ACME B-eliminator

---with Raytheon Tube is now
on sale at a new reduced
list price of only

\$35⁰⁰

Acme quality, Acme leadership, Acme efficiency is now yours at a figure that you are glad to pay. Model E-3, illustrated above, supplies voltages up to 180 for sets up to six tubes. The finish is in tan and its rugged construction promises a lifetime of service. Model E-1, for multi-tube sets, is priced at \$50.

Acme speakers, K-1 at \$25 and K-3 at \$18.50, offer the research and skill of the Acme Apparatus Company at prices which are surprisingly low, quality considered.

Would You Let \$1.25 Per Month

*Stand Between You and
Perfect Radio Reception*

For that amount (\$15.00 per year) we will agree to keep your storage batteries fully charged, and will call for and deliver same.

During the same period of one year we will also inspect your set regularly and make any repairs necessary to keep its performance at top notch. (This does not include, of course, new tubes, parts and accessories.)

Our Service Men are experienced and capable.

Drop in at one of our Los Angeles stores, call us on the telephone, or mail coupon below, and we will explain details.

Radio Frequency Tubes

GREAT FOR DISTANCE

With the new CeCo "K" Radio Frequency Tubes, DX fans are finding less congestion on the air in radio broadcasting traffic. It is really surprising how greatly these tubes improve selectivity and tone quality. Use them exclusively on your radio and enjoy the mul-

titude of new benefits made possible by the CeCo tube family.

Your dealer will gladly demonstrate the difference.

From

CLOYD MARSHALL, JR.

Our Chinese Policy

China is very old, but it certainly has active ideas about murder. American citizens are still being threatened, attacked and killed.

From the Chinese viewpoint this may be quite justifiable, but from the viewpoint of this nation, whose citizens should by right be offered security in any land, it is malicious and barbarous murder.

In some instances our nationals were saved from death through the fear of the Chinese from armed reprisal on the part of our military forces.

And still some of our national Senators are vociferously objecting to sending protection to endangered and helpless Americans in the stricken area.

It is deeply lamentable that some of these gentlemen in Washington were not pushed close to the business ends of Chinese machine guns during the past week. Undoubtedly they would have continued to launch eloquent speeches to each other condemning the American Government for sending ships and troops to save their hides;—YES!

Opportunity National Security

America is continuing to improve as the land of great opportunities. Rockefeller started as a clerk in a small country store; Carnegie a poor immigrant boy from Scotland; Charlie Schwab a miner; Henry Ford thirty years ago began as a mechanic working at the bench. Ford and Rockefeller have both made over a billion dollars; Schwab and Carnegie hundreds of millions.

Has the amassing of these great fortunes imposed a burden on the rank and file of American citizens? Let us see. From the beginning of the century American prosperity has steadily increased, living conditions have improved amazingly. Carnegie has endowed numerous libraries for the education and enjoyment of the people. Rockefeller has given many millions for the stamping out of disease. Charlie

Schwab has used his fortune for the advancement of the steel business, so that now America is pre-eminent in this industry. Henry Ford was the first one to start mass production, to pay high wages to his men and to shorten the hours of their working days, consequently bringing comfort, happiness and prosperity to everyone who has been associated with him.

Ford and other American automobile manufacturers stand behind our government as a direct threat to any nation aspiring to forcibly acquire American wealth or territory. Our automobile industry produces a little in excess of four million cars a year.

In a time of impending or actual war this automobile industry is admirably equipped to be converted into a tremendous producer of war implements, especially aeroplanes.

A nation looking behind our peacetime military forces at the overwhelming potential aerial power possible in the conversion of our industrial plants will hesitate in any contemplated act of aggression.

It has been conclusively proven that the aeroplane is the most terrible engine of destruction ever devised by mankind. Two planes with high explosive bombs can sink the largest battleship. A squadron of five equipped with gas bombs can attack a city of a million people and wipe out the entire population. One skillfully piloted aeroplane could rout, if not destroy, a whole regiment of well-armed soldiers.

Certainly this security is not a burden to our country. Great wealth, if used rightly, is a blessing to everyone. Are these rich men happy with their wealth? Yes, for they are masters of their immense interests, not slaves of their possessions.

This is a country of opportunities. So blessed is the child born in even the most humble home. He is free to aspire to the very pinnacle of human endeavor and his only obstacle is the self-imposed limitation of his own ability.

Radio Topics of the Day

A Weekly Review of Radio News, Thought and Opinion

NEW R. C. A. TUBES

The Radio Corporation of America has announced the development of a new tube which will presently be offered to the public. This is an alternating current tube. The cathode, or electron emitter, is heated to the necessary temperature by a special heater unit, the current for which is provided from the house lighting circuit through a suitable transformer.

This heater element is replaceable, and since the cathode can be constructed to give off electrons for a long period, a much greater tube-life is had with the new tubes. This tube is similar to the already successful McCullough A. C. tube in theory, and no doubt will eventually replace the present standard type with its A battery, rheostat, charger, etc.

COMMISSION LIKELY TO STABILIZE SITUATION

Leaders in the industry, regardless of political affiliations, appear to be pleased with the President's appointment on the radio commission, especially since he did not yield to the advice of political advisers and select lame ducks, as had been expected, but put men in who really know something about radio.

As a result, they apparently feel that authority lodged in the hands of such a group is apt to have a stabilizing effect on the radio business.

RADIO LICENSING BEGINS SOON

According to an announcement made public by H. A. Bellows, a member of the Federal Radio Commission, the plans so far formulated by the commission do not provide for any drastic cut in the number of stations on the air. Stations conducted solely for advertising purposes or operated by religious institutions will probably be limited in hours on the air, giving the preference to those stations which "perform the greatest public service."

It is reported that the Commission's plans do not provide for any increase in the wave band now assigned to broadcasting; the channels below 200 meters now used by the 17,000 amateurs and the channels above 600 meters assigned to commercial, ship and shore stations, will remain the same and will be fully protected by the Commission.

The present congestion on the 89 available channels will be solved by assigning the stations definite hours when they will be permitted to broadcast. It is expected that religious stations will be limited to Sunday only. The choice hours for operating and the best wavelengths will be assigned to those stations which convince the Commission that they render the greatest service to the greater number of people.

The Commissioner was emphatic in the statement that the 400 small stations will receive the same consideration as the big fellows, and that "New York and Chicago will not dominate the rest of the country in the assignment of exclusive wave-lengths."

Cannibals to Be Entertained By Radio

Sailing on the yacht "Trojan," Capts. Thomas E. Burke, Jack Robertson, W. R. Biddle and a few other soldiers of fortune left Los Angeles late in March for Tiburon Island, where they hope to

Schooner Yacht "Trojan"

make motion pictures of the cannibals. They expect to bring back some very interesting films in case they are successful in remaining off the menu.

Captain Burke has equipped the yacht "Trojan" with a Model E-10 Federal Ortho-Sonic receiver, and expects to keep in touch with civilization by means of radio; also it is hoped that radio will prove such an attraction to the cannibals that they will forget their appetites for the time being.

"Not more than eighty members of the Seri tribe are now left on the island," said Mr. Biddle, who recently

Major Mott tells the Whole Wide World About It!

The Preston "DX" Ground has literally swept the western states like a cyclone. Everywhere radio is discussed it is the chief topic of conversation.

Major Lawrence Mott, owner and operator of KFWO, one of the few non-commercial broadcasting stations in the United States, has made several talks to his listeners, telling them of the merits of this new and sensational radio development.

The Preston "DX" Radio Ground is a permanent and positive ground connection that increases both volume and selectivity on any make of receiving set. . . it is an efficient static eliminator. . . it cuts down harmonics on single dial receivers. . . it improves tone qualities to an amazing degree.

No matter what make radio set you own. . . no matter where you live. . . no matter how many broadcasting stations are nearby. . . you should get a "DX" Radio Ground and enjoy, at last, real radio reception. Order one from your dealer today.

NOTICE TO DEALERS

If you haven't yet investigated the "DX" Radio Ground you have delayed making inquiries about one of the greatest money makers in the radio field. Write for dealer proposition TODAY.

— and worth every cent of it —

Major Mott's letter is just one of the hundreds of comments we are receiving from enthusiastic owners of the Preston "DX" Radio Ground. Major Mott's radio talks on the "DX" Ground have stressed its value as a static eliminator. His tests of it indicate that it will prove to be a valuable aid to radio reception during the warm summer months.

For more POWER and better tone quality— Gold Seal Radio Tubes

Most of the trouble with poor quality radio reception is caused by "pushing" ordinary tubes beyond their capacity.

ENJOY REAL RADIO

Put the proper Gold Seal special purpose radio tubes in your set and enjoy the improvement — you'll be delighted.

No trouble — you can make the change yourself in a few minutes. Just ask your local Gold Seal Dealer or write us for full details.

The Electrical Phonograph

By E. K. HAYES and V. M. BITZ*

As a source of real entertainment the electrical phonograph is perhaps the outstanding development of radio science. The musical reproduction obtained from a properly designed electromagnetic system closely approximates

in quality the studio rendition. So that the experimenter may construct a phonograph giving good quality, the writers will describe a filter system which they have designed for this purpose. As we all know, a phonograph record has unwanted surface noises, and some pick-up units have undesirable characteristics, it is obviously important that we filter out as much of this noise as possible.

In Fig. 1 is the system employed on the Panatrope. While this system is fairly efficient when combined with certain apparatus, the circuit of Fig. 2 is a more effective filter. The leads from the pick up are connected to the primary of a good audio transformer which is shunted by a variable resistance of 5000 to 50,000 ohms, depending on the type of unit used. While this resistance is primarily a volume control, it plays an important part in the filter system. The primary is also shunted

*Lab. of Radio Standards.

by a fixed condenser ranging from .001 mf to, in some cases, .1 mf.

As most of the undesirable noises are of very high frequency, it will be seen that the greatest capacity we can use without affecting high frequency notes of the violin, etc., the better the quality. The secondary of the audio transformer is connected to a standard vacuum tube, the output of which is fed into a suitable power amplifier. As there has been considerable data published on power equipment, it will not be treated here.

The conclusion to be drawn is this,—that by selecting a good pick-up unit and a good audio transformer, it is pos-

sible when using this filter system with the power circuit constants to obtain musical reproduction freer from surface noises and distortion than most commercial machines.

The Radio Commission is so poor at the present moment it does not even have printed letterheads, but uses plain paper, at the top of which is typed "Federal Radio Commission."

Steinite Interference Eliminator

Latest
1927 Model 600,000
Sold

Assembled complete; attach to aerial in 2 minutes. No tools. Doesn't disturb present log. No additional tubes or batteries.

\$1 Better reception or your money back. Bank guaranteed.

THE TROUBLE SHOOTER

ASK K.G.O.
The Answer Man

KENNETH G. ORMISTON
Technical Editor

Inquiries from our readers of a technical nature are answered directly by mail. There is no fee for this service. Please explain your difficulty or question fully in order that we may better assist you by giving an intelligent and comprehensive answer.

Readers have requested information concerning the attachments which are designed to plug into the detector socket of a radio set to enable you to tune in the short wave transmitter of KDKA and the other short wave stations.

Such devices might rightly be termed "Short wave adapters," and consist essentially of a one-tube short-wave receiving set. The idea of plugging into the detector socket of the regular set is to make use of the audio amplifier and loud speaker of the set. It is also a very convenient method of connecting the A and B batteries to the short-wave unit.

Various circuits have been used in these units, probably the most successful being the Reinartz. The detector tube, which is removed from the big set and placed in the socket in the short-wave unit, must be one which will oscillate readily at the short waves and some adjustment of the B voltage is sometimes necessary. The antenna and ground are, of course, removed from the big set and attached to the short-wave unit. KDKA is usually tuned in without difficulty, and for anyone who is familiar with the code there is an unlimited field and a real kick.

Many inquiries have been received during the past week in regard to the AC tubes announced by the R. C. A.

No information is at hand except the brief announcement of the R. C. A. as printed elsewhere in this issue. There is no doubt but that the A. C. tube is entirely practical and has reached that stage in its development where it may be put on the market as a commercial product. In fact, the A. C. McCullough

tube, which has been with us for several years and which flourished through a period of defective design in its youth, is now perfected to the point where it is entirely satisfactory.

The Walbert Isofarad sets using the AC tubes are performing remarkably well, and the tube can now unhesitatingly be pronounced a success.

As we understand it, the new RCA tube is based on the same general design with the added improvement of a replaceable heater unit.

We are informed that the new tube is so designed that it may be used in the present sets with little if any change.

Readers have asked why tuned R.F. sets seem to be more efficient at the shorter wave-length than the longer. That is, why stations of the same power and distance come in better around 300 meters than 500, etc.

There are three reasons for this. First, the so-called neutralized or balanced R.F. sets are adjusted to be just off the point of oscillation at the lower end of the wave-length scale, hence we have maximum efficiency at the lower wave-lengths, and as the condensers are advanced there is less feed-back or regeneration. Second, the coupling between the primary and secondary of the R.F. transformers is fixed, when for maximum efficiency over the whole scale the coupling should be gradually tightened as the wave-length is increased. Third, the vacuum tube functions on voltage, that is, it is the voltage impressed upon the grid from the preceding tuned circuit which causes the plate current variation. And since the voltage impressed upon the grid is

Picked Out of the Air

By HEARL LA VERN CROWTHERS

Patience can never cease to be a virtue.

It is just as impossible to run away from yourself as it is from your own shadow.

The price of freedom sometimes seems enormous, but once gained would not be disposed of for twice what we paid.

Your neighbor's house is built of the same material as your own, but his attic may be different.

It's a great life if you don't weaken, and a lot of strife if you don't waken.

Selfishness and jealousy are bar sinisters, and should always be considered as such.

A street car must run on the track which man has made for it, and its power is limited. Man has no track, and his power is limitless.

Common sense tells us that we can not get water into a watermelon by planting the seeds in a spring. We must plant them in the spring.

True success is gratification. The basic elements are desire, anticipation, visualization, conviction and realization. But KEEP AT IT.

What is the difference between a knee or ankle length skirt and a hip length bathing suit, any way? Didn't Lincoln say that a pair of legs should be just long enough to reach the ground?

WOMAN'S PAGE

By CAREY PRESTON RITTMEISTER

"C. P. R."

Four and five years ago the happenings in a broadcast studio were interesting — even thrilling — sometimes amusing. Out of the thousands of letters which came in weekly were gleaned real gems of prose and poetry, while the inspiration gained from a letter written by a lone forest ranger in the Rockies, or a trapper in Quebec, made pleasure of hard work, and we found the long days too short for all we would do in them.

The recollection of Jane Novak's broadcast from KHJ would doubtless have been lost in the many similar occurrences had it not been for the subsequent visit of the Czecho-Slovakian woman. Then, a little over a year ago, at KNX, G. Allison Phelps asked me if I remembered the night of Jane Novak's program, and he told me, laughingly, how he had failed to find Miss Novak; how her director, Mr. Johnson, and his wife had searched for her and then hastened to KHJ, thinking that she might have gone ahead; how, on their entrance to the studio, Uncle John's unexpected greeting of "Here's Jane Novak!" had forced Mrs. Johnson to "carry on" for Miss Novak before the microphone; and when Allison finished, I told him about the Czecho-Slovakian woman, and we had a good laugh.

I wish I could find that woman and let her know that Jane Novak did not disown her country, and, of course, Mrs. Johnson, being a Scandinavian, loyally acknowledged it. So I am telling this now, hoping to set Miss Novak right

with her countrymen and women in Southern California.

New Hats for Old!

When one is out searching for unusual things it is surprising what you can find. For instance, the other day, I put it all over old Diogenes, and found an honest man. I have been broadcasting it ever since.

Another thing I discovered was a shop where the most charming felt hats are made out of old hats discarded by the man of the house. It is one of the cleverest ideas I have seen worked out in a long time, and as felt hats are to be worn all spring and summer, there's no reason why there shouldn't be a felt hat for wear with each street and sports outfit.

Memories From a Cook Book

Sometimes I pass a flower shop and a whiff of the scent of violets or some other fragrant flower sends me with the speed of radio half way around the world, and I see again an old-fashioned garden nestling in the Green Mountains.

Just now, from my file of recipes, I drew one which, with the same speed, took me back to a midwestern city and a very happy day, some ten years ago. The Minneapolis Symphony Orchestra was Sundaying in Kansas City, and my husband brought home some fifteen of his friends for dinner; I had ready a dinner for two. But I found one shop open where I could get all the round steak and sausage necessary. I cut the steak into strips two inches wide and four inches long. I mixed the sausage with equal parts of bread crumbs and spread it on the strips of beef, which I rolled and skewered, dipped in

Koo-KoO KolyuM

By HAL DAVIS

The Croix de Guerre for Brilliant and Exceptional Dumbness this week goes to Melanthon Klingensmith of Paskeato, Cal., who wrote us that he had sent to KNX for some Applause Cards, and couldn't make as much noise with them as he could with his hands!

We have a friend who has a hobby of finding out the personal ambitions of people he chances to meet. The funniest case he ever ran into was a goof who wanted to be an ex-convict. This puzzled him a lot till he found out the poor guy had just been sentenced to life imprisonment.

We are tickled to report some letters of appreciation and some contributions from our "Dere Reedurs." Here's one from Miss Clara M. Barton of San Bernardino, Cal., clipped from a local paper: "The animal hospital is completely equipped . . . for treatment of all ailments and injuries to dogs, cats and other household PESTS" (!)

And here's a letter from Sam Holt, of Los Angeles, another DX enthusiast, who was refused admittance to that snobby "DX Club" of ours. Welcome, Sam! This kolyum of ours will ever be the refuge of them whose woid is doubted elsewhere:

p. s.—don't forgit.

KFXB

Radio KFXB, the new downtown Los Angeles broadcasting station, located on the Commercial Exchange building at Eighth and Olive streets, is now operating on a limited schedule, according to announcement of Merle J. Grindle, manager. The station is on the air as a

licensed A. T. & T. unit, and plans to use 4000 watts of power on 352.7 meters. Pending the arrival of certain needed equipment, however, the full power will not be used.

The station will be on the air daily from 2 to 4 p. m., and from 5:30 to 10 p. m., with studio programs. Five remote control stations will be installed as fast as Western Electric equipment may be secured by the telephone company. (Turn to Page 75)

FORGOT TO SIGN NAME

DX Club:

Being one of the old subscribers to your splendid magazine I take this opportunity to answer Mr. Sadler of Point Loma, who requested Sonora owners to send in their DX lists.

I have received 140 stations of which three-fourths are verified. This includes practically all of the western stations and about 50 in the middle west. On the eastern coast have picked up KDKA, WGY, WJZ and WOR, KPRC, WBAP, WMC and WCOA comprise those I have heard in the south. Canadians include 3 in Calgary and 3 in Vancouver. Mexican, AMB and CYJ. Last, but not least, we have good old 2BL at Sydney and 5CL at Adelaide. I have had 2BL on two different occasions.

I am using 60 feet of wire, vertical, for antenna and blue vitrol ground, also power tube in last stage.

I am with Mr. Sadler. Let's hear from more Sonora owners.

806 N. Vista St.,
Hollywood, Cal.

CUTTING THRU "BLAH"

DX Club:

Have read the Radio Doings DX Club too long. Can't resist any longer.

So my 325 Stewart-Warner and myself being unfamed wolves, it is our time to howl.

I just take a copy of Radio Doings and take the daily time table and go down the list and get the stations in their order on the page, excepting KFRC, KFBC, KFUS, KRE and KMO.

And all this, cutting through station BLAH, owned and operated by the home folks.

Have some of the other fans try this stunt once.

Yours for doing the radio to a crisp nut brown, I am

LEAS M. EHLER,
1098 El Paso Drive,
Los Angeles, Calif.

SMALL DX RECORD?

DX Club:

After reading Friend Ormiston's letter on "DX," feel that while he is right in regards location, I feel this man Preston has some "ground." I installed one on March 1st, and between 5 and 6 p. m., I played KDKA, KFKX and KOA.

Have a small DX record myself, not so bad, considering I am two blocks from one local and five from another.

Have 21 stations outside the United States. From Moncton, N. B., and Portland, Me., to Florida; have 14 coast state stations, Pennsylvania 5, Tennessee 1, Louisiana 2, Chicago 14, Michigan 2, and 7 others east of the Mississippi river.

Between the Mississippi river and Salt Lake 48, and 59 on Pacific coast.

All stations verified except locals.

Am using two stages T. R. Freq., a detector and two of audio, with power tube in last stage.

My detector and T. R. F. tubes are 199's and 301-A, in audio UX-112, for power.

* Have 14 feet cage aerial. Six wires, hung vertically.

Am sorry to say some of our DX writers are going too strong, as I investigated one last week and he could not bring in but two stations east of the Rockies.

Verifications, not simply "I got," are what counts.

Have been taking Radio Doings since the beginning and it's a great book.

C. H. HODGE,
335 W. Fifth St.,
Long Beach, Calif.

The DX Club continues to flourish in spite of the fact that "Sprig is cubbig" and King Static is commencing to grow a bit on the extreme DX. Perhaps in August we may put this page away with moth balls and a tear, but this is April! Come on, fans, let's go!

We Believe it's the Invention of the Year.

NO matter what radio you own... no matter where you live... no matter how many broadcasting stations are nearby... the newly invented "DX" Radio Ground will positively do all these things for you...

*Better Distance Reception
Increase Volume Amazingly
Insure More Selectivity
Sharpen Your Tuning
Improve Tone Qualities*

This improved, positive ground connection is a recent invention... it is sweeping the western states like a cyclone. It will modernize any radio.

A Permanent Installation

The Preston "DX" Radio Ground will not wear out. The longer it remains in the ground near your radio set the better the performance it gives. As the good news spreads everyone will discard their obsolete water pipe grounds and, at last, enjoy real radio reception.

The Preston "DX" Radio Ground, ready for installation, sells for \$8.00 postpaid. FREE literature and copies of letters from enthusiastic owners will be mailed on request.

DON'T DELAY—WRITE TODAY.

*The new Balkite
Combination-
with your
"A" battery*

*it supplies all radio power automatically
from the light socket*

Now you can operate your radio set from the light socket. Merely by adding the new Balkite Combination Radio Power Unit. Once connected to your "A" battery and set and plugged into the light socket, it *supplies automatic power to both circuits*. You need not even turn it off and on, for it is controlled by the filament switch already on your set and is entirely automatic in operation. It will give you a constant quality of reception that cannot be secured in any other way.

Balkite Combination can be installed in a few minutes, either near the set or in a remote location. Like all Balkite Radio Power

Units it has no tubes, nothing to replace or renew, is a permanent piece of equipment, and is built to conform with the standards of the Underwriters' Laboratories. It is noiseless in operation. It will serve any set now using either 4 or 6-volt "A" batteries and requiring up to 30 milliamperes at 135 volts of "B" current—any set of 8 tubes or less, including power tubes.

Add Balkite Combination to your radio set and know the pleasure and convenience of owning a receiver always ready to operate at full power. Price \$59.50 [\$83 in Canada.] Ask your dealer.

THE
Orthoformer

WHAT IT DOES!

A completely revolutionary method of producing perfect amplification without the use of power tube. Giving tone quality heretofore unknown.

Price \$17.50

(In Canada \$21)

Attach the **ORTHOFORMER**, which is a tone amplifier and a tone filter, and it will bring your old set up to the standard of the finest radio built.

This is a Broad Statement but it Costs You Nothing to Let Us Prove It

The **ORTHOFORMER** requires neither power tubes nor any method of power amplification and is adaptable to all standard sets.

Cut off the coupon and mail direct to us and we will instruct a dealer to attach the **ORTHOFORMER** to your set for your approval.

"The Orthoformer — Alone for Tone"

INTERNATIONAL DISTRIBUTORS CORP.
 UNION INSURANCE BLDG.
 SIXTH AND BEAUDRY STS.
 LOS ANGELES, CALIFORNIA

Dear Sirs:

Please have dealer attach an **ORTHOFORMER** to my set without obligation to me.

Name.....

Street.....

City.....

Telephone.....

Make of Set.....

It takes an Efficient Radio to Separate the Southern California Stations!

With nearly twenty broadcasting stations in Los Angeles and nearby communities... each with power varying from a few hundred watts up into the thousands... air congestion has ceased to be a laughing matter. It takes an efficient receiver to merely separate the locals, without trying for distant reception.

The Model 325 Stewart-Warner five-tube receiver has made a splendid reputation for selectivity under the most trying of reception conditions. Its famous U. S. Navy receiving circuit insures 100% radio performance. It is a "distance getter," too.

Stewart-Warner dealers will gladly demonstrate this popular model on request. They will also show you the other models in the Stewart-Warner Matched Unit Radio line. Ask one of them TODAY to make a demonstration of either a five or six tube Stewart-Warner radio in your own home.

Program Published as Submitted by the Station.

Anten-A-Liminator

Static, extraneous noises, many stations coming in at one time, unsightliness and a fire hazard are some of the disadvantages of an outside aerial.

Why get a jumble of noise from an instrument designed for pleasure?

Manufactured by:
Geo. E. Browning Co.
Ogden, Utah

If Your Dealer Can Not
Supply You

Scott Sales Co.

443 S. San Pedro St.
Los Angeles, Cal.

The result of months of experimenting and exhaustive tests. Many times the selectivity of an outside aerial. Will make it possible for you to separate the lower wave length stations.

Small—Compact. Can be put inside or outside of the cabinet. Quickly installed.

Will take the Chaos out of the Air.

NOW THE **SUPREME R-F 5** IS SOLD
FACTORY DIRECT TO YOU
5-Tube Console Complete

\$59

Built-in speaker, large tubes, 100 A. H. Rubber Case Battery even the inside aerial is included—nothing else to buy.

Selectivity :: Quality :: Distance

New Modified S. L. F. condensers allow ample separation of low wave lengths and gives absolute selectivity on all stations. Using Kellogg's laboratory grade transformers assures you of tone perfection, and for distance the utmost in sensitivity has been achieved through proper design of condensers and inductance.

Made of Finest Parts Obtainable

The Supreme—Made of the finest of material such as Kellogg, Yaxley, Carter, C. R. L., Benjamin, Bakelite coils.

Order Your Set Today

and you'll say, like everyone else that hears the Supreme, "That's the best receiver I ever heard—it's wonderful." It's simply not equalled for purity of tone or fidelity of reproduction. Remember every part is guaranteed to you—you take no chances.

THE PATTERSON FACTORY TO YOU SALES PLAN

puts a guaranteed \$155 console, 5-tube receiver in your home for cash at about \$35 less than the actual wholesale price. Volume production is the answer.

RADIOLA SPECIALISTS

We make any RCA SUPER HETERODYNE include in its tuning range the stations between 200 and 230 meters, at a nominal cost. Not an attachment but a fundamentally sound improvement in the circuit. We have also developed improvements for the Radiola 20 and the Radiola 28.

Our Electrical Phonograph

is creating a furor among the music lovers who demand the last word in quality reproduction. We build portable and console models, or this equipment can be installed in your old phonograph. Furthermore we guarantee as faithful reproduction as that given by any machine offered to the public.

STATION "E.P." BROADCASTING

Meaning Eddie Peabody, wizard of harmony, radio hound de luxe, who is returning to the Metropolitan Theatre next Thursday. Eddie, who has talked over radio stations from Vancouver to Cuba, says: "Hello, everybody! Mighty glad to get back to L. A. This is a 'scoop' for Radio Doings. It is given without static, or interference, and I hope it's got the right modulation—for no reason at all."

Cannibals

(Continued from Page 15)

returned from Tiburon. "They are sun-worshippers, wear almost no clothing, sleeping on the ground, and seldom using fire for any purpose. They believe that the hands and feet of man contain his highest intelligence, and for this reason they eat the raw flesh from the hands and feet of their victims, believing that all the physical and mental virtues of the foe is then incorporated into the body and personality of the eater."

Trouble Shooter

(Continued from Page 20)

dependent upon the number of turns in the secondary of the R.F. transformer, it follows that for maximum efficiency the higher waves should be tuned in by the addition of inductance (turns) rather than the addition of capacity in shunt with a fixed coil.

The ideal circuit would therefore be one wherein the tuning is done by inductance rather than capacity; where coupling is variable with the actual tuning, and where balancing is such that the degree of feed-back is constant regardless of tuning.

George Rothwell Brown, paragrapher—Secretary Hoover seems to be going ahead with his plans for controlling the radio just as though he thought the new \$50,000 commission wouldn't amount to much.

Woman's Page

(Continued from Page 22)

flour and fried a rich brown in olive oil. I removed the beef rolls to a large iron pot, friend onions and carrots in the oil until brown, poured the vegetables and oil over the meat, while with beef bouillon cubes I made sufficient bouillon to cover the meat, giving the sauce a most piquent flavor by adding two tablespoonfuls of tomato catsup. The pot was covered and allowed to cook slowly over the gas flame until the meat was done—about an hour. As these musicians were all from Germany and Holland, this dish, served with German potato dumplings, touched the spot that's said to win a man's heart. To make the dumplings, brown in melted butter in oven, one quart of grated bread crumbs. Boil potatoes, not quite done. Drain and let stand in the warming oven to dry. Put through collendar. Add grated onion, salt, pepper, half-pint flour, 3 eggs. Mix with hands. Add the bread crumbs; make into balls, dipping hands in flour. Drop into boiling salted water and boil 10 minutes.

KFXB

(Continued from Page 23)

pany, when the hour of broadcast will be extended to midnight. These remote stations will include the Albert Hay Melotte pipe organ studio in the Wurlitzer building, Lyman's Cafe Alabam', Ralph Markey and his orchestra, and the great organ at Roosevelt Memorial Park.

The station staff includes Eddie Barnes and Allan Fairchild as announcers; Baron Keys, well-known composer-musician, will cooperate with the sponsored program department; and Bert Heller, technician in charge. Mr. Heller, who has owned the KFXB license since it first went on the air at Big Bear about two years ago, built and installed the present station and is to be complimented on his engineering ability.

Mark Smith Joins Ray Thomas, Inc.

MARK SMITH

Mark Smith, well known expert in merchandising radio, is now Vice President and General Manager of Ray Thomas, Inc., Southern California distributors of Atwater Kent Radio, Cunningham Radio tubes, Eveready, USL Batteries and Majestic Eliminator.

Due to a greatly increased volume of business during recent months, it became absolutely imperative that additional assistance be given the Thomas management.

Of immediate benefit to Atwater Kent dealers in Southern California, will be the additional help that can now be given them by C. W. Griffin, Sales Manager, who plans to devote more of his personal time and attention to assisting dealers in giving the maximum of service to the Radio Public.

Smith is a Western man, having spent most of his life on the coast. He is thoroughly conversant with market conditions through years of close contact, and has earned an enviable reputation as a merchandiser in the radio trade. He came to Los Angeles direct from his position, held for several years, as sales manager of E. T. Cunningham, Inc., National manufacturers of Cunningham Radio Tubes.

His accurate knowledge of manufacturing and distribution methods will undoubtedly be of great assistance to Ray Thomas, Inc., and Atwater Kent dealers, while his previous experience has particularly fitted him for the new responsibilities he has assumed.

Our Eastern Representative

Introducing Mr. J. W. Hastie, Eastern representative of RADIO DOINGS, with headquarters in New York City. Mr. Hastie is married and has a happy little family of which he is very proud. He is very well known in the advertising fraternity, and has a large host of

J. W. HASTIE

friends. He is just as enthusiastic about the advertising value of Radio Doings as we are, and he reports that an ever-increasing number of national advertisers are coming to appreciate this value. He threatens to make another visit to the Pacific Coast at the first opportunity, and we hope he does, because he will see a tremendous growth since his last visit several years ago.

The Hu-chin, or two-stringed Chinese violin, was introduced to the radio audience of the United States for the first time in a broadcast from a Minneapolis station.

Timely Trade Topics

Mr. W. D. Scott, of the Scott Sales Company, Los Angeles, has through numerous demonstrations shown that to get the greatest distance, most volume and clearest tonal quality with any set, it is necessary to supply the tubes the exact C and B value needed for best performance, and that this can be done only through sources of current supply which may be accurately controlled for all the stages.

The socket power unit which accomplishes this most conveniently and efficiently is said to be the Webster Little Giant B-C power supply unit, which has positive variable controls for the detector, intermediate and power tube B supply and the intermediate and power C supply. These units are being supplied by the leading radio distributors.

Ira R. Seltzer of Henger & Seltzer Company, is making a business trip to the east, where he is visiting the factories his firm represents—Yaxley Mfg. Co., Aero Products Co., and American Electric Co., all of Chicago, and the Spartan Electric Co., New York. He will be away about three weeks.

The Dexter Supply Company reports that orders from individuals in thirty-eight states having already been received for the Preston DX ground. Retail and dealer orders for the unit are daily increasing in number and size and the shipping department of the Dexter Supply Company is kept busy, filling and shipping all orders the same day the orders are received.

George W. Stackman, who has been associated with the Bosch organization for a number of years, has been appointed branch manager for this company with headquarters in San Francisco.

Of interest to the trade, particularly those who are manufacturers and jobbers of B eliminators are the following Magnatron Tubes: DC 216B, half wave rectifier, will deliver from 80 to 100 milliamperes. DC 213, full wave rectifier, will deliver from 70 to 80 milliamperes. DC 210, power amplifier, will deliver 25 per cent greater power output. The factory guarantees these tubes for a life of 2000 hours. The Pacific Radio Laboratories of 256 S. Los Angeles St., Los Angeles, are California distributors for the Magnatron line.

The Velvetone Radio Corp., formerly of 2729 Avalon Blvd., Los Angeles, is now nicely located in their new factory at 237 South Figueroa street.

Their factory is of latest design, and gives them a floor space for manufacturing purposes of over 8500 square feet. Their telephone number is MUtual 9153.

W. D. Scott has returned from Ogden, Utah, where he spent several days with the "Browning boys" at their AntennaMinator factory, which is now running on a capacity of 500 per day. Scotty finds an increasing dealer demand, now that the device has been on the market long enough for the public to familiarize themselves with its merits.

The Filter-Flex Radio Corp. of 724 West Vernon, Los Angeles, is now displaying four beautiful models of their popular batteryless receiver. This receiver is undoubtedly meeting with great favor on the Pacific Coast and in the Western States, as is evidenced by the rapidly increasing orders being received at the Los Angeles factory.

Broadcasters' Digest

The opening program of the National Broadcasting Company, Inc., will be broadcast from the Colonial Ballroom of the Hotel St. Francis, beginning at 8 o'clock, April 5th. Extensive plans have been made to make the first program a success for the radio public. San Francisco and Los Angeles will be the gathering points for the talent. Telephone wires to KGO Oakland, KPO San Francisco, KFI Los Angeles, KGW Portland, KHQ Spokane, KOMO and KFOA of Seattle will make the program available to radio listeners throughout the Western States.

Henry N. Robinson, member of the advisory council and president of the First National Bank of Los Angeles, will make the opening address.

A number of artists, known to the musical public the world over, have been secured for the initial program. Alfred Hertz, leading the entire San Francisco Symphony, will be heard for the first hour. The vocal soloists to appear with the Symphony orchestra will be Jeanne Gordon, contralto, formerly of the Metropolitan Opera Company and now with the Chicago Civic Opera, and Lambert Murphy, concert and operatic tenor, also formerly with the Metropolitan. Wallace A. Sabin, organist of San Francisco, will play the pipe organ at the Bohemian Grove. This will be the first time that the organ will be heard on the air. Max Dolin, newly-appointed musical director for the Pacific Division of the National Broadcasting Company, Inc., will conduct a musical comedy presentation.

The Duncan Sisters and the Hollywood String quartet will appear before the microphone in songs so well known to their admirers. For the lovers of lighter entertainment, the program will include Los Caballeros, a newly-discovered Spanish orchestra, Mosby's Dixieland Blue Blowers and the Hotel St. Francis Dance Orchestra.

Mory Leaf, badtime story artist, left this week for Chicago, to be away for several weeks. He made a decided hit over KNX, the Evening Express. Before leaving Mory made six records for Columbia, two songs, two "Heestry Lessons" and two badtime stories. Other KNX artists also have made records, among them being Badger and Musseller, novelty team, and Earl Burtnett's Biltmore orchestra.

We have received numerous inquiries about station KELW. This station is located at Magnolia Park, Burbank, and is owned by Earl L. White, broadcasting on 535 meters, 250 watts; George W. Bunton is general manager, Harry A. James, chief announcer and Stuart F. Wainwright, engineer in charge. They are on the air daily from 6 to 10 p. m. except Sunday, when they broadcast from 2 to 4 p. m.

The Merriken Drug Company of 4201 Park Boulevard, San Diego, California, recently started a radio letter contest among the children. Every child who would write a letter and turn it in would receive a pair of stilts. The interest which the children showed in radio and their knowledge of the subject was indeed surprising.

Radio is more and more coming to be a constant source of entertainment and education to both children and parents.

Off to Cannibal-Land With Federal Ortho-Sonic

2003 Santa Rosa,
Altadena, California.
March 15th, 1937.

Yale Radio Electric Company,
1111 Wall Street,
Los Angeles, California.

Attention Mr. Yale.

Gentlemen:

I have tried out many of the so called best radio receiving sets on the market on my sporting yacht "TROJAN" but have been dissatisfied with the results of all of them until I tried out your G tube number 410 Federal Ortho-sonic.

Your agent, Mr. E. W. Eagles, 1700 Hollywood Blvd., installed the Federal Ortho-sonic. I have been able to log 10 to 20 stations during the day light hours every day, and the night reception is more than can be expected of any receiving set.

I am about to sail for Mexico and other Latin Countries, for the purpose of photographing the Indian life of the so called Cannibal West Indians and other tribes which are about to become extinct. We will do this work, as well as to collect valuable data and specimens in the interest of anthropology. The Federal Ortho-sonic will be a great boon to those on the "TROJAN" during the lonely hours in these out of the way places.

Again, I will say, I have never seen anything quite as good as the Federal Ortho-sonic. Am enclosing a photograph of my yacht the "TROJAN".

Yours very truly,

Edmund Burke.
CAPTAIN TROJAN YACHT.
