the loan of the scripts for educational broadcasting. The radio unit is, in effect, a library service."

Script Exchange

The Exchange was established in 1936 under the auspices of the Federal Radio Education Committee—a committee composed of some 40 men and women representing education, religion, the radio industry, the press, labor, civic organizations, and other related groups. The FREC planned that the Exchange should be a direct answer to the many requests for service of all kinds which it had been receiving from educators, broadcasters, civic groups—in fact anyone who wished to use the radio for educational purposes. That the Exchange serviced 17,000 requests in the past year is evidence to the fact that the FREC did find the answer to an important radio need.

Six radio scripts were offered by the Exchange at the time of its organization. A new script catalog which will be issued in 1942 will probably list about 1,000 scripts on a wide variety of subjects, and many aids to the organization and production of educational programs.

Transcription Service

An initial series of transcribed programs was made available through the Exchange in 1939. The programs, "Americans All—Immigrants All," had been produced by the WPA-financed Radio Project which was then a part of the Office of Education. The programs had been awarded two national honors as the outstanding educational series of the year. The transcriptions pointed the way to the development this past year of the Transcription Service for Schools. A catalog has just been issued listing 96 recorded programs available on a loan basis. Need for this transcription service and the possibilities it offers were proven by a survey conducted by the Office of Education in 1941. This survey indicates that more than 2,700 junior and senior high schools in the United States, Puerto Rico, Hawaii, and the Philippine Islands are equipped to play radio transcriptions at 33 1/3 RPM. These schools represent a potential listening audience of over 2,000,000 students.

The Transcription Service for Schools does not represent an effort to compete with commercial producers. It has been established to provide a source of educational recordings with which schools can experiment. It is another instance where the Exchange can assist in stimulating interest in the tools of education by radio.

Radio and Defense

The national defense effort has placed an added responsibility on educators in the last year. It would be mere wishful thinking to expect this responsibility to lessen in 1942. Radio services in the Office of Education have been geared to this emergency. Scripts and transcriptions are available which can help schools and other groups develop national defense and morale programs. Such Government agencies as the Office for Emergency Management, the Treasury Department, the Department of Justice, and the Public Health Service have placed in the Exchange transcriptions which have timely significance and value.

FM For Education

Encouraging the use by schools of the ultra-high frequency bands reserved exclusively a few years ago for education has been of vital concern to the Radio Division of the Office of Education. The Commissioner of Education, John W. Studebaker, particularly during the past year has insistently called upon city superintendents and state school officers to consider seriously and make definite plans for the establishment of educational FM stations in the bands allocated by the FCC. The Commissioner has carried on his campaign for FM educational stations both by direct appeal to educators and by sponsorship of section meetings devoted to school-owned stations in such national radio conferences as the Institute for Education by Radio at Ohio State University and the Annual School Broadcast Conference in Chicago.

FREC

The Federal Radio Education Committee has continued to work toward the goals stated in its original charter, namely, to eliminate controversy and misunderstanding between groups of educators and between the industry and educators; and to promote actual cooperative arrangements between educators and broadcasters on national, regional, and local bases. The Committee has carried on research studies which may be grouped into three classifications: those under the direction of Dr. Paul F. Lazarsfeld at the Office of Radio Research, Columbia University; those under Dr. I. Keith Tyler, Evaluation of School Broadcasts, Ohio State University; and the studies centered in the Office of Education. The FREC research activities in the Office of Education have been completed. The studies by the Office of Radio Research this year have resulted in two publications, "Radio Listener Panels" and "Audience Building in Educational Broadcasting." This project will continue up to 1944. The Evaluation of School Broadcasts terminates as of June 30, 1942. A total of 60 publications is expected to emerge from the findings of the Ohio group.

The "Service Bulletin" of the Federal Radio Education Committee has been, and will continue to be published monthly. The Bulletin has shown considerable evidence of serving as a helpful medium for the dissemination of in-

formation and the exchange of ideas and experiences of other groups.

New Association

While not a part of the radio work of the Office of Education, the new Association for Education by Radio is worthy of mention as an important recent development in the field. This organization was formed to provide "an instrumentality through which persons interested in education by radio may have adequate communication." Some of its other purposes are to represent the interests of education by radio wherever necessary, to encourage research and experimentation, to advance radio training, and to publish pertinent news and information. It is hoped that the Association for Education by Radio will become the voice of the ever-increasing group of those interested in education by radio.

Future Plans

To look to the future—the Congressional appropriation for radio has made it possible to inaugurate two new services in the Educational Radio Script and Transcription Exchange, a technical advisory service and an information service. The technical advisory service will employ an expert who can give concrete advice to schools about play-back equipment, central sound systems, recording machines, acoustics, building transmitters and receivers, FM broadcasting, and other allied subjects. Judging from the letters which now come to the Exchange, this type of expert advice is greatly needed by educational groups all over the country. Research activities in this field will also be carried on by the technical advisory service.

An attempt has been made to conduct an information service in the Exchange in past years, but because of insufficient facilities it has not been very effective. With the creation of the position of Radio Information Specialist, a better clearing-house and center for information on all aspects of education by radio will go into action. This service will collect and assemble data on such phases of educational radio as teacher training, workshops, conferences, programs, etc., and make it ready for distribution.

The year 1942 will undoubtedly offer us—and all those working in educational radio—greater opportunities for service and greater responsibilities for making that service coordinated and effective.

F. C. C. REGULATIONS

Operation and Service

The operation of, and the service furnished by, non-commercial educational broadcast stations shall be governed by the following regulations:

(a) A non-commercial educational broadcast station will be licensed only to an organized non-profit educational agency and upon a showing that the station will be used for the advancement of the agency's educational program particularly with regard to use in an educational system consisting of several units.

(b) Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system and may transmit educational and entertainment programs to the general public.

(c) Each station shall furnish a non-profit and non-commercial broadcast service. No sponsored or commercial program shall be transmitted nor shall commercial announcements of any character be made. A station shall not transmit the programs of other classes of broadcast stations unless all commercial announcements and commercial references in the continuity are eliminated.

Power Requirements

The operating power of non-commercial education broadcast stations shall

be not less than 100 watts or greater than 1000 watts unless a definite need for greater power is shown.

The transmitter of each non-commercial educational broadcast station shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.01 percent of the assigned frequency.

Non-commercial educational broadcast stations are not required to operate on any definite schedule or minimum hours.

The transmitting equipment, installation, and operation as well as the location of the transmitter shall be in conformity with the requirements of good engineering practice as released from time to time by the Commission.

Frequencies Allotted

The following frequencies are allotted for assignment to non-commercial educational broadcast stations:

42,100 kc.	42,300 kc.
42,500	42,700
42,900	

Stations serving the same area will not be assigned adjacent frequencies.

Frequency modulation shall be employed exclusively unless it is shown that there is a special need for the use of amplitude modulation.

Only one frequency will be assigned to a station.

ENGINEERING DEVELOPMENTS

By Lynne C. Smeby, NAB Director of Engineering

NINETEEN HUNDRED FORTY-ONE brought engineering developments on many fronts. The outstanding developments were: the reallocation of March 29; numerous improvements in the broadcast system such as increases in power; new standard band stations; high frequency stations; television; and improvements in the international broadcasting facilities. Superimposed on the already burdened engineers was the new thing called "Priorities," a frankenstein which never seems to tire of finding new reasons why you can't have 2 cents worth of wire to keep your equipment in operating condition. Uncle Sam's need for unlimited numbers of radio technicians has seriously depleted the staff of most broadcast stations in the country. A chief engineer can no longer telephone the factory and have urgently needed replacement part delivered the next day, nor does he have in his file several score of applicants for jobs as operators from which to draw when a new technician is required.

Frequency Reallocation

On December 13, 1937 the North American Regional Broadcast Agreement was consummated. The Agreement provided broadcast channels for all of the North American countries whereas in the past only Canada and the United States had an agreement and the rest of the countries were forced to spot their transmitters whenever they could receive the best coverage irrespective of the damage done to stations in Canada and the United States. There were many legal and technical difficulties to be ironed out before the agreement could become effective. As late as January 14, 1941 a meeting was held by the representative of the United States, Canada, Mexico, Cuba, Haiti, and the Dominican Republic in order to iron out remaining reallocation confusions. The reallocation was not definitely ordered until January 31 leaving less than 60 days in which to shift the frequency of approximately 1,300 stations in North America of which approximately 800 were in the United States. Engineers had estimated that it would require a minimum of 3 months in which to properly make the change. Led by A. D. Ring, former Assistant

Chief Engineer of the FCC in charge of Broadcasting, the shifts were made smoothly with the wholehearted cooperation of the FCC, the manufacturers of equipment, and the broadcasters. The morning of March 29 found every station in the country at its new address. A minor number of operations in connection with the reallocation such as re-aligning some directional antennas upon the new frequencies were performed after March 29.

In the past a good share of our regional and clear channels have been subjected, at one time or another, to ruinous interference from stations particularly in Mexico and Cuba. On March 29 our good friends to the South began participating in the orderly division of channels available to domestic broadcasting. Under the agreement our stations suffer only the normal amount of interference that they would suffer from a station in the United States or Canada. All of the North American countries subscribed to the Standards of Good Engineering Practice of the FCC insofar as they pertain to allocation problems.

Power Increases

The reallocation opened the way for increases in power for some stations. Also a great number of stations during 1941 took advantage of possibilities for power increases. By the end of 1941 a good percentage of the local stations were operating on 250 watts. A large number of regionals increased their night power to 5,000 watts. During the year approximately 80 stations increased power and there was a net increase of 56 operating stations. The breakdown of clear channels and the super-power controversy was revived by a number of applications for duplication on clear channels and by a number of applications for so-called "superpowers" of 500 to 750 kilowatts. The year also saw the start of an attempt to obtain a power of 10,000 watts day time for regionals.

Frequency Modulation

High frequency broadcasting, or FM has undergone a steady development during 1941. One of the most significant rules

established for FM was the one providing for rating of coverage on the basis of square miles covered and not on the power of the transmitters. Also stations in the same locality were required to cover the same area. The first licensed commercial FM station W47NV owned by WSM in Nashville, Tennessee, started regular operation on March 1. The transmitter was designed and built under the direction of Jack DeWitt, Chief Engineer.

At the end of the year CPs for over 60 high frequency stations had been granted and application for over 50 more awaited action by the FCC. Approximately 24 stations were in operation at the end of the year. Early in the year all the channels set aside for FM were used up in New York City leaving a residue of applications which apparently cannot be granted. It was originally thought that FM stations could operate on adjacent channels in the same city. However it was found that a channel must be skipped.

Amateur reports of long distance reception on 5 meters and observations and measurements made by others indicate that FM signals at distances of several hundred miles reach rather high intensities for long enough periods so as to require that they may have to be considered in allocation problems.

Secrecy methods of transmitting by radio telephony have been used extensively on radio extensions to the telephone system. During the year Muzak Corp. of New York City was authorized by the FCC to conduct "scrambled" FM transmissions on 117 megacycles. Regular FM receivers tuned to this transmission will receive a disagreeable squeal along with the program. It is intended that the station will serve listeners who pay for the privilege by renting a special receiver which removes the "pig squeal."

Increase In Receivers

Each year the number of receivers in the hands of the public has shown a steady increase and 1941 was no exception. An estimated 56,000,000 standard band receivers were in the hands of the public at the close of 1941 as against an estimated 50,100,000 at the beginning of 1941. At the close of the year there were an estimated 200,000 FM receivers in the country and an estimated 5,000 television receivers in the New York City area.

Defense Communications Board

Organization of the Defense Communications Board was perfected on January 6. It was charged with the duties of

dealing with the physical aspects of all communications as they pertain to the national defense. Headed by James Lawrence Fly, the Board membership is made up of members from the FCC, the Army, the Navy, the State Department, the Treasury Department and the Coast Guard. Functioning directly under the Board are the law, coordinating, labor advisory and industry advisor committees. Functioning through the coordinating committee are 13 committees as follows:

Amateur Radio, Aviation, Communication, Cable, Domestic Broadcasting, Interdepartment Radio Advisory, International Broadcasting, Radio Communication, State and Municipal Facilities, Telegraph, Telephone, United States Government Facilities, Communication Liaison for Civilian Defense, and Priorities Liaison.

Many engineers of the broadcasting industry have devoted a considerable amount of time to work of the DCB Committees. The DCB work is of course confidential and therefore the work accomplished cannot be given publicity. Suffice to say that the industry in general and many of the industry engineers in particular deserve a great deal of credit for the way in which they have wholeheartedly given of their time and effort in carrying on the work of the DCB.

Television

Although National Defense requirements have seriously interfered with television nevertheless several important and interesting developments occurred during the year. The first public showing of direct color television pickup occurred on January 9 when the CBS demonstrated its system to the Institute of Radio Engineers and the press. During the IRE Convention in January the Bell Telephone Laboratories demonstrated coaxial transmission of television from New York to Philadelphia and back to New York. The demonstration showed the possibility of long distance transmission of television signals over land cables. The pictures showed very little degradation of quality.

The RCA came forward with major contributions during the year. A projection system of television was demonstrated in the New York Theater on a screen 15 by 20 feet. Also during this demonstration part of the program a telecast was picked up at Camp Upton on Long Island and relayed 68 miles to

New York by means of 3 ultra high frequency relay stations. An RCA home receiver with a projection tube producing a picture on a 13½ by an 18 inch screen was demonstrated.

1941 saw the authorization by the FCC of television on a commercial basis. The unselfish cooperation on the part of all those interested in television resulted in standards acceptable to all of those concerned. This was accomplished by the National Television Systems Committee.

Facsimile

Two way multiplexing of facsimile and voice by means of FM from an airplane was demonstrated by W. G. H. Finch during the week of January 13. So far as facsimile transmission to the public is concerned there was very little activity during the year. Facsimile research has turned toward specific uses such as the transmission of press and military uses.

International Broadcasting

During 1941 plans for improving the International Broadcasting facilities of the United States were greatly advanced. The General Electric Company plans to construct a 50 KW short wave plant at Bellemont, California. The Columbia Broadcasting System at the close of 1941 put into service its new extensive Bentwood plant. This plant employs two 50 KW transmitters using 13 antennas. Also late in the year station KSFO at San Francisco was granted a CP for a 100 KW short wave station designed to serve the Orient. This station is being rushed to completion and should be ready for service shortly. These improvements in International Broadcasting facilities augment the improvements made by NBC, GE and Crosley during the past two or three years, and give the United States international facilities second to none in the world.

Recordings

In June a committee sponsored by the NAB was formed for the purpose of establishing Recording and Reproducing Standards. The Committee has a membership of over 70 and represents virtually the entire recording industry. So far 15 standards have been adopted. The committee is continuing its studies and

is making progress in spite of the fact that most engineers are very busy with work in connection with the defense.

Priorities

During the year "priorities" has come to plague the radio industry along with most other industries. The first item to be curtailed was the use of aluminum for acetate recording blanks. The discs manufacturers successfully substituted glass and we now have an adequate supply of discs unless the acetate and the glass becomes critical also.

The broadcasting industry was granted a defense rating of A-10. However, it was soon found that this was entirely inadequate. Work was then started to obtain an allocation plan for the industry. The priority system has been changed several times during the year. A new one has just been announced in which DCB will advise the OPM on priority requests from all communication companies. It is expected that this will expedite the granting of priorities to broadcast stations.

Experimental Activity

One of the most interesting experimental grants during the year was the one to WHO. This grant was for a power of 150 KW to test out the Polyphase transmission systems that had initially been tested with 1 KW. In this system there is a center tower radiating the carrier and four auxiliary towers surrounding it to supply the side bands. The system can be thought of as producing a directional pattern that rotates. The system saves half of the modulator power. Dr. John F. Byrne is credited with the Polyphase idea and Paul Loyet technical supervisor of WHO has directed the experiments.

1942 will present problems that will tax the ingenuity and industry of the broadcast engineers. Replacement and repair parts will become scarcer and scarcer and the armed forces will sap personnel to a great degree. All engineers must and will bend every effort to maintain an efficient broadcast system for the purpose of assisting the war effort and administering to the morale of the public.

WESTERN ELECTRIC IN ALL OUT WAR EFFORT

VASTLY increased production to help meet America's emergency land, sea, and air communications needs—that's the story of Western Electric Company in 1941. During the year the Company threw its technical facilities into the Big Job of turning out equipment for the armed forces of the U. S. and telephone apparatus to meet the unprecedented "emergency" requirements of the Bell System.

In normal times, Western Electric manufactures broadcast transmitters and associated equipment, radio units for aviation, marine, and police service, and other by-products of telephone research—all in addition to its principal function as source of supply for Bell System telephone apparatus.

"Command Sets"

In 1941, however, not only was the production of telephone equipment and material greatly increased, but the company became a source of radio "command sets" for America's fighting planes, tanks, and torpedo boats, throat microphones and "bomber mikes" for Air Corps pilots, battle announcing and battle telephone systems for our two-ocean Navy, and high powered radio units for ground use, as well as of field wire, field telephones and field switchboards.

Before the company could hit its stride in its defense and war work, plant capacity had to be boosted to meet the unprecedented demand. During 1941 employment on Government orders jumped 400 per cent in the Specialty Products Division, responsible for the Company's production of combat equipment. New plants were leased to handle this work supplementing the capacity of the Company's three principal works. At year's end the entire Western Electric Company forces of production were moving into high gear.

Western Electric is producing ever-increasing quantities of aviation radio units, providing instantaneous two-way plane-to-plane and plane-to-ground communication. These "command sets" were, by the end of 1941, leaving the assembly lines at a constantly accelerating pace.

Announcing Systems

Western Electric, fashioning the P.A. system of peacetime to duty in war, is turning out battle telephone and battle announcing systems for America's newest aircraft carriers, battleships, and other naval units. To the engine room, to the gun turrets, to all vital stations on board, these systems carry commands. Thus equipped with "battle announcing systems," the fleet, in battle or on patrol, loses no precious time in transforming word to action.

Telephone Progress

Paralleling its work on Government contracts, Western Electric is today manufacturing greatly augmented quantities of telephone apparatus, keeping pace with the rising telephone traffic curves in Bell System locations throughout the U. S. Each month, as new records are set for the number of telephones in use, so must new records be set for telephone manufacture.

To meet this demand, the company, in 1941 alone, manufactured many billions of conductor feet of cable, built and installed central office equipment in new or expanding Bell System exchanges, manufactured and installed telephone equipment in military and naval locations, as well as defense plants of private industry.

As throughout the communications manufacturing industry, this increased production for 1941 had to be completed despite the necessity of conserving vital materials. To help accomplish this, Western Electric replaced these materials wherever possible with others less essential.

Replacement Methods

So successful has this program proved that several hundred pursuit fighter planes could be built with the aluminum the company will save annually by its replacement methods. By replacing a zinc aluminum alloy, in another manufacturing process, an annual saving of zinc amounting to 1,600,000 pounds was effected. Programs to save many other essential materials, such as nickel and magnesium, are also well under way.

RMA HAS ENORMOUS PROGRAM

By Bond Geddes,

Executive Vice President of Radio Manufacturers Association

IN the national defense program, the radio industry is now engaged on an enormous program. Radio is a new agency of offensive and defensive warfare, which practically did not exist in the World War I. For aircraft, submarines, battleships, tanks, Signal Corps and even the individual infantryman now require voluminous radio equipment. For all this, the American radio industry is now being geared into peak defense production, and with the additional problems of producing a substantial volume of new receiving sets required for civilian use and also of providing sufficient tubes, parts, etc. to maintain in operation both the nation's broadcasting service and also the 50 million receiving sets now estimated to be in the hands of the public.

Defense Program Paramount

The radio defense program, of course, is paramount and is being given precedence in all industry factories. Already defense contracts totalling \$300,000,000 have been awarded by the government for radio apparatus. The immediate program aggregates about \$1,100,000,000. It includes many new radio devices which have been developed by government experts and also in the industry's own laboratories. This 1942 defense radio program will tax the capacity—which already has been expanded, with new plants and factories—of the industry, its executives, engineers and skilled employees.

The radio industry, therefore, largely is shifting from a civilian to a defense production basis, with over \$600,000,000 worth of government contracts for defense radio scheduled in the spring of 1942. This includes Army Signal Corps, Navy, Lend-Lease, and other defense requirements for many types of radio equipment. Necessarily, the civilian requirements for new radios are secondary, except for maintenance and repair parts for broadcasting stations and for the public sets now in use.

The national defense agencies, including OPM, have recognized the import-

ance of radio communication for public morale, information and for other purposes, such as the Civilian Defense project, as well as international short wave broadcasting. The general policy of the government largely has been to assist the radio industry to maintain its necessary engineers, laboratories, staffs of skilled radio employees, etc. to do the enormous defense radio job. To this end, sufficient allocations of metals and other "critical" materials have been provided substantially by the government for civilian radio production, to maintain existing plants and personnel until the big defense contracts are distributed.

RMA Priorities Committee

The Radio Manufacturers Association, with its membership representing probably 90 per cent in volume of the radio industry, early in the defense program recognized its responsibilities and problems, both defense and civilian. Shortly after OPM was organized, the RMA appointed, on March 24, a Priorities Committee, to cooperate with all government agencies. This originally was headed by Paul V. Galvin of Chicago, now President of RMA. Its present Chairman is Fred D. Williams of Philadelphia. It began to function with the institution of "priorities"—which now have become so familiar—and has continued largely to represent the industry's interests on both defense and civilian problems.

Prompt steps to conserve "critical" metals were taken by the industry. An all-industry conference was held April 29 and voluntary action taken to reduce the use of aluminum and other defense metals, in addition to discontinuance of some types of radio sets. Substitutions also were an early resort, copper and plastics being substituted for aluminum. Other materials were later substituted when the original "substitutes" became short. Engineering ingenuity also was exercised in conservation and simplification, but there still is nothing approaching "ersatz" in radio design. Special allocations of aluminum, copper,

☆ ☆ ☆ *Radio In Defense* ☆ ☆ ☆

nickel and plastics have been provided to the industry by OPM, on a basis of gradual curtailment, although the popular and familiar plastic cabinet has now virtually disappeared from the production lines, due to the increasing shortage of plastics required for ammunition production.

Problems of conservation, substitution and simplification were met by the industry through the organization, July 1, of an RMA Materiel Bureau, through the Association's Engineering Department. Over 100 of the most expert radio engineers of the country participated in the voluminous and difficult work of the Materiel Bureau. This consists of a dozen "specialist" groups covering various radio components and materials involved in the defense program. Director W. R. G. Baker of the RMA Engineering Department is in charge of this important industry operation.

1941 Civilian Production Maintained

With the expansion of "defense radio" production in 1941 and with the special OPM allocations, plus manufacturers' inventories on hand, the civilian production of 1942 in the industry has been well maintained. Curtailed production of new receiving sets in 1942 is certain, as the industry's plants become more extensively engaged upon defense work.

OPM has organized a Radio Industry Defense Advisory Committee, appointed on October 30. This government agency

will be concerned both with the defense and civilian programs of radio and also the maintenance of broadcasting service and of the receiving sets in the hands of the public.

Problems of all branches of the radio industry have been of concern to RMA, its Priorities Committee and Board of Directors. The interests of radio wholesalers, dealers and service men, as well as manufacturers, have been presented to officials of OPM, OPA and other government agencies in an effort to minimize, so far as may be consistent with the defense program, the effects of curtailed civilian production upon them. They, like the manufacturers, are directly concerned in the price control policies of the Office of Price Administration, which "pegged" radio prices late in 1941 on the levels prevailing October 15, 1941, pending further price control action during 1942. Except for some price increases last September, due largely to the new federal excise tax and increased labor costs, there has been no substantial rise in radio price schedules comparable to those of many other consumer goods.

Thus far, the radio industry has fully met its defense responsibilities to the government and, with difficulties innumerable, has been able to keep its products on reasonable levels of production and price, while, as a high OPM official stated, it has done an outstanding job in conservation and substitution of defense materials.

Radio Manufacturers Association

Officers and Executive Personnel—1941-1942

Headquarters: 1317 F. St., N.W., Washington, D. C.

President

Paul V. Galvin, Galvin Manufacturing Corp., Chicago, Ill.

Executive Vice-Pres.-General Mgr.

Bond Geddes, 1317 F St., N. W., Washington, D. C.

Vice-Presidents

Ray H. Manson, Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.

SUPREME WAR EFFORT BY RCA

RADIO alone among means of communication meets and surpasses the lightning movement of modern warfare; for this reason, all the resources of the Radio Corporation of America—research, manufacturing, direct communications, and broadcasting—are geared to a supreme war effort.

Minutes after word went out December 7 that the Japanese had struck Pearl Harbor, David Sarnoff radioed President Roosevelt that “all our facilities and personnel are ready and at your instant service;” hours later, every phase of the widespread activities of RCA and its associated companies was shifted from a basis of defense preparation to one of all-out war production and service.

In RCA Laboratories there was an immediate revision of plans and a redoubling of effort to drive the science of radio across new frontiers. Every research scientist and development engineer, already actively engaged in defense work, is sparing no effort or expense in the perfection of new and improved radio communication devices as well as other electronic instruments for the armed forces.

80 Per Cent For War

On the front line in defense production for almost two years, the RCA Manufacturing Company finished 1941 with its volume of unfilled orders at 80 per cent for war, 20 per cent for commercial use. Deliveries are being rushed, and many orders are reaching their destination weeks, and sometimes months, ahead of schedule. Employment is at an all-time high.

It is impossible, in time of war, to describe the exact nature of radio devices being built for the Government. It can be said, however, that the RCA plants are busy turning out radio equip-

ment for tanks, aircraft, battleships, cruisers, submarines, destroyers, field sets for the Army, public address system, under-water sound instruments for detection and location of submarines, radio direction finders, radio locators and altimeters, sound-powered batteryless telephones, many types of vacuum tubes, sound motion picture apparatus and recorders, as well as transmitters and receivers designed for the many purposes and variable conditions under which radio must operate in war-time.

Morale

Within 24 hours after the United States entered the war, more than 16,500 employees of RCAM staged mass demonstrations at the Harrison and Camden, N. J. plants to pledge allegiance to the American flag. Shortly thereafter, it became known that the “Beat the Promise” campaign in defense production, which ended December 1, would be followed by a “Beat the Promise for Victory” campaign in war production starting February 1.

Meanwhile, representatives of RCAM attended radio industry conferences in Washington, where 1942 production plans, laid down a month earlier, were checked and revised upward by officials of the Government, Army and Navy.

Of particular significance in the nation's war production plans was the manufacture of the electron microscope developed by RCA Laboratories. Capable of magnifying infinitely small bits of matter up to 100,000 diameters, this instrument is finding a constantly widening field of application. Built at present for war industries only, the electron microscope is being used on important munitions studies, particularly in the fields of chemistry and metallurgy.

☆ ☆ ☆ *Radio In Defense* ☆ ☆ ☆

N. B. C.

With broadcasting performing a vital role in building public morale, the National Broadcasting Company's No. 1 program is war service. as an agent for instantaneous communication with millions of people, NBC has built its news and information services to a point where they equal, if not surpass, broadcasting's value as a medium of public entertainment. In Washington, where the President's words of request and the Congress' action to declare war were broadcast to the nation, and on the war fronts around the world, where eye-witness coverage of war is given, NBC is performing its duty as an agency of defense. At the same time, it maintains its programs of music, drama and comedy, which it regards as revitalizing tonics to the people of a nation at war.

NBC's television service, limited at present, is none-the-less performing a vital war function. In New York, where some 300,000 air-raid wardens are in training, NBC has organized television to greatly facilitate the job. Television receivers are set up in selected areas for the reception of visual instructions, which have been worked out as studio presentations. Experts in bomb protection technique appear in the programs.

All facilities of NBC and the Blue Network Company, Inc., stand ready at all times for the use of the President, Government officials, and the Congress for communicating with the public.

RCA Communications

The direct radio communication circuits of RCA Communications, Inc., which link the United States with forty-nine countries of the world, are performing an irreplaceable function in the general war

scheme. Operating under the jurisdiction of the Defense Communications Board, with censorship being handled by the U. S. Navy, these circuits are maintaining contact with nations and far-flung outposts that could be reached by no other means. Adding materially to its general effectiveness, RCAC opened in December the first direct radiotelegraph circuit ever to link the United States and Australia. Even after its main installations at Manila were destroyed in the face of Japanese advances, the company re-established communications with the Philippines by contacting a small station on the island of Cebu.

Marine Equipment

While its marine radiotelegraph services have been reduced, Radiomarine Corporation of America still maintains to a limited degree these vital links with ships at sea. At the same time, Radiomarine, which has large Government orders for marine radio equipment, has for the second time in a year enlarged its manufacturing space, equipped it with machinery and tools, and added to its personnel. Likewise, it has broadened its facilities for maintaining and servicing its more than 1,500 radio installations in the rapidly expanding merchant fleet.

RCA Institutes

RCA Institutes, deluged by inquiries from prospective students who wished to prepare themselves for war's technical jobs, recently placed under consideration plans for additional radio courses relating to the war effort. The Institutes finished 1941 with enrollment in the New York and Chicago Schools at a record-breaking high.

AN UP-TO-THE-MINUTE LIST OF IMPORTANT

THE LATIN AMERICAN NETWORKS

FROM the international viewpoint, the most significant development of 1941 in the broadcast field was the organization of three commercial long wave networks in Latin America to supplement, and later, possibly, supplant purely short wave airings from the United States to our southern Good Neighbor republics. Actively encouraged by the Government, the development of these new links with Latin America progressed rapidly during 1941 until early this year all three networks were operating commercially.

With encouragement of the exchange of ideals, ideas and goods between the American nations a primary objective of United States policy, in order to develop Hemisphere solidarity in the face of Axis aggression, beginning of operation of these new Latin American long wave links by U. S. broadcasters served to afford means of reaching the largest potential audiences in South America in their own language and via their own stations. Surveys have shown that while there is a considerable short wave listening audience, such International broadcasts do not reach a majority of the population whose listening habits are restricted to the standard band. Short wave broadcasts also are subject to considerable atmospheric interference which can be overcome with properly equipped International links when local hookups are used for rebroadcast purposes.

NBC, CBS, Crosley Networks

Made up of previously established South American stations, hooked together by wire and short wave for the purpose of rebroadcasting U. S. programs, the three networks were organized by NBC, CBS and Crosley Corp. (WLWO), Cincinnati. NBC and CBS, with 124 and 76 S. A. affiliates, respectively, was set up to cover practically the entire southern continent, while WLWO limited operations to the so-called "quarter-sphere," Mexico, Central America, Panama, Venezuela, Colombia and the Caribbean Islands. The WLWO hook-up comprised 15 stations in these areas.

With three commercial networks in

operation, the questions facing these pioneers was whether there was enough advertising money available to support them—or even one, for that matter.

At first glance the answer would appear to be negative. Statistics on U. S. advertising expenditures in Latin America are unofficial and hard to obtain, but most authoritative estimates place the total expenditure by U. S. firms, both parent companies and their Latin American producers and distributors, at only \$20,000,000 per year in all media. Compared with the 1941 U. S. advertising bill, estimated at \$1,700,000,000 — of \$107,000,000 or more than four times the which network radio here accounted for total for all media in Latin America—the magnitude of the problem becomes immediately apparent.

Taking the "Long View"

However, like all new broadcast developments, this venture in inter-American relations is based on long-range planning. With U. S. foreign trade in other than war goods at an absolute minimum, due to the war, American exporters are turning more and more to South America as an outlet for their goods. This factor, plus the Government's favorable trade agreements with Latin America, acts as a strong stimulant in expanding the field and may be expected to result eventually in providing these new South American hookups with the conditions necessary for full scale commercial operation, bringing a substantial return on investments.

Meanwhile, until conditions are ripe, these pioneers in hemisphere broadcasting find themselves in a position similar to those other two new broadcast developments, television and frequency modulation. All must struggle along as best they can on slim budgets until the day when their foresight, ingenuity and patience will be rewarded in a material way. In the interim, however, the Latin American broadcasters have the satisfaction of knowing they are rendering important service to their country in paving the way for better understanding between the free peoples of North and South America.

FCC REGULATIONS REGARDING INTERNATIONAL BROADCAST STATIONS

The term "international broadcast station" means a station licensed for the transmission of broadcast programs for international public reception. (Frequencies for these stations are allocated from bands assigned (between 6000 and 26600 kilocycles) for broadcasting by international agreement.)

A license for an international broadcast station will be issued only after a satisfactory showing has been made in regard to the following, among others:

(a) That there is a need for the international broadcast service proposed to be rendered.

(b) That the necessary program sources are available to the applicant to render an effective international service.

(c) That the technical facilities are available on which the proposed service can be rendered without causing interference to established international stations having prior registration and occupancy in conformity with existing international conventions or regulations on the frequency requested.

(d) That directive antennas and other technical facilities will be employed to deliver maximum signals to the country or countries for which the service is designed.

(e) That the production of the program service and the technical operation of the proposed station will be conducted by qualified persons.

(f) That the applicant is technically and financially qualified and possesses adequate technical facilities to carry forward the service proposed.

(g) That the public interest, convenience, and necessity will be served through the operation of the proposed station.

A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international goodwill, understanding, and cooperation. Any program solely intended for, and directed to an audience in the continental United States does not meet the requirements for this service.

(The Commission on July 14, 1939, suspended the operation of this rule until further order of the Commission.)

Commercial Service

Such international broadcast service may include commercial or sponsored programs: Provided, that—

(1) Commercial program continuities give no more than the name of the sponsor of the program and the name and general character of the commodity, utility or service, or attraction advertised.

(2) In case of advertising a commodity, the commodity is regularly sold or is being promoted for sale on the open market in the foreign country or countries to which the program is directed in accordance with paragraph (c) of this section.

(3) In case of advertising an American utility or service to prospective tourists or visitors to the United States, the advertisement continuity is particularly directed to such persons in the foreign country or countries where they reside and to which the program is directed in accordance with paragraph (c) of this section.

(4) In case of advertising an international attraction (such as a world fair, resort, spa, etc.) to prospective tourists or visitors to the United States, the oral continuity concerning such attraction is consistent with the purpose and intent of this section.

(5) In case of any other type of advertising, such advertising is directed to the foreign country or countries and to which the program is directed in accordance with paragraph (c) of this section and is consistent with the purpose and intent of this section.

The areas or zones established to be served by international broadcast stations are the foreign countries of the world, and directive antennas shall be employed to direct the signals to specific countries. The antenna shall be so designed and operated that the signal (field intensity) toward the specific foreign country or countries served shall be at least 3.16 times the average effective signal from the station (power gain of 10).

An international broadcast station may transmit the program of a standard broadcast station or network system: Provided, The conditions in the commercial provision of these rules in regard to any commercial continuities are observed and when station identifications are made, only the call letter designa-

tion of the international station is given on its assigned frequency: And provided further, That in the case of chain broadcasting the program is not carried simultaneously by another international station (except another station owned by the same licensee operated on a frequency in a different group to obtain continuity of signal service), the signals from which are directed to the same foreign country or countries.

Station identification, program announcements, and oral continuity shall be made with international significance (language particularly) which is designed for the foreign country or countries for which the service is primarily intended.

Program Logs

(1) Each licensee of an international broadcast station shall make verbatim mechanical records of all international programs transmitted.

(2) The mechanical records, and such manuscripts, transcripts, and translations of international broadcast programs as are made shall be kept by the licensee for a period of two years after the date of broadcast and shall be furnished the Commission or be available for inspection by representatives of the Commission upon request.

(3) If the broadcast is in a language other than English the licensee shall furnish to the Commission upon request such record and scripts together with complete translations in English.

Frequency Assignment

The following groups of frequencies are allocated for assignment to international broadcast stations:

Group A	15330
6040 kc.	15350
6060	Group E
6080	17750 kc.
6100	17760
6120 ¹	17780
6140	17800
6170	17830
6190	Group F
Group B	21460 kc.
9530 kc.	21500 ²
9550 ²	21520
9570	21540
9590	21570
9650	21590
9670	21610
Group C	21630
11710	21650
11730 ²	Group G
11790	25600 kc.
11820	25625
11830	25650
11870	25675
11890	25700

Group D	25725
15130 ¹	25750
15150	25775
15210	25800
15230	25825
15270	25850

Additional frequencies allocated by international agreement may be assigned to international broadcast stations subject to the conditions that no objectionable interference results to the service of foreign international broadcast stations which, in the opinion of the Commission, have priority of assignment.

Any frequency licensed to an international broadcast station shall also be available for assignment to other international broadcast stations, provided no objectionable interference is caused to the service of any United States international broadcast station.

An international broadcast station will not be authorized to use more than one frequency listed in any group listed in the rule on available frequencies without a showing of technical necessity.

Not more than one frequency shall be used simultaneously under the same authorization and call letter designation.

No international broadcast station will be authorized to install equipment or licensed for operation with a power less than 50 kilowatts.

Supplemental Report

A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following:

1. The number of hours operated on each frequency.

2. A list of programs transmitted of special international interest.

3. Outline of reports of reception and interference and conclusions with regard to propagation characteristics of the frequency assigned.

The transmitter of each international broadcast station shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.005 per cent of the assigned frequency.

¹ Authorizations for international broadcast stations which permit operation on these frequencies shall be subject to the condition that the authorizations for these frequencies may be modified by the Commission to delete these frequencies without advance notice or hearing.

² Authorizations for international broadcast stations which permit operation on these frequencies shall be subject to the condition that there shall be no commercial or advertising announcements of any kind in the programs broadcast through the medium of these frequencies, and that the names of program sponsors shall not be broadcast.

appear on your telephone bill.

**For descriptive folder — address Postal
Telegraph, 157 Chambers St., New York
or ask local branch manager.*

HOW IS YOUR RADIO PROGRAM DOING—

You can use any of several excellent services to find out how many people listen to your show. You'll get a general or national picture.

If your sales lag in some places—if your program doesn't seem to click in others, that's your cue to use Ross Federal's coincidental facilities right in those marketing sore spots. Ross Federal can go to work for you in one market or many, separately or simultaneously, to point up weaknesses and uncover the information you need to guide you.

Why not ask your advertising agency, right now, to tell you more about Ross Federal coincentuals, the swift and economical way to analyze your radio promotion. Rare indeed

is the Ross Federal coincidental study that doesn't syphon up some important data. These little suspected facts will pay for the study many times over.

WHAT ROSS FEDERAL DOES*

- CONSUMER INTERVIEWS**
Person to person—by telephone or mail
- RADIO COINCIDENTAL SURVEYS**
- CONFIDENTIAL SHOPPING STUDIES**
- DEALER INTERVIEWS**
Inventory and point of sale display checking
- READERSHIP STUDIES**
- OUTDOOR ADVERTISING CHECKING**
- TRAFFIC CHECKING**

**For a detailed presentation of Ross Federal's many research services write for a copy of SOUNDINGS.*
