## GIVE WCCO PROGRAM H. A. BELLOWS, DIRECTOR,

RECOMMENDS NEW IDEA Claims Better Stations Must Soon Buy Advertising Space to Tell of "Sponsored" Features

## By E. H. Gammons

MINNEAPOLIS.—Sooner or later, and MINNEAPOLIS.—Sooner or later, and the sooner the better, broadcasting stations will have to buy advertising space in newspapers, magazines, etc., to announce their program features, according to H. A. Bellows, manager of the Gold Medal Station, WCCO, of Minneapolis and St Paul

St. Paul.

Mr. Bellows and his station are practicing what he preaches. Beginning in September, WCCO has been purchasing space daily in the five newspapers of Minneapolis and Saint Paul to advertise the features which it will send out to its Radio audience. Not only the name of the program is given, but also the name of its sponsors in case there are any. sors, in case there are any.

sors, in case there are any.

Scheme Very Satisfactory

The scheme of buying paid space in the papers has proved very satisfactory, Mr. Bellows said. With the large number of programs published by the average paper each day, it is impossible for them to devote very much space to any individual feature. feature.

The result is that the average Radio listener, reading over the programs and trying to determine what he shall listen to ing to determine what he shall listen to that evening, is sometimes in considerable doubt as to exactly what will transpire. WCCO now is able to go into details concerning each program and specifically mention any feature which they believe will be of particular interest to the listening audience. ing audience.

The Twin City newspapers, it is said

## WHOZIT? THE LADIES AND MEN ON COVER?

O, THOSE are not the regular WHOZIT pictures on the cover. They were merely put there for samples and to attract your attention. We wanted to let you know that,

We wanted to let you know that, with this issue, the Second November Number of Radio Digest, the great new national game of WHOZIT begins, with \$26,000.00 in prizes.

On pages 4, 5 and 7 will be found the first section of WHOZITS, ready for your scissors and paste. You'll find duplicates of the panels shown on the front cover, but work with the pictures found on pages 4, 5 and 7. If you would like to experiment, however, before you begin the game in earnest, you might cut up the WHOZITS on the cover.

A BOVE is reproduced for the second time the National Survey of Radio Dut credit to Radio Digest, and mail all blanks received from their readers to National Survey of Radio Digest at 510 N. Dearborn St., Chicago. We have started something. Help us in our fight!

## Looking Ahead

That's a Lot of Prizes-\$26,000.00-Just for Playing a Game, and naturally WHOZIT is going to be very, very popular. The second section of WHOZIT pictures will appear in the next issue, on the newsstands December 1, but you had better reserve your copy now-or perhaps subscribe.

A and B Chargers, Aerials, Aerial and Ground Equipment and other miscellaneous new accessories will be featured in the First December number. Perhaps this page will give you Christmas present suggestions.

Set Builders! Heat Your Soldering Irons, for we are going to tell you all about the "how to make" of another dandy receiver in an early issue. Watch for it.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

## SHORT WAVES

By Marcella

Where the Arrows Fall; Madam Zita Wonders; The Norman Brokenshire Mystery; News from Harold H. Isbell; Grace Itrick Story; Paul Johnson Is White; Gold Dust Twins; United Lansinger; "Big Bad Bill" of WOAW; Clyde Hager.

I shot an arrow into the air, It fell to earth, I knew not where. . . .

I breathed a song into the air, It fell to earth, I knew not where. —Longfellow

OW prophetic of modern times was that little poem, "The Arrow and the Song," written eighty years ago! How many of our light hearted Radio entertainers have any conception of the destiny of the arrows and songs they breathe into the air at each broadcasting? In looking over my Marcella letters I sometimes feel that a new prodigious force is at work to vitally influence the lives of all of us without our being really conscious of it. The most successful singers for the Radio have found the secret heart of the microphone. I have seen them almost embrace the little metallic instrument as they poured into its sensitive ear their passion of love or the destiny of the arrows and songs they its sensitive ear their passion of love or pathos. They seem to vision a cozy nest with Someone waiting and listening with a sympathetic ear. And, of course, there IS a Someone just like that, and there the arrow comes to earth.

Apropos of this comes a letter from a lady in Texas who signs the name "Madam Zita." I will give you some excerpts: "Thank you for answering my questions promptly. WBAP (Fort Worth) has ever been my favorite station, I enjoy the Hired Hand's quaint humor so much. But I am disappointed to find that the Sunflower Girl is not the Hired Hand's wife. I have especially studied his voice and I can tell by its sound whether he is tired, happy, blue, disgusted or jealous. and I can tell by its sound whether he is tired, happy, blue, disgusted or jealous. I heard him announce the Sunflower Girl the first time she sang at WBAP and was struck at once by the new, tender longing in his voice. They attended the Radio Show at Oklahoma City together and when he told of the fellow with the big car who had paid her a lot of attention his voice fairly crackled with jealousy. How long has the Hired Hand been married and did he marry a Radio artist? . . . I am so sorry Pat Barnes did not get the cup." Please don't feel bad about the Hired Hand, Mme. Zita; the Sunflower get the cup." Please don't feel bad about the Hired Hand, Mme. Zita; the Sunflower Girl is kin of the Mrs. Hired Hand and they are all very happy, you may be sure. No, Mrs. H. H. was not a Radio artist.

Sorry, Peggy and June, that I haven't any definite new information to give you about Norman Brokenshire. Some of my Eastern correspondents say that he is back at WJZ, assisting; others say they have heard him at other stations. Norback at WJZ, assisting; others say they have heard him at other stations. Norman's last letter to me was on the stationery of the Arrow Amusement Corporation, 1562 Broadway, N'yawk, in which he says, "I will inform you, very shortly, just what my plans for the future will be." Norman is still darning his own socks and sewing on his own buttons light hearted sewing on his own buttons, light hearted

Various inquirers: It appears that the Gold Dust Twins have taken their feather dusters and departed from the air. I am not advised as to their future plans.

Hazel: That United Lansinger yodeler you like so well keeps right on making a mystery of himself. I tried to get the low down but the best info I can get is that he looks a little like the Red Headed Music Maker would without his mustache. He has a wife but no children.

'Liza of Route 1, Stockholm, Wis., you all sho am mistaken what you all maginations baout dis heah Paul Johnson at WCCO bein' an ol' M. E. pawsson wif he haid stickin' up fru his haiah. No, Miss 'Liza, Paul Yonson, he bain vun Swede, pur-ty tall and good lookin' feller and he bain go to schole to be a doctor. As for Mr. Bellows, he's another typical big Norseman in appearance, full of vim and fire—a hard headed business man and Norseman in appearance, full of vim and fire—a hard headed business man and afraid of nothing or nobody. You wouldn't think he ever had been one of those who dwell in the rarified atmosphere that surrounds a university faculty—but such is the man. He is fully matured but not old by any means. Ties by any means, 'Liza.

Would be glad to print a picture of "Big Bad Bill" of WOAW if I had one, Georgia Ann. He's not bad at all. In fact he is very good, looks good, is a good pianist and behaves himself. Still unhitched.

Clyde Hager, formerly announcer at WMBB, is entertaining vaudeville audiences at the Columbia in San Francisco, according to a clipping from the San Francisco Bulletin, just received.

## GREAT GAME OF WHOZIT STARTS

## \$26,000.00 IN **PRIZES AWAIT** LISTENERS IN

Everyone Is Eligible to Play Free of Charge Beginning with This Issue

24 Big Stations in Link

New National Game to Be Very Popular—To Acquaint Fans With Favorite Artists

(For Complete Rules See Page 11)

Greatest of all chains of stations ever joined together for a single enterprise of such duration, twenty-four principal broadcasters located in all parts of the United States and in Canada begin their parts in playing the new national game of WHOZIT as this issue of Radio Di-

Merely for playing WHOZIT according to the rules Radio Digest offers twenty-six thousand dollars (\$26,000.00) in prizes to the successful contenders. Everyone is eligible to play, and Whozit is to be great fun and sport for every

Whozit is a game invented by Radio Digest for Radio listeners. It is destined to acquaint the invisible audience with hundreds of favorite Radio artists, and in a way the listeners cannot forget.

acquaint the invisible audience with hundreds of favorite Radio artists, and in a way the listeners cannot forget.

Sixteen Pictures From Each Station

The Game of Whozit starts with this, the Second November number of Radio Digest, and will continue for eight issues, to and including the First March issue, and ends officially March 15, 1927. Right here it is well to warn players of Whozit not to send their work to Radio Digest until the Whozit pictures in all eight issues, including the First March, 1927, issue, have appeared and been solved.

On pages 4, 5 and 7 will be found a total of forty-eight partly or wholly incorrectly assembled Whozit pictures. Among these forty-eight composite pictures will be found all the parts for the faces of two announcers or artists from each and every one of the twenty-four participating stations. Each issue, for eight issues, will have the same total number (48) of composite pictures, among which are parts for two complete faces of artists or announcers at each of the twenty-four stations. Thus, when the Game of Whozit ends, a total of sixteen composite pictures will have appeared for each station.

Two Grand and Seventy-Two More Prizes

Now, before going on with how to play, just a word about the prizes:

There is a \$500 cash first prize, a \$300 merchandise order second prize and a \$200 merchandise order third prize to be awarded for the best (see rules) sets of sixteen assembled pictures belonging to any one station. Since there are twenty-four Whozit stations, there are twenty-four of these first, second and third prizes, or seventy-two prizes, with a total value of \$24,000. Everyone is eligible to save and put together a set of sixteen pictures from each station they care to or feel capable of reassembling correctly. Thus there is a possibility of winning more than one of the prizes.

Best of all, however, are the two grand prizes each of \$1,000 cash. One of these

Best of all, however, are the two grand prizes each of \$1,000 cash. One of these will be awarded to the contestant or "Whoziteer" who sends in the greatest number of stations' Whozit pictures nearest correct and neatest assembled. (In all 384 of these will appear. See Rules.)

The other grand prize of \$1,000 will be awarded for the nearest correct, neatest and best appearing set of sixteen Whoozit

pictures of any one station.

How You Will Be Helped

Each Whozit station will aid you by giving you over the air or in person hints that will enable you to identify and cor-rectly assemble the Whozit pictures from that station. The schedule of the broad-casting of this information by the stations

is given herewith in another column. Caution! The last sentence of rule six says that each assembled Whozit picture must be identified in ten or more words giving at least five facts about the artist or announcer whose picture it is. These facts will not be difficult to obtain, as the Whozit stations will give many facts about the Whozit artists during their

## KAY SINGS TO LOVE SICK SWAINS

Vicarious emotions are vivaciously purveyed each afternoon and evening from Station WBBM, the Stewart-Warner Air theater, by Kay Ronayne, above, singer of "blues" that wander over the chromatic range from palest azure to deepest indigo. Kay gets requests and letters from every species of love sick humanity. There are letters from those who have loved and lost, those who have never loved at all, and those who feel that love is too perfect to last. In her voice they say they hear all the joy and all the heartbreak that they feel themselves and cannot lyrically express.

broadcasts of the Whozit information.
The list of Whozit stations is given with
the Whozit broadcast schedule and again
in rule one of the Complete Rules.

Game of Whozit Is Free

The Game of Whozit is free. It is not
necessary to be a subscriber or newsstand buyer of Radio Digest to compete.
Tracings of the pictures may be made at
the offices of Radio Digest in Chicago or
New York, public libraries or at the of-

broadcasts of the Whozit information. | fices of the participating broadcasting

fices of the participating broadcasting stations.

These with proper identifications may be submitted in place of the published photographs. General information helpful to the solution of the game may be obtained at any of the offices of the twenty-four participating broadcasting stations.

Everybody understand? If you don't, write Radio Digest. If you do, get out your scissors, and let's play WHOZIT!

## **ANSWERS FOR YOUR** WHOZIT QUESTIONS

READ THESE IF NEW GAME IS NOT ENTIRELY CLEAR

When to Submit Solved Pictures—What to Solve—Where to Get Five Facts

(For Complete Rules See Page 11)
QUESTION—Am I to send in to Radio Digest the pictures as I solve them?
ANSWER—No. Hold them until you have a complete set; the last pictures will appear in the March 1 (or First March) issue of Radio Digest. You then have fourteen days to send in your complete solution. solution.

fourteen days to send in your complete solution.

QUES.—Do I have to solve all the pictures from all the stations?

ANS.—Not unless you are trying for the DX championship prize of \$1,000.00 which will be awarded to the one submitting the nearest correct and neatest solution of all the pictures with proper identification. If you are not trying for the DX championship all that will be necessary for you to do to enter for a prize will be to submit the nearest correct and neatest solution of the sixteen artists from anyone of the broadcasting stations participating. Two pictures from each station will be published each issue for eight issues of Radio Digest. A set of sixteen from one or all of the stations participating can be submitted. The contestant having the nearest correct and neatest solution together with proper identification of any station will be awarded first prize of \$500.00 in gold. The second nearest correct and neatest solution with proper identification, \$300 in merchandise. The Third, \$200.00 in merchandise.

QUES.—Will it be necessary for me to buy a copy of Radio Digest each issue?

ANS.—No, the contest is free. Tracings of the pictures may be made at offices of Radio Digest in Chicago or New York or from the files in public libraries or at the offices of participating broadcasting stations. These, with proper identifications, may be submitted for the published pictures.

QUES .- If I do not hear the broadcast-

QUES.—II I do not near the broadcasting, where can I get this information?

ANS.—All general information, helpful to the solution of the game, may be obtained from any of the offices of the broadcasting stations participating.

QUES.—Where do I get the five facts about the artists that is necessary to submit with each completed portrait?

ANS.—You can get this material by broadcast over the air or it will be available in the offices of the stations participating, or at the offices of the Radio Digest in Chicago or New York. We will give you the names of the artists, for a start, and that will count as one fact.

QUES.-What do you mean by "five

facts?"
ANS.—Their names and stations (count ANS.—Their names and stations (count as one); what voice they sing, what instruments they play, or what their bit before the microphone is; when they were born; if they are married or single; what the color of their hair, eyes or skin is; other descriptive items, etc.

QUES.—Can I cut out the background of the assembled picture and paste the segments so that the photo stands by itself, provided that I write the numbers plainly beside their respective segments?

ANS.—Yes. Neatness will be an important factor in making awards.

## WHOZIT HINTS

Get into the Whozit game today

Get into the Whozit game today.
Read everything you can find in Radio Digest about the game.
Familiarize yourself with the Whozit stations within your range.
Hunt for the names representing those stations beneath the Whozit strips. Check with the hour those stations that are scheduled in Radio Digest to broadcast.
Provide yourself with a pencil and a pair of scissors and tune in for that great Whozit hour.
Mark the segments as you identify them

Mark the segments as you identify them

from the voices over the air.

Cut the segments apart and paste them together in their proper order. (Later these may be assembled in folio.)

When you have finished you will have two complete photographs of Radio artists toward the complete set of sixteen, the number you will need to identify to qual-ify you for the station prizes.

## \$26,000.00 IN PRIZES FOR SOLVING "WHOZITS"

The following artists are in panel above: Grace Schaefer, WOAW; Natalie Arnoux, KTHS; Alice Sachse, WPG; Louise Schnauber, WOAW.

The following artists are in panel above: Stuart Dawson, WHT; A. E. Bush, WSOE; Al Carney, WHT; Frank Vaughn, WSOE.

The following artists are in panel above: Harry Philwin, WMC; Clarke Tate, WMC; Carlo Ferretti, WPG; Lawson Reid, KTHS.

The following artists are in panel above: Frank Lane, KVOO; Snedder Weir, WMCA; Ted Nelson, WMCA; Roy C. Griffin, KVOO.

## ASSEMBLE THESE PICTURES OF RADIO ARTISTS

The following artists are in panel above: Mrs. T. J. Harling, KPRC; Marigold Cassin, WOC; Alice Maslin, KMOX; Jean Sargent, WNAC.

The following artists are in panel above: George Junkin, KMOX; Peter MacArthur, WOC; Patrick Brown, KPRC; E. Lewis Dunham, WNAC.

The following artists are in panel above: E. J. Sweeney, WHB; Harry Lane, WHB; Leo Dessauer, KJR; Henri Damski, KJR.

The following artists are in panel above: Ray Bankson, KOA; J. E. Klein (or "Senator Schultz"), WLW; William C. Stoess, WLW; Walter Newell, KOA.

## ASSIC these Questions When You buy an Eliminator

Must I purchase a separate C battery and how will I know that a leaky cell is not spoiling my reception?

In the Freed-Eisemann you do not need a separate C battery. Both C and B are supplied because a leaky cell in a C battery cannot always be detected, and yet can spoil reception. The Freed-Eisemann power unit gives perfect C power.

Must I operate rheostat controls in addition to the controls on my set, and how will I know that I am furnishing the proper B voltage when I adjust the controls on the Eliminator?

Freed-Eisemann is automatic. No controls.

**Is there a safety door** which will automatically cut off the line current while I'm connecting wires to my set?

In the Freed-Eisemann the safety door cuts off the line current while you make connections. When closed, all terminals are covered.

**Is there a voltage regulator tube** in addition to the rectifier tube so that I will *automatically* get a steady and not a jumpy current and so obviate the necessity of separate controls on the Eliminator?

The voltage regulator tube in the Freed-Eisemann B&C Eliminator automatically gives your set just the current it needs in changing from high to low volume stations. No controls on the Freed-Eisemann. A good Eliminator must have both a voltage regulator tube and a rectifier tube. Two tubes are necessary!

Has it provision for ample C in addition to full voltage of B supply so I can get the most out of the power tube in the 2nd audio stage?

"C" governs tone in your set. The Freed-Eisemann Eliminator supplies as high as 27 volts of "C" in addition to 135 volts of steady humfree "B" current at the same time.

If more than 135 volts of "B" are used with your radio, you may burn out the loud speaker windings or the fixed condensers in your set.

The Freed-Eisemann is absolutely safe and gives perfect performance with any speaker or set.

When the lights are turned off or on, in houses in my neighborhood, and line potential varies, or when the electric light plant is delivering a fluctuating current, how does the Eliminator maintain an even current?

The Freed-Eisemann transforms the current by the rectifier tube and then maintains an automatically controlled even supply by the voltage regulator tube.

The ONLY Eliminator that has ALL these vital features is the new

FREED-EISEMANN
B&CPOWER UNIT

## PLAY THE GREAT NATIONAL GAME OF WHOZIT

The following artists are in panel above: Muriel Kyle, WJR; "Bernice," WJR; Mrs. A. H. Shaw, CKY; Winifred Parker, CKY.

The following artists are in panel above: Grace Sande, WMAK; Helen Neuman, WOOD; Esther White, KFWB; Martha Brown, WSM.

The following artists are in panel above: Eddie Squires, WJAX; Charles Lawman, WJAX; Mike Lash, WHK; Eddie Mosier, WHK.

The following artists are in panel above: Tudor Lanius, WOOD; A. T. Erisman, WMAK; Charlie Wellman, KFWB; Obed Pickard, WSM.

## Why is the KARAS EQUAMATIC the most efficient receiver ever designed?

OU who have attended the great radio shows in New York and Chicago do not need to be told that the Karas Equamatic Receiver was not only the biggest new thing on exhibition there, but also the most talked about new receiver of either

Every visitor at both shows was given a new thrill when he observed how Karas had solved the last and most baffling problem of radio.

All who have heard this sensationally successful

receiver—all who have built Karas Equamatics for themselves—have been amazed at its flexibility—its selectivity—its great volume—its remarkable tone, while at the same time marveling at the innate simplicity of the set and the ease with which anyone, with-out even a particle of radio experience, can quickly build the Equamatic and enjoy the possession of a

## The Hidden Secret of Equamatic Efficiency

receiver which is the last word in efficiency.

The efficiency of the Karas Equamatic lies in its uncanny ability to maintain the tubes at their very highest point of efficiency—just below the oscillation point. Radio engineers have known for years that this was desirable, but only Karas has been able to design a receiver that accomplishes this—not occasionally—not at certain points of the dials—but AT EVERY WAVE LENGTH SETTING FROM 200 to 600 METERS! You can turn the dials of the Equamatic from one end of the scale to the other and the set will not lose one particle of its efficiency at any point. The tubes positively will not break into oscillation. Yet the slightest change in the rheostat setting will permit them to oscillate.

All of this has been achieved in the Karas Equamatic by providing a continuously equal transfer of energy.

by providing a continuously equal transfer of energy between the primary and secondary of the inductance coils at all wave length settings of the dials between 200 and 600 meters, and by making this transfer of energy at all times the practical maximum necessary to keep the tubes exactly under their oscillation point. No other set ever did this before. No other set does

## Note the Three Lines on the Chart

In the chart shown above, the line AA represents the oscillation point of a tube between 200 and 600 meters. The line BB, directly below this, is the point at which the tube will operate at its highest efficiency, and is also the point at which the radio frequency tubes in the Karas Equamatic operate at all wave lengths. The curved line CC indicates the tube effiset and in the neutrodyne circuit.

Note that the line CC falls far below the oscillation point at its right hand end, i. e., at low frequencies.

Note also that such sets as tuned radio frequency and neutrodyne receivers approach the efficiency of the Karas Equamatic Receiver at only one point between 200 and 600 meters (this point being where the curve CC almost but not quite touches the line BB.) At

this one point in the broadcast wave band, and at this point only, do these sets come anywhere within range of Equamatic efficiency. If various stabilizers and other so-called losser methods of control were not used to keep the tubes from breaking into oscillation, when tuned to the shorter wave lengths the curve of these sets would extend far above the lines AA and BB, as indicated by the dotted upper portion of the line CC. Due to these losser methods the tube efficiency of such sets at the shorter wave lengths falls away from the desired optimum line BB, at which the Equamatic System always maintains the Karas Equa-

Equamatic System always maintains the Karas Equamatic Receiver.

Note that the left hand end of the line AA represents 200 meters, and the right hand end 600 meters, while the center represents 300 meters. Since the impedance of an inductance varies with the frequency and the amount of energy transferred from primary to secondary varies with the impedance, a primary coil must have much greater inductance to tune to 600 meters than will be needed to tune to 200 meters. Assume that these values are 14 turns of primary for the longer wave and 3½ turns for the shorter.

## One Hundred Coils in One

The Karas Equamatic Receiver automatically provides the exact number of turns of primary for EVERY WAVE LENGTH SETTING OF THE DIALS—its ingeniously designed Inductance Coils accomplish what could only be done otherwise with a hundred separate inductances, each of the proper value for a certain wave length—and the tubes thus are kept at precisely their proper point for highest efficiency operation—just below their oscillation point. The primary coil is mounted upon the extended shaft of the Karas Orthometric Variable Condenser at an angle of 58 degrees, which gives, in effect, the precise number of turns or parts of a turn needed to furnish the continuously increased inductance for each succeeding longer wave length.

## What Is the Result of this Equamatic Efficiency?

As a result of its remarkable design the Equamatic has a selectivity undreamed of save in a superhet. It has a volume on DX that remains constant for every station brought in. It has a clarity of tone that is unlike any other receiver, regardless of price or number of tubes. It is easy to tune. Any member of the family can get superlative results with the Equamatic. It stays put—does not develop temperamental streaks—has no "off nights"—and performs consistently and uniformly at 100 per cent efficiency always.

## You, Too, Can Build This Great Receiver

Anyone, even without set-building experience, can build this wonder set in a short time. We furnish a complete manual of simple, easily understood assembly instructions with every set of three Karas Equamatic Inductance Coils. We supply every nut, screw, binding post, for mounting all the parts. In addition to the Karas parts listed in the coupon you will need certain other standard parts easily obtainable anywhere. Your dealer can supply ALL of the parts you will require, including panel and subpanel completely drilled and engraved, if you wish. If he is out of stock you may order Karas parts direct from us by filling out and mailing the coupon below. SEND NO MONEY. Just hand the postman the price of the Karas parts plus a few cents postage. Order your parts today so that you can

postage.

Order your parts today so that you can begin building your Karas Equamatic Receiver just as quickly as possible. You want one of these great sets—you should have the most efficient receiver obtainable—you will have it if you build this Karas Equamatic. MAIL THE COUPON NOW!

## Yes! You Can Tune to Within 1-1000 of an Inch With the Karas Micrometric

How would you like to be able to secure a vernier action in tuning that was as fine as 1-1000th of an inch? How would you enjoy operating a set with condensers equipped with vernier dials that had not a five to one, nor a ten to one, nor even a twenty to one, but that had a 63 to 1 ratio between the vernier knob and the condenser shaft? Karas Micrometrics offer you this remarkable hair-splitting control. They are the only vernier dials made which do this. And they accomplish it without a particle of backlash. Karas Micrometries use no cams, or other unreliable friction devices. They never pause, jerk or slip; just a liquid-like smoothness of operation. You should equip your set with Micrometrics. You will be amazed at the ease with which you can bring in stations you could never bring in before. Your dealer can furnish them in 180 or 360 degree types the former with sithest in 180 bring in before. Your dealer can furnish them in 180 or 360 degree types, the former with either right or left hand markings. Micrometrics are made of Bakelite. They have large, comfortable knobs, gold inlay markings of unusual precision, and may be attached to your present set without drilling any additional holes in panel. To really know sharp tuning you must use Karas Micrometrics. Order them today from your dealer, or if he cannot supply you, order direct from us. Price each, \$3.50.

## "King" Builds "Karas Gquamatic

M TELLING you, boy—that this is some big happy world to live in—and the scenery is growing more interesting and less instructive each day. Do you know what I mean? Once upon a time even the wisdom of Solomon would make a bum guess on "wimmin," but today—oh, boy—Old Man History has repeated himself. Remember way back when fond fathers used to pipe up about "Children should be seen and not heard?" Well, Bozo, he was right. All you have to do snould be seen and not heard?" Well, Bozo, he was right. All you have to do is give one peek through your Rose Colored Glasses and you'll discover the avenue thick with "girlies" from 14 to admitted 40 who absolutely insist upon being seen.

admitted 40 who absolutely insist upon being seen.

Of course, hosiery has its place in the fitments of wiminkind, as a matter of form, and I'm thinking "wimin" have a perfect right (saying nothing about the left) to dress as they choose, but I don't think they have any business going to foothall grames to disrunt the "esprit de corns" ball games to disrupt the "esprit de corps" of the players. And they shouldn't fuss me up with their color schemes until I can hardly get down to brass tacks and tell you how to finish the wiring on this little wonder Karas Equamatic.

ART III, Conclusion, in Which the wire across the plug terminals. Now connect W-34 from filament switch to the Regal Milo, Aided by Maggie, Tells How connection with the minus B, we will connect this right at the Joi es plug also with wire W-35. W-34 goes through hole to Finish Wiring This Selective, Beautifully Toned distance to the filament switch. Now con-Receiver, and How to Operate It

By "KING MILO" GURNEY

connects W-20 with minus A connection to use a long wire again for this connector S-1. Then put the 4-inch piece of tion. Put a one-half twist in the soldering sleeving on W-20, keeping close to next lug on binding post B-6, so that a wire link, W-22, which goes through hole 56 along the panel can go through it. Put and connects W-20 to minus connection of S-2. The 2-inch piece of sleeving is then put on W-20 close up to hole 56, where

wire through the hole in the soldering lug and then put on a 3-inch piece of sleeving put on W-20 close up to hole 56, where to cover the sub-panel bracket. Bend-end it crosses the center panel bracket, D-2. of the wire into soldering hole on bottom At the end of this 2-inch piece of sleeving make a bend in the wire so that it just point. Where this wire becomes even

red or plus A post. As this is a common nect the brown or aerial post of the Jones plug to binding post B-1 with W-36. This will require a new length of wire. This connection is started at Jones plug first, goes through hole 43, and makes a slight goes through hole 43, and makes a slight jog toward the edge of the sub-panel here or so that it may run parallel to the edge of the sub-panel and close up against the ends of the sub-panel brackets. Two 2-inch pieces of sleeving are put on it to insulate the wire from the brackets. The wire is then bent into the soldering hole in the binding post B-1 and the connection soldered soldered.

Turn set over and connect minus filament of the two transformers with W-37. The wire should run about ½" beyond ends of the soldering lugs so that it passes

Figure 7-Looking down on completed set.

EVER mind, never mind, Maggie wasn't there, and when she reads this it will be too late to bawl me out because I left her out of the story. Therefore, I now adjust my pair of green goggles so that I cannot be influenced unduly and will continue from the last issue of the Radio Digest wherein the front panel assembly was screwed to the sub-panel assembly, and proceed to connect the condensers. Here's how:

Now with set bottom side up and Jones plug toward you, connect W-14 from lower that or connection of first condenser C.1

stator connection of first condenser, C-1, to the grid of Socket S-1. This connection to the grid of Socket S-1. This connection passes down through hole 59, up through hole 47, and then to the grid connection of S-1 and has a piece of 4-inch sleeving to keep it away from binding post B-3. Then connect W-15 from lower stator connection of second condenser, C-2, to grid connection of S-2. This wire passes from the condenser down through hole 60 and up through hole 48 to grid lug of tube up through hole 48 to grid lug of tube Socket S-2 and has a 4-inch piece of spaghetti sleeving between the holes. Connect W-16 from lower stator connection of C-3 to the connection nearest. nection of C-3 to the connection nearest it on the grid condenser. Connect W-17 from rotor connection of C-1 through hole 52 to soldering lug on binding post B-3. In same manner connect W-18 from the rotor of the second condenser, C-2, through hole 55 to the lug on bottom of binding post B-5. Make a loop and connect W-19 from the rotor connection of third condenser with W-5 which is just below hole 58.

below hole 58.
Starting with a long wire at the lug on the binding post B-2, with a 4-inch piece of sleeving at this end, lay W-20

so that it passes over so that it passes over hole 53. Just at this hole, make a bend so that the wire also passes over hole 56. It is now running parallel with the sub-panel edge. Cut wo ing, 4 and 2 inches respectively. long, Make two connecting links, W-21 and W-22, with loops at one end, %" long from the center of the loop, to connect this wire to the minus A connection of the first two tube sockets. W-21 goes through hole 53 and

crosses the middle of rheostat R-10. This free end is bent over the corner of the subpanel and connected to rotor connection of first rheostat. Be careful to keep W-20 well away from filament switch.

Now connect W-23 from W-13 to the soldering hole on the amperite mounting A-2, on the end nearest Jones plug. This wire will be sleeved and will run between the first stage pack J-1, and amperite wire will be sleeved and will run between the first stage pack J-1, and amperite mounting A-2 and will be parallel to them. Attach the end at the rheostats with a loop. Now connect W-24 from soldering lug on the switch, which is closest to the edge of the sub-panel, to wire W-5, making a loop at this end. Now connect W-25 from top spring of jack J-1 to P of S-4 through hole 50. The top spring is the one nearest heads of the screws. Likewise connect W-26 from top spring of jack J-2 to P of S-5 through hole 51.

OW turn set over right side up and connect W-27 from minus of S-3 to rotor connection of rheostat, R-30. Turn set with panel face down and with the bottom of sub-panel toward you. Now connect W-28 from the plus B of T-2 through hole 46 to the third spring of jack J-1. Keep the wire as close to the under side of the sub-panel as possible. Now connect W-29 from the P of T-2 through hole 49 to second connection of jack J-1, also keeping this wire as low as possible and away from the last wire.

Turn set bottom side up again with Jones plug toward you and connect the plus B-90 wire W-30. It will be necessary

crosses the middle of rheostat R-10. This with end of the second amperite mounting A-2, bend it directly up to fourth lug in the first jack. At a point just above the hole, bend wire at right angles so that it passes over lug No. 4 in the first jack and lug No. 2 in the second jack. Cut it off just beyond the second jack. By bending the fourth prong of jack J-1, sliding the wire back through the soldering lug on B-6 and bending the wire slightly, it can be gotten through both of these jack prongs and into both soldering holes also. Then solder all connections, making sure that this wire is far enough away from the wire in spring No. 2 of J-1.

The next step is to make connections 2 in the second jack. Cut it off just beyond

The next step is to make connections to the Jones plug. Place the set on end with the first condenser, C-1, down, and with Jones plug toward you. Connect W-31 from the pink post of the Jones plug through hole 44 to the plus B-90 wire, W-30, just finished. As it runs within 1" of hole 44, the connection is simply brought out of hole 44 and connected at the nearest point with a loop. nected at the nearest point with a loop. It is best on all these connections to the Jones plug to make the plug connection

Now connect W-32 from the green or minus A connection of the Jones plug through hole 41 to the nearest connection on the amperite mounting A-1. All of the wire under the sub-panel is sleeved. As the ground and the minus A are to be connected together, this connection W-3s is made right at the Jones plug with a

right over hole 45. With a loop on W-38 around W-37 allow it to extend through hole 45 for ¼". Turn the set over and tie C battery with thread on under side of the sub-panel between the jacks and the end of the sub-panel bracket. Wind the thread back and forth from the end of the bracket to the play B connection which connectes

back and forth from the end of the bracket to the plug B connection which connects the two jacks. Then attach minus connection of the C battery to end of wire W-38. Attach the plug C battery connection to W-23 at the end where it is attached to the amperite mounting. Turn the set right side up and place one retard coil on the binding post B-3 and connect W-39 from the other end of the retard coil to the minus connection of Socket S-1. Put the other retard coil on the binding post B-5 and connect W-40 from its other end to the minus connection of S-2. The receiver is now completely wired. pletely wired.

ow attach the dials so that when the plates of the condensers are entirely turned in, the dial marking registers 100. Put the primaries on the shafts, with set screw up, when the condensers are at 100. Then turn each coil at right angles with the white line underneath it. The lead wires in each case go underneath the brackets which connect them with the condenser. The black lead wire of primary No. 1 goes under the binding post in hole 30. The green lead wire of the first primary goes under the binding post in hole 31. The black wire of primary No. 2 goes on the P binding post connection of tube socket S-1. The green wire of primary coil No. 2 goes under the binding post in B-4. The black wire of primary coil No. 3 goes under the P binding post of the green wire of primary coil No. 3 goes under the P binding post OW attach the dials so that when

3 goes under the P binding post of the second socket. The green

wire goes under the binding post B-6.

The secondary coils are then slipped under the little clips from the rear of the set, parallel

the white line. to with the slot in bracket toward front panel, until they come even with the side of the primary nearest the condensers. Now place the black wire of the secondary coils under the binding post B-3 which holds

(Turn to page 12)

# Announcing the new Rest O Lite Trikl-Automatic Radio "A" Power Unit

An "A" power unit combining Prest-O-Lite's fine storage battery with a trickle charger. A unit that can be plugged into an electric light socket, then hooked up to the radio set—and forgotten! It charges itself automatically.

It's new. Entirely automatic in action. No switches to operate by hand. Now you can have full storage-battery power for your radio all the time. Power that is noiseless and without the slightest pulsation, the kind of power that brings in the distant stations loud and clear.

Never again will you have to bother with a charger. Never again will a run-down "A" battery spoil your radio.

A thing of beauty.

The unit is beautifully finished in deep maroon. Small and compact. Even in full view under the library table it looks well.

You'll find further details below. But the main thing is to see it. Go to the Prest-O-Lite dealer's store. There's one near you. Or write us and we will give you a lot of interesting facts about this wonderful new "A" power unit.

And remember, it is made by a company which has had more than twenty years of manufacturing experience.

THE PREST-O-LITE CO., Inc. INDIANAPOLIS, IND.

New York

San Francisco

In Canada: Prest-O-Lite Company of Canada, Ltd., Toronto, Ontario

## LOOK AT THESE NEW FEATURES

The battery. Ample capacity. Extra thick, rugged plates, deep-grooved separators. Unusually large acid volume requires infrequent watering. One-piece, leak-proof rubber case, with acid-tight cover. Screw post seal and double baffle vent to prevent leakage and acid spray.

The charger. Built on an entirely new principle. Silent in operation. Adjustable to needs of individual user. Economical to operate. Nothing to get out of order. Nothing to replace. Built to last for years.

No moving parts. No bulbs. No electrolyte. No water or acid to be added. No electrodes to wear out. *Entirely automatic*. No switches to operate by hand. Built-in power relay automatically shuts off the charger when radio is in use and turns it on again when radio is idle. Will operate at any distance from set.

Fully enclosed. Entire unit enclosed in beautiful metal case, with hinged cover and handle.

Radio dealers should write at once for full details

# Modernize your set with a scientific SAAIL Soft SPEAKER

SAAL
Ec-centric Cone
Showing the new SAAL
Ec-centric construction
in cones. Stylus is scientifically placed at the
umbo of eccentricity to
give proportional vibrating areas for both high
and low tones. Cone
measures 20 inches in diameter and reproduces
all tones whether the set
is equipped with or with
out power amplifier.
Price, \$25. Junior
model, \$15. All prices
slightly higher west of the
Rockies.

SAAL Horn No. 5
The broad polished bell
is of non-warping Bakelite, the goose neck of cast
aluminum in crackle gold
finish. The horn has no
metallic resonance and is
guaranteed not to blast
or chatter. Standard
equipment for radio engineers in laboratory
work. Price, \$22.50.

SAAL Pedestal
Tones rise through the 3foot wooden tone chamber and emerge from
both front and back of
thetop, hence, non-directional. The top is level
with your ear when you
are seated tuning in.
American walnut finish with inlaid design.
Price, \$38.

The greatest improvement in radio this year is the improvement in speakers. In SAAL, speaker mechanisms have been developed until they now do justice to the finest radio receivers.

Furthermore, the tone chamber and vibrating area of SAAL speakers—horn, cone, and pedestal—are scientifically shaped for sound reproduction.

The new SAAL Ec-centric Cone—with its stylus "off center"—is shaped on the original musical principle. Just as the harp and piano have short and long strings for high and low notes respectively, the Ec-centric Cone provides a short and long radius to give proper vibrating area for both extremes of sound. This cone reproduces all tones equally well, without loss of low notes, without over-accentuation of high notes. And completely prevents drum or barrel tone.

In Horns, SAAL has always been standard. SAAL Soft Speaker No. 5 is the latest and most popular SAAL Horn ever offered. It requires no adjustments and no additional power for quality reception. It will give 100% satisfaction regardless of the set or equipment with which it is used.

The SAAL Pedestal is an ornament to the most beautiful surroundings. Its pure wooden tone chamber, measuring three feet in length, gives exceptionally clear mellow reception. The Pedestal is designed for those who prefer the tone quality of horn reproduction in a drawing room piece. Keeps the speaker away from the set and eliminates harmonics.

Modernize your set with one of these scientific SAAL Soft Speakers and get the fullest return from radio now.

## HER FRIENDLY VOICE WARMS COLD NORTH

MABEL TOMER DISPELS LONELINESS VIA CNRV

Binds Isolated Women of Wilderness Together with Chats "Over the Back Yard Fence"

Mrs. Mabel Tomer, director of women's programs for CNRV, the Vancouver station of the Canadian National Railways, has a voice that people love to hear. It has bridged great gulfs of silence for lonely pioneers in the remote parts of the province, and it has cheered men and women who were solitary and sad. It has brought hope and happiness to women who were too much alone, and far from the sound of other women's voices.

In a little informal chat which she calls

In a little informal chat which she calls "Over the Back Yard Fence," Mrs. Tomer talks for half an hour or more every Tuesday and Friday to more than fifty thousand people.

sand people.

Among the women who are listening in are city women in comfortable homes, farmer's wives and daughters, and women who have gone into the hinterland of British Columbia to help their husbands hew fortune out of the great silence of the forest; women who are living in the far, frozen North. They all know Mrs. Tomer's voice now. And write her letters, telling her how she has helped them, and thanking her for making life less lonely for them. for them.

The men write letters too, for the men like these "back yard talks" just as much as women do.

She Knows Fear of Loneliness
Mrs. Tomer has herself experienced the loneliness of isolated life. She has lived on a homestead, she has slashed acres of wooded ground and worked in the fields of her own place like a man. She has been far from neighbors herself, so she knows what it means to be lonely. And while her chats are friendly and informal, they are also instructive. She draws her hearers together like a great family, and tells them things they want to know.

Things about the city, what other women are wearing, and about the pretty new things in the shop windows. Then she tells them how to make over old clothes, and about little labor saving devices that will make their housework easier and give them more time to devote to other interests. Mrs. Tomer is a firm believer in her own sex, and endeavors to give other women all the help she can.

Tells How to Make Fin Money

## HAS LARGE AUDIENCE AWAITING HER CHATS

Mrs. Mabel Tomer has a speaking acquaintance with people from Mexico to the Arctic Circle. She has made friends with thousands of women in British Columbia, Oregon, Washington, Alberta and California. Twice a week she talks to them "over the back yard fence" from CNRV, Vancouver, B. C., Canada.

their rough shacks, cheaply and practi-cally. They write letters telling how they have painted the walls and made curtains out of old party dresses for which they have no further use; things they never dreamed of doing until they learned that other women were doing things like that and making the best of their lonely frontier days.

So Mrs. Tomer and the Radio help to make many thousands of homes better, wives more contented, husbands more comfortable. comfortable.

A world's record for distant reception on a one tube set is claimed for Miss Jennie R. Miller, a bedridden invalid, who resides at 139 W. Seneca street, Oswego, N. Y., whose record came to light in the Miss Radio contest.

Miss Radio contest.

Hearing long distance stations is nothing new to Miss Miller, whose log includes 316 broadcasters. She listens in during the late hours of the night, her room in total darkness. She has heard 5NO, Newcastle, England; LOW, Buenos Aires, and gets the Pacific coast quite frequently, including stations in Seattle rarely heard in the East. She has won several prizes in DX contests.

\* \* \*

Tells How to Make Pin Money

For farm women, especially, she has little talks about making pin money on the farm. She gives information about side lines in marketing, possibilities of rug or quilt making, and passes on the newest ideas in colors and design.

In a little lonely hamlet far up the Pacific Coast twice a week a little group of women gather to hear Mrs. Tomer's voice over the one Radio in the community. She tells them how to beautify

\* \*

Impossible windows, shabby furniture, ugly woodwork and all the other things it seems so hard for the housewife to improve, will be treated in the talks given by Leone Grandland on Monday afternoons that the same time, Charlotte Voge discusses the new house and its attending problems. Both Misses Voge and Grandland, before forming their own company as interior decorating staff of Marshall Field and Co.

## COMPLETE RULES OF GAME OF "WHOZIT"

1. Radio Digest will sponsor a national game to be called the game of Whozit, which will be participated in by the following Radio broadcasting stations: WHT. Chicago; WMCA, New York; WNAC, Boston; KJR, Seattle; WMAK, Buffalo; WHK, Cleveland; WPG, Atlantic City; WLW, Cincinnati; WJR, Detroit WODD, Grand Rapids, Mich.; WSOE, Milwankee; CKY, Winnipeg; WMC, Memphis; WSM, Nashville; KTHS, Hot Springs, Ark.; KMOX, St. Louis, Mo.; WOC, Davenport; WHB, Kansas City; WOAW, Omaha; KOA, Denver: KFWB, Los Angeles; KPRC, Houston, Tex.; KVOO, Bristow, Okla.; WJAX, Jacksonville, Fla.

Houston, Tex.; KVOO, Bristow, Okla.; WJAX, Jacksonville, Fia.

2. \$25,000 in prizes will be distributed to the successful contestants, as follows: Twenty-four first prizes \$500 in gold for each of the twenty-four stations twenty-four \$300 ceach of the twenty-four second prizes, and twenty-four prizes of the twenty-four second prizes, and twenty-four \$200 in mediandise orders for third prizes. Crand prizes of \$1,000 in gold will be awarded to the individual judged to be the national DX (long distance) "Whorit' champion to the has submitted the neatest work identification and the nearest correct solution of the entire 344 portraits from all stations participating, and \$1,000 in gold for the individual who shall be judged to have submitted the neatest work entered in all of the twenty-four participating stations. The twenty-four station prizes will be divided and awarded on the following hasis; 1st prize, \$500 in gold to the individual whose set of sixteen completed portraits is most nearly correct in the assembly of segments, identification of artists, and of the neatest workmanship; 2nd prize, \$300 in merchandise order to the individual whose completed sets are second best in order of correctness, identification and neatness; and 3rd prize, \$200 in merchandise order to the individual whose completed sets are second best in order of correctness, identification and neatness; and 3rd prize, \$200 in merchandise order to the individual whose completed sets are third best in order of correctness, identification and neatness; and 3rd prize, \$200 in merchandise order to the individual whose scale the work each of the work of the prize of

in order of correctness, identification and neatness.

3. A board of judges at Radio Digest, 510 N Dearborn st., Chicago, Ill., will pass on all the work submitted and award the prizes for all stations and the grand prizes. Its decisions will be final.

4. Everybody will be eligible to compete except employes (and their families) of Radio Digest or of any of the participating stations, included in Rule 1.

5. The game of Whozit will be free, It will not be necessary to be a subscriber to Radio Digest. Tracings of the pictures may be made at offices of Radio Digest in Chicago or New York or from the fless in public libraries, or at the office of participating broadcasting stations. These with proper identifications may be submitted for the published pictures. All general information helpful to the solution of the game may be obtained from any of the offices of the broadcasting stations participating.

6. Conditions of the game: Beginning with the issue

stations participating.

6. Conditions of the game: Beginning with the issue of November 15 and for eight consecutive issues Radio Digest will publish a series of forty-eight composite portraits in each number. These forty-eight portraits will comprise two representations each from the twenty-four broadcasting stations that participate. Each photograph will be intersected with white lines showing the forehead of one artist, the eyes of another, the nose and mouth of a third and the chin and neck of a fourth. Each segment of each composite photograph will bear a number. It will be necessary for each contestant to separate the various segments and reassemble them on a mount so that they are correctly aligned to complete the portrait of one of the original Radio artists of whom it was taken. Only complete sets are to be submitted. Each portrait must be identified in ten or more words; giving at least five facts about the original artist photographed.

7. Artists (or their representatives) whose frag-

7. Artists (or their representatives) whose frag-mentary portraits appear on the "Whozit" pages of Radio Digest are to describe themselves by way of broadcasts from their home station when their respec-tive pictures are published in Radio Digest. Such information as they give over the air is to be made available at the station in the event the listening contestant has failed to hear the individual when he broadcast.

8. In case of tie, prizes of identical value with those tied for will be awarded each tying contestant.

9. The contest will end at midnight, March 15, 1927. All sets submitted must be complete and must be mailed post paid to Whozit Contest Editor, Radio Digest, 510 North Dearborn St., Chicago, Ill., and must bear postmark not later than midnight of March 15, 1927.

Believing that music lightens the work of the home maker, WMAQ, at the suggestion of Judith Walier, has added a "Morning Musical" from 10 to 11 every day except Sunday. And the ladies like it, too, according to the many letters of thanks received.

## SHORT WAVES

By Marcella

(Continued from page 2)

You should see the nice letter I received from Harold H. Isbell, Curly Head, in response to the various questions that you

response to the various questions that you and other of my girl friends have propounded.

And here is the picture he sent. Howja like it? He's terribly enthusiastic about KNX, Los Angeles, his new job. "We have," sez he, "an artist payroll of \$5,000 a week and you may well imagine that we get the very best in Southern Cal for that figure. There isn't much to tell about me except that I am the Town Crier of the Night Watch and chief of the announcing staff." He says that KNX has increased its power fifty percent and he is sure his eastern friends will be able to hear him from 10 to 12, P. S. T., Saturdays 11 to 2 a. m. And, listen to this, Curly Head, "I have a brand new high powered Auburn Straight Eight brougham. . . have only been pinched brougham. . . have only been pinched once for speeding." Yes, dearie, he is and he worships the ground she walks on.

Once upon a time there was a nice little

Once upon a time there was a nice little girl and she lived in a forest—Forest Park, Ill., which is a suburb of Chicago. The little girl's name was Grace, Grace Itrick, And, my dear Frankie of Roanoke, if you would like to know the rest of the story I will tell you. WHAT DO you suppose happened? Well, sir, the little girl grew up to be a charming young wom-

little girl grew up to be a charming young wom-an, as charming as ever you please. (This is her pic-ture.) AND she went away for a long journey to Florida. And when she got there SHE BECAME A STORY LADY. To this day you can hear her talking to the kiddles from out of the air by tuning in WGHR at Clearwater. She also teaches in WGHB at Clearwater. She also teaches kindergarten. And that's all. Good night, Frankie, and all the rest of you little kiddies. Good night.

Inquisitive at Cleburne, Kans.: Here is the picture of Ralph Emerson which you and a number of others have asked for on

and a number of others have asked for on various occasions. Isn't he a dear, or what would you? Oh yes, indeedy, Eugene Konecky is still very much audible at WOAW and if the Blah Club isn't gallivanting out of your receiver by the time you read this I think you may expect it soon. In regard to Elsie May Look, WLS, why Elsie may look at whom, when, how

why Elsie may look at whom, when, how and where she pleases as she has not yet put her head into any marital blinders.

\* \*

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

## KING BUILDS KARAS SET

(Continued from page 9)

the first retard coil. Place green wire of first seconday coil under G binding post of the first socket. Place black wire of second secondary coil under binding post B-5 which holds second retard coil. Place green wire of the second secondary coil under G binding post of second tube socket. Place black wire of third secondary under rotor binding post of third condenser. Place green wire of third secondary coil under screw which holds the clip on the grid condenser that is connected to the stator of third condenser. Put in the Amsco gridgate, the amperites, tubes, and rheostat knobs, and the set is ready for operation.

AND now that you have the baby wired, the operation of the Karas Equamatic is simplicity itself. Due to the wonderfully geared Karas Micrometric vernier dials, which give 1/1000th of an inch control of tuning—a touch of the finger tunes to less than a hair's breadth. After you have placed the secondary coils in their correct positions with relation to their angular variation, and have made the proper adjustment of the first primary coil to automatically compensate for the length of your aerial, simply turn on the detector and radio

frequency tubes with the two rheostats provided, and set the three dials to tune

provided, and set the three dials to tune to the wave length of the desired station. When you have tuned in the carrier wave use the middle dial to bring in the station strong, making such minor adjustments of the other two as may be necessary for absolutely maximum results. Neither rheostat need be touched after once adjusted, although the radio frequency rheostat will be needed to control volume. The detector tube rheostat is not critical, and may be left permanently at the point of greatest clearness. That is all there is to operating this remarkable receiver.

I ask those who build the Equamatic to use Karas parts where specified because this unique circuit was designed around Karas parts, and all of its remarkable qualities are due to the precision, efficiency and proper coordination of these parts in the receiver.

The tone and volume of the Equamatic—the beauty of its scientific operation—and the sheer efficiency of its application of the correct principles of automatic tuning—have made the Equamatic the Radio sensation of the season. Hereafter it will be an everyday thing to hear people ask one another: "How does it compare with the Karas Equamatic?"

And the answer, of course, will be, "Why ask such dumb questions? Let's eat!"

## Use either one for a dependable source of "A" battery current

YOU can get the famous Valley Battery Charger in both vibrator and bulb types. Use either one for a dependable source of A battery current.

The Vibrator Type: This is the pioneer of radio battery chargers. Nearly a quarter of a million of this type of Valley Charger has gone into service all over the world.

Charges 6-volt batteries at 6 amperes, 12-volt batteries at 3 amperes. Quiet. Efficient. Cannot harm the battery.

Mounted in black case with bakelite panel and glass top. Pleasing in appearance and will harmonize with finest radio receiver. Complete with cord and plug, and leads and clips.

The Twin Bulb Type: The twin bulb design of this Valley Charger overcomes the only objection to the bulb type charger, i. e., the slow charging rate.

Using both bulbs, you have a 5-ampere charger. Using only one bulb, you have a 2 1/2-ampere charger. Thus the charging rate and the purchase of one bulb or two are entirely optional.

Absolutely noiseless. Built in handsome black grained metal case. Complete with cord and plug, and leads and clips.

SIXTY-FIVE, SIXTY-SIX—the Little Needle Trembles as the Engine Leaps—the Glare of the Pursuing Eye Fades—an Obstruction—a Halt—and Lois Goes to Jail.

T the first horse race she ever had attended, Lois Sylvester, against the advice of her most intimate friends, placed \$10 of her very meager funds on Sombrero, and Sombrero, supposedly, hadn't a chance. But, then Psymond Lengester, the rich youth then, Raymond Lancaster, the rich youth who had helped Lois to escape from her who had helped Lois to escape from her stern step-father when she had run away from Paradise, had put up a bet on Sombrero and he did it simply because he had dreamed about a hat the night before. Mrs. Gayton, who had taken Lois in charge and kept her as an unsuspecting guest at her questionable apartment, made no secret of her surprise at Lois sudden exhibition of sportsmanship. And Herbie Coles, who had gone to school with Lois back in the little town of Paradise and whose attentions Lois school with Lois back in the little town of Paradise and whose attentions Lois formerly had spurned, pitied her bad judgment as they sat together in the grandstand watching the speeding figures rounding the track. Herbie had placed his last \$200 on Skylark, the favorite and this was the horse especially favored by Neil Becker, Mrs. Gayton's friend. But Sombrero, the sorrel, crept forward gaining steadily. Skylark spent himself at the last quarter. Sombrero shouldered him then crossed the spent himself at the last quarter. Sombrero shouldered him then crossed the line a nose in the lead. Becker promised to get Lois her winnings, which amounted to over \$1,600, but she rode back to town with Herbie, who was morose and desperate. He didn't pay the road house supper bill, but told Lois not to mind and not to ask questions because he had to drive and drive "like the devil."

## CHAPTER IX

Arrested

OR fully thirty minutes after leaving the roadhouse—to Lois it had seemed many times that—Herbie Coles had made good on his assertion that he was going to drive as if the devil were behind him. Moreover, he had kept to side-roads, dirt or gravel for the most part, and the girl had begun to experience a feeling of sympathy and understanding for those who must ride bucking horses. The morrow, she was quite sure, would find her body an assortment of black-and-blue spots. Nevertheless when they had taken a bump in the road with such vio-

blue spots. Nevertheless when they had taken a bump in the road with such violence that she was almost thrown through the top of the roadster and Herbie turned to her with a curt "Sorry" she had merely said: "It's quite all right. Don't mind me."

She didn't in the least know what lay behind his desire for speed, but his manner had convinced her that it was something imperative and she was game enough to accept her terrific jolting without complaint. So they rushed on through the night and she braced her foot against the dashboard and clung to the arm of the seat and gradually her heart descended from her throat and she found time to admire his skill in hanfound time to admire his skill in handling the car. She even managed to essay a bit of humor when, having returned to a paved highway with a muttered remark that he would have to take a chance, she discovered that something with a single shining eye was pursuing

"Herbie, someone's after us," she said.
"I can't see horns or a tail and he doesn't seem to be spitting fire, but—"
He threw a fleeting glance over his

shoulder and smothered, half-uttered, the imprecation that rose to his lips. "Might as well be Old Nick. Motorcycle cop. Keep your eye on him. I'll see if I can lose him."

THE car seemed to fairly leap from under them. Lois' eyes persisted in wandering from that little window at the back to the speedometer, crawling up notch by notch before her fascinated gaze. Sixty miles an hour. Sixty-five. Sixty-six. Sixty-seven—and

there the indicator seemed to hang.
"Can't do another mile," said Herbie
from between clenched teeth. "Trottle's jammed down to the floor-board now. Is he still after us?"

Lois thought that single pursuing eye

seemed farther away.
"We might make it," said Herbie. "If

nothing gets in our way."

Something did—a heavily laden vegetable wagon market-bound. Herbie sounded the horn. The wagon continued

## By MERLIN MOORE JAYLOR

in the middle of the road. Again Herbie's finger, firmly pressing the but-ton upon the steering wheel, sent their rancorous demand for right-of-way sounding through the night. The wagon

did not offer to turn out.

The car was slowing down rapidly, the speedometer dropping like a plummet. In a moment they were barely crawling. Herbie began to manipulate the spotlight. To the left a ditch a scant two feet beyond the pavement edge. To the right, the same. No chance to go around so long as the wagon held the middle of man." She indicated the wagon driver.

man." She indicated the wagon driver. "I want him arrested."
Beside her Herbie seemed on the verge of strangling and the wagon driver, after one astounded "What!" was making strange noises in his throat.
"Yes, I want him arrested," Lois continued. "He blocked the road and wouldn't move over for the horn and then he damaged the car by stopping his wagon so quick we ran into it and then wagon so quick we ran into it and then he used such dreadful language. There, that's my alibi and I hope he gets six months in jail."

if I book you and the other cop who about now is headed this way and who isn't any friend of mine, I'd only be grabbing hold of a hot poker. So nothing doing. Step on that starter and follow me."

"I'm sorry—" Lois began as they 'I'm sorry-" Lois began as they

"Tm sorry—" Lois began as they moved along in the motorcycle's wake.

'Don't talk. I've got to think a way out of this," Herbie cut her short and she retired to her corner of the seat.

What the policeman had called the station proved to be a little square building of concrete blocks on one side of the highway, which also seemed to be the main street of the cluster of houses and little stores which made up the village. The policeman shepherded them up a short flight of steps and through an open door into a large room, bare except for a desk and half a dozen chairs. At the farend of the room a heavy barred door permitted view of a row of dimly-lit cells in the room beyond it.

the room beyond it.

A loose-jointed, walrus-mustached individual reclined in a swivel chair with his heels on the desk. He surveyed the arrivals from under shaggy eyebrows, then got briskly to his feet and began buttoning the row of brass buttons down the front of his coat. "What have we here, Jerry?" he asked.

ADY who mistook the road for the Indianapolis speedway, chief," the policeman replied. "She was doing sixty for better than five miles. I wouldn't have caught her at all if she hadn't bumped into Jed Turner and his vegetable wagon. You know how Jed is. Won't give an inch until he's plenty ready—"

"H-m-m. Sixty miles, eh? What was your hurry, young woman?"
"Whatever she says, I'll bet it will be

"Whatever she says, I'll bet it will be something you never heard before," the policeman broke in. "She pulled some fast stuff on me, chief. Wanted me—"
"Let her try it on me," said the walrusmustached one grimly. "Well, young

woman?"

Herbie was twitching warningly at her skirt. Lois shook her head. "I have nothing to say."

"Which means you're probably guilty. Well, I'll let you fight it out with the judge tomorrow. Now about bonds? Got any money?"

"Forty dollars."

Wellus mystache a considered. "Not

Got any money?"

"Forty dollars."

Walrus-mustache considered. "Not enough. How about you, young feller?"

"I can dig up ten, but that's all," said Herbie Coles.

"That makes fifty. How about the car? Who owns that?"

It was Herbie Coles who answered. "Victor Jermin. You must know who he is. She's a friend of his."

The chief's bushy eyebrows wobbled up and down excitedly and he flashed a sharp look at the policeman who had brought them in. "Yes, I know who Victor Jermin is," he said and his tone had taken on something significant. "So the car's his? And the young lady is his friend? Well, there's the telephone. Call him up and tell him you're pinched. After that I'll have a word with him. Who knows, Jerry? Might be Victor's handling grease now instead of soft soap, eh?"

E chuckled and the policeman laughed loudly. Apparently they were enjoying some good joke.
"I'm sorry," said Lois. "We left Mr. Jermin after the races at Aurora this afternoon. I don't know where he was going from there, except that it wasn't to Chicago. I don't know where to get hold of him. Won't the fifty dollars be enough?"

"Just a fifth enough," the chief said firmly. "Your bond will be two hundred and fifty bucks—in cash."
"Two hundred and fifty!" she echoed.

"That's outrageous for a speeding "Either produce it or—" The chief

let his hand waving toward the cells be-yond the grated door finish the sentence for him.

Lois turned helplessly to Herbie Coles.
"What are we going to do?"

He shrugged. "I don't know a soul who could be expected to come to the rescue," he said. Plainly there was no intention on his part of admitting that it was he, not she, who had driven the car. "Can't you think of some of the car. "Can't you thi people you've met-"

## 4mproved—

Radio Digest, do you know all the information contained and how to find it? The advance programs have been rearranged recently for the sole purpose of serving you with more speed, accuracy, and completeness.

All Mondays, Tuesdays, Wednesdays, etc., have been thrown together. Now you find first on page 16 the heading, "Monday, November 15, Headliners," following which comes, "Monday, November 22, Headliners" and then, "Monday, November 29, Headliners." Under each of these headings are found classified by time the most attractive, best and unique programs of the by time the most attractive, best and unique programs of the by time the most attractive, best and unique programs of the day. After the various Monday headliners follows the group "Educational Features Monday," which heading is self explanatory. Then comes, "Regular Monday Features." Here all principal stations are listed according to the time bands, for the convenience of readers, and the regular Monday schedule is given for each of the broadcasters. Unusual features of a special date are omitted from the "regular" listings but will be found above in the "Headliners" for that date. Finally before Tuesday's programs are considered, one finds the Monday silent night stations in a small paragraph.

the road. "If he'd just edge over a few feet we'd go around," said Herbie and hopefully sounded the horn again. Instead of pulling over the wagon stopped suddenly. Although the roadster

by now was barely creeping along Herbie was taken by surprise and before he could jam on the brakes it had bumped the piled-up vegetables a coarse voice spoke sulphurously. What the blank did they mere doing? When the blank did they get to own the road? What the blank this and what the blank that? that? Who the blank did they think they were, anyhow?

HE pop-pop-pop of the motorcycle grew momentarily louder. Herbie twisted his head around for a glance through the little window in the back, then slid out from behind the wheel. "Quick! Change places with me," he ordered. "If that cop thinks you were driving, perhaps..."

Obediently Lois slipped into the place he vacated. The driver of the vegetable wagon had jumped down and was coming toward them, howling his profanties. The motorcycle roared up alongside and its khaki-clad rider hopped off side and its khaki-clad rider hopped off and kicked the rest into place under the rear wheel.

rear wheel.

"Cut it out!" he snapped at the vegetable man pawing at his sleeve. "Now,
you in the car—" He broke off at sight of Lois. Who did you think you was, lady? Mrs. Barney Oldfield?"

Lois felt Herbie's elbow nudging her and interpreted it as a command for her to do the talking. "Good evening, officer," she said sweetly. "I'm awfully glad to see you."

"Applesauce," retorted the policeman.

"Applesauce," retorted the policeman.
"I've been kidded by experts, lady. I suppose you've got an alibi? Do you want to waste time springing it now or will you save it for the chief?"

"Alibi? Oh, you mean complaint? Why, yes, I do have one. Against that

THE wagon driver had regained his voice and was howling again. The policeman took him firmly by the shoulder and propelled him toward his wagon. "If you know what's good for you, get up there and drive on," he said, then as the man departed, muttering sullenly, came back to the car. "Aren't you going to arrest him, after my alibi and all?" asked Lois.

'Lady, I was mistaken." The policeman spoke sadly. "I never heard an expert kidder before. The rest were all amateurs. An alibi is not a complaint and well you know it. What I want to know is what do you mean by setting our nice new paved road afire?"

"Where is it burning?" Lois poked her head out of the car and looked back in the direction from which they had come

head out of the car and looked back in the direction from which they had come as if seeking the flames.

"That will do," said the policeman. "I see I'll be here until Christmas if I listen to you. Let's get going. The village is only a half mile ahead and the chief's waiting. Wait a minute, though. Let your deaf-and-dumb boy friend here drive, if he can. I pinched a woman for speeding once and she tried her best to run over me on the way to the station. I don't take chances like that any more. You get behind the wheel, feller."

Herbie, rising to let the girl slide past him, whispered; "How much money have you?"

"Elevery dellerer"

T'S no use, buddy. That bet's one I could win without half trying, but between the vegetable man who's bound to stop at the station to see

"Forty dollars."

He nodded and, speaking for the first me. called to the policeman: "Listen, time, called to the policeman: "Listen, officer. I've got fifty dollars that says that machine of yours is faster than this car. I'll bet you that even if you gave me a hundred yards start you'd catch me again before I got beyond the village limits on the other side. You hold the

November 15, 1926

Chaos and Congress

ONE month ago Radio Digest published for the first U time a survey blank for the purpose of obtaining a uniform and national survey of Radio interference. Broadcasting stations were enlisted in the cause and reprints of this blank were made available to all listeners who chose to ask for them.

That the measure was popular cannot be questioned. The blanks have been pouring into this publication's office ever since. As a result the blank is republished this issue for the benefit of listeners who failed to send the first one in or who desire duplicate blanks for their friends.

From a hurried preliminary tabulation of the first several thousand blanks returned, it is obvious that chaos is certainly more than an idle dream. It exists generally over the nation, and, of course, especially in areas known as 'broadcasting centers." And it is bad! November weather has not served to lessen, but rather, to increase the confusion of the tangled ether waves.

Possibly one in one hundred listeners reports that interstation interference, or heterodyning, does not bother him. His set is the very best, he knows how to operate it, he has a good location—so why all this fuss? His attitude is not exaggerated. He firmly believes that everyone, whether they can afford it or not, should get a set as good as his, move to a good location, and quit complaining. Perhaps he does not mean to be selfish, but that, unconsciously perhaps, is what he is. In the motor car world you will find him ownabsorbers, and tires. When rough roads are complained of, he writes to the editor and tells the world that the roads are smooth enough because his car rides well.

The survey shows chaos exists to the point where immediate action must be taken or the popularity and service value of Radio will be lost forever.

Congress, awaken! Prepare for the task at hand. Fix some authority, be it wise or unwise, and invest this authority with power to clear the air of this confusion. Act immediately when you convene, and give relief before ten million Radio listener voters become impatient and vow to change their legislative representatives at Washington.

## Radio Makes the Headlines

GLANCING over the press of the country, one is awed by the amount of space days to the press of the country. J awed by the amount of space devoted to Radio and its current development. Let us quote some of

"Radio Mental Tests in Sweden." Sweden supervises its ether programs and is interested in knowing if Radio is raising the national intelligence. Voluntary tests are given at the close of each day's program.

We admire the spirit. Sweden is a progressive and well ruled country from which we have obtained many of our best American citizens.

"Radio Once in Dumps—Now Hard Put to Meet Orders." The 1925 sales figures, larger than ever before, are being greatly surpassed by 1926 production and sales. We are in the midst of a baby giant industry.

"Radios Forge Ahead of Water Systems on Western Farms." Which is very natural "Radios Forge Ahead of Water Systems on Western Farms." Which is very natural, according to the modern spirit of "live while you can, for at its best, life is short." Perhaps our theory is wrong, but we believe that anything which gives healthy enjoyment is good, and every home should have its Radio receiver, even if the plumbing system isn't what it should be.

"Radio Locates Meteors and Gold Ores," and again, "Japanese Radio Experts Work on Apparatus to Predict and Locate Quakes." So it looks as if Mother Nature were to be observed and probed, if not controlled by the youngest child of science. Here again we find Radio helping industry, aiding prosperity, and saving property and human lives. The future has been but scratched. The work of Jenkins and Baird foretells home Radio motion pictures before another decade has passed, and if we do not offend the American Medical association, we predict that Radio principles. MAY find important medical uses.

He was kicked by a Squirrell and then he
kicked the bucket.

OLD KING TUTT, hiz-self

Which yarn reminds me, Indi, that a newspaper para-Which yarn reminds me, Indi, that a newspaper paragrapher by the name of Ryan got all wet the other Sunday and wanted to know why someone didn't broadcast a Holy Roller meeting. In rebuttal I suggest that someone should buy Radio sets for newspaper paragraphers, especially those writing about Radio. Mr. Ryan could then tune back two to three years at WBAP and hear the Hired Hand picking up the real Roller meetings direct from the revival camp on the edge of Fort Worth.

## Sam 'n' Henry

What's the matter with WGN?
All day we look forward to 10 P. M.
All day we murmur, "What shall we do,
If Sam'n' Henry don't come through!"

Used to get 'em every day,
And get 'em we did, come what may! But now,—a blasting crackle, roar and din, And Sam'n' Henry don't come in.

Faint and far away their voices sound, We strain our ears, to hear them we are bound. What's the trouble now? What shall we do! Sam 'n' Henry aren't going to get through.

Oh whatever Gods that govern Radio:
The crackling, the squealing, the deafening blow
Of static,—whatever else you do,
Please let Sam 'n' Henry through!

HELENA W. FREELAND

## Queen Leads to the Joker

Dear Indi: Everyone has probably read or heard how the Queen of Roumania got to WJZ twenty minutes ahead of her schedule. They wouldn't break her into the program then and there . . . whereupon she hauled off with all her queenly dignity, refused to wait

hauled off with all her queenly dignity, refused to wait and left the studios.

The question is, who got the best of it: (1) The queen, (2) The Radio Non-Monopoly, or (3) The general public, because they didn't have to listen to her? Once more, was she appearing on a Regal Typewriter program? Finally, my last question, who the heck is the Queen of Roumania in the first place?

HEAR AMERICA THIRST

## The Last Wave

The boy stood on the sinking wreck, He didn't want to go; He'd caught a new one on his set, Its letters he must know.

His father called; he would not flee, The water reached his ears, And as he sank he cried with glee, "By Heck, I had Algiers!"

**GEORGE** 

My friend, Paul Specht, sends a tear-bringing telegram about an American musician who is being mis-treated and deported by the English government. Paul does not say what the A. M. plays. It it's the sax, cor-net, trombone or French horn, then I'm for England. But gee—maybe it's the Third Trombone Player???

### **AUTHORS AND COMPOSERS HAVE** SETTLED DISPUTE OVER RADIO

We know not whether to ejaculate "Applesauce,"
"Banana Oil" or "So's Your Old Man." There is something fishy about that. Who ever heard of a dog and a cat signing a permanent peace treaty?

L' ENVOI They have gone and did it,
They will Fight no more;
Mammy songs and ballads
On the Air will pour.

Says a bulletin from PWX, Havana, Cuba: "The enormous yearly increase in Americans visiting Cuba . . . has caused the broadcasting of a new service to prospective visitors, covering traveling advice and clothing, points of interest, amusements, etc." Our only comment is—why sell Americans on Cuba and what to do after they get there? All Americans know very well why they are going there and what they are going to do after they arrive.

## Winter Tonic

## Condensed

BY DIELECTRIC

Fortune favored the signals from our old friend Station WSB, Atlanta, on an evening recently and how good it was to hear the familiar voice from Georgia and excellent program numbers. Particular pleasure was experienced in listening to the program presented by a double male quartet from that station, rendered by voices above criticism. A variety of songs included in the feature made certain the enjoyment of all listening. Negro spirituals have palled a bit on the ears of some in the Radio audiences, yet as sung here they sounded more nearly typical. Then there were old songs, familiar and still delightful to most, and semi-popular numbers that tend to complete any program of universal attraction. A word may be said for the transmission, which appears to have improved.

One of the real delights in listening to a classical one of the real delights in listening to a classical program is to hear such a cultured musician as Walter Damrosch entertainingly and lucidly explain the musical content of works by the masters. This he does, prefacing each number played by his orchestra during the Balkite hour, with the aid of his piano until we have a distinct impression of the themes we are to hear in the composition to follow. Even in the case of certain of Wagner's music with which all of us are acquainted these emphases distinctly improve our acquainted these emphases distinctly improve our enjoyment. So it is, too, as Professor Marshall tersely defines the composer's intent before the Boston symphony orchestra leads us far from the daily tumult to the realm of the muses. Both are accomplishing much each week.

Regardless of what features Station WLW has in store for us from its studio in Cincinnati we are never loath to pay our compliments to the Formica orchestra. They don't owe us anything and we are not oblivious of the merit of other attractions, but there is a body of musicians about as pliant and unified as one could well wish to hear play. These men display uniformly good taste in balancing their programs, as well as set an example of ensemble work worthy of far-famed orchestras and seldom surpassed by any save these.

You can never work up to a point where there is much to say concerning the playing of a dance program, despite the multiplicity of them and the real distinction existing between many of them. Yet I wish to recall a program of dance music from Station KYW, Chicago, which might be repeated without harm either to those taking advantage of broadcasting to insure music for salon dancing or those deriving pleasure merely from the act of listening. This program incorporated selections one may well enjoy though the desire or intent to dance is absent. Such numbers as do not rely solely on the wailing notes of a single instrument to bring the feet into Ethiopian gyrations, or the empty repetition of meaningless phrases, have an interest for any lover of music who may never step on a waxed floor.

Charles Hackett will be as much admired for his artistry as some others having the advantage of a wider acquaintance, for the Atwater Kent hours are introducing this sterling artist to his American fellow citizens as no concert or opera appearances could possibly do. His facile singing of songs in foreign languages as well as his native tongue, the ease with which he portrays various emotions in music and the quality of tenor voice possessed, all make one wish for more frequent appearances before Mike. Mr. Kochanski, who appeared with him, gave every evidence of being the artist we were expecting to find and brought to his audience the tones from the famous Spanish Strad which once belonged to Ole Bull.

## ew A Power Supply Devices

## The Abox Filter

OMETHING radically new is found in the Abox Filter, below, which replaces the storage battery and other forms of A power supply. It is not a battery, but it is used in connection with a suitable charger, to which it is connected. The Abox Filter smoothes out the hum and Abox Filter smoothes out the hum and passes along to the set just the right amount of current at proper voltage for the best operation of the tubes. It is always in perfect condition and never "discharged" except when the lighting current is snapped off is snapped off.
The Abox Filter is designed to replace

the 6-volt storage A battery for supplying filament current for any Radio set employfing not more than six standard 201A type 6-volt tubes. Its use with an electrolytic charger, such as the Balkite, etc., of 2½ amperes capacity, is particularly recom-

mended. When used with such charger it will operate 6 or less type 201A tubes or similar load (maximum load 1½ amperes). The Abox Filter can also be used with a bulb type of charger such as the Tungar Rectigon, etc., of 2 amperes rating to operate a maximum load of 1½ amperes pro-

ate a maximum load of 1½ amperes providing a by-pass condenser is installed as explained in the directions for use. The Abox Filter is not recommended for use with vibrating type of chargers.

Development of the Andrews electrochemical condenser made the Abox Filter possible. It completely eliminates storage batteries. The Abox Filter is the most unusual Radio development in years. Unlike a storage battery, the Abox Filter does not store power. It furnishes no current of its own. It is never charged or discharged. It cannot wear out and cannot deteriorate during long periods of disuse.

## Trikl-Automatic A Power

THE Trikl-Automatic Radio A Power Unit, made by Prest-O-Lite, and illustrated herewith, combines the famous Prest-O-Lite storage battery with a trickle charger which is built on an entirely new principle.
The combi-

nation unit is entirely automatic. When the receiving set is not in switch the battery use, the automatic

switch shuts off the trickle charger. The combination battery, trickle

charger and automatic switch is fully enclosed in a beautifully finished deep maroon metal case with hinged cover and handle. Its design is such that it is small and compact. The unit is neat enough to be placed in full view beneath the library

The trickle charger rectifies without re course to electrolyte, bulbs, or moving parts. The principle employed for recti-fying is distinctly new. The charger is economical and adjustable to the needs of

### Jewel A-B Relay

HE Jewell A-B Relay, above, is an automatic switch which places the trickle charger and the B-eliminator of a Radio set in operation at the proper time and in their proper order. Without an A-B Relay it is necessary to disconnect the charger, connect the B-eliminator to the electric light circuit and turn on the filaments in the set itself; making a total of three manual operations necessary to start the receiving set. When the set is turned off a reverse sequence of operations is required. is required.
The A-B Relay completes all the above

operations automatically, and without any annoying interruption whatever. Simply step to your set, snap the filament switch

step to your set, snap the filament switch or turn the rheostat and the changeover has been completed. The B-eliminator functions only when the set is turned on and the charger is then disconnected, eliminating any hum from this source. Battery, B-eliminator, charger—all may be tucked away in a closet, basement or on another floor and the Jewell A-B Relay will continue to function at the proper time and at maximum efficiency. Its construction is such that it will not interfere in any way with the normal operation of in any way with the normal operation of

An extremely efficient low resistance magnet placed in series with the filament and A-Battery and actuating special contacts constitute the main part of the device. The insulation is molded bakelite and all moving parts are completely enclosed in a metal case. A length of flexible cord with attachment plug provides for plugging into a lamp socket or wall recentrale.

## FRED SMITH REJOINS CROSLEY STATION WLW

### Pioneer WLW Chief Returns with Many New Features

CINCINNATI, O.—Fred Smith has returned to WLW, Crosley superpower station. He resumed his activities as studio director after an absence of a year, during which time he has been associated with the United States Radio society of which organization he is a direct of the control o ciety, of which organization he is a director. He has plans for enlarging the activities of the studio and will introduce many new features. William C. Stoess will be the musical director and assist in announcing.

Mr. Smith first joined the broadcasting Mr. Smith first joined the broadcasting department of the Crosley Radio corporation in August, 1922, upon his arrival in this country after eight years spent in Spain, France, Belgium, Holland, Germany and England, where he studied the arts, languages and institutions of those countries. He returned to Europe in the Spaintries. He returned to Europe in the Spring of 1925 as America's first Radio ambassador, re-visiting all of the important Radio centers.

Radio centers.

The Radario, or play written especially for presentation via broadcasting, was originated by Mr. Smith who also prepared the dramatic version of the first mystery serial story for broadcasting—"A Step on serial story for broadcasting—"A Step on the Stairs," which Radio Digest sponsored. the states, which Radio Digest sponsored.

He also originated the thematic style of presenting programs, utilizing graphic when the set is put in use, the ties were created by him.

## Skelly Oil Company Gives Weekly KVOO Program

BRISTOW, Okla.—With the beginning of the winter season, KVOO's new superpower "Voice of Oklahoma" is planning many big programs. A recent addition to the regular broadcasts is the Skelly Oil Company hour every Monday night from 8 to 9 p. m. Central time.

On his recent swing around the country, Herbert Hoover, secretary of commerce, spoke from KVOO. The Southwestern Sales Corp. owns KVOO.

Balkite Trickle Charger
THE Balkite Trickle Charger, above, is known to almost every Radio listener. This charger for Radio A batteries was one of the outstanding developteries was one of the outstanding developments in Radio last year, when over 200, 000 were sold. Once connected to your battery it is left on continuous or trickle charge. Instead of operating intermittently at a high rate it operates continuously at a low rate, thus automatically keeping the battery at full power. It eliminates the attention usually required by the A battery and converts the battery into a complete Radio power unit supplying A current from the light socket.

It can be used as a trickle charger with

It can be used as a trickle charger with any 6-volt A battery. With 4-volt batteries it can be used as intermittent charger, or as a trickle charger if a spec-ified resistance is added. It is noiseless in operation and, in most instances, can be

in operation and, in most instances, can be used during reception.

The Balkite Trickle Charger operates from 110-120-volt alternating current (which is the usual house lighting current) and its charging rate is approximately .5 amperes. It is made in two models for 60 and 50-cycle current.

The Fansteel Products company, makers of Balkite power supply units have this

of Balkite power supply units, have this

year added a new charger to their line which has two charging rates, one for trickle or continuous charging, and the other for rapid charging at a high rate. It is made in three models for currents of 50, 60, or 25-40 cycles.

Tungar Trickle Charger OW comes General Electric to the fore with a new trickle charger, designed for use with a low capacity four or six volt storage A battery. A special feature of the new Tungar Trickle Charger, shown below, is the range in charging current, which is adjustable in four steps from a rate of one-tenth ampere un to a boosting rate one-half supers.

up to a boosting rate one-half ampere.

It is very small and compact, being only 4% by 5% by 2% inches overall in size, and is enclosed in a metal case. Leads to go to the storage battery, clips, and eight

feet of flexible lamp cord with plug to fit in house lighting socket, are provided.
Other claimed advantages are that the

charger's use of lighting current is slight and economical, and that it will not blow out tubes in one's receiver, inasmuch as an insulating transformer is provided in the

Mica particles which heretofore could not be used are now utilized as an insulating material for Radio parts.

Free Photogravures of Your Favorite Artists

By special arrangement Radio Digest is now able to offer its readers a great opportunity to use a selection of twelve fine photogravures of their favorite Radio stars. These photogravures only be compared with the finest photos obtainable.

## "WHOZIT" BEGINS NOVEMBER 15 AT

Silken Maiden of the Orient is the young lady below. She is a coloratura soprano gifted with a natural radio voice and appears every Monday evening at WLW in a musical setting of the Far East. This mysterious singer has been heard over WLW before. She is shown here in a dress she wore at a recent Jenny Lind concert.

## HIGH LIGHTS OF THE AIR

HE Royal Game of WHOZIT begins auspiciously as this edition of Radio Digest is placed in your hands. Twenty-four big stations are making quite a thing of it and it will making quite a thing of it and it will pay you to get interested. For instance, Station WSOE, School of Engineering, Milwaukee, plans to open its new studios November 15 at 9 p. m. Central time, and a lengthy WHOZIT jubilee will make up the program. See page 3 for full schedule of other WHOZIT stations.

Monday, November 15, the listener will be intrigued by the title of the 9:30 p. m. program from WRVA, Richmond, when the Gypsy serenaders

9:30 p. m. program from WRVA, Richmond, when the Gypsy serenaders bring forth their gay merchandise in "The Caravan from Gypsyland."

Blanche Da Costa, protege of Mme. Schumann Heink, and former New York Civic opera lyric soprano, will delight KOA listeners in a concert program Monday night, November 22. Mme. Da Costa will tell of her experiences with Schumann Heink and sing the favorite songs of the nationally loved artist.

The City of Balimore set a precedent the other day when it appropriated a special fund for broadcasting a series of winter concerts by Baltimore's municipal band over WBAL. Fans who enjoyed the summer concerts of this organization will be glad to know that these concerts are to be continued every Tuesday

be glad to know that these concerts are to be continued every Tuesday night from 10-11 p. m.

Tuesday evenings a course of lectures is being given at WEEI which will interest parents planning to send their young folks away to college. The presidents of the larger New England colleges and universities will give practical talks about preparing for university life. November 16, Charles A. Plumeley of Norwich speaks; Tuesday, November 30, Kenneth M. Sills of Bowdoin; November 30, Paul D. Moody of Middlebury.

For some reason all the headliners seem to fall on Tuesday this last half of the month. Tuesday this last half of the month. Tuesday, November 16, Yale University band gives a program of songs of old Eli at WTIC, at 7:30 p. m. The Yale band was organized in 1918 when Yale turned over all buildings and equipment to the U. S. government.

Music lovers within the range of WTAM, Cleveland, will enjoy the Thanksgiving program at this station. James H. Rogers will give an evening of his own compositions. Although many of his numbers are based on bits of poetry, Mr. Rogers is probably at his best as a composer of sacred music.

## Brings Your Set Up To Date

THE only real advance claimed by the makers of this year's best sets is improvement in tone performance. This improvement can be made in your present set by simply adding the Centralab Modu-Plug. This modernizing device makes your reception equal in tone performance to that of the latest high-priced receivers.

Medu-Plug is warranted by Central Radio

priced receivers.

Modu-Plug is warranted by Central Radio Laboratories, makers of variable resistances for sixty-nine manufacturers of leading standard sets.

Centralab Modu-Plug replaces the loud speaker plug. Gives any degree of tone volume from a whisper to maximum by simply turning the small knob on the plug, without adjustments of other controls. Modu-Plug matches the speaker impedance to the output impedance of the set. Reduces interfering noises. Clarity and faithful reproduction equal the latest developments in perfected performance. velopments in perfected performance.

\$2.50 at your dealer's or mailed direct on receipt of price.

No More "B" Batteries on Your Radio

At last a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

1-Year Guaranteed Majestic "B

Eliminator

Sent for only

The Majestic is connected to your radio just like "B" batteries and attached to an ordinary electric socket. (For 1 to 12 tube radios.) Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Simplifies radio receiving. More efficient than dry or wet "B" batteries. Entirely noiseless. Operates from 110 120 AC, 50-60 cycle current.

Cabinet finished in rich black crystal enamel. Dimensions: 10% inches deep by 5½ inches wide by 9 inches high. Weight: 20 pounds net; 25 pounds packed. Bakelite Panel. Complete with extension cord and attachment plug. One RAYTHEON tube with G-G-H protective packing. Packed in individual padded wire-bound wood cases.

## 1-Year Guarantee

Majestic Eliminator and RAYTHEON tube are both guaranteed for one year against electrical and mechanical defects. A printed guarantee enclosed with each unit.

## \$500 a Month, If Satisfied After Trial

Only \$1.00 with the coupon brings the Majestic "B" Eliminator to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenpenny. See now it improves reception. See now much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your \$1.00 plus all transportation charges. If you decide to keep the Majestic "B' Eliminator, start paying only \$5.00 a mon'h until you have paid the total price of only \$35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Don't miss this opportunity to get the 1 year guaranteed Majestic "B" Eliminator at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. Order by No. Y8789A, \$1.00 with coupon; \$5.00 a month; total price \$35.00.

The 2 ampere Tungar permanently con-nected. This hook-up is fully illustrated in the instruction book which comes with each Tungar.

## Charging Now Simplified

Tungar is the original bulb charger. It is a G-E product developed in the Research Laboratories of General Electric.

The 2 and 5 ampere sizes will charge 2, 4 and 6 volt "A" bat-teries, 24 and 96 volt "B" batteries, in series: and auto bat-teries, too. No extra attach-ments needed.

> East of the Rockies 2 ampere Tungar \$18 5 ampere Tungar \$28 Trickle Charger \$12 (60 cycles-110 volts)

Merchandise Department General Electric Company Bridgeport, Connecticut

When Tungar charges your batteries just by the turn of a switch, how easy it is to keep them fully charged.

Nowadays, it is possible to have a Tungar permanently installed. Then you can place the batteries in a cabinet, a closet, or down in the cellar, and just have a convenient switch to throw when they need charging.

It's as simple as snapping on a light. And an overnight charge costs less than a dime.

Tungar—a registered trademark—is found only on the genuine. Look for it on the name plate.

## WEDNESDAY, NOVEMBER 24 Headliners

Central Mountain WGR (319m-940kc) Allen's symphonic saxophone

## This Amazing New Cone Speaker Hangs on Wall or Stands on Table!

This Windsor Cone Loudspeaker Console is equipped with a 22-inch Windsor Cone Loudspeaker. Its top is 30" x 17" and is 29" high. The battery shelf provides ample space for batteries, charger, battery eliminator and other equipment. Beautifully finished in either Mahogany or Walnut. Price only . \$2900 (West of Rockies, \$35)

In this Windsor Console is combined both the Windsor Moulded Composition Horn Loudspeaker and the & inch Windsor ( Loudspeaker. The top is  $30^{11} \times 17^{11}$  and stands 29 high. Ample battery and equipment space is provided by large shelf in rear. Price finished in Walnut or Mahogany: \$4800

Model 302 With Moulded Composition Horn Loudspeaker and 18-inch Cone Loudspeaker (West of Rockies \$55)

OW the radio world enjoys a new sensation—a 22-inch cone loudspeaker mounted on a sounding board and equipped with an easel back so that it can be hung on the wall, stood on a table, or placed on the floor.

And this is the famous Windsor Cone Loudspeaker that reproduces all the tones as they are broadcast. From the deepest throated pipes of the largest organ to the softest note of a crooning lullaby—from full volumed brass of a band playing "The Stars and Stripes Forever" to the last faint note of "Home Sweet Home" played by a master violinist-every tone, every sound is reproduced with perfect fidelity in all its beauty, just as it entered the microphone.

This wall and table model Windsor Cone Loudspeaker has no equal in value in the world of radio. When compared with the average cost of cone-type loudspeakers of even smaller size and without the sounding board and easel back, the cost of this Windsor model is amazingly low.

Dealers everywhere are showing this new radio wonder. Go to your dealer today-see and hear this marvelous loudspeaker-note its extreme utility—compare its low price with others—compare its tone hen you will have no other. If your dealer should no have one, send your name and address for complete information and prices on the entire Windsor line of Cone and Horn Loudspeakers and Loudspeaker Consoles.

## Kingston

## B Battery Eliminator

No Fixed Voltage Taps With the Kingston, three different voltages are obtainable at the same time.

## Extreme Flexibility

Each tap is adjustable over a wide range, making any voltage from 5 to 150 possible.

## The Raytheon Tube

The Raytheon Tube is used as a recti-fier—only the highest quality is admitted to the Kingston.

## Is Without Noise

The Kingston operates with extreme quietness and without vibration, and will not heat.

## No Acid or Solution

trouble to operate and operation cost extremely low. Will not get out of

remove battery nuisance, but to deliver increased volume. A trial will convince you.

## Thank You Mr. Best-

Power-Six Kit Set

Gerald Best, Technical Editor of "RADIO" published in San Francisco, says:

The new Bremer-Tully Power-Six is by far the best Bremer-Tully receiver yet developed.

Its remarkable selectivity and simplicity of operation leads me to believe it will be one of the season's most popular circuits.

It is one of the easiest circuits to wire of any I have seen. Its engineering principle is sound.

Congratulations to Bremer-Tully on this new development.

The new Power-Six is a revision of the famous Counterphase circuit to take advantage of the latest improvements in tubes. resistances and parts.

It is easier to build, balance and operate. Full size colored picture wiring diagrams leave no room for errors in building. Essential parts available in Kit, \$41.50.

## BETTER TUNING

Those having the original Counterphase Kit set and wishing to change to a Power-Six model will find the necessary information in the Tenth Edition Better Tuning (56 pages) price 10c.

Name...... Age.....

SUPPOSE the battery wires to your radio set became crossed, accidentally, what would happen? Almost anything from a serious fire, due to overheated wires, to a ruined B-battery or a burned-out tube. The consequences are serious enough to warrant some careful thought, right now!

The cheapest insurance against the dangers of crossed wires is to protect your radio set with a Belden Fused Radio Battery Cord. It provides

1-An A-battery fuse.

2-A B-battery fuse.

3-A polished bakelite cover for the battery fuses.

4—A compact connecting cable that dispenses with loose wires.

5-A color-code on each wire for identifying each circuit.

—A time-saver, because the cord is quickly connected and easily

Eliminate fire hazard, ruined or discharged batteries, and burnedout tubes. Ask your nearest dealer for a Belden Fused Radio Battery Cord, to-day!

To get the greatest distance and volume from your radio receiver use Beldenamel Aerial Wire. Baked Enamel on every strand prevents corrosion and keeps the wire smooth and bright even after years of service.

IT took seven years of ceaseless experiment to produce the Farrand Speaker.... That's why it takes but a moment to sense its superiority. Listen! Compare!—at your dealer's today.

BACK of the Farrand Speaker is the enthusiastic endorsement of over half a million nightly listeners, reflecting a public preference that is spreading countrywide . . . . The Ear says Buy!

Senior Model, \$32.50. Junior Model, \$16.50.

Slightly Higher West of Rockies

## Farrand Speaker

Farrand Mfg. Co., Inc. > Long Island City, N. Y.

## The Abox Filter

\$19.50 East of Rockies

## Gives "A" Current from Light Socket—Contains No Batteries!

HE Abox Filter is in no sense a Battery.

It is a filter circuit consisting of a choke coil and two of the new Andrews electrolytic condensers which operate on a new principle and permit enormous capacity with small space, cost and weight.

The Abox Filter handles as much as five amperes and renders the current absolutely smooth and suitable for proper operation of the tubes.

It is only half the size and less than half the weight of a storage battery. Used with a suitable charger the Abox Filter provides a complete "A" eliminator drawing power from the light socket. Can be installed by anyone in a

It is never charged or discharged and supplies no power of its own. It is always ready for immediate use, even after long periods of idleness. There is nothing to wear out. It does not deteriorate either in use or lying idle, and will last for many years.

For an explanation of this remarkable development write for folder, describing in detail its construction and use.

**BRING** IN **EVERY** STATION On the Air With A AYE-X ANTENNA

An aerial that can be erected on wall, chimney or roof, anywhere 5 foot square is available. Provides sharper tuning, increases selectivity and is non-directional. Twelve highly conductive feelers reaching out in all directions have the capacity of long single wire. Perfect insulation prevents losses. Erected and dismantled quickly. A single upright to erect, hammer and screwdriver the only tools needed. No. 2, 8 foot pole ready to install, full instructions, \$12.50. Get a Wave-X now.

A strong hand turned rock maple pole 5 or 8 foot lengths. Fits any roof. Will carry heaviest sleet covered single or multiple wire antennas in strong wind. Complete, guy rods, neb irons, roof sockets, anchor pins and full in-structions. 5 foot mast \$3.50 each. 8 foot \$4.25. Ask your

> DEALERS Wave-X and Redi-Mast are quick sellers. Write today for our dealer offer.

Manufactured by The PRESSED METAL MFG. CO Waukesha, Wis.

Sales Dept. THE ZINKE COMPANY 1323 S. Michigan Ave. Chicago

Buy this for all the family-a "B" eliminator that does away with ALL "B" batteries and gives constant, unvarying power to any set up to 10 tubes using resistance, transformer or impedance coupling; one that will operate power tubes, too.

## WARREN "B" **ELIMINATOR**

150, 90,  $67\frac{1}{2}$ , 45 and  $22\frac{1}{2}$ -volt taps give correct voltage with no variable resistances to worry you. Simple, compact. Free from distortion. No expensive tubes to burn out; no dangerous acids. Can not blow out receiver tubes from short circuit. Needs little more attention than your loud speaker; costs less than \$1 per year to use; easier to hook up than a set of "B's." Just plug into light socket and turn on the switch—get full tone, humless reception without fuss, worry or "B" battery expense.

J. M. Smithson, Lacon, Ill., says:—
"Have put my WARREN B to
every test; find it more than claimed. Tried cheaper and more expensive eliminators—yours is the one to buy. Price is right; quality can't be surpassed.

## Why Pay More than \$24.75

\$35.00 and up can not buy more; less than \$24,75 can not buy near as much. WARREN "B" costs about the same as two sets of "B's" and is built to last indefinitely; wonder-fully well made of finest materials; beautifully finished in old gold—an eliminator you will boast about and proudly show to your friends. Shipproducy show to your friends. Simpled complete, all ready to use; no extras to buy. 110V; 60 cycle; A. C. Unconditionally guaranteed to do more than claimed or money back. If dealer

orchestra; 8:40, Vanderbilt Hotel orchestra.

## **IMPROVED** RECEPTION

Nothing in radio assures satisfaction in reception so much as controlled filament voltage.

You can only guess at the filament voltage when not using a voltmeter to check it. Overload-ing your tubes quickly places you in the market for new ones.

Check your batteries. Test your tubes. Control your filament voltage.

No. 135A, Tip-Jack Voltmeter

for checking filament voltage by plugging into jacks on panel of Victor, Radiola, Brunswick and

Back view of pattern No. 135-A showing the wonderful adjustment feature which enables the scale to be brought always to the normal reading position. The adjustable prods and rotating back plate do the trick. No other filament control instrument has this valuable adjustment feature.

No. 135-C Double Scale Voltmeter

Our pattern No. 135-C portable voltmeter for checking filament and B-battery voltages is a quality measuring instrument, and is also very beautiful. Batteries, circuits, filament voltage—all can be easily checked or determined with this handy little instrument. Its movement parts are all silvered and it is furnished with zero adjuster. Flexible phone tipped leads are sumplied for making tests. leads are supplied for making tests.

Send for Our 32 Page Radio Instrument Catalog No. 15-C

## Jewell Electrical Instrument Co.

1650 Walnut St. - Chicago

"26 Years Making Good Instruments"

VERYBODY, including experienced radio engineers, said—it cannot be done. But we did it—produced a high grade, long distance single dial control radio to operate a loud speaker to retail for—\$25.00 and yet allow liberal discount to agents.

This marvelous instrument is the result of five years' hard work by an organization of trained radio engineers. It is no experiment—thousands are in use the results speak for themselves.

## There Will Be a Radio in Every Home

Thousands have been waiting for just such a radio—a real long distance, powerful instrument—but at a price they can afford.

It is here, and live, wide-awake salesmen will recognize their opportunity immediately—they won't lose a single minute writing for full information.

mation.

Just as there are 100 Fords to one high-priced car, just so will there be 100 Vikings to every \$75.00 and \$100.00 radio—think what this means to men who get in on the ground floor right now.

### A \$25 Radio Which Will Equal a \$75 Radio

Radio
Put a Model 599 Viking, which retails for \$25.00, alongside any radio retailing for \$75.00 and even more. Compare them for ease of tuning—only one dial to tune on the Viking—distance received, volume and tone. The results will make any man say, "I'll save that \$50.00."
Radio is today the biggest and quickest selling line—thousands are being sold—salesmen have made unheard-of profits. But here is a far greater, a far more interesting radio proposition than anyone ever dreamed of.

## Agents Wanted

You Should Make \$100.00 a Week Easily

You can't help it—many will make more. Some ill control a county—others will control many State

counties. We have the liveliest radio selling plan of today—instruments of all prices—a radio price to fit every pocket book.

Any man who will follow our teaching cannot help but add big money to his present income and start to do it immediately. If you want more money here is your chance, but you'll have to act quick—others will jump at this chance.

### Sell Radio in Your Spare Time-Evenings

You don't even have to give up your present position. The only time radio can be sold is in the evening—by demonstration. So here is a chance to add to your present income. During the past five years we have trained 4,364 men in this very profitable business.

You'll be the first one with a real low priced long distance radio—your price will startle everybody—the results will be even far more startling. Once you demonstrate you're sure of a sale. No one can think of investing \$75.00 to \$100.00 in a radio when this instrument will equal the results and your retail price is only \$25.00. Just think of the advantage you have. Sell a radio for only \$25.00, and yet make a handsome commission.

## Territory Is Going Fast-Better Write Today

Someone is going to get the big profit on the sale of these instruments in your community—is that someone going to be you? Write today for our 100 page book which fully describes not only this wonderful instrument but also a full line of radio at all prices. It's FREE for the asking,

IN IT'S WENT

Radio fans—look! Amazing new invention eliminates troublesome "B" Batteries forever! Lasts as long as the set itself and costs less than a good set of "B" Batteries! Wonderful news. Now you can get more real service and new pleasure out of your radio. No more gradual loss of power as "B" Batteries weaken. No more worry about worn out cells or re-charging old batteries.

10 Minutes to Hook Up 10 Minutes to Hook Up
Hook up wires to radio posts. Plug cord into any
handy electric light socket. That's all! Sit back and
enjoy more perfect reception, more power, sharper
tuning. Constant voltage gives new life to radio
sets. Yet tubes don't burn out. Works perfectly
on any set up to six tubes. Thousands in use. Many
owners write, Worths & Caghtin Rodi.

Send only \$1.00 Now
Marvelous device sells for \$9.95. No extras to buy.
Mail only \$1.00 with order. We will send set
C, O, D, to \$8.50. Money back if not delighted
with results in O days. Order today.

## Aerials have gone out of style

In the old days, when radio was new, the "fan" was known by crazy festoons of wire that decorated his housetop or yard. These were the old-fashioned aerials, and no one has forgotten all the grief they caused.

Modern radio may use the hidden loop, or the short indoor aerial. But there is a better way. The Dubilier Ducon enables you to use the complete wiring system of your house without risk, and with better results than most out-door aerials give.

You simply screw a Dubilier Ducon into any lamp socket, and connect it with the antenna binding post of your set. You will find that it increases selectivity—especially in crowded neighborhoods, and will reduce "static" in the summertime.

Try a Dubilier Ducon on your set tonight. They are sold by all good dealers on five days' trial for \$1.50.

4377 Bronx Blvd., New York, N. Y.

it takes you less than one second to end microphonic howling for

once and all! That's when you slip one of these live rubber "howl absorbers" over the offending tube.

## M<sup>c</sup> DONALD ARRESTER

(Continued from page 2)

have been helped out of a rather embarrassing situation by the decision of WCCO to buy this space. With the advent of commercial programs, newspapers faced a problem. Many of the programs were booked under a trade name. If the newspaper listed it as such, was it not free advertising?

Probably no objection would have arisen if the commercial programs had been limited to the better class of stations which selected their clientelle very carefully. In many cases, however, small stations followed the lead of the large ones, but sold commercial programs to anyone and everyone who would take them, and then insisted that if the newspapers listed the

sponsors of the programs on the larger stations, they were in duty bound to list those of the smaller stations.

The management of WCCO, according to Mr. Bellows, decided that it would be very good business for the station to purchase paid space to advertise its features. Not only did this serve to call the attention of a greater number of Radio listeners to these programs, but it marked the day when, to use the popular expression, stations were ready to stand on their

## "GOODY GOODY GIRL"

(Continued from page 13)

Into Lois' mind flashed that night on the club veranda when Raymond Lan-caster had told her that if ever things got too much for her-that was the way he had put it—he would come on the jump if she called.

"Give me a Chicago phone directory," she asked the chief and sat down at the desk with the dog-eared, thumb-marked

Raymond was not yet home, a feminine voice told her. This was his mother. If she could take a message—. Lois glanced at the number on the card in the little slot on the mouthpiece of the instrument in her hand and gave it to her, heard it repeated correctly and hung up.

"I suppose there's nothing to be done now," she began and looked around in surprise. "Why, where's Herbie?"
"If you mean your boy friend, he stepped outside," the chief replied. "He

ADVERTISES PROGRAMS asked if there was any charge against him

The roar of a motor came to them through the open door, then the clash of gears meshing. The motorcycle man ran to the door.

"There he goes toward the city," he cried. "He's beat it and left you holding

"That," said the chief, tweaking angrily at the walrus mustache, "is my idea of a yellow dog.'

Lois, remembering that it was Herbie's anxiety to get some place; a hurry that was responsible for her present predicament, was not so sure. Still, he m least have told her he was going. Still, he might at

## SANGAMO

## now offers a full range of sizes in **Wound Condensers**

"They won't break down"

IVE us higher capacity T condensers as good as Sangamo Mica Condensers,' asked the radio set builders. We have done so. Sangamo Wound Condensers are now on the market. They have high insulation resistance and exceptionally good power-factor (or low energy loss.)

Internal air and ozone bubbles (the cause of breakdowns) are prevented by special winding processes that keep the aluminum foil and insulation under unvarying tension.

"The only condenser that stands up in eliminator service" is the comment of testing laboratories. For sturdy Sangamo Wound Condensers will stand continuous duty at their service voltage.

Sangamo Electric Company Springfield, Illinois

RADIO DIVISION, 50 Church Street, New York SALES OFFICES—PRINCIPAL CITIES CROSLEY RADIO

Embodies the Musicone in a beautiful console of two-tone mahogany finish and provides room for batteries and accessories. 24 ½ inches long inside.

This little double-circuit

Highly Selective

Manufactured under Radio Frequency Laboratory License

Crosley R. F. L. sets represent the highest known development in radio receivers. They will not howl, squeal or re-radiate while tuning—no matter how inexperienced the operator may be.

They are sensitive to a degree rarely attained in tuned radio frequency circuits, cutting out nearby stations with an ease and simplicity that makes them ideal for use in congested broadcasting areas.

Persons technically initiated will instantly understand the perfection of Crosley R. F. L. sets when they realize that true cascade amplification, in addition to absolute balance, is accomplished through the use of Wheatstone bridges in each stage of radio frequency.

To this technical perfection Powel Crosley, Jr. has applied his mass production methods, with the result that nowhere else will the radio buyer find equipment that even approaches Crosley values.

The use of parts in million quantity lots, the simplification of mechanical processes and assembly, and the ownership of wood-working factories which produce exquisite mahogany cabinets at an almost unbelievable low cost, are the means employed by Crosley to make possible the highest type of radio reception at the lowest possible price.

That the public is appreciative of the excellence of Crosley R. F. L. radio sets, as well as the opportunity to enjoy them at small cost, is daily indicated by the tremendous volume of Crosley sales.

## Table Model R. F. L.—75

Beautiful two-tone mahogany cabinet High ratio vernier controlled condensers affording sharp tuning—Re cessed dials behind windows—Rich metal trimmings-Power tube adaptability. Appearance and efficiency of this set are out of all proportion to its low cost-the result of Crosley mass

production.

6-Tube Console Model R. F. L.—90

Double drum station selector. hogany console finished in two tones. Crosley Musicone built-in. Ample space for all batteries and accessories. Powertube adaptability. Comparable in appearance to the highest priced radios, and in performance it has few equals.

THE CROSLEY RADIO CORPORATION, CINCINNATI-POWEL CROSLEY, Jr., Crosley manufactures radio receiving sets, which are licensed under Armstrong U.S. Patent No. 1,113,149 or under patent applications of Radio Frequency Laboratories, Inc., and other patents issued and pending. Owning and operating station WLW, first remote control super-power station in America. All prices
