# Canadian Broadcasting: Brief Summary and Outlook for 1957

By JULES  
LAROCHELLE  
Can. Correspondent  
Radio-Television Daily

WITH some fifty-four percent of Canadian households now equipped with television receiving sets and practically 96 percent of all households having radio sets as at the end of 1956, according to latest official government census, the Canadian radio and television industry experienced favorable results during 1956. Outlook for the year 1957 is reported good from almost all aspects.

Further television broadcasting stations came into operation in the past year but at same time, radio broadcasters also showed growth, and demonstrated that they have now "learned to live with television." As a matter of fact, radio broadcasters point out that radio set sales in Canada have shown continued and sustained increase as compared with sales of television sets, which tended to ease off considerably in 1956. Increased radio set sales, it was pointed out by radio broadcasters, showed definitely the sustained high level of radio listening audiences.

Radio broadcasters, in order to continue to attract sponsors, have adapted their programming to obtain best audience results. More and more, radio broadcasting is slanted towards busy housewives during earlier housework hours, and during early morning hours for the motoring and night-time workers. As far as television time is concerned there is gradual increase in operating time. But advertising time continues "hard to obtain", especially for periods considered most favorable.

Radio broadcasters generally report satisfactory operating results. Schedules have been altered, operators admit. The biggest change, it is gathered, has been in program sponsorship. There has been a tendency for shows, especially the major ones, to be sponsored by a number of advertisers. Spot announcement also has become more widespread. Radio broadcasters have drawn special attention to advertisers of service that can be rendered on a local basis and this has proved very satisfactory and has meant that radio operators have been able to maintain revenues in the face of television competition.

Probably the biggest thing that occurred in Canada's radio and television broadcasting industry in the past year was the extensive investigation made by the Royal

Commission on Broadcasting headed by R. M. Fowler of Montreal. The commission heard hundreds of briefs, at a number of sittings both in Canada and the United States. The commission report is expected to have a strong effect on the future of the industry.

Further progress is being made on 4,000-mile microwave radio relay network—from Sydney, Nova Scotia, to Victoria, B.C. The Toronto-North Bay-Winnipeg section has been completed, as well as part of the Maritime Provinces section. The entire network is scheduled to go into operation in 1958. When the network is complete, it will afford simultaneous network television for 28 cities from the east to the west.

Official government figures indicate that television set sales in Canada in 1956 amounted to 598,149 units, or down 22 per cent from the record year, 1955. Value of sales slipped from \$234,800,000 to \$179,900,000. Radio set sales, on the other hand recorded sharp advance to 709,416 units up 16 per cent from 609,993 sold in year before. Radios sets sales were valued at \$46,311,633 compared to \$491,907,208.

The Canadian Association of Radio and Television Broadcasters, comprised of private operators across Canada, increased its membership during the past year and a report, issued by the association in the latter part of January said that CARTB membership to date totalled 145 radio broadcasting stations, 28 television broadcasting stations, and 54 associate members.

As far as CBC is concerned, high officials of the corporation reported early this year that considerable progress had been recorded both in television and radio and that the outlook remained very bright. At the turn of the year, A. Davidson Duntton, chairman of the Board of Governors of CBC pointed out in a progress report that there were 38 television stations in Canada which could attain some 80 percent of the population and that Canadian broadcasting is second to none in the world.

## ADVERTISERS BUY Network TV AND RADIO

TV — There are more than 2,500,000 television homes in Canada. Over 60% of all Canadian households now have TV.

CBC TELEVISION NETWORKS . . . English and French . . . serve this enormous audience through CBC stations and 30 affiliated stations.

RADIO—There are more than 4,000,000 radio homes in Canada . . . over 6,800,000 radio sets in Canadian homes and automobiles.

CBC RADIO NETWORKS comprised of both CBC stations and affiliates, English and French, serve Canadians in all parts of Canada . . . in markets large and small . . . reaching millions of listeners at home and countless thousands on Canadian highways.

Used in combination, CBC NETWORKS make available to advertisers the tremendous impact of television plus the effective, low-cost mass coverage that only network radio provides.

In both French and English, you'll have our full cooperation in the effective use of CBC networks . . . and in the creation and production of Canadian programs.

## *Even a phony professor can spot a real dollar*

"You Canadians may have no culture, no flag and no president, but you sure do have a dollar. . . . Your dollar is strong; people want it." It was Professor Horrors Fleegle, lecturer in economics at Upstate U., speaking. (Or so H. Devon Smith, Financial Editor of The Toronto Telegram, reported recently.)

Frankly, we suspect Professor Fleegle is a phony . . . but there's no question at all about the genuineness of the Canadian dollar. In fact, Canadian exporters feel it's a bit *too* genuine! In November, the Canadian dollar reached a 23-year high in terms of U.S. currency. That kind of money makes it hard for Canadians to sell.

Here's what happens. In the first ten months of 1956, Canadian purchases from the U. S. exceeded sales to the States by more than \$1 billion. This is Canada's biggest trade deficit with the U.S. in history. But the "fat" dollars, which make it hard for Canada to sell, make it *easy* for Canada to buy; make her a wonderful market for other countries.

Then, too, Canada is enjoying unprecedented prosperity in spite of an unfavourable trade balance, Manufacturers' shipments, and sales at

retail and wholesale, were all substantially higher in 1956 than they were in 1955.

Any professor of economics—faked or famed—would see this as a good time to go after Canadian business. But one thing remains: harnessing this great sales potential to good selling media. Canada provides these media.

Canadians love both radio and TV. How else can you explain the amazing purchase of sets? Canada, with a population of only 16 million, has about 6½ million radio sets (including more than a million car radios); and approximately 2,400,000 TV sets. In the first 9 months of 1956 alone, 156,591 radios and 403,399 TV sets were sold. Transistor radios and portable TV's are pushing sales still higher.

Television is really getting its stride in Canada, with new stations, network extensions, and more programming hours.

Most products lend themselves to radio or TV advertising . . . especially on independent stations. We urge you to take advantage *now* of Canada's remarkable purchasing power. Our Association offices will be glad to work with you.

Ricard, Sudbury, Ont.; J. M. Davidson, Toronto, Ont.; W. T. Cruickshank, Wingham, Ont.; J. A. Dupont, Montreal, P. Q.; W. N. Hawkins, Owen Sound, Ont.; E. E. Fitzgibbons, Kitchener, Ont.; R. J. Buss, Medicine Hat, Alta.; V. Dallin, Saskatoon, Sask.; J. O. Blick, Winnipeg, Man.; H. A. Crittenden, Regina, Sask.; C. J. Rudd, Nanaimo, B. C.; M. P. Finnerty, Penticton, B. C.

## Functions

The Canadian Association of Radio and Television Broadcasters is a voluntary trade organization of 144 privately owned (independent) radio broadcasting stations, and 26 television stations in Canada.

## Picture of a woman buying a refrigerator

**B**EDTIME . . . but she's already on her way to a \$465 purchase tomorrow. Wherever you go there's not only radio, but a woman companioned by radio.

Through CFRB, you reach her and all the others like her who do the buying for 1,156,000 families\* living in the rich heartland of Ontario. Annual family buying power (after income tax) within the forty-four counties served by CFRB totals \$6,118,230,000\* . . . annual retail sales in this same area now account for 84% of Ontario's total.\*

**RADIO REACHES YOU EVERYWHERE**

Are you and your product getting a proper share of this booming, easy-to-speak-to, *waiting* market? Let CFRB send a representative around to show you how inexpensive and profitable a well-designed radio campaign can be.

**REPRESENTATIVES:**

**United States:** Canadian Station  
Representatives Ltd.

**Canada:** All-Canada Radio Facilities Limited

*\* Based on Sales Management's Survey of Buying Power, Canadian Edition, May, 1956*

**50,000 watts**  
**1010 on your dial**

**CFRB**  
**TORONTO**

# STATIONS OF CANADA

The following list of stations is arranged in call letter alphabetical order giving page number for complete station data.

# Foreign Language Stations Service Strong Ad Markets

RALPH N. WEIL  
By  
Exec. V.P. & General  
Manager WOV

AN ADVERTISER'S modern media arsenal isn't complete unless it includes foreign language radio! True or false? Very, very true. If you're an advertiser you can't sell to people unless they know who you are and what your product will do for them. And a sizeable share of them will never find out if you spend your total efforts just telling your story in another language (English) somewhere other than where they're tuned.

Foreign language radio is the most—and often the only — effective instrument for sparking sales among the foreign language segments in a community. And these "segments", by the way, can be very large, depending on the area and the language. In WOV's case, the area is New York City-and-environs and the foreign language is Italian. With the Italian language population figured at better than 2,000,000 people it adds up to the size of one of the world's major cities all by itself.

Listeners are in tune with—not just tuned to — foreign language broadcasting. They really stay with it, not just over the years and on into a new generation (they do that too) but throughout the day. They're habit-gearred to turn to their foreign language station for familiar entertainment. Our own experience over the years shows it is one of the most satisfactory groups a broadcaster can direct himself to. Certainly its one of the most desirable groups to which an advertiser can direct his efforts. The language listener feels a comfortable pride in "his" station and also embodies an advertiser's dream prospect. Why? Because your language listener—with what amounts to devotion and trust concerning the station—is motivated to accept foreign language radio advertising as a wise and urgent recommendation that had best be heeded.

Foreign language listeners become very active customers—so active in fact that they aid with merchandising and distribution. They will really harangue a retailer to stock up on an advertised item. The list of products which foreign language radio can sell successfully is longer than that of English language media. Why? Because your language listener is a potential customer for everything any other American in the same community is a prospect for (chewing gum, bread, movies, automobiles) plus full lines of additional items like special food products.

The Italian-American group (that we at WOV serve) is large and its buying power is strong. However, in areas where the total group identified with a given language is numerically smaller, or even proportionately smaller, foreign language time may be the media buy that lights up an otherwise dormant dollar sign. The reason is that if the programming bears the ring of authenticity and nostalgia for the listening group, and if it has become part of their habit patterns, it is a stronger influence on their buying habits than any other medium. Costs being in ratio, the advertiser who buys foreign language is getting more than his money's worth whether in a great city or a small community.

Programming is the vehicle. It definitely does take a knack to combine the all important quality of nostalgia with a new-every-day "quickening" quality. News, for example, is heavily emphasized by WOV. We even maintain our own shortwave news service from Italy (and have often scooped the wire services on news from abroad). The actual news is in itself an item of major importance — and a genuine service. In addition, however, it has the added value of imbuing language programming with "today-ness". A news flash from "La Casa Bianca" alerts attention just as instantaneously in its league (in fact I believe more so) as a flash from "The White House" hits listening-in-English ears.

When programming has done its job of establishing loyalty, the job is still not done! well begun, yes, but not done—not without properly keyed advertising. Very seldom, can an agency just have its English language pitch translated and let it go at that. The message must really be "transposed", idiomatically styled. The station can, and as a rule is willing to, offer excellent suggestions in the matter of angling to make a campaign roll right from the beginning. There is no market, I feel, which can best it for heady yields of year-in, year-out success stories.

FULLEST ELECTION COVERAGE ON TV IN HISTORY

From top to bottom, representative scenes of the ABC, CBS, and NBC television coverage of the presidential election night returns. Smoothly coordinating a great deal of detail, and conveying results to listeners with extraordinary speed, the networks achieved the most complete and successful coverage in history.

Sigalert—An Instant Warning Device to Alert the Public

By
LOYD C. SIGMON
Chairman of the Board
Southern California
Broadcasters Assn.

SIGNALERT, born of necessity as an instantaneous warning device to alert the public of disaster or major inconvenience, has become the model for modern emergency communication in less than two years of official use.

Forty-eight communities in the County of Los Angeles, in addition to cities in Nevada and Arizona, are joined today in a mighty electronic network that instantly relays, through Sigalert, news of disaster, impending or actual, major traffic tieups or other information considered to be vital to the public interest.

Within a few months, Sigalert will be made available to radio stations, newspaper offices, police and civil defense departments and other agencies nationwide.

With Sigalert installed in radio stations throughout the country, the President of the United States, for example, could instantly reach the listening public with a message of major importance, simply by pressing a Sigalert button. All radio and TV stations equipped with Sigalert could immediately broadcast the President's voice, or his taped message could be played back on the air numerous times.

As now installed in more than a score of radio and TV stations, newspaper offices, aircraft companies, civil defense posts and public utilities offices, Sigalert is a specially-designed receiver that is turned on and off by sub-audible impulse from the Los Angeles police radio station. A red light glows, a bell rings, and the tape recorder goes into action.

Responsible fire or police officers utilize the Sigalert system whenever, in their opinion, a situation exists likely to affect any considerable part of the population of Southern California, Nevada or Arizona. The officer says via police band radio: "This is a Sigalert bulletin" and the message is immediately broadcast on police shortwave from the Los Angeles Police Communications Center to all Sigalert receivers.

An example of the speed with which Sigalert bulletins can be effective over vast areas is the case of the 7-year-old boy who was critically injured in a traffic accident on Santa Monica Boulevard in Los Angeles. His identity was unknown. A Sigalert bulletin went out over the commercial stations in Los Angeles, and within 20 minutes after the bulletin was aired, the boy's father in Idaho was on the long-distance phone in contact with the Santa Monica General Hospital to make identification.

Sigalert, developed at the request of Los Angeles Police and in collaboration with the Southern California Broadcasters Association, has proved itself in many crises since Labor Day, 1955, when it first went on the air.

Chief of Police William Parker credits Sigalert with holding down the death toll in the tragic Santa Fe train wreck in Los Angeles last year. Through Sigalert bulletins, doctors, nurses and ambulances were summoned, hospitals alerted and the curious public told to stay away. Sigalert served the public interest in the Pacific Palisades landslide and during the extensive Malibu fires which destroyed thousands of acres of timber, burned scores of homes. Sigalert notified residents to pack up and leave, notified motorists to by-pass the inferno, helped marshal off-duty firemen, police officers, Red Cross workers and volunteers.

Sigalert alerted Long Beach to evacuate thousands of homes when Los Angeles County experienced, in '56, a seven-day rain-storm and flood that threatened to obliterate retaining walls and inundate the city. Taped messages of public importance accumulated so fast one network station killed its program until the danger was past.

In the words of Arthur C. Hohmann, Deputy Chief of the Los Angeles Police Department, "Sigalert has notified the public of many dangerous or delaying conditions. Public response has been excellent. Sigalert bulletins have forestalled many telephonic inquiries that otherwise would have overloaded police telephone circuits. Sigalert can become Free Worldwide in scope. Meanwhile, it plods incident by incident toward the certainty of the universal success it so richly deserves."

Chief Hohmann's opinion of Sigalert and its future is known and shared by many Police Chiefs throughout the country. Word has gone out: Sigalert is on the way . . . and by a simple addition to any existing police transmitter, it will arrive soon in Hometown, U.S.A.

Advertising Agency Puts Case Of Handling TV Production

By
EMIL MOGUL
President
Emil Mogul Company
Inc.

SHOULD advertising agencies produce television shows? In a word, my position on the question is *Yes*. The only proviso I would make is that agencies obviously must be equipped with more than just a desire to be creators and impresarios.

Consider it first from the advertiser's point of view. It seems to me the client stands to benefit in a variety of ways from an agency-produced show. There is first the advantage of economy. Since agencies do not depend on TV show production for their profit, as the independent producers do, or even partially as the networks do, shows would on the whole cost clients less if agencies produced them and felt responsible for justifying the costs. In the present economics of the TV business, the prices of network shows are often supported at an unnecessarily high level by the shortage of time—with networks able to command higher prices than they are necessarily worth for shows that occupy desirable time slots. Independent packagers are in business to produce and sell shows and naturally require greater profits than agencies would require for the same production. Since the agency's primary interest is not in selling a program but in utilizing TV time to attract the largest possible audience, the agency is or at least should be, less interested in propping from the production itself.

Shows produced by agencies would automatically be much more closely supervised by the agencies than they are when, for practical purposes, they are out of the agency's hands and—no sarcasm intended—in the laps of the gods. Since an agency's fortunes with a particular client rise or fall, as they so often do, with the ratings of the client's TV show, it seems to me the agency should have much more to do with running the show than simply choosing it in the first place and then praying that the initial judgment was correct, to say nothing of the moral obligation of *earning* its commission on talent and production costs.

From the network's point of view, the question may appear to be a different one. Admittedly, networks must, for their own protection and as a public obligation, maintain standards of taste, quality, interest and programming diversification which it might be difficult to maintain if each sponsor were an individual producer. But this is not a really valid argument against encouraging

agencies to assume the responsibility. Many of the finest shows on the air today are produced by independent packagers — and in some cases they are far greater credit to the network and stations which telecast them than much of the networks own product. And at least two of the really outstanding shows on the air are currently agency-produced. Maintaining proper programming standards would still be a matter of network policies, policing, and the prerogatives of approval and disapproval.

From the public's point of view, it should make no difference whatsoever who produces the show they watch—network, packager or agency. The inalienable right to tune in and tune out is the most effective arbiter of what's good TV and what's bad TV, in any case. As for the agencies themselves, all of this presupposes the necessary talent and manpower to produce programs of sufficient quality and interest to attract and hold audiences. And this of course means large additional overhead which would in many instances exceed the agency 15% or 17.65% gross income. To maintain the same profits that it currently earns on a network produced or packaged show, the agency would have to charge a substantial additional production fee. But this should certainly still leave room for a considerable saving to the client.

Whether it is or should be an agency responsibility to produce its own shows is quite a different question from whether agencies should be allowed or *encouraged* to do it. And whether any individual agency should *seek* this additional responsibility is of course for that agency to decide. As for ourselves, we've created and produced successful shows in the past and we plan to do so again. When we put our money on a *horse*, we're willing to gamble on our judgment and the jockey. But when we put our client's money on a TV show, we'd like to have as much as possible to do with making it run—even if it means a lot more work for us.

East-West TV Network — Economic Closed Circuit Package Deals

A package deal, in closed circuit television, can be made available through the coordination of a group of clients and the multiple use of leased facilities of A.T.&T. and local phone companies. The packages now ready to deliver are of this type.

Services rendered in the 9 and 11 city package deals described below are as follows: Origination from any included city; video and audio—long lines and local loops; 9'x12' TV projection, with union operation, and Network supervision at each location; hotel liaison; facility test prior to show; reports on test and show.

NINE MAJOR INDUSTRIAL MARKETS

(April — May — June)

Chicago	South Bend	Pittsburgh
Columbus	Cincinnati	Cleveland
Detroit	Indianapolis	Huntington, W. Va.

9 CITY PACKAGE RATE

1 Hour	\$ 9,746.39
2 Hour	\$12,954.00
COMPARE:	
Average 1 Hour	\$13,531.04
East-West Package	9,746.39
SAVING	\$ 3,784.65

ELEVEN KEY FARM BELT MARKETS

(June — July — August)

Minneapolis	Omaha	Wichita
Mason City	Quincy	Siaux Falls, S.D.
Des Moines	Pearia	Kansas City, Mo.
Madison, Wisc.		Davenport, Iowa

11 CITY PACKAGE RATE

1 Hour	\$11,965.00
2 Hour	\$16,427.00
COMPARE:	
Average 1 Hour	\$17,400.00
East-West Package	11,965.00
SAVING	\$ 5,435.00

EAST WEST PROJECTION OPERATION RATES

Uniform 9' x 12' projection equipment
Available in any key market—anytime.

To 1 Hour 30 Minutes	\$435.00
Base period to 3 Hours	\$525.00

"Off-the-air" projection service available

(Price includes Agency commission.)

— ESTIMATING COST —

It is relatively simple to estimate the cost of a closed circuit show. By using the following formula you can readily determine the approximate cost of a show for your Company.

Multiply the number of cities to be reached

by \$480.00, (average one time local video and audio charge); add, \$435.00 per city for projection; plus \$1.24 per airline mile for inter-city video and audio, (includes Fed. tax); average studio origin at \$1500.00; your estimate of script and talent.

Prices Include Fed. Tax and Agency Commission. Does not include script or talent.

Creative Thinking Necessary in TV Film Commercial Activity

AS a man deeply interested in the graphic arts, I assume it's within my province to attempt to forecast some of the developments that can be expected in the field of television film commercials during 1957.

Generally, the picture appears to be bright. During 1956, an estimated total of \$397,498,000 was spent by national advertisers alone in spot television. Naturally, this steady growth pattern is reflected in the film commercial business and we expect to see this healthy trend continue upward during the coming year.

There are many factors contributing to the increased activity within this field. Advertisers have been compelled to use a greater variety of commercials to cater to an increasingly sophisticated television audience. A spot that was considered outstanding five years ago might be quite ordinary by today's standards.

There is a more discerning audience to be sold today. We can remember in the early days when some commercials ran two or three years with quite a successful sales record. Today, a campaign can be "old hat" in a matter of months.

Another product of this era of intensified competition will be the excursion by advertisers and agencies into new areas of commercial expression. I anticipate more experimentation in the field of commercial technique with utilization of some art forms which have been considered, up to this time, as somewhat esoteric and avant garde. I believe the influence of abstraction and other non-objective art forms will be felt more strongly this next year.

Coupled with these new graphic forms will be an ever increasing and ingenious use of new sounds. Only now is there a growing appreciation of what sound can do to enhance the film commercial. I look for greater use of original orchestral scores sound effects and unique instrumental combinations to bolster the attention-getting power of the commercial sell.

By
SHAMUS CULHANE
President
Shamus Culhane Prod.,
Inc.

Animation will be employed more than ever before. In my judgment, animation remains the most exciting and desirous form of commercial. Quite probably, the rotoscope technique, which optically combines live action and animation, will be utilized to a greater extent than before despite the increased cost due to intricacy of production. This marriage of realism and imagination will be effectively harnessed by more advertisers in 1957.

The antics of Bert and Harry Piel have already exerted an influence that is bound to extend into 1957. Agencies are presently attempting to duplicate the success of this series by a more careful attention to characterization in their animated commercials.

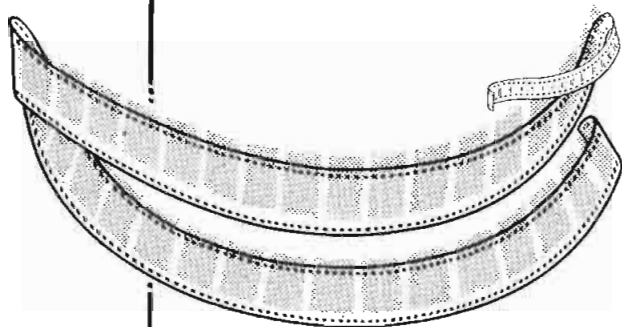

One cannot survey any field of television endeavour without contemplating the impact of color on the 1957 scene. Here is a subject of vast possibilities, one, which I venture, will affect merchandising revolution beyond present expectation when it is finally accepted by advertisers as a truly mass medium. Having experienced its explosive impact on Hollywood upon its introduction in the 30's, I can fully appreciate its potential. Despite its growing popularity, for 1957 at least, black and white commercials will continue to dominate the commercial field.

I have attempted, with the usual reservations, to map just a few of the possibilities. There are certainly many turns in the road which may turn out to be dead ends. To judge how successful a prognosis this has been, I suggest checking this space next year to see whether I've been booked for a return engagement.

The one and only thing NEW in television!

ZENITH "SPACE-COMMAND" TV TUNER

It answers silent commands from your easy chair...or even from the next room. Turns set on and off, changes stations, mutes sound, shuts off long, annoying commercials!

You'll be amazed! There's nothing between you and the television set but space! No wires, no cords, no batteries, no radio control waves. Yet the "SPACE-COMMANDER" control box in your hand carries out your commands from across the

room, or even from the next room. Is it magic? How does it work? Well, see it yourself...try it yourself at your Zenith dealer's. You've just never seen anything like it! And remember—only Zenith has it!

NOTHING BETWEEN YOU AND THE SET BUT SPACE

- You hear nothing!
- You see nothing!
- No transistors!
- No radio control waves!
- No wires!
- No flashlights!
- No batteries!
- No cords!
- The only wireless complete remote control!

*KNXT for general overall excellence in public service.
Honorable Mention—To KTTY for standards of public service.*

BMI

For SERVICE in TV

SERVICE continues to be one of the basic theme songs at BMI. Not only are its facilities offered to its TV licensees, but to producers, advertising agencies and their clients, TV film distributors, music conductors, directors, and everyone in TV concerned with music and programming.

This service is apparent in the day to day activities of BMI and is provided in many forms, such as:

- Assistance in the selection or creation of music for theme, background, bridge, cue or incidental mood music
- Help in protecting music ownership rights
- Answers to questions concerning copyrights, music right for future residual usage and help in solving all other problems concerning the use of music in TV
- Aid in music clearance.

TELEVISION *Sketch* BOOK

A regular monthly service of pre-tested musical sketches for the producer, director and artist

Finely and practical working scripts for the presentation of songs in dramatic, comic and pictorial fashion.

The very latest song hits as well as the standard favorites are developed into photogenic sketches which can be used effectively as complete musical shows, as production numbers in variety programs or as scene-setting segments.

There are dozens of ways in which you can adapt the BMI Sketchbook to advantage.

Let BMI give you the TV Music Story — Call or write BMI TV SERVICE DEPARTMENT

Learning Public's Tastes Needed for TV Series' Success

By
OLIVER TRELYZ
Vice President
in Charge
ABC Television
Network

As everyone has heard at one time or another, build a better mousetrap and the whole world will come to you. Television is certainly no exception.

To bring the viewer to your network channel requires consistency and quality, finding a need and filling it, building a habit of expectancy. Programs with a sawtooth, up and down record, cannot succeed as winners over the long haul. Inevitably, a spotty viewing audience will result, since people will not follow a program if it doesn't deliver with regularity.

Witness the record of feature films in the Los Angeles area alone. At first a sensation when the MGM package was presented, an up and down rating pattern soon developed. This was the direct result of offering features of varying quality. As in any feature package, this group included films both bad and good, and in-between. The public, as discerning a group as there ever was, reacted with the same inconsistency as the film series itself.

In contrast, consider any number of network shows which maintain consistency throughout the year and develop strong audience loyalty. Each new rating report shows a stability in share of audience. Possessing an intangible though pre-existing personality and giving the audience consistency each week, these programs will always emerge victorious over the spectaculars, the shows which cannot maintain a theme and focus.

Who would underestimate the regular drawing power of a "Disneyland," which presents something new and different each week, yet holds the attention of the viewer since he knows what to expect from the inimitable talent of Walt Disney.

Always a winner with motion picture audiences, Westerns and Adventures have established themselves firmly as television leaders. "Cheyenne," "The Life and Legend of Wyatt Earp," "Gunsmoke," "Broken Arrow" and "The Adventures of Jim Bowie" fill a need of the American public and deliver with consistent high quality. I, for one, predict they'll be with us for a long time to come, maintaining loyalty as long as Americans are Americans.

Many examples of programs which deliver with regularity could be cited. In network television today, we have "Crossroads," Alfred Hitchcock, "The \$64,000 Question,"

"Father Knows Best," "The Ed Sullivan Show," "What's My Line?," "Dragnet" and many others, all of which have that extra something which distinguishes them in the eye of the viewer. They have found a need, and filled it.

Of the newer shows of the past season or two, none has quite equalled the record of Lawrence Welk. Where other musical shows had failed, Welk and his Champagne Music became an overnight phenomenon. Welk hit the top and has remained there since with a combination of his magnetic personality and the presentation of music in the way the people wanted to hear it. As such, he'll continue to hold top ratings.

In its planning for the 1957-58 season, ABC Television will rely heavily on this quality-consistency-expectancy formula as it readies new programs. We believe that Frank Sinatra, long a favorite, will become a firmly entrenched habit with television viewers. So too, will the new Walt Disney program and the latest adventure series to come from the Warner Bros. studios.

One important factor in building expectancy which cannot be ignored is 52-week exposure. ABC Television research has found that shows which are in there punching the year-round build up a much stronger habit than those which take the conventional hiatus during the summer months. This exposure has helped immeasurably in the success of Welk, "Disneyland," Wyatt Earp, "Cheyenne," Ed Sullivan and others.

While not relying on mousetraps to capture audiences, ABC Television has achieved unusual results with a "mouse." With the "Mickey Mouse Club" ABC-TV has established itself firmly in the daytime picture. With its year-round appeal, the club has become a habit with the housewife and young America. With it as a keystone, ABC Television is planning new and important daytime entries. As at night, we will follow the pattern of finding a need and filling it, firmly convinced that it will bring us public acceptance and acclaim.

A.B.C. TELEVISION NETWORK

JAMES T. AUBREY, JR.

Vice President in Charge of Programming and Talent

James T. Aubrey, Jr. was named vice president in charge of programming and talent for ABC-TV network in January, 1957. He had previously served as manager of CBS-TV programs in Hollywood since June, 1956. From 1952 to 1956, Aubrey was general manager of KNXT, Hollywood, and of the Columbia TV Pacific Network. Prior to this, he was sales manager of KNXT from January to June 1952; account executive with KNXT during 1951-52 and account executive with KNX from 1948 to 1951. Aubrey was associated with Street and Smith Publications and Conde Nast Publications following World War II. During the war he served with the Air Force. A graduate of Princeton University, Summa Cum Laude, Aubrey is married to actress Phyllis Thaxter. They have two children.

SLOCUM CHAPIN

Vice President in Charge of Sales

Slocum Chapin, VP in charge of sales for ABC-TV, is a graduate of Dartmouth College. Prior to joining WJZ (now WABC) as sales manager in 1942, he served in sales promotion for World Broadcasting System; in sales with WOC, Davenport, Iowa; as sales manager of WKBN, Youngstown, Ohio, and as general manager of WSTC, Stamford, Conn. Chapin moved from the local New York station in 1944 to the radio network sales department and then in 1948, was appointed eastern sales manager for ABC-TV when the department was created in 1948. In 1951, he was named vice president in charge of owned and operated stations for ABC, a post he held until being named to his present position in 1954.

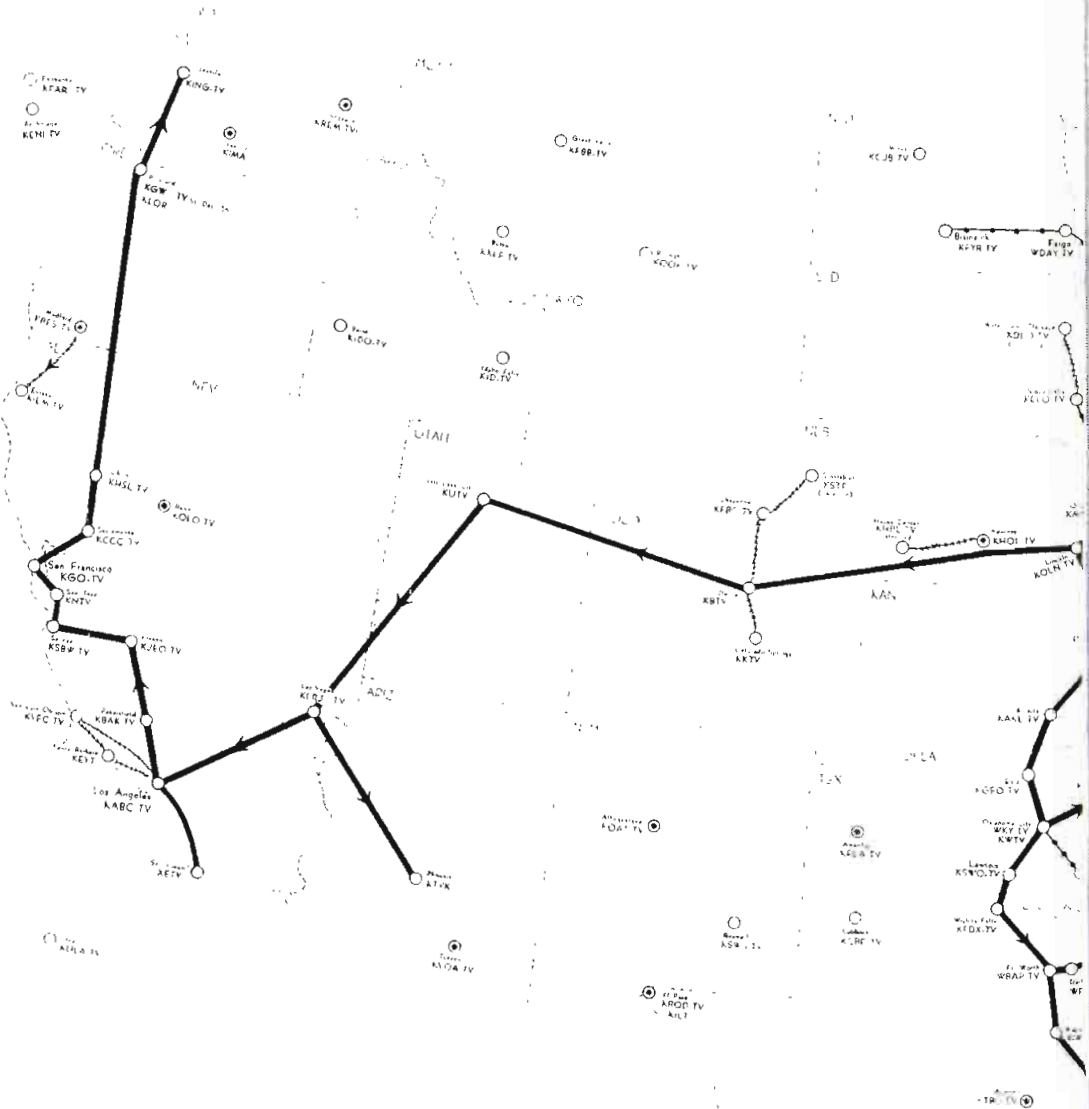

JOHN DALY

V.P. in Charge of News, Special Events, Sports and Public Affairs

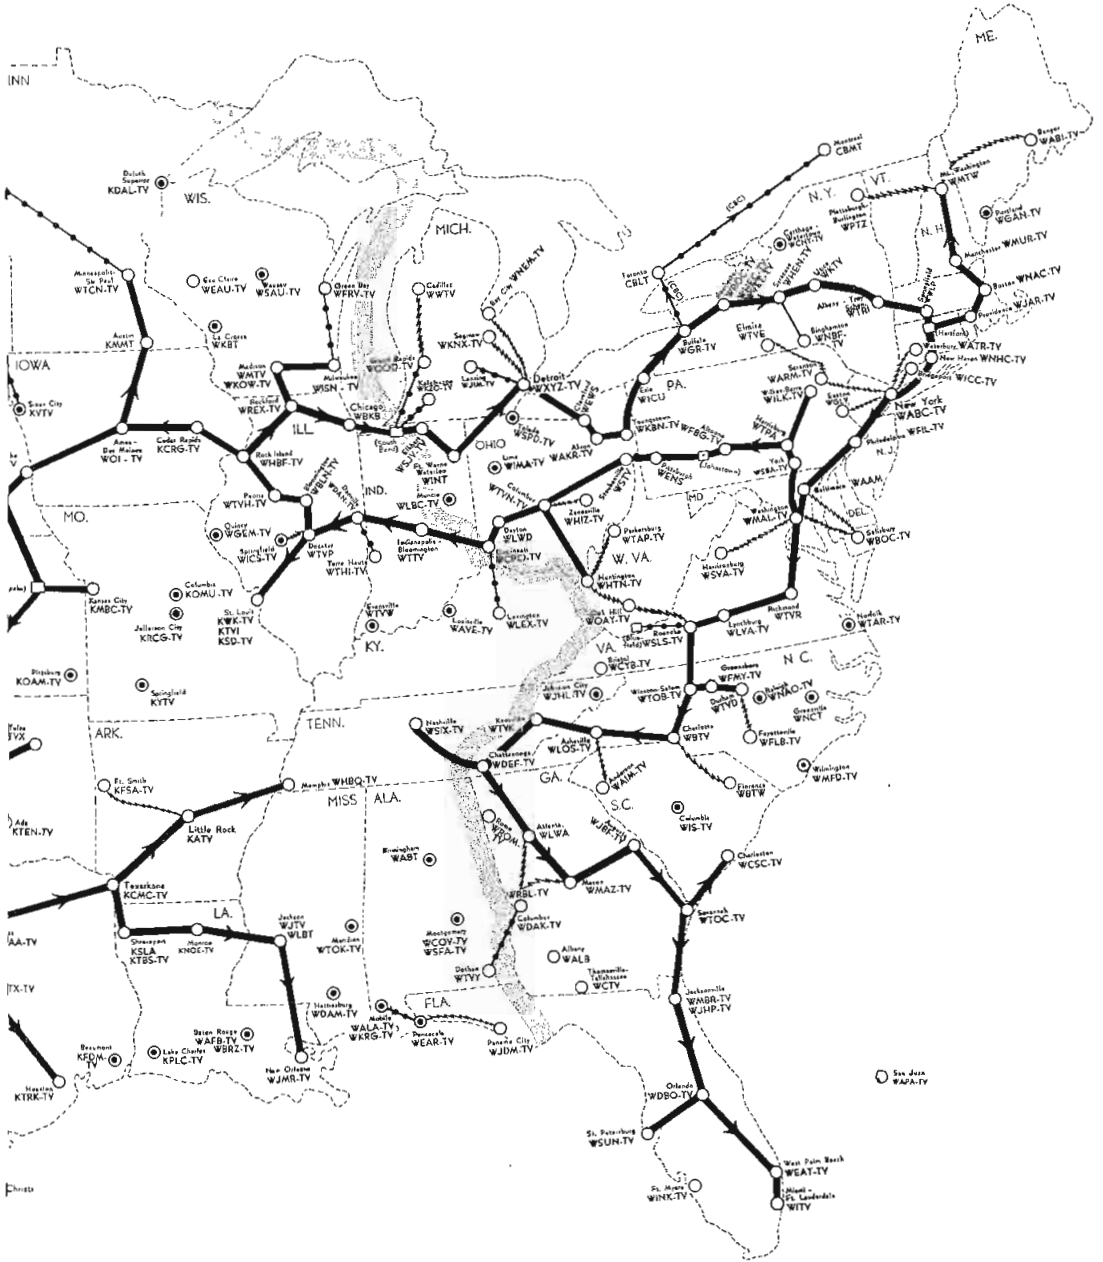

John Daly, vice president of ABC in charge of news, special events, sports and public affairs, started as a CBS radio reporter and commentator in 1937 in Washington, D. C., after leaving Boston College. He left CBS after 12 years, joining ABC in 1949 and was named to his present post in August, 1953. Daly worked under a Washington dateline for four years. He was transferred to New York in 1941. Daly's combat reporting included eye witness accounts of the Sicilian campaign, the Italian campaign and the Anzio landing. He returned to cover the 1944 conventions, Presidential campaign and election. Since joining ABC he has directed or participated in the coverage of each year's great stories—from the Korean crises through the major sessions of the UN, the 1956 political events, the inaugurations of President Eisenhower, the coronation of Queen Elizabeth, the Army McCarthy hearings, the Suez Invasion and the Hungarian rebellion.

what they watch

needs watching

"Every day is a school day. The things Johnny learns from TV—really remarkable."

"Peter never used to look both ways before he crossed the street. Now he does it—because *Jiminy Cricket* told him to!"

A few years back, you didn't hear parents talk like that about children's television. Nobody thought the whole country could be a classroom. Maybe you remember some of the things that parents used to say.

Today, such words have a far-away ring, like the bell on the little red school house. Today the whole country's a classroom.

It isn't that parents have changed or that children have changed. Nothing has changed—but television itself.

Television is no longer a child. Today's shows for children are sometimes educational, often exciting and always entertaining. Today's television is wonderful. And ABC intends to keep it wonderful—make it even more wonderful by daring to make it thoughtfully different.

We watch what children watch. We watch *Rin Tin Tin* and *Mickey Mouse Club* and *Jim Bowie* and *Disneyland* and *Cheyenne*. We hope that parents watch the way we do.

We are never too preoccupied to be watchful. But we are proud of our efforts—and of the efforts of other networks—in making television for children a trusted, well-adjusted playmate.

CBS Television Programming Assumes Basic Viewing Habits

By
MERLE S. JONES
President
CBS Television

AFTER a decade of television, it would be reasonable to expect that the unprecedented hold which the medium has had on the American public would begin to wear out. But nothing of the sort has happened. Nor are there any indications that the pattern will change during the coming year.

Indeed industry estimates predict that set ownership will climb a substantial 5%, raising the number of television homes to 41,800,000, or 83% of the U.S. total. But even though this gain in raw circulation is impressive, it is outshaded by the forecast that the average television family in 1957 will continue to spend more than five hours a day watching television entertainment, information and education.

With viewing remaining at the same high level, and with the addition of 3 million new television families, America by the end of 1957 will be spending 209 million hours a day watching television—4½ million more hours per day than in 1956.

The public's increasing commitment to television carries important implications for both the broadcaster and the advertiser—on the one hand the acceptance of greater responsibilities, and on the other, recognition of greater opportunities.

We at CBS Television will seek to meet this greater challenge by adhering to the basic programming policy which won for the network in 1956 a leadership unmatched in the history of the medium—a monthly average of 8 out of the Top 10 nighttime programs, 8 of the Top 10 daytime programs... and an audience virtually as large as those delivered by the other two networks combined.

In our opinion this unprecedented record stems directly from a two-fold policy—first, to create the best in entertainment, information, and public service programming; and second, to give each program a reserved spot on the schedule so that it can be presented at the same time on the same day, week after week.

This policy of program frequency and continuity springs from a recognition that man is a creature of habit with a recurring pattern to his activities week to week. As part of this routine, he not only watches television but develops the habit of watching the same programs week after week. Thus, CBS Televi-

sion has sought to mesh its program schedule into the normal behavior and activities of the television audience, so that each viewer will form the habit of watching certain programs on certain days at certain times.

But this faith in the value of regular week to week programming does not mean that the CBS Television schedule will remain unchanged in the future, any more than it meant there were no changes in the past. During 1956, for example, more than twenty new program series were introduced on the network, and undoubtedly a comparable number of new series will be introduced during 1957.

This commitment to a regular weekly schedule does not preclude the so-called "special one-time broadcasts." We believe in the merit of such broadcasts but only when they provide viewers with entertainment or information of sufficient value to justify a break in the viewer's normal routine. In other words, a special show must offer something special. Operating within this definition CBS Television in 1956 broadcast such special events as the Kentucky Derby and The Orange Bowl, "The Sinking of the Andrea Doria", the annual news review by CBS News foreign correspondents—"Years of Crisis," day and night coverage of the two National Conventions, the Election Night returns, such special public affairs programs as "The Secret Life of Danny Kaye", and such entertainment one-shots as "The Victor Borge Show."

We at CBS Television during the coming months will do everything possible to maintain our role as "pace setter of the networks." We hope to achieve this goal by strengthening our regularly scheduled program lineup, by presenting one-time broadcasts that are indeed special, and by further extending our efforts in the fields of education and information through such exciting series as the new "Odyssey." By so doing we hope to provide our advertisers with a still more effective means of reaching—and selling—their products to the largest audiences ever gathered by a medium of mass communication.

C.B.S. TELEVISION NETWORK

HUBBELL ROBINSON, JR.

Executive Vice President in Charge of Network Programs

Hubbell Robinson, Jr. was named to his post of vice president and director of CBS-TV network programs in 1951 when the web was reorganized into separate network operations for television and radio. He joined CBS in 1947 as a vice president in charge of network programs. Prior to his affiliation with CBS, Robinson was vice president and director of radio for Young & Rubicam from 1928 to 1944. He joined the Blue Network, now ABC, in 1944, as vice president and director of programs. Robinson moved to Foote, Cone and Belding as vice president in charge of radio in 1945. A native of Schenectady, N. Y., Robinson was graduated from Brown University. Following graduation he was a reporter on the Schenectady Union Star and the Knickerbocker Press in Albany. In 1928, he moved to New York and entered advertising.

SIG MICKELSON

Vice President in Charge of News and Public Affairs

Appointed vice president in charge of CBS News and Public Affairs in 1954, Sig Mickelson took over when the Radio and Television News and Public Affairs Departments were combined. Prior to that, he had served as director of news and public affairs for TV. He was reporter, then editor of the Sioux Falls, S. Dak., Argus Leader and newscaster for Station KSOO, Sioux Falls. He instructed journalism at Louisiana State University and was an assistant professor of journalism at Kansas University and the University of Minnesota. Mickelson joined CBS in 1943 as news editor of Station WCCO, Minneapolis, an outlet then owned by CBS. He served as director of news and special events, director of public affairs and production manager there. Late, in 1949, he transferred to New York to be CBS director of public affairs. Two years later he headed news and public affairs for TV. Mickelson was graduated from Augustana College, S. Dak., in 1934. Later, he received his master's degree at the University of Minnesota.

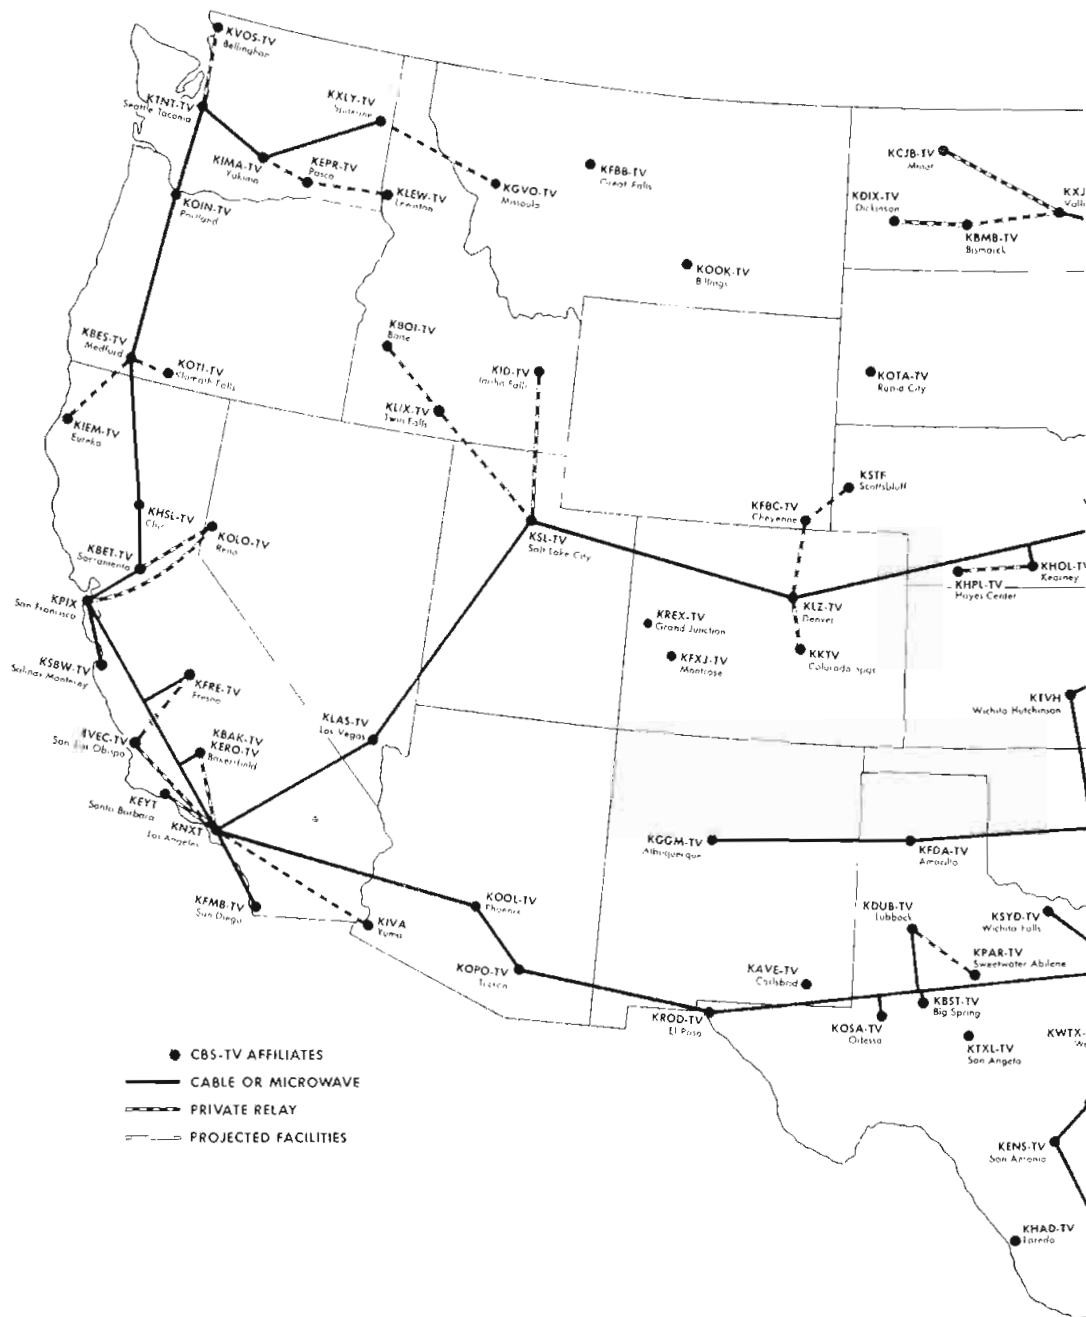

WILLIAM H. HYLAN

Vice President of Sales Administration

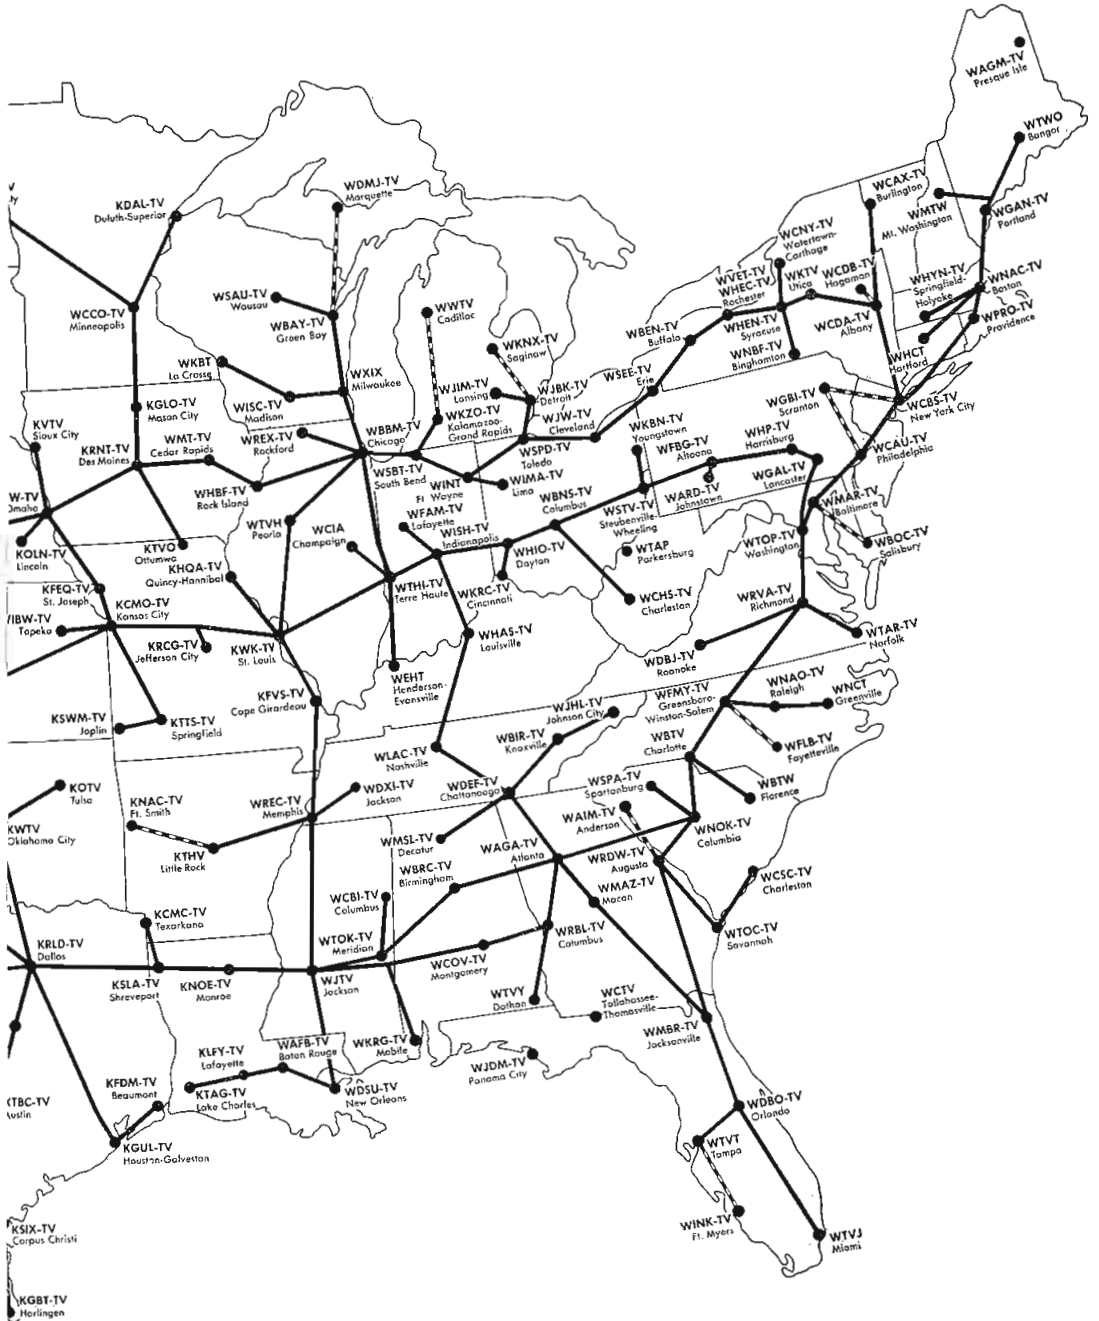

Associated with CBS for 19 years, William H. Hylan, vice president of sales administration since February, 1957, was named vice president in charge of network sales for CBS television in 1952. He entered military service with the Army after four years as an account executive with CBS Radio Sales from 1937 to 1941. In 1945, he returned to CBS radio and was appointed assistant to the director of station administration. He switched to the network's new TV sales staff as an account executive in 1948. In 1951, he was named assistant sales manager. Early the next year, Hylan was appointed eastern sales manager. He was born in New York City in 1905 and spent a good part of his youth as a resident of the Island of Puerto Rico. Hylan was graduated from Yale University.

profit

As television ended its first decade two programs eloquently testified to its boundless vitality: the regularly scheduled weekly dramatic series *Playhouse 90* and the hour-and-a-half one-time special broadcast, "*The Secret Life of Danny Kaye*."

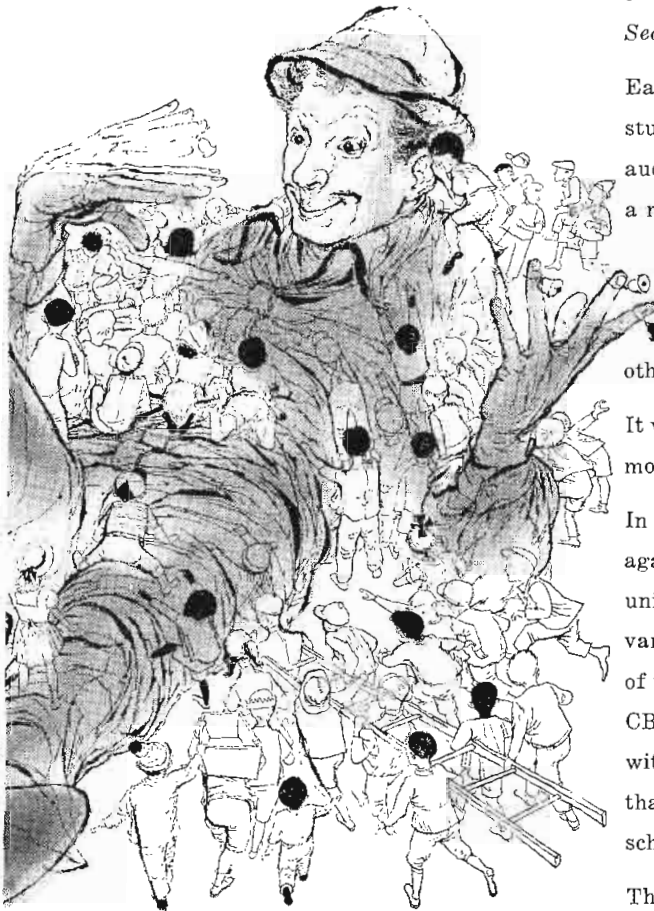

Each presented a great actor in a stunning performance, won vast audiences and unstinted praise as a major television contribution, took infinite pains to produce. One yielded its producers a tangible financial reward; the other nothing but critical acclaim.

It would be difficult to say which was more profitable to television.

In these two programs the medium again brilliantly demonstrated its unique capacity to respond to the varied needs, interests and aspirations of the American people. Broadcast on CBS Television, they were produced with the enthusiasm and imagination that characterize the entire program schedule of the network.

This kind of programming for profit helps explain why Americans spent more time watching television during 1956 than during any previous year, and why they spent as much time watching CBS Television as the other two networks combined.

Spectaculars, Color Gain Firm Hold on Viewing Public

By
EMANUEL SACKS
Vice President
TV Network Programs
National Broadcasting
Company

ONE of the most significant developments of the 1956-57 broadcasting season has been the success of the Spectaculars and other special shows injected in the regular schedule. This type of NBC programming, nearing the end of its third season, has become progressively more attractive to both the public and the advertiser.

The bare statistics tell the story:

The Spectaculars and the one-shot programs this season are averaging higher audience ratings than in either of their first two years.

These special shows on NBC television averaged a 42 per cent higher rating in the Fall than the average of all nighttime shows scheduled on a regular basis on the three television networks.

Of the 169 Spectaculars presented in the last three seasons, 40 per cent, or four out of ten, achieved Top Ten rankings in the Nielsen ratings.

The Spectaculars alone, separately rated from the special one-shot programs, showed an 18 per cent audience gain for 1956-57 over the previous season.

One of the Spectaculars, "Jack and the Beanstalk," attracted the largest audience ever to view a 90-minute show—55,000,000 viewers, a 75 per cent greater audience than the average of the three main competing shows.

The Spectaculars and the special programs apparently have won a permanent place in the plans of major advertisers. This is a statement which can be made with some confidence on the basis of inquiries at hand and interest in our plans for these programs in the 1957-58 season. Advertisers looking for special power, special impact and special merchandising find the answer in the Spectaculars and the special one-shot programs.

In addition to the Specials, we will always continue to maintain a strong schedule of regular daily and weekly programming. We recognize that regular programming, building strong audience interest and habit, is the backbone of our programming.

Although NBC remained the only network broadcasting Spectaculars and special programs on a regular basis at the outset of 1957, indications are that other networks may yet return to them. This is a development foreshadowed by heavy advertiser interest and public demand.

In any compilation of the factors which contributed most to the success of the Spectaculars and special programs, two stand out: the excitement of color and live television. Color is catching on and taking hold with the public and live programming is proving an enduring audience attraction.

The added beauty, emotion and realism of color TV is now on tap every night of the week. Color adds still more excitement to this special event type of programming and accelerates audience building. In the process, it brings the program added promotional power.

At NBC we believe that television is fundamentally a live medium. This remains the major fact-of-life in our industry despite the influx of Hollywood films.

The success of the Spectaculars, the fact that such shows as Perry Como and Steve Allen are doing better than ever on live programs, the new viewer interest created by "Playhouse 90" on CBS through some of its live presentation of television originals, prove that audiences are attracted by live programming—by the immediacy, the excitement, the right-before-the-eyes quality of a live show.

This does not mean that there isn't plenty of room for film in television. Some of the most popular shows on all networks are on film. Also, this doesn't overlook the fact that "The Wizard of Oz," presented in prime time as a network show, drew a huge audience. But how many features are there which have the wonderfully timeless appeal of that show?

The networks, together, present some 12,000 hours of programming a year. Hollywood's yearly film output is less than one-tenth of this total.

The future lies in live programming. We must continue to build new live shows. We must continue our search for creative talent—writers, producers, entertainers. We must recruit from all areas of show business. We must go on trying out new ideas. We must emphasize in television the quality which is unique to that medium. It was this quality which gave TV its fantastic rate of growth.

N.B.C. TELEVISION NETWORK

ROBERT E. KINTNER

Executive Vice President, TV Network Programs and Sales

Robert E. Kintner was elected to his present post of executive vice president, TV network programs and sales, in February, 1957. He had been named an executive vice president a month earlier. Kintner, former president of ABC, is a graduate of Swarthmore College. He joined the editorial staff of the New York Herald Tribune, later becoming Washington correspondent for that paper. With Joseph Alsop, he wrote a nationally syndicated column. Kintner has co-authored several magazine articles and books. In 1941 he joined the Army, serving overseas, and with the War Department Bureau of Public Relations in Washington. He joined ABC as VP in 1944 with supervision of programming, public services, public relations and advertising. In 1946 he was elected executive VP, and president in 1949. He resigned in October, 1956.

THOMAS A. McAVITY

Executive Vice President, Staff

Appointed to his new post as executive vice president, staff, on Feb. 6, 1957, Thomas A. McAvity was formerly vice president, TV network programs and sales. He first joined NBC in 1929 as a producer, then left in 1932 and for several years supervised the production of radio programs as vice president of Lord and Thomas' radio department. From 1937 to 1941, McAvity was manager of their Hollywood office. He later concentrated on free-lance productions and packaging, rejoined NBC in 1951 as director of talent and program procurement for TV. McAvity was appointed national program director in 1952. He was elected VP of the TV network programs division in 1954 and a year later was made VP in charge of the TV network. A native of St. John, N. B., McAvity attended Ridley College in Ontario and McGill University in Montreal.

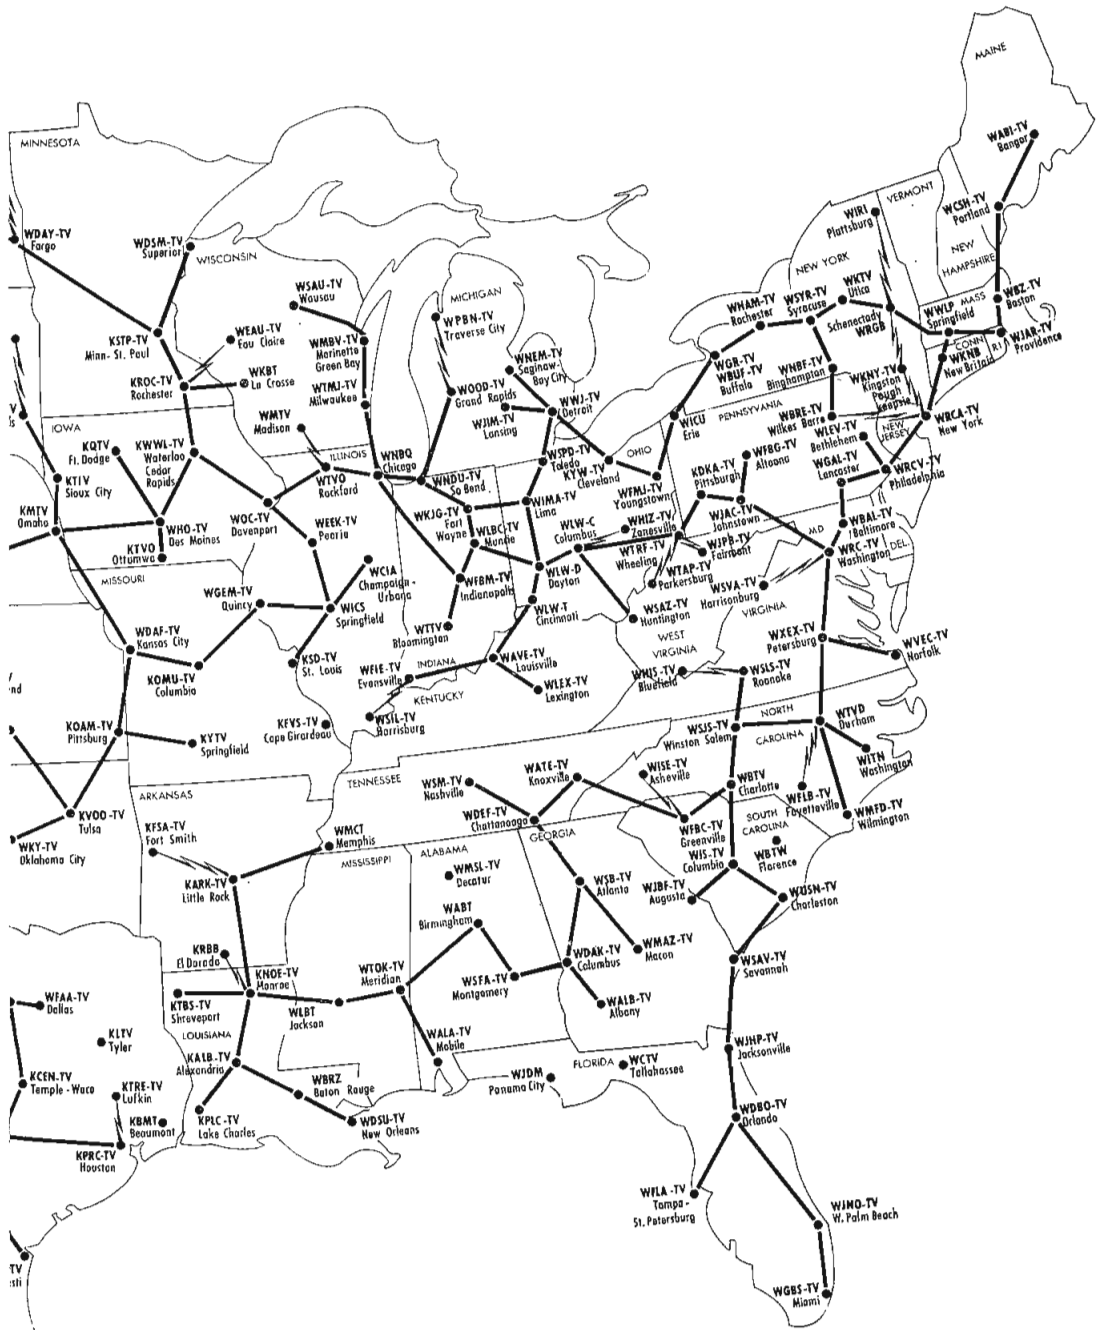

WILLIAM R. GOODHEART, JR.

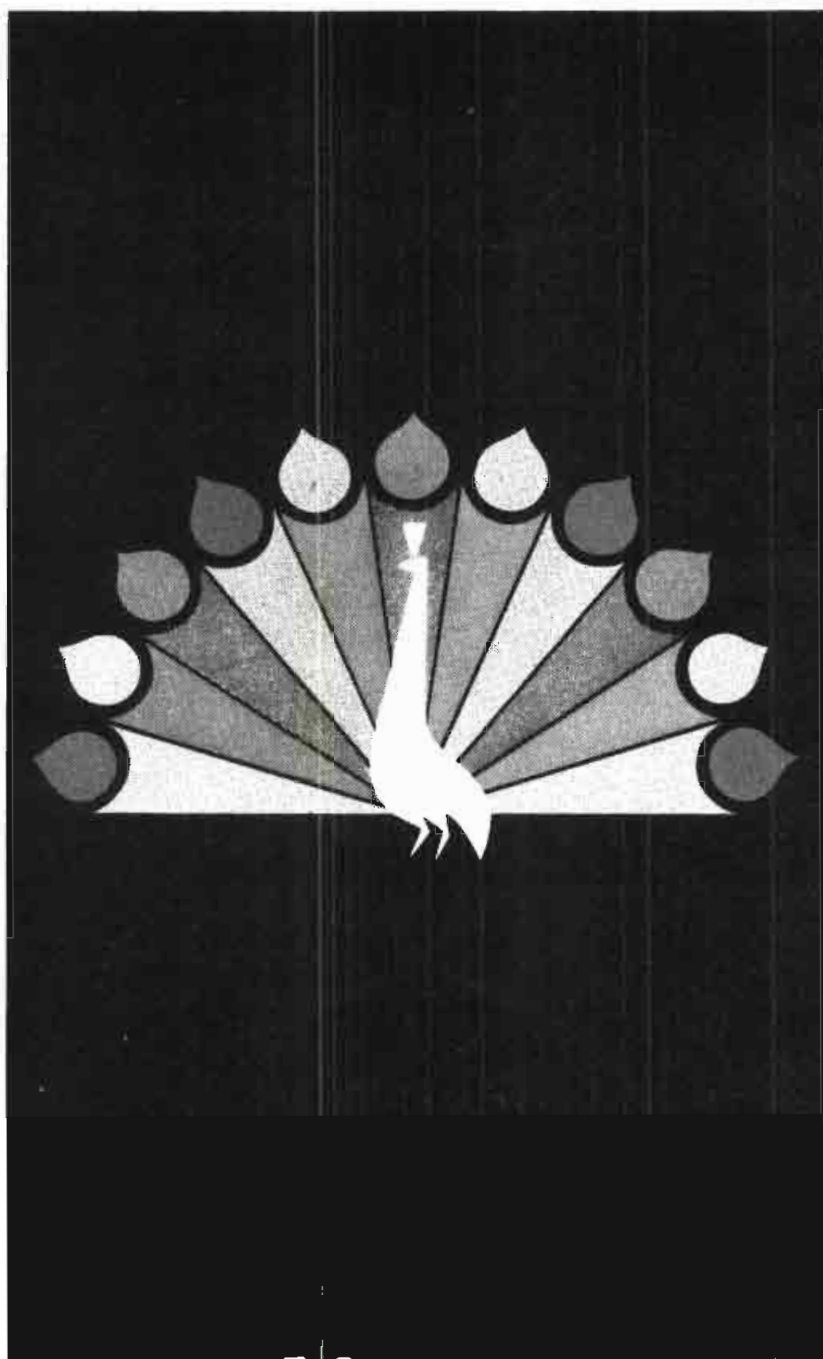

Vice President, Television Network Sales

William R. Goodheart, Jr. was placed in charge of sales for the NBC television network in September of 1956 and was named a vice president the succeeding month. Goodheart joined NBC in May of 1956 in an executive capacity. For almost a quarter of a century, he discovered, developed and managed stars in the entertainment field. Goodheart co-founded the Music Corporation of America in 1924. He retired from MCA in 1943 as an executive vice president and established the Goodheart Farms at Eaton, Ohio, specializing in Aberdeen Angus cattle and Hampshire hogs. Since coming to NBC, he conceived the "NBC Bandstand" program series of live big-name orchestra music on both radio and TV. Born in Chicago, Goodheart attended the Universities of Chicago and Illinois.

NTA Plans Future Based On Advantages Of Film Web

By
ELY A. LANDAU
President
NTA Film Network

THE time honored business advice "Find a need and fill it" probably sums up the reasons "why" of the NTA Film Network as well as any maxim in the book.

That's if you don't use the word "find" in the sense of "discovery," of course. We were hardly the first to discover the need for a television network linking its affiliates by the use of film, unshackled by the built-in restrictions and heavy cost burdens of coaxial cable.

Nor can we in these, our incipient stages, accurately measure how completely we fill this need. We can, however, pause for a deep breath after a hectic yesterday, and venture a look at tomorrow as viewed from the vantage point of today.

I have repeatedly referred to America's fourth television network as a lower case network with an upper case tomorrow. In that tomorrow, I am convinced, the archaic aspects of network broadcasting, virtually unchanged since the mid-Twenties, will be drastically overhauled and updated. The television network of this tomorrow will be a modernized version, primarily a film network, and we of the NTA Film Network are pointing for this future in the hurly-burly of our busy today.

The Network's status report is just as simple as its compilation was complicated. It seems like yesterday . . . and it was, as a matter of fact, a few short months ago . . . that we decided to organize a network that would give its stations an additional source of strong, competitive programming and national advertising revenue; that would offer to the advertiser and his agency a new, convenient marketplace to buy nationwide coverage at a realistic cost; and a network which would elevate the program standards of television, offering finer entertainment to the television household of the nation.

We set October 15th, 1956 as our target date, and we met our deadline. As of April 1st, the Network will be operating under its first commercial auspices, as the sponsorship by the Warner-Lambert Pharmaceutical Company, one of the country's most respected advertisers, goes into effect.

Even in these, our "lower case" days, the NTA Film Network will be furnishing commercial service to 128 television stations from coast to coast covering with their combined signals over ninety percent of America's television homes.

And tomorrow? Mindful of the fact that tomorrow, despite the popular saying to the contrary, always comes, we are making earnest preparations for its advent. An hour and a half children's spectacular, our next program project, is nearing completion. Eleven series of half hour programs are in varying stages of development at Twentieth Century-Fox and Desilu. We are, in a word, arming ourselves for an expanded tomorrow, stepping up our programming support to our affiliates and the communities they serve, thus creating new television advertising opportunities for America's already television conscious advertisers.

We feel that we are already serving the public by broadening the base of the television medium, widening the program horizons on channels already available. With the increase in the number of stations a virtual certainty, these top programs will be available to more and more people.

Mindful of the fact that service to the public is TV's primary reason for existence, our Network will constantly seek ways and means to further that service. We believe that the phrase "public service programming" can be consonant with excitement and entertainment, and we are not unmindful of the challenge such programming represents.

In the years to come we confidently expect "NTA" to loom more and more importantly in the television spectrum as network television advances.

NTA FILM

NETWORK

Speaking of Launching

This is a model of the man-made satellite, which will encircle the earth in this international Geo-Physical Year, travelling at a speed of 18,000 miles an hour, in an orbit 300 miles away in space.

NTA

New Concepts . . .

Just as the satellite is a totally new concept in aerodynamics, so is the NTA Film Network in the dynamics of television air.

To wit: coverage of about 90% of America's television homes . . . at an amazingly low cost that is science fact, not fiction. With the flexibility of "spot" and the prestige of network.

It seems to be working, too, inasmuch as the NTA Film Network went on the air on October 15th, 1956, with over 100 television stations and completed its first commercial sale effective April 1st, 1957, in 129 markets.

Everything considered, a rather good orbit to be travelling in.

FILM NETWORK

Tomorrow's TV Network today

Married one year . . .
and so compatible!

A year ago
 Channel 6 and
 the ABC Network
 joined together in
 the billion dollar
 San Diego market.

The happy result
 is a sensational
 ARB rating . . .
 and a real
 strong pulse . . .

Your cost per M
 continues down
 when you buy
 the No. 1 buy . . .
XETV.

**GOING PLACES

White Columns

A symbol of broadcasting integrity

"White Columns" is the home of WSB Radio and WSB-TV. To the people of this region, "White Columns" is more than a beautiful building. No other broadcast source or combination, has such a vital influence in Atlanta and Georgia.

Thirty-four years of programming in the public interest has earned for these stations an audience confidence and respect that means much to advertisers. It means a *pre-conditioned* acceptance of your programs—even those still in the planning. It means an audience *more receptive* to products and services advertised on WSB Radio and WSB-TV. These are *tangible assets*... with a record of higher-than-anticipated dividends to sponsors.

The Champ Is Still Champ!

4 OF 5 TOP NIGHT-TIME SHOWS

You say that's not enough? Then how about 20 out of 35 top night-time shows? (Nov. '56, A. R. 8.)

CHAMP IN THE DAY-TIME, TOO!

16 of top 25 week-day strips . . . including Buckskin Bill, whose top rating is a full 7 points above the No. 2 day-time show. If you want a breakdown . . .

8 OF 10 TOP MORNING SHOWS

and 8 out of the top 15 afternoon shows, for a clean-sweep victory, morning and afternoon.

6 WINNERS IN 6 NATIONAL CONTESTS

WAFB-TV is tops in merchandising, too. Four firsts, one second, and one "top four" in these shows; 1956-57 "Frank Leahy Show" . . . "The Millionaire" . . . "Screen Gems Programs" . . . "Lucy Show" . . . 1956 Billboard Promotion . . . 1955-56 "Frank Leahy Show" . . . six more reasons for you to sell more in Baton Rouge on WAFB-TV.

KNOE-TV OPENS DOORS TO 280,000 HOMES

Your cost-per-viewer is extremely low in the tri-state coverage of KNOE-TV. Of the 280,000 sets we 'boom into' in North Louisiana, West Mississippi and South Arkansas 145,000 of them are unable to get any other station. Set count is growing all the time, too, as more and more industry moves into this area where income has always been high from oil, natural gas, agriculture, cattle and industry.

Top Shows From 3 Networks

Check the survey reports for the top shows on all three networks . . . then check our program schedules. You'll find the first 25 in the industry on KNOE-TV . . . plus the best from the syndicated film field.

Powerful Local Programming

Name your product and we have a strong local participation show to sell it . . . News, weather, sports, music, variety, farm or cooking and homemaking.

* 145,000 Homes Unduplicated Coverage

the map tells the story— great sales potential

WMAR-TV's coverage area encompasses more than 2,500,000 homes. In the Baltimore area alone there are over 713,000 television sets*, and Channel 2's signal extends far out into the rich market surrounding the area, thereby providing an added potential for advertisers using WMAR-TV. *Baltimore Television Circulation Committee Report

In Maryland, most people watch

The background of the entire advertisement is a dense, repeating grid of Jefferson nickels. Each nickel is shown in profile, facing right, and is slightly offset from the others to create a three-dimensional effect. The grid covers the entire page, with a dark rectangular box in the lower-left quadrant containing text and logos.

Spend Jefferson Nickels
on a Jefferson Standard Station...

The "MARKET MAKERS" made market out of North Dakota!

Now . . . ONE CALL BUYS THE NORTH DAKOTA MARKET

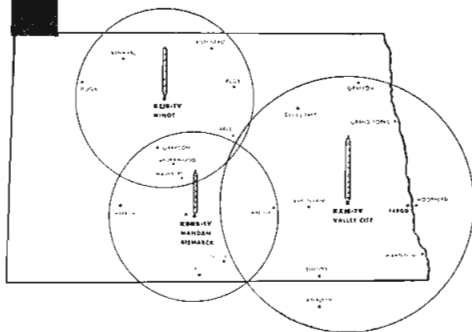

They're spread out in booming North Dakota, but they've got Cadillac buying power from oil, wheat, farming and distribution jobs—a population equal to Seattle, Minneapolis, New Orleans or Providence (and more buying power than most of them.)

What's the easiest, most impressive, most economical way to reach this boom baby? Buy television on the "Market Maker Stations"—the perfect case of *one* television operation taking over 700,000 people scattered over 75,000 sq. miles and making a single market of them.

Here's how economically you can cover North Dakota with the "Market Maker Stations." The open rates below include a 15% discount for using all 3 "Market Makers." (Use two, and get a 10% discount):

	10 sec.	1 min.
AA (7:30-9:30 PM)	\$64.00	\$127.50
A TIME	48.00	96.00
B TIME	35.00	70.00
C TIME	23.00	47.00

Additional frequency discounts to 25%.

ONE CALL . . . ONE CONTACT . . . ONE CONTRACT

Delivers 80% of North Dakota and plenty of gravy in Minnesota and South Dakota, too!

ONLY POSSIBLE BY BUYING THE . . .

MARKET MAKER STATIONS!

• CBS Primary • N. D. Broadcasting Co. • 4000 Front St. • Fargo 4461

WHIO-TV

Fair Game For Smart Sponsors

1 FOR THE MONEY

Three States, 41 Counties, 747, 640 TV Homes! That's what NCS Market Coverage reports for WHIO-TV, the No. 1 station in this great market. High tower (1104 ft.) and maximum power give it proven superiority.

2 FOR THE SHOW

WHIO-TV programs keep dials tuned our way. Pulse consistently rates us with 13, 14 and even 15 of the top 15 weekly shows.

3 TO GET READY

Stock your dealers before you sing out in this market! Sales Management calls area retail sales at \$3,361,973,000.

4 TO GO

How? Easy! Call our National Rep—Gamester George P. Hollingbery!

It takes the

RIGHT

two!

IT'S A FACT! With the *right two*—WFBG-TV, Altoona and Pittsburgh—you get 76,701 *more* TV homes. In this area—day and night—seven days a week—WFBG-TV delivers average audiences 30 1% greater than Johnstown, 71 4% more quarter-hour firsts. Your BLAIR-TV man has the proof. ARB, November 1956, ARB Altoona Coverage Study, March 1956

cover PITTSBURGH
...cover the TRI-STATE AREA
with
KDKA-TV

Channel 2 has always been first in the rich Pittsburgh market! No other station can deliver more viewers in Pittsburgh and the Tri-State Area. For facts on far-and-away the highest tune-in you can buy in *this* wealthy market, call John Stilli, KDKA-TV Sales Manager, at EXpress 1-3000.

Only KDKA-TV delivers the *entire* Pittsburgh Trading Area. That's why in Pittsburgh no selling campaign is complete without the WBC Station:

WESTINGHOUSE BROADCASTING COMPANY, INC.

SITTING

ON A

\$4 BILLION MARKET

WBAP-TV is sitting right in the middle of the lucrative Fort Worth-Dallas market, delivering a stronger signal and stronger programs day and night to these two vast metropolitan areas. In addition WBAP-TV also delivers a 53 luxuriant county coverage area in Texas and Oklahoma.

When you buy spots or programs, buy the full market area, buy WBAP-TV.

WBAP-TV 53 COUNTY MARKET TOTALS

POPULATION	2,671,900
FAMILIES	811,400
1955 EFFECTIVE BUYING INCOME (NET DOLLARS)	\$4,012,343,000
1955 EFFECTIVE BUYING INCOME PER FAMILY (NET)	3,495
1955 RETAIL SALES	3,188,047,000
FARM POPULATION	397,400
NUMBER OF FARMS	100,934
GROSS FARM INCOME	425,349,000

First in Houston

radio and television

KPRC and KPRC-TV Dominate the Houston Market

KPRC RADIO has been the first choice of Houston Gulf Coast listeners for more than 30 years. KPRC-TV, now over five years old, is also first choice with these same people. More than a time-honored habit, this loyalty is indisputable proof of KPRC's experienced leadership and consistent fine quality.

**PARDNER STATIONS CORRAL RICH, SCATTERED
 POPULATION INTO ONE BIG PACKAGE**

now covering more than 250,000 sets!

KDUB stations

CBS

THE COMBINED AREA covered by KDUB-TV, KPAR-TV and KBST-TV encompasses a population equal to many "major" metropolitan areas. Advertisers are quick to realize that such agricultural areas depend more on TV for entertainment than do big-city viewers. This microwave installation knits such an area into one big market.

Oil-rich Casper, Wyoming Invites You to share its wealth

You may install your own pipeline into Casper Wyoming and siphon off your share of the profits.
Casper's Share-the-wealth situation is indicated in the February 15 issue of U S News & World Report. Its special study indicates that Casper ranks 2nd of all U S cities, regardless of size, in terms of how much income is earned by the average worker. If you have something to sell, you can sell it profitably in Casper. To the advertiser, CASPER is CAPTIVE audience thanks to Casper - only TV station

All
eyes are on
WAPA-TV
CHANNEL
4
Puerto Rico

Yes, all eyes are on WAPA-TV of San Juan, Puerto Rico.

1956 was our best year, and 1957 will be even better, because:

WAPA-TV can deliver the largest audience from 1:00 to 7:00 PM at the lowest cost per thousand TV homes.

WAPA-TV has new and enlarged program facilities

WAPA-TV can give you better service than ever before

And because of many other factors which are important to good broadcasting.

Services Offered: The Keystone Broadcasting System is a transcription network which services local radio stations in their programming with transcriptions, with KBS making their time available to national advertisers and their agencies at an attractive network package rate.

At the present, there are more than 800 Keystone affiliates, located in towns with 10,000 to 250,000 population where they reach both the small town and rural markets. For the most part, these Keystone stations serve those areas which are beyond clear reception areas of the large metropolitan radio stations or other high power stations. The number of radio homes in the Keystone Primary Coverage Area total more than 25,000,000 based on Nielson Reports, or one-half millivolt where the Nielson Report is not available.

Success of Local Programming Is Based on the Personal Touch

By
DICK LAWRENCE
General Manager
World Broadcasting
System

IN keeping with the sweeping trends in radio programming and selling today, in which the emphasis has returned to "local" programming creation, "local" merchandising and selling, we at World Broadcasting System long ago started to broaden the original concept of our services.

We realized, by talking to many of the broadcasters among our 1,000-odd world affiliated stations, that what was needed was much more than the old idea of a "music library" to fall back on. What they required, it became increasingly clear, was a wide-ranging "sales and program service" designed to give them individual "identity" in a community—an identifiable personality—as well as scores of specialized sales tools.

Our emphasis today has switched largely to the development of new "program aids" of all sorts, tailored to meet the needs of creative broadcasters who have reshaped their program schedules to meet local listening tastes.

Today, we are supplying such packages and program aids, as part of the World Sales & Program Service, as:

(1) A wide variety of service-type radio features. These include special time signal jingles, weather jingles, tune-in jingles (to build station listening)—all of which can enhance a station's service to its community and its advertisers.

(2) A long list of programming features. These include specially created musical signatures, formats, lead-ins and many other devices for use in locally produced programs of community-wide interests, sportscasts, special feature shows for homemakers, seasonal and holiday events. These are designed to give increased "production values" of a professional calibre, and represent the sort of values few broadcasters are in a position to afford on a locally-created basis.

(3) Special selling jingles, of a wide range, in which a local advertiser can insert his selling message. These are produced with top musical and creative talent by World. In fact, World has jingles for over 150 different categories of advertisers, which cover the bulk of all the advertising a local station usually carries. Some are even designed to operate as special seasonal packages, keyed to themes of spring cleaning, back-to-school, or other activities.

(4) Special programs, often of a seasonal nature, featuring such star personalities as Gene Lockhart, Raymond Massey, Robert Montgomery, and others.

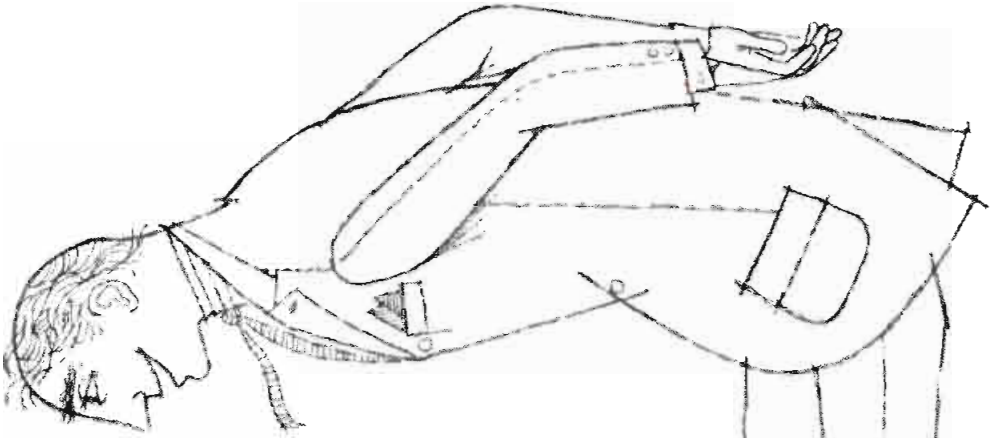

Of course, we are still supplying custom musical recordings featuring many of the outstanding recording artists in America today, such as Doris Day, Peggy Lee, Sauter-Finegan Orchestra, Three Suns, David Rose, Xavier Cugat and Harry James. These recordings still represent an important segment of our over-all program activities.

A good example of successful program building through World Broadcasting System has been our "Radio's Voice of Fortune" series. It is actually a major program package, complete with everything from program blueprints to promotion and merchandising materials, and has been designed basically to act as an all-day audience-builder for radio stations.

"Radio's Voice of Fortune" is a telephone quiz show which centers on identification by radio listeners of the recorded voices of famous personalities. These are actually well known people—actors, actresses, sports figures, leaders in business and government, and others—whose names are instantly recognizable, but whose voices usually baffle the memories of the average listener.

This in itself would be a sizable package for any station, but World has backed it with one of the most extensive merchandising and promotional campaigns in the history of our firm. There is a wide range of point-of-sale material, posters, mailing pieces and other promotional devices available to the advertiser who really wants to call maximum attention to his show.

All of our activities today are really centered on a problem I mentioned earlier—the creation of a separate, distinct and "personal" identity for radio stations today. We feel that such an identity is vital in order that a station attract new business and new listeners.

WHAT'S THE GIMMICK?

It's the little things that make a big difference; the *extra* stuff that sales are made of! Modern merchandising. What you see here is just a sample of the merchandising extras that back up every CBS Television Film Sales property: records, comic books, games, novelties, toys, jewelry, self-liquidating premiums. And there's audience promotion too... in specially-designed kits. *Everything* the advertiser needs to get his show off to a fast start and keep sales rolling. Little things. But they're sales-clinchers when coupled with CBS Television Film Sales' top-rated syndicated films.

CBS TELEVISION FILM SALES, INC. *Distributing Amos 'n' Andy, The Gene Autry Show, The Range Rider, Cases of Eddie Drake, Life with Father, Files of Jeffrey Jones, Fabian of Scotland Yard, Adventures of Long John Silver, Annie Oakley, Buffalo Bill, Jr., San Francisco Beat, The Whistler, Navy Log, Assignment Foreign Legion, Under the Sun, Bruce Eganle, Terrataors, Whirlybirds and Newshlm.*

1957
IS THE
BIG
YEAR
FOR
MGM-TV

*...for
3
big
reasons!*

1

The famed M-G-M feature film library continues to amaze the television industry with its fabulous performance record—highest ratings from coast to coast—attracting new advertisers to spot TV and winning higher rates with upped billings for every station.

2

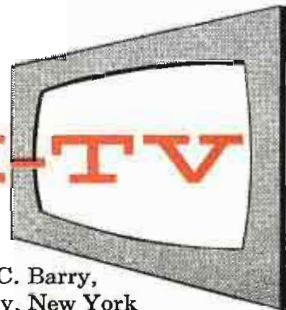

For the first time, MGM-TV is producing films for television. From more than 1500 M-G-M properties, several are being adapted into TV series for the 1957-58 fall season. The huge physical and technical resources of the greatest studio in the world will be behind these films.

3

Television commercials and industrial films are now being produced by MGM-TV, with the entire facilities of the M-G-M Culver City plant available to advertisers and their agencies . . . including an animation department that has won many awards for its "Tom and Jerry" and other cartoons.

Top Quality Professional Productions
To Suit The Budget

We Are Professionals

TV and radio commercials can be purchased at bargain prices by shopping around — but a bargain isn't a bargain if top-flight quality is lacking.

Let Song Ad Productions prove its creative work will equal the professional standard being set by your agency. We're creating new successes every day — sharp... entertaining... sales-wise animated and live action tv films and, of course, our famous musical commercials for radio.

**The direction**—of any film is a complex procedure where experience plays an important part in obtaining the desired effects. And so it is in the film processing laboratory.

At Precision, expert guidance through each phase of the processing operation assures producers, cameramen and directors the finest possible results.

All of which leads to another form of direction: West of 5th Avenue on 46th Street in New York to Precision. That's the right direction for you wherever you are and whatever your film processing problem.

In everything there is one best...in film processing, it's **Precision.**

# ASCAP MUSIC

**... the music of America** ... has been created for more than forty years by the skilled professional music men and women whose performance rights are represented by the Society. These music people have created a repertory that covers every phase of our musical literature. And this prime ingredient of our nation's vast entertainment industry is readily available through a single ASCAP license.

THE AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS  
575 Madison Avenue, New York 22, New York

Issued with copyrighted ACI SURVEY for week ending January 3, 1957.  
Office of Research, Inc.

**A . S . C . A . P .**  
By **PAUL CUNNINGHAM**  
President

**T**HE American Society of Composers, Authors and Publishers serves our nation's television and radio broadcasters in the clearance of music copyrights for the commercial performance of its varied and extensive repertory.

Through the simple machinery of an agreement between the licensee and our society, acting on behalf of the writers and publishers of the nation's outstanding compositions, the licensee obtains complete clearance of the entire catalog of its members' works.

With a membership of more than 4000, ASCAP is proud of the caliber of music it makes available to the broadcasting industry, as well as every phase of the entertainment world.

The Society maintains headquarters at 575 Madison Avenue, New York City, with 24 branches throughout the country. Officers as of January 1, 1957, are:

|                    |                     |
|--------------------|---------------------|
| Paul Cunningham    | President           |
| Louis Bernstein    | Vice-President      |
| Otto A. Harbach    | Vice-President      |
| John Tasker Howard | Secretary           |
| Saul H. Bourne     | Treasurer           |
| George W. Meyer    | Assistant Secretary |
| Frank H. Connor    | Assistant Treasurer |

The Board of Directors is comprised of 12 writers and 12 publisher-members, elected biennially, the writers by writer-members, the publishers by publisher-members, for two-year terms. The directors are: Writers—Stanley Adams, Gene Buck, Paul Cunningham, L. Wolfe Gilbert, Oscar Hammerstein II, Otto A. Harbach, John Tasker Howard, Alex C. Kramer, A. Walter Kramer, George W. Meyer, Deems Taylor, Jack Yellen; publishers—Louis Bernstein, Saul H. Bourne, Irving Caesar, Frank H. Connor, Max Dreyfus, Bernard Goodwin, Donald Gray, Jack Mills, J. J. Robbins, Gustave Schirmer, Maurice Scopp, Herman Starr.

# ASSOCIATED MUSIC PUBLISHERS, INC.

By **CHARLES A. WALL**  
President and Treasurer

**A**SSOCIATED MUSIC PUBLISHERS, INC., a wholly owned subsidiary of Broadcast Music, Inc., serves the radio and television industry in the field of serious music. It is recognized at the present time as one of the principal publishers and exploiters of contemporary music in the United States and controls a very extensive and expanding catalog of orchestral, band, chamber, instrumental and choral works by foremost American and foreign composers. In addition AMP also represents exclusively in the United States many of the most famous serious music catalogs of Europe such as Breitkopf & Haertel and Schott of Germany, Schott and Universal Edition of England, Universal Edition of Austria and Switzerland, Eschig and Enoch of France, Union Musical Espanol of Spain, Suvini Zerboni and Sonzogno of Italy, and many others.

AMP is also the sole selling and exploitation agent in the United States for serious works published by Broadcast Music, Inc., and BMI Canada, Ltd. All performing rights are cleared through BMI.

The Board of Directors of the company are as follows:

Sydney M. Kaye, Chairman of BMI Board, Chairman; Carl Haverlin, President of BMI; William S. Hedges; Paul W. Morency; J. Harold Ryan; Charles A. Wall, President and Treasurer.

Officers of the company are: Charles A. Wall, President and Treasurer; Karl Bauer, Vice President; Richard French, Vice President; Benjamin V. Grasso, Vice President; Robert J. Burton, Secretary.

Foreign and domestic music catalogs represented.

# BROADCAST MUSIC, INC.

By **CARL HAVERLIN**  
President

---

**B**ECAUSE it expresses our philosophy in 1956 just as emphatically as it did in 1955, we are repeating below our statement in last year's RADIO ANNUAL AND TELEVISION YEARBOOK:

During each day of the seventeen years of its existence Broadcast Music, Inc., has adhered steadfastly to one basic principle—competition is healthy and necessary. Because of this credo, BMI operates as a competitive force in the field of performing rights. Because it believes in competition, BMI operates in a manner intended to benefit all composers, all writers, all music publishers, all users of music.

The result has been to establish an open door and an open market place for all creators of music and for all publishers of music. Benefits of the BMI policy continue to flow not only to well established publishers and writers but to the newcomers who have come into the field since the creation of BMI.

In order to maintain a constantly growing source of music and to provide a steady challenge to the progressive composer, writer, and publisher, BMI has devoted its attention to all types of music. As a result, national, indeed world-wide, interest has been focused on fields of music once considered geographically limited or intellectually esoteric. The resultant democratization of musical elements has developed a truly American music, one which is made up of many forces, popular, country and Western, rhythm and blues, concert. Because of this, the creators and the developers of these musical forces have found new opportunities.

Today, BMI is proud of the fact that so many publishers, composers and writers have found inspiration and remuneration in the open market place.

BMI begins its eighteenth year of existence as it did its first . . . dedicated to the one basic principle—competition in music is as healthy and necessary as in any other field of American endeavor.

**OFFICERS OF BMI:** Carl Haverlin, President; Sydney M. Kaye, Vice-president and General Counsel; Robert J. Burton, Vice-president in charge of Publisher and Writer Relations, Secretary; Charles A. Wall, Vice-president in charge of Finance; Roy Harlow, Vice-president in charge of Station Service; Glenn Dolberg, Vice-president in charge of Station Relations; Jean Geringer, Vice-president, Foreign Relations; Harry P. Somerville, Vice-president, Non-Radio Licensing; Robert Sour, Assistant Vice-president, Publisher Relations.

**DIRECTORS** (elected annually): Sydney M. Kaye, Chairman; J. F. Brauner, John Elmer, Joseph E. Baudino, Carl Haverlin, William S. Hedges, Herbert Hollister, Leonard Kapner, Paul W. Morency, J. Leonard Reinsch, J. Harold Ryan, G. Richard Shafo and William Reagan.

**SESAC TRANSCRIBED LIBRARY**

THE COLISEUM TOWER  
10 COLUMBUS CIRCLE  
NEW YORK 19, N. Y.

# SESAC, INC.

By PAUL HEINECKE

President

**M**USIC, apparently, not only "hath charm" but also the eggshell quality of an atom bomb—and like atomic energy, requireth skillful and delicate handling.

During the past few years the world at large has been made acutely aware of the performance licensing organization. This is good. It's about time the curtain was raised and the music user be made to see what part such an organization plays in his professional life.

The shortsightedness on the part of music users stems from a lack of understanding as to what the music industry and specifically the performance licensing organization is all about. Creative works have always been subject to highjacking by the unscrupulous—those who are prone to exploit and profit without being willing to pay—in short, those who want to dance but not pay the fiddler.

The copyright system under which the United States presently operates is the result of thinking several hundred years old, and which eventually became manifest in this country in the copyright laws passed by twelve of the original states. The basic thinking in each was the encouraging of the arts and reserving to the creator the rewards of his accomplishment. Finally, Congress realized that it would have to do something about the protection of all American art forms and, so, followed the present Federal Copyright Act. The purpose of this law is to grant to the creator, a reward for his talent and ability, as well as to stimulate and encourage others equally talented. The law takes a definite stand and allows the creator and/or the copyright owner the privilege of protecting his work from unauthorized use.

While performing rights of musical works were first recognized in 1897, the first performing rights organization in the United States was formed in 1914, approximately five years after the establishment of the present Copyright Law.

When radio came into existence there was naturally a great demand for music. This industry, like restaurants, cabarets and hotel owners, took the position that they were not publicly performing copyrighted music for profit. It became apparent that without such groups as SESAC, the individual user would have to, if he were going to use a copyrighted work in public performance for profit, contact the individual copyright owner, who was in many cases the composer and/or publisher, in order to secure permission to use the work. These individual contacts would involve detailed paper work, and increased personnel. Secondly the performance cost would undoubtedly be higher if such fees had to be arranged between the copyright owner and the user. The performance licensing organization eliminated all the obstacles and based costs upon natural and sound economic phenomena.

We've got to realize that today we're faced with the problem of protecting those works which have already been created and of encouraging the creation of new material to augment the old. This is not done without effort. Talent to begin with is rare. When it is realized it is a treasure and when finally put to work it becomes a blessing. So don't ever expect to get it for nothing.

# HOW TO APPLY FOR FCC LICENSE

## Official FCC Procedure for AM, FM and TV Licenses

ANY qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a commercial standard (AM), frequency modulation (FM), or television (TV) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the Commission that they are legally, technically and financially qualified, and that operation of the proposed station would serve the public convenience, interest or necessity. The Communications Act also recognizes broadcasting as a competitive industry and invests the Commission with the responsibility of allocating facilities so as to provide a fair, efficient, and equitable distribution of radio service.

The licensing procedure is detailed in Part 1 of the Commission's "Rules Relating to Practice and Procedure," while station operation is covered by Part 3, "Rules Governing Radio Broadcast Services," and "Standards of Good Engineering Practice" for AM stations.

Following is a summary of the consecutive steps required in applying for authorization to build and operate a commercial broadcast station. The application procedure is substantially the same whether the facility sought is for AM, FM, or TV broadcast.

### Selecting a Frequency

Standard (AM) broadcast stations operate on "local," "regional," or "clear" channels. Local stations are of 100 to 250 watts power and serve smaller communities; stations of 500 watts to 5 kilowatts power cover larger centers of population and surrounding areas; stations of 10 to 50 kilowatt maximum power are for large area coverage, particularly at night. There

is no separate classification for AM operation by educational stations.

To determine whether an AM frequency is available for assignment in a particular area, it is necessary for the applicant to have a frequency search made by a competent engineer. The Commission's engineering personnel cannot undertake to make such studies for prospective applicants.

An applicant for a commercial FM station must specify a frequency available to the area to be served. The Commission has tentatively allocated geographic blocks of frequencies to accommodate Class A stations (community) and Class B stations (metropolitan and rural) throughout the United States. The demand for FM stations has not yet exceeded the supply of available frequencies. (The Noncommercial Educational FM Broadcast Service is a separate category with its own rules.)

An applicant for a new television station must request a channel assigned in the Table of Assignments to the community involved. However, a channel assigned to any community listed in the table can be requested for operation in any unlisted community within 15 miles of the listed community. Commercial TV stations are authorized for unlimited hours of operation and are of a single class with minimum power determined by the size of the principal city and maximum power dependent on antenna height and allocation zone. Channels are reserved for noncommercial educational TV operation.

### Applying for a Construction Permit

Once a prospective licensee has decided upon the type of station he wishes to apply for, the next step is to make application for a construction permit. This

application must be in writing on a form supplied by the Commission (Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers AM, FM, and TV broadcast). This form requires information about the citizenship and character of the applicant, as well as his financial, technical, and other qualifications to construct and operate a station, plus details about the transmitting apparatus to be used, and the proposed new service. Triplicate copies are required, one of which must be executed under oath or affirmation.

### Application Processing

Applications for new broadcast stations are twice reported by the Commission—when first tendered, and, again, when accepted for filing. Such an application is not acted upon until at least 30 days after public notice is given of its acceptance.

Applications are reviewed in their engineering, legal, and financial aspects by the Broadcast Bureau, which makes recommendations to the Commission.

Applications are, in general, processed in the order in which accepted for filing. There is a Temporary Processing Procedure for TV applications.

If, upon examination of an application, the Commission determines that there are no engineering conflicts, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued.

Any grant made by the Commission without a hearing is subject to protest within a period of 30 days, during which the protesting party may request a hearing. Within 15 days thereafter the Commission must determine whether the objection merits a hearing.

The law requires that, in general, final decision on noncontested applications be rendered within three months from the

date of the original filing, and within six months from the conclusion of a hearing in those cases which go through a hearing.

### Hearings

Where it appears that an application violates provisions of the Commission's rules and regulations; that interference would be caused to another AM or FM broadcast station; or that the minimum separation requirements for TV stations are not met; or if other serious questions of a technical, legal, or financial character are involved, a hearing usually is required before a final decision on the application can be made. Often a hearing is necessary because two or more applicants seek to use the same frequency or immediately adjacent frequencies with such a proximity of stations that excessive interference would result. In such instances, the Commission is compelled by law to accord a hearing to the competing applicants and to make a comparative judgment as to which, if either, should be granted.

If unable to grant an application, the Commission is required to notify the applicant and other known parties of interest as to the reason. The applicant usually is given 30 days in which to reply. After that, if the Commission is still unable to make a grant, a hearing is ordered.

In designating an application for hearing, the Commission gives public notice of the issues for the information of the applicant and other parties who may be concerned. The hearing notice generally allows the applicant a period of 60 days or more in which to prepare. Even after being designated for hearing, an applicant may sometimes find it possible to satisfy the issues by amending his application, especially if the apparent deficiencies are of an engineering nature.

Competing applications for the same facility are not considered if filed more than 10 days after public notice designating the prior application or applications for hearing.

Hearings are customarily conducted by an examiner. The hearing examiner has authority to administer oaths, ex-

amine witnesses and rule upon the admission of evidence.

Pre-hearing conferences are held both prior to and after an exchange of exhibits by the parties. The latter takes place at least 20 days in advance of the hearing date, the second pre-hearing conference is held at least 10 days before the hearing commences.

Within 20 days after the close of a record by the hearing examiner, each party and the Chief of the Broadcast Bureau of the Commission has the privilege of filing proposed findings of fact and conclusions in support of their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

In the event he wishes to contest the initial decision, the applicant or any other interested party has 20 days from the date on which the initial decision was announced to file exceptions and to request oral argument before the Commission. In all cases heard by an examiner, the Commission will hear oral argument on request of either party. After oral argument, the Commission may adopt, modify, or reverse the hearing examiner's initial decision. Within 30 days thereafter, any party involved may petition for rehearing.

If no exceptions are filed, and the Commission does not initiate a review of the hearing examiner's initial decision, the latter becomes effective 40 days after the issuance of the initial decision, unless otherwise ordered by the Commission. Court appeals can be taken within 30 days following announcement of the commission decision.

### Construction Permit

When and if an application meets statutory and other requirements, it is granted and a construction permit is issued. A maximum of 60 days from date of grant is provided in which construction shall begin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form (301) used in seeking initial con-

struction authorization. If the permittee is unable to build his station within the time specified, he can apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving the reasons. Upon completion of construction the permittee can engage in equipment tests.

### License

The final step is to apply for the actual license. All applicants for broadcast license are required to fill out Form 302 ("Application for New Broadcast Station License"). Applicants must show compliance with all terms, conditions, and obligations set forth in the original application and the construction permit. After applying for a license and receiving authority from the Commission, the holder of a construction permit can conduct program tests. A station license is then issued if no new cause or circumstance has come to the attention of the Commission that would make operation of the station contrary to public interest.

AM, FM and TV broadcast stations are licensed for the statutory limit of three years. Applications for renewal of license are made on Form 303, which is "Application for Renewal of Broadcast Station License."

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License").

Should the permittee or the licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License").

In certain cases a permittee or licensee can apply for a transfer of corporate control or an assignment of license by using form 316 ("Application for Assignment or Transfer—Short Form"). This form may only be used when the transfer or assignment is *pro forma* or technical in nature; i.e., where no substantial changes in interest occur.

an Ampex can keep your  
accountant happy too!

**it can cost less  
per hour  
than any other  
recorder  
you can buy**

A few cents per hour is all it costs in the long run . . . because year after year an Ampex continues to perform within original specifications (18,000 known hours of service in one actual instance). Inevitably it requires fewer adjustments and parts replacements than machines of lesser quality. And because an Ampex is the recorder that everyone wants, it maintains the highest percentage of its original value. For lasting economy, buy the best — buy Ampex.

## INCREASE YOUR AUDIENCE WITH **SIGALERT** NEW PUBLIC WARNING SYSTEM!

Sigalert is an instantaneous warning device that brings you confirmed bulletins from a responsible source (normally the Police Department) within minutes of an emergency. The Police radio dispatcher presses a special button at his control panel, which triggers your Sigalert receiver...automatically setting off alarms and recording the message on tape. Any existing police transmitter can be modified to transmit Sigalert bulletins. Your Police Department knows, or soon will know, how simple it is to reach you in a hurry with Sigalert...and through you a grateful listening audience. Write for complete details today. Give PICON (public interest, convenience or necessity) its true voice in your city.

Sigalert receivers are available in desk models (above) or console models (left) with built-in tape recorder or without cabinet for rack mounting.

# Radio-TV Set Sales Increase as Number of Outlets Grows

---

By  
JAMES D. SLOCREST  
Executive Vice President  
Radio-Electronics-Television  
Manufacturers  
Association

**T**HE radio-electronics-television industry continued to grow in 1956, but increasing competition in TV set-manufacturing sharply reduced the number of producers, though not the production.

A score of television receiver manufacturers dropped out of the running, though not of the industry in many instances; yet the year's net output fell only 5 percent or from 7.7 to 7.4 million units. Moreover, this decline was partially offset by the production of about 150,000 color TV sets with a value several times that of monochrome sets.

Home radios and portables continued to belie the prophecies of their decline in the face of TV competition and actually rose well above 1955 figures. Only auto sets declined in keeping with the lower car sales.

The output of all radios, except auto sets, increased about 15 percent in 1956 over 1955 with portables taking the lead by an increase in excess of 50 percent. Transistor-equipped portables were produced in quantity for the first year, numbering about 950,000. Auto sets declined about 25 percent due to the cut-back in auto production.

One of the most significant developments in the television market in 1956 was the emergence of the portable TV receiver. While approximately 250,000 were made in 1955, the 1956 figure totalled about 1.8 million. In 1957 this production may be nearly doubled. One obvious result of this trend has been a decline in the average price of the television receiver and an over-all loss in revenue from TV set sales.

The outlook for 1957 is that close to 7 million black and white television receivers will be made and sold and that color TV set sales will total several hundred thousand.

Two segments of the industry has been benefiting from the growing number of television and radio sets in use—now about 42 million TV sets and 150 million radios—and seem likely to continue to make gains in 1957. These are the component manufacturer who sells replacement parts and the jobber and service technician who handle and use them in home set maintenance.

The sale of radio-TV replacement parts rose to \$850 million in 1956 and is expected to rise another \$100 million in 1957. Set servicing costs are estimated at close to \$1 billion in 1956 and the total dollar value to manu-

facturers, jobbers, and service technicians at \$2.4 billion.

The size of the electronic industry, measured in terms of production and sales, increased 15 percent and approached \$5.9 billion at the factory level in 1956. When distribution, servicing, and broadcasting revenue are added, the industry's actual income amounts to nearly \$12 billion. Another 10 percent in growth is expected in 1957, and industry statisticians predict the entire income of the electronics industry will reach \$22 billion by 1966.

Military electronics in 1956 accounted for about \$2.7 billion—up 10 percent from 1955—and constituted almost half of the industry's factory sales. All indications are that the rise in military electronics will continue in 1957 as total defense expenditures increase, and the electronics percentage rises as guided missiles threaten to replace many types of military aircraft.

Industrial electronics, especially in automation techniques employed by many non-electronic as well as electronic manufacturers, made forward strides in 1956 and appeared headed for continued expansion in 1957 and thereafter. Equipment sales were estimated at between \$900 million and \$1 billion in 1956.

One of RETMA's most important projects in 1956 was to co-sponsor a pilot educational television system in the public schools of Hagerstown, Maryland. The intrinsic value of academic television as a teaching tool has been proved and this project will help educators to perfect new techniques for using this new audio-visual medium. It also will enable our industry to design better equipment for school use.

More and more industries have found profitable new uses for closed-circuit television which can provide actual visual data from places where it is dangerous, uncomfortable or impossible for human beings to go. Declining prices have spurred sales; in 1956 the sales figure approached the \$3 million level. Sales in 1957 are expected to more than double that figure.

**A List of Important Radio, Television and FM  
EQUIPMENT FIRMS**

**Acme Camera Corp.**

2704 W. Olive Ave., Burbank, Cal.  
Phone: Victoria 9-3144

President ..... Edward Furer

1957

# COMMERCIAL AM PROGRAMS OF 1956

(NETWORK)

The following pages contain a complete alphabetical listing of program titles of the four national radio networks' commercial programs heard during the 12-month period ending Dec. 31, 1956. Listing includes program title, sponsor and product, network and the advertising agency handling the account. Compilation has been made through the cooperation of ABC, CBS, MBS, and NBC. Programs are all of 13-week duration or longer.

## A

| PROGRAM       | ADVERTISER AND PRODUCT | NETWORK | ADVERTISING AGENCY                    |
|---------------|------------------------|---------|---------------------------------------|
| Allen, Mel    | Allstate Insurance Co. | ABC     | Christiansen                          |
| Amos 'n' Andy | Kools<br>Pharmacraft   | CBS     | Ted Bates & Co.<br>J. Walter Thompson |

# COMMERCIAL TV PROGRAMS OF 1956

(NETWORK)

The following pages contain an alphabetical listing by program title of the four national television networks' commercial programs during 1956. The programs listed are for the 12-month period ending Dec. 31, 1956. Listing includes program title, sponsor and product, network and the advertising agency handling the account. Programs are all of 13-week duration or longer. Compilation has been made through the cooperation of ABC, CBS and NBC.

There is a knack of tying knots that hold in hail and high water. It takes a pair of hands and a mind that knows what's to be done and the best way to do it.

There's a knack to printing literature that sells. It takes more than type and presses. It takes knowing what to print as well as how to print it.

It takes a knowledge of how to hold the reader's interest and make him want what you are selling.

- 30: Rudyard Kipling born (1865). The Gadsden purchase and new boundary treaty ratified by Mexico and the U. S. (1853).
- 31: New Year's Eve.

# THE TELEVISION CODE OF THE NARTB

## PREAMBLE

**T**ELEVISION is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

**T**HE REVENUES from advertising support the free, competitive American system of telecasting, and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obligated to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

**T**HE AMERICAN businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

**T**ELEVISION, and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

**I**N ORDER that television programming may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

**ADVANCEMENT OF EDUCATION AND CULTURE**

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and co-operation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. In furthering this realization, the television broadcaster:

a) Should be thoroughly conversant with the educational and cultural needs and desires of the community served.

b) Should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

c) Should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

**ACCEPTABILITY OF PROGRAM MATERIAL**

Program material should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has toward his society. Furthermore:

a) (i) Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

(ii) Words (especially slang) derisive of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combatting prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

(iii) The Television Code Review board shall maintain and issue to subscribers, from time to time, a continuing list of specific words and phrases, which should not be used in keeping with this subsection. This list, however, shall not be considered as all-inclusive.

b) (i) Attacks on religion and religious faiths are not allowed.

(ii) Reverence is to mark any mention of the name of God, His attributes and powers.

(iii) When religious rites are included in other than religious programs, the rites are accurately presented, and the ministers, priests and rabbis portrayed in their callings are vested with the dignity of their office and under no circumstances are to be held up to ridicule.

c) (i) Contests may not constitute a lottery.

(ii) Any telecasting designed to "buy" the television audience by requiring it to listen and/or view in hope of reward, rather than for the quality of the program, should be avoided.

d) Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually nor justified as a solution for marital problems.

e) Illicit sex relations are not treated as commendable.

f) Sex crimes and abnormalities are generally unacceptable as program material.

g) Drunkenness and narcotic addiction are never presented as desirable or prevalent.

h) The administration of illegal drugs will not be displayed.

i) The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

j) The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with Federal, state and local laws, and should concentrate on the subject as a public sporting event.

k) In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

l) Exhibitions of fortune-telling, astrology, phrenology, palm-reading, and numerology are acceptable only when required by a plot or the theme of a program, and then the presentation should be developed in a manner designed not to foster superstition or excite interest or belief in these subjects.

m) Television drama shall not simulate news or special events in such a way as to mislead or alarm. Reference is made to the section of the Code on News.

n) Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

o) The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

p) Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

q) Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

r) The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

s) The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

t) Law enforcement shall be upheld, and the officers of the law are to be portrayed with respect and dignity.

u) The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

v) Suicide as an acceptable solution for human problems is prohibited.

w) The exposition of sex crimes will be avoided.

x) The appearance or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

y) The use of animals, both in the production of television programs and as a part of television program content, shall, at all times, be in conformity with accepted standards of humane treatment.

### RESPONSIBILITY TOWARD CHILDREN

1. The education of children involves giving them a sense of the world at large. Crime, violence and sex are a part of the world they will be called upon to meet, and a certain amount of proper presentation of such is helpful in orienting the child to his social surroundings. However, violence and illicit sex shall not be presented in an attractive manner, nor to an extent such as will lead a child to believe that they play a greater part in life than they do. They should not be presented without indications of the resultant retribution and punishment.

2. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. (Attention is called to the general items listed under "Acceptability of Program Materials.") Television is responsible for insuring that programs of all sorts which occur during the times of day when children may normally be expected to have the opportunity of viewing television shall exercise care in the following regards:

a) In affording opportunities for cultural growth as well as for wholesome entertainment.

b) In developing programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

c) In reflecting respect for parents, for honorable behavior, and for the constituted authorities of the American community.

d) In eliminating reference to kidnapping of children or threats of kidnapping.

e) In avoiding material which is excessively violent or would create morbid suspense, or other undesirable reactions in children.

f) In exercising particular restraint and care in crime or mystery episodes involving children or minors.

### DECENCY AND DECORUM IN PRODUCTION

1. The costuming of all performers shall be within the bounds of

propriety, and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

2. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

3. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

4. Racial or nationality types shall not be shown in television in such a manner as to ridicule the race or nationality.

5. The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

### COMMUNITY RESPONSIBILITY

A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

### TREATMENT OF NEWS AND PUBLIC EVENTS

#### News

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. Commentary and analysis should be clearly identified as such.

4. Good taste should prevail in the selection handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

5. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

6. Pictorial material should be chosen with care and not presented in a misleading manner.

7. A television broadcaster should exercise due care in his supervision of content format, and presentation of newscasts originated by his station; and in his selection of newscasters, commentators, and analysts.

8. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

9. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . ." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words

or phrases which do not necessarily imply that the material following is a news release.

### Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. Because of the nature of events open to public, the treatment of such events by a television broadcaster should be effected in a manner to provide for adequate and informed coverage as well as good taste in presentation.

### Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. In keeping therewith the television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to its fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. The provision of time for this purpose should be guided by the following principles:

a) Requests by individuals, groups or organizations for time to discuss their views on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

b) Programs devoted to the discussion of controversial public issues should be identified as such, and should not be presented in a manner which would mislead listeners or viewers to believe that the program is of entertainment, news or any other character.

### Political Telecasts

Political telecasts should be clearly identified as such, and should not be presented by a television broadcaster in a manner which would mislead listeners or views to believe that the program is of any other character.

### Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community, as part of a well-balanced program schedule, adequate opportunity for religious presentations.

2. The following principles should be followed in the treatment of such programs:

a) Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

b) Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

c) Religious programs should be presented by responsible individuals, groups, and organizations.

d) Religious programs should place emphasis on broad religious

truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

3. In the allocation of time for telecasts of religious programs it is recommended that the television station use its best efforts to apportion such time fairly among the representative faith groups of its community.

### PRESENTATION OF ADVERTISING

1. Ever mindful of the role of television as a guest in the home, a television broadcaster should exercise unceasing care to supervise the form in which advertising material is presented over his facilities. Since television is a developing medium, involving methods and techniques distinct from those of radio, it may be desirable, from time to time, to review and revise the presently suggested practices.

(a) Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

(b) A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broadcaster should avoid the use of commercial announcements which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called "trailer" announcements). To this end, the program itself should be announced and clearly identified BOTH AUDIO AND VIDEO before the sponsor's advertising material is first used, and should be signed off BOTH AUDIO AND VIDEO after the sponsor's advertising material is last used.

(c) Advertising copy should contain no claims intended to disparage competitors, competing products, or other industries, professions or institutions.

(d) Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

(e) Television broadcasters should exercise the utmost care and discrimination with regard to advertising material, including content, placement and presentation, near or adjacent to programs designed for children. No considerations of expediency should be permitted to impinge upon the vital responsibility towards children and adolescents, which is inherent in television, and which must be recognized and accepted by all advertisers employing television.

(f) Television advertisers should be encouraged to devote portions of their allotted advertising messages and program time to the support of worthy causes in the public interest in keeping with the highest ideals of the free competitive system.

(g) A charge for television time to churches and religious bodies is not recommended.

### ACCEPTABILITY OF ADVERTISERS AND PRODUCTS

#### General

1. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commercial pres-

entations for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements. Moreover, in consideration of the laws and customs of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. The foregoing principles should be applied with judgment and flexibility, taking into consideration the characteristics of the medium and the form and content of the particular presentation. In general, because television broadcast is designed for the home and the family, including children, the following principles should govern the business classifications listed below:

a) The advertising of hard liquor should not be accepted.

b) The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable subject to federal and local laws.

c) Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

d) The advertising of firearms and fireworks is acceptable only subject to federal and local laws.

e) The advertising of fortune-telling, occultism, spiritualism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading is not acceptable.

f) Because all products of a personal nature create special problems, such products, when accepted, should be treated with especial emphasis on ethics and the canons of good taste; however, the advertising of intimately personal products which are generally regarded as unsuitable conversational topics in mixed social groups is not acceptable.

g) The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is not acceptable.

2. Diligence should be exercised to the end that advertising copy accepted for telecasting complies with pertinent federal, state and local laws.

3. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

4. Bait-switch advertising, whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes, is not acceptable.

### ADVERTISING OF MEDICAL PRODUCTS

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer, and the following principles and procedures should apply in the advertising thereof:

a) A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

b) Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe", "without risk", "harmless", or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

### Contests

1. Contests should offer the opportunity to all contestants to win on the basis of ability and skill, rather than chance.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of product, reasonable facsimiles thereof should be made acceptable.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (see Time Standards for Advertising Copy.)

### Premiums and Offers

1. Full details of proposed offers should be required by the television broadcaster for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of the listeners.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

### Time Standards for Advertising Copy

1. In accordance with good telecast advertising practices, the time standards for advertising copy are as follows:

| Length of<br>Program<br>(minutes) | Length of Advertising Message<br>(minutes and seconds) |                    |
|-----------------------------------|--------------------------------------------------------|--------------------|
|                                   | Class "A"                                              | All Other Programs |
| 5                                 | 1:00                                                   | 1:15               |
| 10                                | 2:00                                                   | 2:10               |
| 15                                | 2:30                                                   | 3:00               |
| 25                                | 2:50                                                   | 4:00               |
| 30                                | 3:00                                                   | 4:15               |
| 45                                | 4:30                                                   | 5:45               |
| 60                                | 6:00                                                   | 7:00               |

2. Reasonable and limited identification of prize and statement of the donor's name within formats wherein the presentation of contest awards or prizes is a necessary and integral part of program content shall not be included as commercial time within the meaning of paragraph 1. above; however, any oral or visual presentation concerning the product or its donor, over and beyond such identification and statement, shall be included as commercial time within the meaning of paragraph 1. above.

3. The time standards set forth above do not affect the established practice of reserving for station use the last 30 seconds of each program for station break and spot announcements.

4. Announcement programs are designed to accommodate a designated number of individual live or recorded announcements, generally one minute in length, which are carried within the body of the program and are available for sale to individual advertisers. Normally not more than 3 one-minute announcements (which should not exceed approximately 125 words if presented live) should be scheduled within a 15-minute period and not more than six such announcements should be scheduled within a 30-minute period in local announcement programs; however, fewer announcements of greater individual length may be scheduled, provided that the aggregate length of the announcements approximates three minutes in a 15-minute program or six minutes in a 30-minute program. In announcement programs other than 15 minutes or 30 minutes in length, the proportion of one minute of announcement within every five minutes of programming is normally applied. The announcements must be presented within the framework of the program period designated for their use and kept in harmony with the content of the program in which they are placed.

5. Programs presenting women's services, features, shopping guides, market information, and similar material, provide a special service to the listening and viewing public in which advertising material is an informative and integral part of the program content. Because of these special characteristics the time standards set forth above may be waived to a reasonable extent.

6. Even though the commercial time limitations of the Code do not specifically prohibit back-to-back announcements, such a practice is not recommended for more than two announcements, either at station break or within the framework of a single program.

7. Any casual reference BY TALENT in a program to another's product or service under any trade name or language sufficiently descriptive to identify it should, except for normal guest identifications, be condemned and discouraged.

8. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade mark or slogan may be used only incidentally. They should not obtrude on program interest or entertainment. "On Camera" shots of such materials should be fleeting, not too frequent, and mindful of the need of maintaining a proper program balance.

### Dramatized Appeals and Advertising

Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes. When dramatized advertising material involves statements by doctors, dentists, nurses or other professional people, the material should be presented by members of such profession reciting actual experience or it should be made apparent from the presentation itself that the portrayal is dramatized.

### Sponsor Identification

Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

★

## REGULATIONS AND PROCEDURES

The following REGULATIONS AND PROCEDURES shall obtain as an integral part of the Television Code of the National Association of Radio and Television Broadcasters:

### I

#### Name

The Name of this Code shall be the Television Code of the National Association of Radio and Television Broadcasters.\*

### II

#### Purpose of the Code

The purpose of this Code is cooperatively to maintain a level of television programming which gives full consideration to the educational, informational, cultural, economic, moral and entertainment needs of the American public to the end that more and more people will be better served.

### III

#### Subscribers

##### Section 1. Eligibility

Any individual, firm or corporation which is engaged in the operation of a television broadcast station or network, or which holds a construction permit for a television broadcast station within the United States or its

\* "Television Board. The Television Board is hereby authorized:—(4) to enact, amend and promulgate standards of practice or codes for its Television members, and to establish such methods to secure observance thereof as it may deem advisable; —". *By-Laws of The National Association of Radio and Television Broadcasters. Article VII Section 2, B. (4).*

dependencies, shall, subject to the approval of the Television Board of Directors as hereinafter provided, be eligible to subscribe to the Television Code of the NARTB to the extent of one subscription for each such station and/or network which it operates or for which it holds a construction permit; provided, that a non television-member of NARTB shall not become eligible via code subscription to receive any of the member services or to exercise any of the voting privileges of a member.

#### Section 2. Certification of Subscription

Upon subscribing to the Code, subject to the approval of the Television Board of Directors, there shall be granted forthwith to each such subscribing station authority to use the "NARTB Television Seal of Good Practice", a copyrighted and registered seal to be provided in the form of a certificate, a slide and/or film, signifying that the recipient thereof is a subscriber in good standing to the Television Code of NARTB. The seal and its significance shall be appropriately publicized by the NARTB.

#### Section 3. Duration of Subscription

Subscription shall continue in full force and effect until thirty days after the first of the month following receipt of notice of written resignation. Subscription to the Code shall be effective from the date of application subject to the approval of the Television Board of Directors; provided, that the subscription of a television station going on the air for the first time shall, for the first six months of such subscription, be probationary, during which time its subscription can be summarily revoked by an affirmative two-thirds vote of the Television Board of Directors without the usual processes specified below.

#### Section 4. Suspension of Subscription

Any subscription, and/or the authority to utilize and show the above-noted seal, may be voided, revoked or temporarily suspended for television programming, including commercial copy, which by theme, treatment or incident, in the judgment of the Television Board constitutes a continuing, willful or gross violation of any of the provisions of the Television Code, by an affirmative two-thirds vote of the Television Board of Directors at a regular or special meeting; provided, however, that the following conditions precedent shall apply: (1) The subscriber shall be advised in writing by Registered Mail of the charges preferred; (2) Such subscriber shall have a right to a hearing and may exercise same by filing an answer within 10 days of the date of such notification; (3) Failure to request a hearing shall be deemed a waiver of the subscriber's right thereto; (4) If hearing is requested by the subscriber, it shall be designated as promptly as possible and at such time and place as the Television Board may specify. Oral and written evidence may be introduced by the subscriber and by the Television Code Review Board (hereinafter provided for). Oral argument may be had at the hearing and written memoranda or briefs may be submitted by the subscriber and by the Television Code Review Board. The Television Board of Directors may admit such evidence as it deems relevant, material and competent and may determine the nature and length of the oral argument and the written argument or briefs to be submitted. The Television Board of Directors shall decide the case as expeditiously as possible and shall notify the subscriber and the Television Code Review Board in writing of the decision.

### Section 5. Additional Procedures

The Television Board of Directors shall, from time to time, establish such additional rules of procedure as, in its opinion, may be necessary for the proper administration of the Code; provided, that special considerations shall be given to the procedures for receipt and processing of complaints and to necessary rules to be adopted from time to time, taking into account the source and nature of such complaints; such rules to include precautionary measures such as the posting of bonds to cover costs and expenses of processing same; and further provided, that the Board of Directors shall take the steps necessary to insure the confidential status of any proceedings before it.

### Section 6. Amendment and Review

Because of the new and dynamic aspects inherent in television broadcast, the Television Code, as a living, flexible and continuing document, may be amended from time to time by the Television Board of Directors; provided that said Board is specifically charged with review and reconsideration of the entire Code, its appendices and procedures, at least once each year.

### Section 7. Termination of Contracts

All subscribers on the air at the time of subscription to the Code shall be permitted that period prior to and including the earliest legal cancellation date to terminate any contracts, then outstanding, calling for program presentations which would not be in conformity with the Television Code, provided, however, that in no event shall such period be longer than fifty-two weeks.

## IV

### Rates

Each subscriber shall pay 'administrative' rates in accordance with such schedule at such time, and under such conditions as may be determined from time to time by the Television Board (see Article VII Section 2.B (3) and (4), *By-Laws of the NARTB*); provided, that appropriate credit shall be afforded to a television member of the NARTB against the regular dues which he or it pays to NARTB-TV.

## V

### The Television Code Review Board

The Television Board of Directors shall establish a continuing committee entitled the Television Code Review Board. The Review Board shall be composed of five members. A person shall not serve consecutively as a member of the Review Board for more than two two-year terms or for more than four years consecutively. A majority of the membership of the Board shall constitute a quorum for all purposes. The Television Code Review Board is authorized and directed to maintain a continuing review of all television programming, and to reach conclusions, and to make recommendations or prefer charges to the Television Board of Directors concerning violations. The TV Code Review Board shall meet regularly once each quarter of the calendar year.

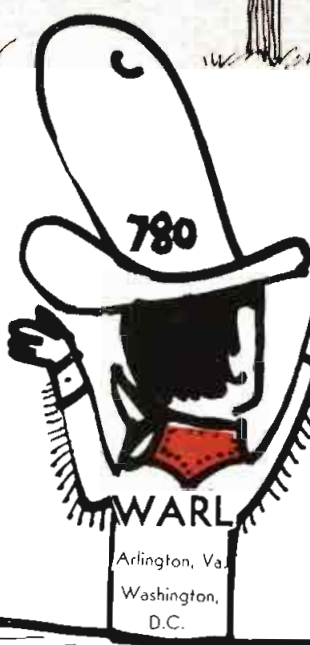

Cheers, heigh-ho, and hurrah  
for the honored General!  
For loyalty to client,  
reliability in the lab,  
foresight in the field, and  
devotion above and beyond  
the call of duty,—
